After giving effect to the company's new convertible preferred stock dividend, earnings available for common shares were $25.5 million in the first 1990 quarter, compared with $27.6 million in 189. On a fully diluted basis, per-share earnings were $1.05 compared with $1.08 a year earlier.

Operating earnings from continuing operations were $42.7 million in the first quarter, down 10.4 percent from $47.7 million in 1989. Stead said this decline was largely offset by an increase in non-operating income.

The Square D chief executive said that operating earnings of the Industrial Control Segment were lower than 1989 due to increased expenditures for research and development, increased expenditures in Technical Services, and weaker year-over-year performance in the Power Protection Systems and the Automation Products Businesses.

He said development expenditures for a new sensor product line, other new products and increased expenses to fund rapid growth of the Technical Services Division will enhance Square D earnings in the years ahead.

Stead said Electrical Distribution Segment operating earnings were up modestly compared to 1989, despite a slow market in residential and light commercial construction in the 1990 first quarter.

KENOSHA, WI (APRIL 18) BUSINESS WIRE - Snap-on Tools Corp. Wednesday announced that first quarter net sales increased 3.6 percent.

Earnings per share were 76 cents, including a 6 cent gain from the sale of a manufacturing plant, compared with 77 cents in the year ago period.

Net earnings were $31.1 million, a decline of 0.8 percent, on sales of $240.4 million, compared with earnings of $31.4 million on sales of $232.1 million in the first quarter of 1989 -- previously the strongest sales and earnings period in the company's history.

Net earnings benefited from a one-time after-tax gain of $2.5 million, or 6 cents per share, on the sale of a Canadian manufacturing plant. The plant has been replaced by a modern new facility in suburban Toronto which produces tool storage units for worldwide markets.

''This first quarter was the single biggest sales period in our history,'' said Marion F. Gregory, chairman and chief executive officer. ''Our sales trends continue upward, which gives us cause for cautious optimism for 1990.''

Gregory said the company's lower net earnings reflected slightly higher costs associated with Snap-on's international business development efforts and domestic marketing enhancements. He noted that the company's gross profit margins remained at historic levels at 50.1 percent during the quarter.

''Our international businesses continue to show significant gains, with sales from our newer overseas dealer operations especially strong,'' said Gregory.

He noted that the nation's Big Three automakers cut back production levels during the first quarter by nearly 23 percent from a year ago, while U.S industrial capacity utilitization was flat, slowing growth in demand for hand and power tools.

''Continued weakness in domestic automotive production and sales, which causes a slackening in demand for tools from professional mechanics, remains the major drag on the growth of our dealer sales in the United States,'' Gregory said.

Snap-on Tools Corp. (NYSE:SNA) produces and distributes hand and air-powered tools, electronic equipment, and tool storage units for professional mechanics.

WILLOW GROVE, PA (APRIL 18) BUSINESS WIRE - Hope Technologies (Philadelphia, Stock Exchange: HPE, HPEU, HPEWB), OTC Wednesday made several corporate announcements:

Stephen Hope, president of the company reported that on March 2, 1990, Hope Industries Inc. (''Hope'') established a new lending relationship with Fidelity Bank consisting of new lines of credit and term loans totaling approximately $7 million if the line of credit is fully drawn.

The new facility contains more beneficial terms than were available under Hope's previous financing arrangements. This will provide enhanced cash flow permitting more rapid expansion of the company's product lines and research and development efforts.

The company also announced that on March 8, 1990, the board of directors adopted a resolution, by unanimous consent, extending the expiration date of the company's warrants to purchase 14 million shares of its class B common stock from June 30, 1990 to September 30, 1990. The company has filed a post-effective amendment to its Registration Statement on Form S-18 with the SEC, which, then declared effective by the SEC, will allow the holders to exersise the outstanding warrants.

At the same time, Hope said that Hope and a Korean company with $1+ billion in sales, signed an accord under which the Korean company will market and provide service support for Hope's 2000 Daylight Enlarging System in several countries in the Far East. In the first two months of the agreement, Hope has delivered over $485,000 worth of equipment. The current schedule calls for shipments at this rate throughout 1990 and into 1991.

In commenting further on marketing activities, the company announced a successful preview demonstration of its Hope Spectrum 2100 Electronic Imaging System, a major new product launch for the company, at the recent Photographic marketing Association's trade show in Las Vegas.

With beta units going to customers shortly, the company anticipates that full production will begin later this year. The Spectrum 2100 is a desk-size work station, which allows photo images to be manipulated, cloned, retouched, enlarged, sharpened, and corrected producing a ''new original'' image of such high quality that the viewer would not be able to distinguish it from an original.

Hope Technologies Inc. invents, designs, manufactures, and sells high-quality professional image processing systems. It distributes its

products through a worldwide network of dealers and provides private label manufacturing for other companies in the industry. In addition, the company has applied its thin film expertise gained in the photographic business to a patented thin-film rechargeable lithium energy storage system.

SAN ANTONIO, TX (APRIL 18) BUSINESS WIRE - The board of directors of Valero Natural Gas Co., the general partner of Valero Natural Gas Partners L.P. (NYSE:VLP), Wednesday declared a quarterly cash distribution of $.625 per unit to holders of the partnership's publicly traded preference units.

A like amount was declared for the partnership's common units held by subsidiaries of Valero Energy Corp., which have an approximate 49 percent interest in the partnership. The distribution is payable May 30 to holders of record at the close of business May 10.

Valero Natural Gas Partners L.P. owns a 7,100-mile intrastate network of natural gas transmission and gathering lines throughout Texas, purchases and sells natural gas to distribution companies, electric utilities, other pipelines and industrial customers throughout the United States, and provides gas transportation services to third parties.

The partnership also owns 11 gas processing facilities and markets natural gas liquids to refineries, petrochemical plants and domestic fuel distributors.

HOUSTON (APRIL 18) BUSINESS WIRE - American General Corp. (NYSE:AGC) Wednesday announced first quarter net income of $107.1 million, compared to $97.2 million reported in the first quarter of 1989.

On a per share basis, net income increased 17 percent to 90 cents compared to 77 cents for the 1989 period. Operating earnings, which exclude realized gains, increased 18 percent to 86 cents per share in the first

quarter compared to 73 cents in the first quarter of 1989.

Total shares outstanding were 119.2 million during the first quarter of 1990, compared to 133.0 million for the 1989 period, reflecting in part the effect of American General's share repurchase program.

In commenting on the results, Harold S. Hook, chairman and chief executive officer, said, ''The improved earnings in the first quarter are the hard-won rewards of a very complex and difficult restructuring program. We believe these results signal the beginning of a new era of progress for American General.''

MARLBORO, MA (APRIL 18) BUSINESS WIRE - Stratus Computer Inc. Wednesday announced two major development programs which will enhance its fault-tolerant Stratus XA2000 Continuous Processing Systems for use in inetlligent network applications, one of the fastest-growing segments of the telecommunications industry -- and one of the hottest new battlegrounds for vendors of fault-tolerant computers.

Stratus is enhancing its XA2000 Systems to comply with a broader set of telecommunications industry standards than previously supported, enabling the company to market its systems to telecommunications providers worldwide for a broader set of uses. The enhancements will also enable Stratus to more aggressively market its systems to systems integrators, as well as value-added resellers, who target the telecommunications market.

This announcement follows a series of telecommunications announcements made by Stratus over the last year, including the company's January 1990 introduction of FTX, a UNIX System V-compatible operating system, and a September 1989 joint agreement with AT&T to develop ISDN (integrated services digital network) links to AT&T's DEFINITY (PBX, or private branch exchange) Communications Systems.

Specifically, the Stratus XA2000 Systems will be further enhanced to comply with:

-- Stringent telephone company standards for equipment installed in central offices across the globe. Modifications to the already- resilient Stratus systems will include expanded support of power requirements; earthquake emplacement; top-entry cable access; major and minor alarming; and barcode labelling.

-- Software support for the SS7 (Signalling System 7) and CCITT7 (Consultative Committee for International Telegraphy and Telephony Standard 7) communications protocols used in intelligent telecommunications networks worldwide. Increasing Demand for Fault-Tolerant, Online Systems in Telecommunications

As telephone companies expand their range of sophisticated service offerings, there is an increasing need for computers in central offices -- and elsewhere on the telephone networks -- to drive those services. These computers provide the necessary ''intelligence'' and high-volume, online processing power to the networks (for example, as online database processors connected to the telephone switching -- or telephone call-routing -- equipment).

Based in Marlboro, Mass., Stratus Computer Inc. supplies the XA2000 family of continuously available computer systems for online transaction processing and communications control. The company offers the most technologically advanced architecture for online, distributed, and networked applications and has set a new standard for computer reliability.

One of the fastest-growing companies in the industry, Stratus reported revenues of $341.3 million for fiscal year 1989, up 29 percent from $265.3 million in 1988.

BOSTON (APRIL 18) BUSINESS WIRE - State Street Boston Corp. held its annual meeting Wednesday at State Street's headquarters, 225 Franklin St., Boston.

William S. Edgerly, chairman, defined State Street's strategy for extending its growth into the '90s. He said, ''Global development will play a major part in extending our high growth from the '80s through the '90s.

''Our plan to be a growth company in the '90s,'' he said, ''requires that we achieve sustainable real growth in earnings per share. To accomplish this, our financial management approach is to generate capital internally, maintain a strong balance sheet, and control risk.''

Edgerly said, ''Increasingly, customers seek worldwide services for diverse portfolios of financial assets.'' To meet this need Edgerly discussed State Street's increased global presence, which includes new

offices in 1990 in Luxembourg, Toronto, Tokyo, and Melbourne, in addition to State Street's overseas offices in London, Munich, Hong Kong, and Sydney.

Edgerly emphasized State Street's continued investment in ''systems, products, and customer service...to provide customers anywhere in the world efficient access to State Street's full resources.''

Edgerly reviewed the increase in assets under custody that occured during the '80s -- $64 billion to $787 billion -- and the increase in assets under management during this same period -- $3 billion to $57 billion. He also noted that for the eighth year in a row State Street's return on equity exceeded 18 percent.

In conclusion, Edgerly restated State Street's goals for the 90s ''to stay on its present course...achieve continued high growth in earnings per share and widening recognition as a growth company.'' He said, ''We are moving to take advantage of the major trends in the worldwide financial marketplace, and we have set our sights on being a global leader in servicing financial assets.''

With over $806 billion in total assets under custody at March 31, 1990, State Street is one of the world's leading securities custodians. State Street is an industry leader in mutual fund, amster trust, global custody, asset management, and corporate trust services.

DANBURY, CT (APRIL 18) BUSINESS WIRE - The Linde Division of Union Carbide Industrial Gases Inc. has embarked on a decade-long program to plant a half a million trees in 130 communities across the nation which host Linde facilities.

Rooting For America, The Linde Community Trees Planting Program, demonstrates Linde's commitment to environmental excellence not only by beautifying communities, but by educating young and old about the importance of trees.

The Linde Community Trees Planting Councils established in each of the 19 participating communities which will plant over 50,000 trees in 1990 alone will decide on where to plant the trees, as swell as play an integral role in the continuing care of the trees.

On April 3, 1990 in Speedway, Ind., an Eagle Scout candidate -- who is

earning his badge by participating in Linde's program -- was invited by the White House to plant a tree side by side with President Bush.

In Wilmington, Calif. over 1,000 community volunteers assembled on April 7 to plant over 2,000 trees. These are but two examples of the excitement that's already building around the country -- and there's more to come.

#90108b0840 04/18/1990 ~Business Wire

NEW YORK (APRIL 18) BUSINESS WIRE - Republic New York Corp., holding company of Republic National Bank of New York and The Williamsburgh Savings Bank, announced Wednesday that net income for the quarter ended March 31 increased to $44.4 million, compared to net income of $41.8 million in the first quarter of 1989.

Net income per common share for the first quarter of 1990 increased 8.3 percent to $1.30, up from $1.20 per share earned in the first quarter of 1989.

The previously announced merger of the corporation's wholly owned subsidiary, The Williamsburgh Savings Bank, with The Manhattan Savings Bank has received all required approvals by regulators. Manhattan's conversion from a mutual form savings bank to stock form savings bank was approved by Manhattan's depositors at a special meeting on April 16.

Also, as required by the merger agreement, the corporation's stockholders, at today's annual meeting, approved certain amendments to the corporation's 1985 restricted stock plan and 1985 stock option plan.

At Dec. 31, 1989, Manhattan had total assets of $3.1 billion, total deposits of $2.8 billion and net worth of approximately $270.7 million. It is expected that the transaction will be consummated in the near future.

Net interest income was $91.2 millin for the first quarter of 1990, compared to $89.7 million a year ago. Average interest-earning assets in the first quarter of 1990 increased to $23.8 billion from $21.9 billion in the first quarter of 1989. The increases in the corporation's earning assets were predominantly in higher quality, lower spread domestic office loans in the form of term federal funds and in investment securities of U.S. Government agencies.

The adjustment to fully taxable equivalent net interest income related to certain tax-exempt obligations increased by $1.8 million in the first quarter of 1990 from the comparable period last year.

Differences in average and period end balances occurring primarily in the federal funds sold and loan categories result from the fact that opportunities to participate in certain short-term matched arbitrage transactions are diminished significantly at the ends of reporting periods.

In the first quarter of 1990, the corporation recorded charges to allowance for loan losses of $24.4 million relating to the sale, swap and charge-off of obligations of lesser developed countries (LDC), compared to $5.2 million of such charges in the same quarter of 1989.

WINSTON-SALEM, NC (APRIL 18) BUSINESS WIRE - Integon Corp. (NASDAQ: ITGN) announced Wednesday that the U.S. Bankruptcy Court overseeing the plan of reorganization of its majority stockholder, Southmark Corp., approved the sale of substantially all of Integon's assets to an investment group formed by Jupiter Industries and Head Insurance Investors L.P.

Integon officials indicated following Wednesday's hearing before the court in Dallas that subject to regulatory and shareholder approvals, the transaction should be completed during the summer as scheduled.

James R. Ridley, chairman of Integon's board of directors and the

company's president and chief executive officer said, ''We are delighted by the court's action today, which completes an important step in Integon's transition to new ownership.'' The transaction calls for Integon's public stockholders to receive $6 per share cash.

Integon markets a diversified line of life insurance and annuity products, specialty property and casualty insurance and private mortgage insurance in 47 states. The company has approximately $1.5 billion in assets.

CHATTANOOGA, TN (APRIL 18) BUSINESS WIRE - Signal Apparel Co. Inc. (NYSE:SIA) Wednesday announced that Walsh, Greenwood & Co. has agreed to purchase a substantial equity interest in Signal from two trusts for the benefit of George B. Clairmont and has an option to purchase the remaining interest of the trusts.

Subject to certain conditions, the transaction is expected to close in approximately 10 days, at which time Walsh Greenwood would purchase the shares of Signal's Class A Common Stock (representing approximately 25 percent of the outstanding shares of that class) and Cumulative Convertible Preferred Stock (approximately 6 percent of the class) owned

by the Clairmont trust.

The agreement also gives Walsh Greenwood an option, exercisable for 2 years from the closing date, to purchase the trusts' shares of Signal's Class B Common Stock (approximately 60 percent of the class). Signal's Class A and Preferred Shares have 1 vote each and the Class B Shares have 10 votes each. The trusts' shares represent approximately 51 percent of the company's total voting power.

Upon the closing of the transaction, the board will be expanded to eight members, of which three will consist of the following: Robert B. Colbert, Jr. (presently Signal's chairman of the board, president and chief executive officer), George B. Clairmont and Arnold S. Jacobs.

While the Class B option remains in effect, Walsh Greenwood will vote for designees of the Clairmont trusts to three of the board seats and the trusts will vote for the board of directors' nominees for the remaining positions.

Walsh Greenwood will pay $4.50 per share for the Class A Shares, $18 per share for the Preferred Shares and, if the Option is exercised, $6.50 per share for the Class B Shares.

Signal said it will shortly mail out an information statement to its shareholders describing the transaction in detail and that the closing could not occur until at least 10 days after that mailing.

Signal Apparel Co. Inc. is engaged in the manufacture and marketing of apparel, including knit sportswear, knit underwear for men and boys, sweaters and knit shirts for men and boys, and women's apparel.

#90108c0073 04/18/1990 ~Comtex

STAMFORD, CT (APRIL 18) COMTEX - The Chase Manhattan Corporation reported consolidated net income for the first quarter of 1990 of $44 million, compared with the $132 million earned in the first quarter of 1989. On a per common share basis, first quarter 1990 net income was $.20, compared with $1.27 for the first quarter of 1989.

Net income was adversely affected by a $75 million increase over the first quarter of 1989 in the provision for possible credit losses, principally due to the potential impact of the deterioration that has occurred certain domestic commercial real estate markets.

Net interest revenue was down slightly for the quarter reflecting principally lower interest payments on cross-border extensions of credit to borrowers in Brazil, largely offset by higher spreads and volumes on consumer banking assets. Increases in consumer banking fees, trust and fiduciary fees and trading account revenues also contributed to Chase's core earnings.

Net Interest Revenue - Taxable Equivalent Basis: Net interest revenue, on a taxable equivalent basis, was $814 million for the first quarter of 1990 compared with $829 million for the first quarter of last year. Virtually no interest payments were recognized in the first quarter of 1990 on cross-border extensions of credit to borrowers in Brazil, compared with $61 million of cash payments recognized as interest from such borrowers for the first quarter of 1989.

The first quarter of 1990 net interest margin was 3.43 percent compared with the reported 3.84 percent for the first quarter of 1989. Average interest-earning assets for the first quarter of 1990 increased to $96.3 billion from the $87.5 billion average level reported for the same period last year.

Provision for Possible Credit Losses and Net Loan Charge-Offs: The provision for possible credit lossed for the first quarter of 1990 was $225 million, compared with $150 million for the first quarter of 1989 and $130 million for the fourth quarter of 1989. There was no provision for refinancing countries for the first quarter of 1990 or for the fourth quarter of 1989. The first quarter of 1989 provision included $50 million applicable to refinancing countries.

First quarter 1990 net loan charge-offs were $325 million, up $166 million from the first quarter of 1989. Domestic net loan charge-offs for the first quarter of 1990, which increased $41 million from the same period last year, included $83 million of consumer net loan charge-offs, up $23 million, compared with the same period last year. This increase reflected the substantial increase in consumer outstandings. Domestic net loan charge-offs for commercial real estate were $15 million compared with $1 million for the first quarter of last year. Refinancing country net loan

charge-offs increased by $114 million, which includes approximately $100 million related to the principal reduction bonds received in the Mexican debt exchange. Excluding refinancing countries, international net loan charge-offs for the first quarter of 1990 increased $11 million over the same period last year.

At March 31, 1990, Chase's reserve for possible credit losses was $3,190 million, or 4.22 percent of total loans, compared with $2,728 million, or 3.80 percent of total loans, at March 31, 1989.

If economic conditions in domestic commercial real estate markets deteriorate further, it is likely that the provision for possible credit losses will continue at relatively high levels.

#90108d2330 04/18/1990 ~French/German News Agency
HAVANA (APRIL 18) - Cuba and the Soviet Union have signed an accord for 9.2 billion rubles (14.2 billion dollars) in trade between the two countries in 1990, an 8.7 per cent increase over last year, the official news agency said.

Cuba's news agency AIN said the agreement was signed Tuesday at the close of annual trade talks, which have aroused interest here because of signs of troubles in Cuba's relations with the reform-minded Soviet Union.

Before the talks began a week ago, Pravda published an editorial calling for a radical reappraisal of the Soviet Union's policy on economic aid to Cuba, which has come under increasing criticism in the Soviet press.

President Fidel Castro has warned Cubans in recent months they may not be able to rely on the Soviets for oil and other essential goods. Delays in Soviet wheat and flour shipments led to bread shortages here earlier this year.

But observers said the week-long trade talks appeared to have gone smoothly,
 noting that they were completed a day ahead of schedule.

"The work completed together is very encouraging," said Vice President Carlos Rafael Rodriguez, who headed the Cuban delegation. The accord marked a step forward and a "consolidation" of relations between Havana and Moscow.

Leonid Abalkin, vice president of the Soviet council of ministers and head of the Soviet delegation, said three decades of Soviet-Cuban collaboration had made it possible "to perfect many aspects of the joint work."

Under the agreement, the Soviet Union will continue supplying Cuba with oil, food, raw materials and equipment. Cuba in turn will supply the Soviets with sugar, minerals, citrus and other goods. For the first time, Cuba will export medicines and high-tech medical equipment to the Soviet Union.

Both sides also agreed to establish a commission to draw up five-year plans for trade and scientific and technical collaboration, AIN said. The commission will be headed by Alexandr Katushev, first vice minister of foreign trade relations, and Cuban Foreign Trade Minister Ricardo Cabrisas
 AIN said.

Mr. Abalkin, meanwhile, told an audience of Cuban administrators of Soviet plans to introduce private enterprise and a "planned" market economy in the Soviet Union.

"We have decided to put in practice an economic model that is efficient, based on market formulas," AIN quoted Mr. Abalkin as saying.

"The implanting of reforms (in the Soviet Union) is not a renunciation of socialism," he said. "It is a realistic look at national and international conditions."

The Soviet Union, he said, was working to establish the legal basis for entities ranging from private corporations to family businesses.

He acknowledged that a radical reform of the Soviet economy would be a "long,

difficult and costly" process that in the short-term will mean higher consumer prices and greater unemployment.

Although Mr. Castro has refrained from public criticism of Mr. Gorbachev's

"perestroika", he has championed hard-line socialism for Cuba and vehemently attacked liberal economic reforms introduced by East European countries.

BONN (APRIL 18) - Industrial prices in West Germany rose 0.1 percent in March compared to the previous month, bringing the annual rate of increase down to 1.5 percent, the statistics office in Wiesbaden said Wednesday.

The annual rate in February was 1.7 percent, and 1.9 percent in January.

The industrial price index edged up to 100.2 in March from 100.1 in February.

SEOUL (APRIL 18) - South Korea's Hyundai business group has won a 600-million-dollar order for the construction of a two-billion-dollar Soviet-U.S. joint venture to build a petrochemical complex in Tobolsk, Siberia, the group chief said Wednesday.

Chung Ju-Yung said upon his return from a trip to Moscow that the order he won constitutes designing, construction and supply of equipment for the first phase of the plant.

He added that his group will invest 30 million dollars in the project, of which the U.S. partner is Combustion Engineering.

He disclosed that a powerful Soviet government delegation led by a federal minister will come to Seoul in May or June to push for joint ventures in natural gas development and other petrochemical industry.

Mr. Chung spearheaded a campaign for economic cooperation with the Soviet Union in the absence of formal ties between the two countries.

OSLO (APRIL 18) - A Norwegian state organization for shipping finance has filed a claim against London-based Hambro's Bank for 1.5 billion kroner (230 million dollars) as compensation for losses caused by "disloyal and illegal acts" by the British bank.

The State Guarantee Institute for Shipping and Oil Rigs, established in 1975 to help carry the huge Norwegian shipping industry through the oil

crisis, also demands revision of a 1982 agreement between the Institute and Hambro's Bank, concerning dismantling of Norwegian shipping tycoon Hilmar Reksten's far-flung shipping empire.

When this agreement was reached, Hambro's Bank held back essential information about Reksten's funds abroad, Erling Hjort, a lawyer representing the institute, told the Oslo daily Dagbladet. The Reksten group faced bankruptcy in 1975, but was saved by a massive infusion of capital from the institute.

Mr. Reksten's estate, controlled by his creditors, has carried on a ten-year investigation into his affairs, and has uncovered a wide international network through which the Reksten family is supposed to have stashed away large funds abroad.

The estate claims Hambro's Bank knowingly assisted in this, and earlier this month filed a compensation claim in London for 650 million kroner (100 million dollars) against Reksten's bankers.

Hambro's Bank has traditionally close ties with Norway and Norwegian authorities. Dagbladet, which won journalistic awards for uncovering the Reksten network, said Wednesday that the claim against the bank has probably been cleared with the Norwegian government.

BELGRADE (APRIL 18) - The Albanian Workers' Party (Communist Party) central committee approved a new set of economic measures at a plenary meeting in Tirana on Monday and Tuesday, ATA news agency reported Wednesday.

The measures particularly concern businesses and prices, the report received here said, without giving details. They are aimed at encouraging business internal financing, increasing workers' feeling of responsibility making their contribution a criterion for dividing up net income, and making pricing and credit policy an "active" factor in the economy.

Party leader Ramiz Alia closed the meeting by discussing Albanian foreign policy in the light of developments on the world political stage, the report said.

PARIS (APRIL 18) - Major French bank Societe Generale plans to open a Franco-Yugoslav bank in Yugoslavia, which it will control, the bank announced Wednesday.

It said a preliminary agreement had been signed on April 10 by SocGen and Yugoslavia's leading commercial bank, Beogradska Banka, for study in the near future of a proposal for setting up a joint banking venture.

Societe Generale has had a representation office in the Yugoslav capital since 1978. It is the only French bank to be represented in all east European countries except Albania.

#90108d3860 04/18/1990 ~French/German News Agency

NEW DELHI (APRIL 18) - The foreign ministers of India and Pakistan will meet in New York, possibly this Sunday, in a bid to defuse tensions over the Kashmir dispute, the Press Trust of India (PTI) said Wednesday quoting official sources.

PTI said Inder Kumar Gujral and his Pakistani counterpart, Sahabzada Yaqub Khan, would both be in New York for the special session of the U.N. General Assembly, convened to deal with economic issues.

Mr. Gujral will leave for the United States Saturday, the agency said.

PTI quoted the official sources as saying that the meeting was being held at the initiative of Pakistan.

An Indian foreign ministry spokesman here confirmed the report, saying that Mr. Gujral would "avail himself of the opportunity of having an exchange of views" with Mr. Yaqub Khan in the context of recent developments.

He described those developments as "the fanning of secessionist agitation in Kashmir by Pakistan, and the postponement by Islamabad of secretary level talks and four subcommission meetings between the two countries."

"India is always willing and keen to have a dialogue with Pakistan on all issues," the spokesman said.

The two foreign ministers last met in New Delhi in January, but since then

tension between New Delhi and Islamabad has mounted sharply, with both sides trading accusations of border troop movements. Last week Indian Prime Minister Vishwanath Pratap Singh warned Indians to be prepared for war.

The United Nations, the United States, the Soviet Union, Japan and the European Community have all urged the Pakistani and Indian governments to follow the path of restraint and negotiation. On Wednesday Iran offered to mediate in the dispute.

The northern Indian state of Kashmir, India's only Moslem-majority state, has been in dispute since the partition of the subcontinent in 1947, and Pakistan and India have already fought two wars over the issue.

Since December, the start of a virulent campaign for freedom from Indian rule spearheaded by Moslem militant groups, India has accused Pakistan of aiding the militants.

Pakistan has urged international support for the militants, which it calls "freedom fighters," but has denied supporting them.

#90108d3970 04/18/1990 ~French/German News Agency

HARARE (APRIL 18) - President Robert Mugabe urged Zimbabweans Wednesday to ''even greater and more significant transformation'' as they celebrated their first ten years of independence.

Mugabe spoke at a mammoth ceremony, marked by flypasts by fighter jets, mass gymnastic routines, the release of thousands of balloons and military displays in Harare's Chinese-built national sports stadium, marking the day ten years ago when the British flag was taken down after a seven-year war between black nationalist guerrillas and troops of the illegal white supremacist Rhodesian government of former prime minister Ian Smith.

Before the 60,000-strong crowd - including dignataries ranging from African National Congress (Anc) Deputy President Nelson Mandela to Malawian President Hastings Kamuzu Banda and eleven other heads of state - Mugabe promised an ''economic breakthrough'', ''a gigantic leap forward'' in terms of investment, and a major structural adjustment programme scheduled to begin in June to revive the country's flagging economy.

He also reiterated that changes to the British-brokered independence constitution would now be made to allow the government to introduce a major land acquisition program, and he promised: ''We shall proceed in the name of justice, equity and fairness to amend provisions so as to make more land available to the peasant population.''

Zimbabwe's 4,000-odd white farmers form the backbone of the national economy and own about one-third of the country's land. They have been protected up to now by the constitution which demands that full and externally remittable compensation be paid for land acquisition.

But observers noted that Mugabe baulked at any firm reference to the introduction of a one-party state, apart from an oblique reference to the need for ''one, and only one united people, united nation and united Zimbabwe.''

At midnight Tuesday, the 10-year life expired of the clause in the constitution which demands that any change to the assertion in the bill of rights of Zimbabweans' '' right to freedom of political association'' be effected only through the vote of every member of Parliament.

In its place now is a provision requiring only a two-thirds majority to change the clause in a parliament where Mugabe's ruling Zanu(Pf) party holds 116 out of the 120 contested seats.

Mugabe for the last 10 years has repeatedly affirmed his belief in ''democratic centralism'' and the outlawing of opposition parties, as most other African countries did at their independence, but observers said his failure to mention the issue was a reflection of the fierce resistance he faces on an issue that is not only highly unpopular among most ordinary Zimbabweans but also among many members of the ruling party central committee and Mugabe's cabinet.

#90108d3980 04/18/1990 ~French/German News Agency

PARIS (APRIL 18) - The Cannes film festival looked seriously in danger of being upstaged by Berlin this year, what with all the much-publicized antics of American film stars on the defunct Berlin wall.

So it came as no surprise that no fewer than eight films from the East bloc were in the official selection announced on Wednesday, five of them in competition.

Paradoxically, Berlin had been accused of promoting Hollywood hegemony by showing so many American films.

Cannes is even giving a whole day over to discussion of changes in Eastern Europe, to which at least 50 eminent film-makers have been invited.

But the festival officially opens with a hommage to the veteran Japanese director Akira Kurosawa, who is 80 this year. Nothing much has leaked about his "Dreams" except that the U.S. director Martin Scorcese has a cameo role as Van Gogh.

Another Japanese director, Kohei Oguri, has a film in competition, "Shi No Tage".

Britain's Alan Parker (of "Mississippi Burning") explores the friendship between a Japanese and an American at the end of World War II in his "Come See the Paradise", which has also been selected.

The East bloc films selected include "Korczak" by Poland's Andrezej Wajda of "Man of Iron" and "Danton" fame.

The Soviet actress Natalia Negoda, who delighted in the Soviet Union's sexiest film to date, "Little Vera" can be seen again in "V Gorode Sochi Temnye Nochi" (A dark night in Sochi) directed by Vassili Pitshul, which is being shown in the non-competion official section.

But the film that best demonstrates the new spirit of "glasnost" in Eastern Europe is surely "Ucho" (The Ear) which Czechoslovak director Karel Kachnya shot in 1968, at the time of the Prague Spring. It was immediately banned and is now being shown for the first time in the West, in competition.

In Western Europe, it looks like being another good year for Italy, and not only because Bernardo Bertolucci is chairman of the jury.

There is another film from the young Giuseppe Tornatore, whose "Cinema Paradiso" shared the special jury prize last year, entitled "Stanno Tutti Bene".

Critics who compared him to the brothers Paolo and Vittorio Taviani will have a chance at the real thing, since their latest "Il Sole Anche di Notte", starring Charlotte Gainsbourg, has also been selected.

Federico Fellini's "La Voce della Luna" is being honored with a special showing and the actress Monica Vitti's first film as director, "Scandalo Segreto", is being presented out of competition.

Ken Loach (of "Kes" and "Family Life") represents Britain with "Hidden Agenda".

Avant-garde director Jean-Luc Godard is representing Switzerland with "Nouvelle Vague", starring Alain Delon.

The French selection is said to have been the subject of furious debate behind the scenes this year. Of the three films competing Jean-Paul Rappenau's "Cyrano de Bergerac" starring Gerard Depardieu is a controversial choice as it has been playing to French cinemas already for a month. Critics who gave it deferential reviews admit privately to being bored.

Festival director Gilles Jacob made a special point of welcoming the inclusion of "Tila" from Burkina Faso's young director Idrissa Ouedraogo, whose "Yaaba" charmed audiences at Cannes last year. From a continent so starved of money, it is a veritable feat to make a film, Mr. Jacob reminded the press conference.

From that other continent, where money is in no short supply, there are only three films in competition this year, counting Alan Parker's, which is a U.S. production. Clint Eastwood, a regular at Cannes, will present his "White Hunter, Black Heart", the story of John Huston's filming of "The African Queen."

David Lynch ("Eraserhead" and the "Elephant Man") is there with "Wild at Heart".

Paul Shrader's "Comfort of Strangers" based on the claustrophobic thriller by Britain's Ian McEwan has been chosen to close the festival.

#90108d4090 04/18/1990 ~French/German News Agency

JOHANNESBURG (APRIL 18) - The Pan-Africanist Congress (PAC) told a press conference here Wednesday it had hired lawyers to probe the car smash which killed founder member Japhta Masemola, 58.

The PAC stalwart, who was South Africa's second longest-serving prisoner after Nelson Mandela until his release last October, was killed when his car collided with a truck near Garankuwa black township west of Pretoria early Tuesday, according to press reports.

Police in Pretoria and Bophuthatswana, the nominally-independent homeland in which Garankuwa lies, separately told Agence France-Presse it was the other force's responsibility to investigate.

PAC spokesman Mark Shinners declined to say if foul play was suspected.

The Azanian People's Organization (AZAPO), close to the PAC in its rejection of the role of white liberals and in its espousal of hardline socialism, released a statement Wednesday saying that as it did not have the full facts it would refrain from blaming Pretoria's "dirty tricks department."

Mr. Masemola joined the ANC in the early 1950s. He set up youth movements in Pretoria's black township Atteridgeville, where he was still living at the time of his death, intent on confrontation with the apartheid regime.

When the PAC split from the ANC in 1959 Mr. Masemola broke away with the

new organization. As the PAC's leader in Transvaal province, Mr. Masemola was given the task of setting up the PAC's armed wing.

He was jailed for life in 1963 for blowing up powerlines and sending PAC youths out of the country for military training.

BANGKOK (APRIL 18) - Thailand will ask the United Nations for 240,000 dollars to turn Khao-I-Dang refugee camp on the Cambodian border into a neutral camp, state-run Radio Thailand said Wednesday.

Thai Prime Minister Chatichai Choonhavan initiated the plan, aimed at ending alleged human rights violations in some eight camps now run by Cambodian resistance factions.

The 600 million baht (240,000 dollar) proposal to the U.N. Border Relief Organization (UNBRO) would provide for new shelters, basic infrastructure and food supply, according to a senior official at the National Security Council (NSC), Thailand's top security organization.

The NSC official said new accommodations were needed for the 290,000 Cambodian refugees currently living in Thailand. The cost of maintaining Khao-I-Dang would be lower after renovation, he added.

Another official reached by telephone Wednesday said the "neutral camp" project needed cabinet approval before being presented to UNBRO.

The Cambodian resistance, a U.N.-recognized alliance among the militarily powerful Khmer Rouge and two non-communist factions headed by Prince Norodom Sihanouk and former prime minister Son Sann, is fighting to oust the Phnom Penh government installed by Vietnam after it invaded Cambodia in 1978.

The Marxist Khmer Rouge has been held responsible for the deaths of tens of thousands of Cambodians during its nearly four-year bloody rule.

Since early this year it has reportedly forced thousands of civilians to march from secret camps along the Thai-Cambodian border into Cambodia to build new communes, and to carry munitions and supplies through dangerous war zones.

Khao-I-Dang, located in Prachin Buri province on Cambodia's border some 250 kilometers (155 miles) east of here, can accommodate up to 150,000 refugees and has processed the resettlement of at least 400,000 refugees to third countries.

#90108d4520 04/18/1990 ~French/German News Agency
DAR ES SALAAM (APRIL 18) - Relief aid worth millions of shillings has been donated to Tanzania by local and international agencies following President Ali Hassan Mwinyi's appeal early this week for assistance for more than 200,000 flood victims in the south of the country.

Prime Minister Joseph Warioba flew over the flooded Lindi and Mtwara regions on Saturday and described what he saw as a "national disaster".

His office is coordinating relief operations to the area hit by the worst floods in almost 50 years.

The government estimates that seven billion shillings (36.8 million dollars) will be needed for emergency medical supplies. More money will be needed to repair roads and bridges swept away by floodwaters from the Lukuledi River.

President Mwinyi invited foreign representatives to state house on Monday to brief them on the extent of the disaster, the worst in southern Tanzania since 1944.

A government spokesman said response to his appeal had been encouraging with donations of cash, clothing, food, blankets, tents and cooking oil.

The United Nations office here made an immediate grant of 20,000 U.S. dollars. Local companies, churches, relief agencies and schools all made donations.

Emergency fuel supplies were rushed by sea to Mtwara port on Tuesday so that helicopters and planes could make food drops to marooned villages in Lindi and Mtwara.

Mr. Warioba said 1,000 tons of maize and beans had already been dispatched by helicopter to the area.

Meanwhile local geologists are investigating reports that the floods might have been triggered by volcanic activity in the nearby Makonde plateau.

#90108d4750 04/18/1990 ~French/German News Agency
KABUL (APRIL 18) - The Afghan government Wednesday angrily denied that it had executed any plotters of last month's failed coup or sacked Foreign Minister Abdul Wakil or any other cabinet member.

The vehement denial came from a foreign ministry spokesman reacting to

Tuesday's reports from Islamabad-based Western diplomats that the communist regime had killed at least two coup plotters.

"A number of people were arrested after the coup, and two days later a special court was set up to conduct the investigations into the failed coup," the spokesman said.

"No one can be executed without facing trials," he said. Western diplomats in Pakistan later spoke to reporters of "rumors" that the Kabul regime had executed MPs Ghulam Dastagir Panjsheri and Saleh Mohammad Zeary and sacked Mr. Wakil.

The spokesman said Mr. Zeary and Mr. Panjsheri were alive and in government custody.

"They have confessed to their crimes and are criminals ... but they have not been executed," he said.

He also denied the report that Mr. Wakil has been sacked, adding that the minister was currently in New York attending a United Nations meeting.

"There is no question of sacking Mr. Suleiman (Ali Laik) as he has ceased to be a minister some time ago. He has been reallocated to other work," the spokesman said, referring to the reports that Mr. Laik, believed to be a minister of tribes, has also been sacked along with Mr. Wakil.

"We reject it. The report is completely untrue," he added. Mr. Zeary and Panjsheri were arrested after former defense minister Shah Nawaz Tanai led the failed coup on March 6 to topple President Najibullah.

Sources said Mr. Zeary, who was injured during his arrest, has named several other plotters.

Afghan Deputy Security Minister Yaar Mohamad earlier this month publicly said a total of 623 people had been arrested, adding that no executions had taken place.

#90108d5210 04/18/1990 ~French/German News Agency

ISTANBUL (APRIL 18) - Ismail Besikci, a Turkish researcher on Kurds, went on trial here Wednesday, facing 20 years in jail on many counts of alleged separatist propaganda in his recently-published book ''Kurdistan: An International Colony''.

The state security court prosecutor demanded 15 years for Ayse Zarakolu, the woman publisher of the book.

Defended by over a hundred lawyers, Besikci said he had written the book ''to scientifically disprove the official dogma that all people living in Turkey are Turks'', dismissing the charge of separatism.

Opposition deputies, Turkish and West European jurists and human rights activists attended the trial.

Besikci, 55, had been released from jail only three years ago, after spending a total of 11 years on several past convictions on similar charges.

#90108d5260 04/18/1990 ~French/German News Agency

HELSINKI (APRIL 18) - Bassam Abou-Sharif, an adviser to Palestinian leader Yasser Arafat, met Finnish Foreign Minister Pertti Paasio here Wednesday and transmitted a message from him to the Finnish government and President Mauno Koivisto.

Mr. Abou-Sharif, who arrived in Finland Tuesday evening, did not disclose the message, but said afterwards that Finland should have a more active role in the Middle East peace process.

He said it was important that as many countries as possible now take part in attempts to start peace negotiations between Israel and the Palestinians. Finland, he said, should try to convince Israel that negotiations are the only way to a Middle East settlement.

According to informed sources, President Chaim Herzog of Israel is due to visit Finland early next month, and Mr. Paasio is scheduled to go to Israel in June.

The message from Mr. Arafat is also believed to have dealt with Finland's recent decision to grant transit visas for some 100 Soviet Jews living in and around Leningrad and going to Israel.

Israel says half a million Soviet Jews have asked for emigration visas. There are over 100,000 living in and around Leningrad and in Estonia.

The PLO has described the prospect of mass emigration of Soviet Jews to Israel as an "unfriendly and provocative action against a Palestine nation suffering from occupation".

The Finnish Foreign Ministry has said that Finland strongly condemns any settlement of Soviet Jews in the Israeli-occupied West Bank and Gaza.

But Finland also supports the right of the people to emigrate if the countries concerned agree to such a movement of people.

On Wednesday Mr. Abou Sharif indicated that the PLO understands the Finnish view. The PLO also supports human rights such as the right of people to move freely. But this cannot occur at the expense of the Palestinians, he said.

#90108d5310 04/18/1990 ~French/German News Agency

ULUNDI, SOUTH AFRICA (APRIL 18) - Zulu Chief Mangosuthu Buthelezi Wednesday described as "pure and utter drivel" leftwing charges that members of his Inkatha movement had been sent to Israel for military training.

Chief Buthelezi stated "quite categorically" in the capital of his KwaZulu tribal homeland here that he had not sent teams to Israel and had also not sanctioned any action to enable supporters to engage in acts of violence.

The allegations, levelled Wednesday by the African National Congress-allied South African Youth Congress (SAYCO), come during the heightened Zulu civil war in strife-torn Natal province between ANC supporters and the conservative Inkatha.

The ANC has claimed Chief Buthelezi has encouraged most of the turmoil, citing versions from witnesses of the latest violence, which over the past month has claimed around 200 lives.

The Zulu leader, his foes believe, is collaborating with the apartheid regime by his opposition to sanctions and open approaches to the government.

Chief Buthelezi has replied that his views are pragmatic ones and has repeatedly denied responsibility for the Natal violence, which neither he nor ANC Deputy President Nelson Mandela have been able to stem despite appeals.

Some 3,000 people have died in the conflict since it broke out in late 1986.

-30- 1538

#90108d5350 04/18/1990 ~French/German News Agency

HELSINKI (APRIL 18) - Tanzanian President Ali Hassan Mwinyi, here on three-day official visit, on Wednesday had talks with Finnish leaders on economic cooperation.

Finland is the first leg in an 11-day Scandinavian tour that Mr. Mwinyi, who arrived here Tuesday evening, is making. He will go on to visit Norway

Sweden and Denmark.

On Wednesday he paid a call to President Mauno Koivisto and later met his official host, the conservative Prime Minister Harri Holkeri. He also visited parliament and discussed with the Speaker, Kalevi Sorsa.

After his talks, Mr. Mwinyi said that Tanzania was not only interested in Finland's development aid but would like to attract private companies to invest in his country.

He mentioned sectors such as energy, transports, tourism, communications and agriculture.

The Scandinavian countries have been major aid donors to Tanzania since the 1970's, which gets more development aid from Finland than any other country.

This year Finland's annual contribution is 130 million Finnish marks (about 33 million dollars).

Mr. Mwinyi's visit to Scandinavia is the first since he became president in 1985.

-30- 1338

#90108d5510 04/18/1990 ~French/German News Agency

ACCRA (APRIL 18) - Ghanaian authorities on Wednesday threatened to cancel passports and refuse repatriation of nationals travelling abroad in search of work without the foreign government's consent, an official statement said here Wednesday.

The warning follows reports that many unskilled Ghanaians with little or no education have travelled to Namibia to find work.

The statement said Namibia has enough workers and that the new government "will not welcome the burden of such economic refugees."

Observers say thousands of Ghanaians are currently in West Africa and Europe seeking work. In 1983, the Nigerian government deported some one million Ghanaians who had gone there during that country's oil boom.

"The practice whereby Ghanaians flock to many countries in search of jobs usually without proper travel documents or entry permit creates problems for those countries, invites feelings of animosity towards Ghanaians and tends to bring Ghana into disrepute," the statement said.

#90108d5540 04/18/1990 ~French/German News Agency

NEW DELHI (APRIL 18) - The government Wednesday named career diplomat Muchkund Dubey as India's new foreign secretary to succeed Shailendra Kumar Singh, who sought early retirement voluntarily, it was announced here.

Mr. Dubey, 57, currently secretary for economic relations in the Ministry of External Affairs, will take up the position immediately, a foreign office spokesman said.

He said Mr. S.K. Singh, who was appointed by the government of former prime minister Rajiv Gandhi for a two-year term ending in early 1991, had sought early "voluntary retirement" and that it had been accepted by the government.

The spokesman did not mention any reason for Mr. S.K. Singh's decision, although there has been speculation in local newspapers over whether he would continue in office after the government of Prime Minister Vishwanath Pratap Singh succeeded Mr. Gandhi in December.

Mr. Dubey, currently a secretary in the Ministry of External Affairs, joined the Indian Foreign Office in 1957. He has been high commissioner (ambassador) to Bangladesh and India's ambassador and permanent representative to the United Nations in Geneva.

BERLIN (APRIL 18) - East German production dropped by 4.8 percent in the first quarter of the year by comparison with the same quarter last year, primarily because of a refugee exodus, according to official statistics released here Wednesday.

The figures show that, as of the end of March, manufacturing industry had lost 124,000 workers in a year, and the construction industry 33,000.

The Statistics Office head, Arno Donda, said that the poor result -- which brought East German output back to the level of the first quarter of 1988 -- was also due to the fact that certain products can no longer be sold since people are waiting for products from the West.

He said that yet another factor was the country's "upheavals in economic relations" with some of its trade partners.

Production in the construction sector was down by 14 percent between the two quarters and industrial production by 4.4 percent. However, output of meat and milk was up by 0.5 and 5.6 percent, respectively.

East German exports were down by 7.9 percent in the first quarter by comparison with the same quarter last year, and imports by seven percent.

Some 38,313 East Germans were registered as unemployed at the end of March.

GENEVA (APRIL 18) - A ban on ivory imports has sent prices tumbling in Africa as stocks of unsaleable elephant tusks have built up since January, the World Wide Fund for Nature said Wednesday.

WWF official Francois Droz said untreated ivory sells for two to three dollars a kilo compared to 144 dollars last year, before the ban by 106 members of the Convention on International Trade on Endangered Species (CITES).

The ban was agreed last October and came into force in January, affecting mainly Western countries and Japan, the world's biggest single importer.

Mr. Droz said elephant poaching had fallen substantially in Tanzania, and to a lesser extent in Zaire, Congo and Gabon. Current ivory stocks stand at 250 tonnes, including 92 tonnes in Burundi, he said.

"These signs are encouraging for the survival of 600,000 African elephants " he declared.

Officials of the Swiss-based WWF said ivory sculptors were looking for new sources of supplies -- notably in extinct mammoth tusks from mass graves in the Soviet Union -- and substitutes such as hippopotamus and walrus teeth.

TEHERAN (APRIL 18) - Saudi Arabia and other Gulf oil-producers are behind a U.S.-inspired plot against OPEC that has led to the recent fall in oil prices, an Iranian newspaper charged Wednesday.

"Saudi Arabia, Kuwait and the United Arab Emirates are exceeding their production quotas even more than in the past," Abrar said, warning that the fall could trigger a crisis in the Organisation of Petroleum Exporting Countries.

"These three Arab countries have submerged the market with their over-production to keep their commitments to the United States," it charged, urging OPEC to take measures "against its feeble and cowardly members."

Abrar said the fall in prices was part of a "tactic schemed by the United States and other major industrialized states" to smash OPEC's pricing strategy ahead of increased demand by consumers over the next decade.

"If the current downward trend continues, it will certainly face OPEC with a new crisis," it said.

North Sea Brent crude oil prices have fallen by between two and three dollars per barrel since the start of April because of over-production by several OPEC countries, notably Saudi Arabia, Kuwait and the UAE.

PRAGUE (APRIL 18) - A scandal centered on Czechoslovak Interior Minister Richard Sacher broke into the open Wednesday after he publicly denied allegations he was using former secret police to spy on members of parliament.

Mr. Sacher declared he was innocent in a newspaper interview after two of his aides accused him of "endangering security" in post-communist Czechoslovakia.

First deputy interior minister Viliam Ciklamini alleged Mr. Sacher ordered his chief of staff, Major Vaclav Novotny, to gather compromising information on deputies in the federal assembly.

Maj. Novotny, previously a senior official in the ousted communist regime's StB secret police, then gave the data to former StB colleagues, according to informed sources.

The StB was officially disbanded in January. But a civilian commission set up to monitor reforms in the interior ministry has said many former StB officials still hold important jobs in the ministry.

"Practically all information about state security is collected and sorted at the ministry by former StB members", panel member Radek Prochazka told a news conference.

"If they dismissed or arrested one of the new arrivals, the interior ministry would be functioning within an hour just the way it did before November 17", he said, referring to the peaceful revolution that toppled the communist regime.

A panel member said deputy interior minister Jaroslav Prochazka, the director of the new secret services, Zdenek Formanek, and several members of the commission testified about Mr. Sacher to the parliamentary committee on security and the prosecutor general.

The affair remained a secret until Mr. Sacher went on the offensive in an interview with Lidova Demokracie, organ of the People's party of which he is one of the leaders.

He accused his attackers of lack of professionalism and demanded they resign.

The two deputy ministers, joined by members of the watchdog commission, then mounted a counter-offensive.

Mr. Sacher has said he will explain the affair at the current parliamentary session.

ISLAMABAD (APRIL 18) - Commanders of Pakistan's army and air force Wednesday inspected their fighting units amidst continued talk of war with India over Kashmir.

General Mirza Aslam Beg checked operation plans and logistic support of his

troops in forward lines in Lahore-Qasur sector of the international border with India.

Local commanders briefed him on ''the activities across the border and steps taken to beef up (Pakistani) defenses'', a military statement said.

Air Force leader, Air Chief Marshal Hakeemullah, urged fighter pilots and weapons controllers of his force to ''maintain a high-key combat preparedness in view of the mounting threats'' to Pakistan's security.

''Faced with a numerically superior adversray, Pakistan Air Force (Paf) simply cannot afford to have mediocres in its ranks,'' he told a graduation parade at Sargodha demanding ''the best'' from the graduating combat commanders.

Sargodha is the homebase of the U.S.-supplied F-16 fighter aircraft, Paf's main strike force.

PARIS (APRIL 18) - Chinese dissident Chai Ling asked Beijing Wednesday to release pro-democracy demonstrators jailed after their movement was crushed last June, and urged the West to maintain sanctions against China.

Chai Ling, 24, made the appeals at her first news conference since arriving in France earlier this month, after nine months on the run from China. The former student leader of pro-democracy protests on Beijing's Tiananmen Square on a list of China's 21 "most wanted criminals".

Accompanied by her husband Feng Congde, Chai Ling called on "all those interested in the respect of human rights" to "demand the release of people who are still in prison" after the crackdown last year.

Hundreds of peaceful protesters were massacred during the night of June 3-4 when Chinese Army troops stormed Tiananmen Square. Suspects were later jailed or executed in the subsequent hunt for protest leaders.

"All Western peoples who love freedom and democracy must continue to exert -- along with their governments -- economic, diplomatic and cultural sanctions" against China, she said.

Chai Ling stressed she was speaking only "as an individual", adding that she was undecided as to whether to join the Federation for Democracy in China, a Chinese dissident organization founded here last September.

The former psychology student denied Beijing's charges of being a criminal, saying she had "neither stolen nor killed". She also thanked all those who

had helped her in China and in France, including the French government.

Chai Ling stressed that the pro-democracy movement in Beijing was "peaceful" and charged that "the old generation which leads China has not understood that the mentality of young people has changed".

But she said that the pro-democracy movement had failed to realize its importance to people outside China.

During the "Beijing Spring", clandestine groups were formed in case of repression, which were "very active", she added.

She later produced a set of four poems on a sheet of paper, dealing with the events surrounding the crushing of the pro-democracy movement.

The first, written by her husband, proclaimed "our heart is a heart of steel", while the second said that "what is most moving, now, is fear".

The third, dedicated to China's paramount leader Deng Xiaoping, warned that "no one can bar the way of history" and the fourth, dedicated to Premier Li Peng, said "even your own family and your friends will not help you anymore".

CAPE CANAVERAL, FL (APRIL 18) - NASA Wednesday advanced next week's planned launch of the shuttle Discovery with the Hubble Space Telescope to Tuesday.

The National Aeronautics and Space Administration had scheduled liftoff for April 25, more than two weeks after a first attempt was scrubbed due to a faulty auxiliary power unit aboard Discovery.

But members of the launch team and payload managers moved the launch up by one day after a new auxiliary power unit on the shuttle passed a key test.

The launch window begins at 8:31 a.m. (1231 GMT).

The faulty power unit, one of three used to pressurize the shuttle's hydraulic system, was replaced. Each unit weighs about 40 kilograms (90 pounds), and they are used to move wing and rudder surfaces in the spacecraft's braking and steering system.

The 1.5 billion dollar Hubble telescope is designed to detect objects 50 times fainter than the dimmest objects observable from Earth-bound telescopes.

The telescope will enable astronomers to study stars and galaxies so distant their light has been traveling to Earth for 14 billion years.

The Hubble project is already more than six years behind schedule, due to technical problems and the January 1986 Challenger disaster.

BELGRADE (APRIL 18) - A state of emergency imposed more than a year ago in the southern Yugoslav province of Kosovo was lifted Wednesday, Belgrade television said.

It had been imposed after 50 people died in clashes in the province, of which 90 percent of the population is ethnic Albanian and seeks more autonomy within Yugoslavia's federal structure.

Neighboring Serbia, which is Yugoslavia's biggest republic and lays claim to Kosovo where Serbs form 10 percent of the population, has assumed full police power in Kosovo.

Over the past year Serbia has increased its grip on Kosovo through constitutional changes and the deployment of special police and troops.

Observers said the ending of the state of emergency was a sign that Serbia considers it has the situation under control in Kosovo. Human rights organisations have regularly criticised Serbia's acts.

ABU DHABI (APRIL 18) - Saudi authorities, in a memorandum to the agriculture ministry of the United Arab Emirates, confirmed they have rejected more than 50,000 Australian sheep afflicted with mange, press reports said here Wednesday.

A spokesman for the Australian Meat and Livestock Corporation said earlier in the day in Sydney that Saudi Arabia had last week turned away a total of 48,000 live Australian sheep on grounds that the animals were diseased.

The Emirates news agency WAM reported that Saudi health authorities in the Red Sea port of Jeddah had conducted laboratory tests on sheep from a total cargo of 50,311 and found the animals to be suffering from mange.

A Saudi memorandum on the tests was later sent to the UAE, a fellow member of the Gulf Cooperation Council, according to WAM.

Exports of Australian sheep to Saudi Arabia resumed last December after a

four-month suspension imposed by Sydney. The action followed the Saudi rejection of six ship-loads of sheep, totalling 395,000 animals.

Saudi Arabia since December has taken delivery of some 500,000 Australian sheep.

TOKYO (APRIL 18) - The Japanese Transport Ministry on Wednesday asked the local aviation company Japan Air System to check its Airbus A-300 aircraft following a French report of potential cracks in the fuselage, ministry sources said.

The report warned that some aircraft of the Airbus A-300 B2 and B4 models, made by the European consortium in the early 1970's, had been found to have cracks measuring between four and 36 millimeters (.16 and 1.4 inches), the ministry sources said.

Japan Air System, Japan's third largest airline company, has 10 aircraft in the series and seven new generation A-300600s in its fleet.

BEIRUT (APRIL 18) - The wife of one of three American hostages who may be freed in the next 48 hours said Wednesday she was overcome with joy.

"I don't know how to express my joy," Ferial Polhill told AFP in a telephone interview here after Islamic Jihad for the Liberation of Palestine (IJLP) announced its intention to free one of three U.S. hostages it has been holding since January 1987.

Mrs. Polhill's husband Robert has been held by the IJLP along with two other lecturers from Beirut University College (BUC), Alann Steen and Jesse Turner.

A communique from the group distributed here Wednesday did not identify the hostage that it said is to be freed in the next 48 hours in response to a request from Iran.

"Whichever one is released, it will be a great joy, especially if it opens the door to the liberation of all the others," said Mrs. Polhill, who is a Palestinian and who still lives on the BUC campus.

Badr Turner, who also lives at the collge, is currently visiting her brother in Abu Dhabi while Virginia Steen is in the United States, BUC sources said.

#90108p3938 04/18/1990 ~PR Newswire
CHESTERFIELD, MO (APRIL 18) PR NEWSWIRE - Comprehensive Care Corp. (NYSE: CMP) announced a net loss of $20.6 million or $2.02 per share for its third quarter ended Feb. 28, 1990. Net earnings for the comparable period last year were $.9 million or $.08 per share. The company's pretax loss for the quarter was $25.4 million and included the write- down of certain assets of $14.2 million. Operating revenues for the third quarter of fiscal 1990 were $31.4 million compared to $51.8 million last year.

For the nine months ended Feb. 28, 1990, the company reported operating revenues of $112.9 million and a net loss of $29.3 million or $2.88 per share. For the nine months ended Feb. 28, 1989, operating revenues were $159.8 million and net earnings were $5.6 million or $.56 per share.

The company's pretax loss from operations increased approximately $2.2 million from the second quarter of fiscal 1990 principally due to the decline in occupancy in the company's freestanding facilities. However,

utilization has slightly improved in the fourth quarter.

The write-down of assets relates to the following items: sale of its office building in Irvine, Calif., for $8.5 million; the closures of the CareUnit of San Diego and CareUnit Hospital of St. Louis; the execution of a non-binding letter of intent relative to the sale of the replacement 152-bed psychiatric facility being constructed by the company in Brea, Calif., for $11.5 million; and the continued offer for sale by the company of its unused land in Miami, Fla. The company recognized gains of an aggregate of $1.1 million on the sale of its SmokeEnders operation and its interest in the BMC joint venture

MOSCOW (APRIL 18) PR NEWSWIRE - Kniga Printshop, a Soviet- Canadian joint venture, reported hard currency earnings of $110,000 (Canadian) plus 500,000 rubles in its first year. The joint venture operates two high-tech printing centers in Moscow, according to Geoffrey Carr-Harris, president of Phargo Management and Consulting Ltd. of Toronto. The venture is 49 percent owned by Phargo and 51 percent by Kniga Publishing House of Moscow.

On March 6, 1989, the joint venture opened an AlphaGraphics Printshops Of The Future franchise in Moscow, the fist non- government printing facility to operate in the USSR since the early 1920s. A second Moscow AlphaGraphics opened in November. In 1989, the joint venture also opened two book stores and published its first title.

Most of the earnings were generated by the initial AlphaGraphics shop, located at 50 Gorky St. The second shop, in the Cosmos Hotel, contributed to income for only about a month. The hard currency can be repatriated to Canada. The rubles are not convertible and have been reinvested in real estate in the USSR.

Both AlphaGraphics shops serve the western business and diplomatic communities offering such services as printing, photocopying, desktop publishing and electronic mail communications. One example is the Moscow edition of the Los Angeles Times, which is edited daily in Los Angeles and transmitted by AlphaGraphics' unique satellite system to Moscow, where it is printed in the Gorky Street shop and distributed in Moscow before the sun is up in North America.

The recently-opened McDonald's franchise, also located on Gorky Street, uses AlphaGraphics to print invitations, programs, tray liners, order pads

and menus.

AlphaGraphics is an international franchisor of high-tech printing centers with more than 285 shops in nine countries: Canada, England, Hong Kong, Mexico, Scotland, the USSR, Spain, Sweden and the United States.

TORRANCE, CA (APRIL 18) PR NEWSWIRE - Automedix Sciences Inc. (NASDAQ: AMED) announced today the Food and Drug Administration as approved treatment of five additional cancer patients with its blood L- Tryptophan depletion (BTD) device at the University of Texas, M.D. Anderson Cancer Center in Houston, Albert Einstein College of Medicine, Montefiore Medical Center in New York, and the Harbor-UCLA Medical Center in the Los Angeles area. The clinical trial targets patients with advanced cancer of the breast or lung, leukemia, lymphoma or melanoma, who have failed conventional therapies and have an estimated four to six months to live. Six patients have already been treated with the therapy.

The Automedix BTD device contains a propriety enzyme able to decompose L-tryptophan, an amino acid required for cancer cell growth. A cancer patient's blood flows through the device extracorporeally, in a procedure similar to kidney dialysis. Two weeks ago, the company received FDA approval to use its BTD device in a clinical trial for the treatment of Eosinophilia Myalgia Syndrome, a condition related to the ingestion of L-tryptophan supplements. This disease has affected 1,440 people and caused 20 deaths in the U.S. since last August.

NEW YORK (APRIL 18) PR NEWSWIRE - Thomson McKinnon Inc. ("TMI") announced today that it has agreed in principle to a proposal for the acquisition of its general partnership interest in Thomson McKinnon Asset Management L.P. ("TMAMLP") by a company formed with members of the TMAMLP management who have primary responsibility for the investment advisory services provided by TMAMLP. The acquiring group will be Greylock Investments and TA Associates, both of Boston, and key TMAMLP management members to include Donald A. Chiboucas, Robert A. Prindiville and Irwin F. Smith. The proposal does not contemplate the purchase of any of the public limited partnership units.

Greylock and TA Associates are two of the oldest private equity investment firms in the United States, and together have committed equity capital of over $1 billion. Greylock and TA Associates share an investment philosophy focused on working with management teams to build sustainable, profitable businesses. The professional staffs of the two organizations collectively have over 300 years of experience in working with managements to build companies, and have had investment affiliations with approximately 400 companies.

Under the investors' proposal, the acquiring company will become the general partner of TMAMLP, will purchase 200,000 general partnership units from TMI for $800,000, and for approximately $5,400,000 will obtain an option from TMI to acquire the balance of TMI's units at a price of $4.53 per unit reduced by the option price and partnership distributions received by TMI through the expiration of the option on Jan. 10, 1994. The option exercise price may be increased by up to $.50 per unit if certain operating targets are achieved.

The proposal anticipates a renewed marketing effort for TMAMLP's mutual fund activities. The company formed by the investors will also acquire Thomson McKinnon Fund Distributors Inc. ("TMFD") from its parent, Thomson McKinnon Securities Inc. ("TMSI"), a subsidiary of TMI.

The proposal also provides for the preservation of unit awards under the TMI 1988 Partnership Interest Awards Program for former TMSI brokers employed by Prudential-Bache Securities Inc. ("PBS").

Berkshire Capital Corporation represented TMI in this transaction. TMAMLP is engaged in investment management for mutual funds and private accounts. It had $6.7 billion in assets under management at March 31, 1990. The TMAMLP's limited partnership units trade on the New York Stock Exchange under the symbol TMA.

NEW YORK (APRIL 18) PR NEWSWIRE - T&N plc and J. P. Industries, Inc. (NYSE: JPI), today announced that the Federal Trade Commission has requested additional information pursuant to the Hart-Scott-Rodino Antitrust Improvements Act in connection with the ongoing $17.30 per share tender offer by T&N Automotive Components Inc. for all outstanding shares of common stock of J. P. Industries. The tender offer is the first step in the companies' previously announced agreement to effect a merger of T&N Automotive Components, a wholly owned subsidiary of T&N plc, into J. P. Industries.

Both companies said that they are preparing the necessary information and will comply with the FTC's request expeditiously. The request extends the waiting period under the Hart-Scott-Rodino Act until ten days following "substantial compliance" with the request unless the waiting period is sooner terminated by the FTC.

In light of the FTC's request, T&N Automotive Components has extended the expiration date for the tender offer until midnight, New York City time, on Monday, May 14, 1990. As a consequence of the extension of the expiration date, holders of J. P. Industries common stock are entitled to tender or withdraw their shares pursuant to the tender offer until midnight, New York City time, on Monday, May 14, 1990, unless the expiration date is extended further by T&N Automotive Components. The tender offer had been scheduled to expire on April 26, 1990.

Based on the latest count of tendered shares, including shares tendered pursuant to guarantees of delivery, 505,747 shares of J. P. Industries common stock have been validly tendered and not withdrawn pursuant to the tender offer.

CONTACT: Mark Harnett or Stanley Kay of Dewe Rogerson, 212-688-6840, for T&N plc; or James J. Fahrner of J. P. Industries, 313-663-6749.

#90108p3991 04/18/1990 ~PR Newswire

CORNING, NY (APRIL 18) PR NEWSWIRE - Corning Incorporated (NYSE: GLW) today announced it has developed two ceramic catalyst supports for use in a new generation of catalytic converters being developed for 1993 automobiles.

One catalyst support increases engine performance and boosts fuel efficiency by reducing the strain put on the engine by 24 percent over

conventional substrates.

The catalyst support may also be used in the United States and Japan in start-up converters installed near the engine. By placing the converter closer to the engine, a catalyst support coated with a precious metal will begin converting exhaust pollutants into harmless gases (carbon dioxide and nitrogen) and water more quickly than the converters now in use.

Corning's other catalyst support packs the surface area of two football fields into a product the size of beer can. As a result, the catalyst support, when coated with a precious metal, can convert more exhaust pollutants conventional catalyst supports. According to Corning, the new catalyst support's efficiency may enable some automobile manufacturers to reduce the number of catalyst supports they must use in the converter to meet emissions regulations.

Both catalyst supports are made from a new Corning ceramic and are being tested by automobile companies in Europe, the United States and Japan for a new generation of catalytic converters. The new converters will be used to meet new emissions standards due to go into effect in the U.S. as early as 1993 and in Europe as early as 1991. All automobiles sold in Western Europe will be required to meet emissions regulations in 1993.

Corning first developed catalytic converter cores in the early 1970s and has since supplied more than 250 million cores for automobiles produced since 1975. The new catalyst supports will be manufactured at plants in Erwin, N.Y., Blacksburg, Va., and Kaiserslautern, West Germany.

ATLANTA (APRIL 18) PR NEWSWIRE - Newbridge Networks (NASDAQ-NMS: NNCXF) announced today that the British Columbia Telephone Company (B.C. Tel) has placed an order with the company for $2 million of MainStreet digital networking products.

Newbridge also announced that the company has extended its distribution contract with B.C. Tel. It is expected that sales under the extended contract will total from $5 million to $7 million in calendar 1990.

"We are delighted to announce the extension of our relationship with a progressive carrier like B.C. Tel," commented Mike Pascoe, general manager of the Canada, Asia Pacific and Latin America business region.

B.C. Tel uses the 3600 MainStreet for the provision of network services to

its customers. The product is also a major component in the B.C. Tel internal network, the Digital Services network. It allows B.C. Tel to offer the market enhanced services which are not available on most existing channel bank products.

B.C. Tel, the second largest telecommunications company in Canada, and a corporate affiliate of GTE Corporate, provides full residential and business telecommunications services throughout the province of British Columbia.

Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in the United States, Canada and the United Kingdom.

Newbridge Networks Corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

TORRANCE, CA (APRIL 18) PR NEWSWIRE - International Technology Corp. (IT) (NYSE: ITX) and Davy McKee Corp. (Davy) announced today receipt of notice of award for a contract to an IT/Davy joint venture by the Texas Water Commission (TWC) for closure of the Sikes Disposal Pits Superfund site in Crosby, Texas. The $89.9 million project is the largest to date for a Superfund Site and will involve on-site incineration of about 340,000 tons of waste and contaminated soils, flood protection, site dewatering and water treatment. IT will participate 77.5 percent and Davy 22.5 percent in the joint venture.

Murray H. Hutchison, chairman and chief executive officer of IT, and Michael S. Bickers, president of Davy McKee's San Francisco operations, stated, "We appreciate the opportunity to support the TWC in the cleanup of what we believe to be the largest Superfund site yet awarded."

International Technology Corporation, based in Torrance, is a leading environmental management company providing services to government and industry. Davy McKee Corporation, a subsidiary of Davy Corporation plc, is an international engineering organization which offers design and construction services for the nonferrous metals and minerals industries, and has an established reputation for innovative treatment of toxic waste substances. Davy's stock is traded on the London Stock Exchange.

#90108p4000 04/18/1990 ~PR Newswire

ATLANTA (APRIL 10) PR NEWSWIRE - The Coca-Cola Company (NYSE: KO) reported today that first quarter earnings per common share from continuing operations advanced 15 percent to $0.83 and net income available to common shareholders increased 10 percent to $279 million.

Excluding a $0.03 per common share non-recurring gain from the sale of the coffee business in the first quarter of the prior year, earnings per common share from continuing operations advanced 20 percent.

"We have started the decade of the '90s where we left the decade of the '80s -- on a roll," said Roberto C. Goizueta, chairman of the Board and chief executive officer. "Our Company's focus on strengthening its global soft drink system continues to produce outstanding worldwide volume results on top of a superb performance in the same period of the prior year.

"Our results for the first quarter are even more significant when viewed against the 26 percent gain in earnings per common share in the first quarter of 1989."

Worldwide gallon sales of concentrates and syrups, as well as case sales to retail customers, increased approximately 7 percent in the first quarter.

Gallon sales of concentrates and syrups outside the United States increased 9 percent and case sales to retail customers advanced 10 percent. International operating income benefited from this strong volume growth and was modestly impacted by currency translation. In the quarter, the U.S. dollar strengthened approximately 1 percent against key foreign hard currencies compared to the first quarter of 1989.

Retail case sales in the European Community advanced 14 percent, including a 14 percent gain in Germany, a 21 percent increase in the United Kingdom, and a 16 percent gain in Spain. Gallon sales in the European Community increased 23 percent in the first quarter due primarily to bottler inventory accumulation in Germany and Spain, and improved distribution in France.

Gallon sales in the Northeast Europe and Africa group (NEA) increased 13 percent and retail case sales grew 14 percent. Significant gallon sales in Nigeria, which compared favorably to soft volume in the prior year, led growth in the NEA group followed by strong performance in Turkey due to

successful packaging promotions.

Gallon sales in Latin America advanced 2 percent with solid performance recorded in Mexico due to improved consumer purchasing power and good results in Brazil due to new package introductions. Gallon sales in Argentina declined due to poor economic conditions. Retail case sales in Latin America grew 3 percent. Excluding Argentina, retail case sales in Latin America grew 8 percent.

In the Pacific, gallon sales grew 6 percent led by 10 percent growth in Japan due principally to new packaging and additional flavors for non-carbonated products, 11 percent growth in the Philippines, and over 25 percent growth in Thailand due to additional equipment placement and successful marketing programs. Retail case sales increased 13 percent in the Pacific.

Case sales to retail customers in the United States increased 3 percent in the first quarter. Packaged volume increased 4 percent and fountain volume grew 1 percent. Gallon sales of concentrates and syrups in the United States increased 2 percent. This follows 7 percent growth in gallon sales in the first quarter of last year.

At Coca-Cola Foods, first quarter U.S. retail volume in the chilled orange juice category increased 3 percent, while corresponding frozen orange juice volume declined 27 percent as a result of significantly higher orange juice prices due to the severe freeze in Florida in December, 1989.

Earnings per common share growth in the first quarter benefited from the Company's share repurchase programs. Approximately 3.5 million common shares were repurchased in the quarter, bringing the cumulative number of shares bought back under the current program to 8 million. The Company is authorized by its Board of Directors to repurchase an additional 12 million shares.

#90108p4001 04/18/1990 ~PR Newswire

NEW YORK (APRIL 18) PR NEWSWIRE - Isramco Inc. (NASDAQ: ISRL) reported today that the Negev Venture 2 Partners had decided to conduct production tests for natural gas in the sand horizon which was encountered at the 13,000 foot level in the Yam 2, being drilled 10 miles off the coast of Ashdod, Israel, in the Mediterranean Sea. The planned production test will be carried out after the well reaches total depth.

In making the announcement, Dr. Joseph Elmaleh, chairman, said that the electric logs had been run in the Yam 2 and based on their results and upon the fact that the sandstone horizon was found to be thicker than had originally been indicated, the decision to conduct production tests had been made. In order to conduct testing, 9 5/8 inch diameter casing will be run in the well between the 11,000 foot level and 15,750 feet which is the well's current depth.

Elmaleh further announced that the planned total depth of the well had been increased to 17,400 feet, from the original estimates of from 16,500 to 17,000 feet. In addition to the planned test at the 13,000 foot level, other tests may be conducted if future drilling warrants them.

Elmaleh also announced that the partners had decided, subject to final confirmation by their directors, to increase the budget by $3.7 million: consisting of $1.3 million for drilling, $1.7 million to cover the cost of the production test, and a previously authorized increase of $700 thousand. Thus the budget is now $22.6 million for the Yam 2 well.

Isramco Inc. is operator of the Negev Venture 2, which in association with Dr. Armand Hammer, chairman of Occidental Petroleum, a group of North

American investors and several Israeli companies is conducting the exploration for oil and gas reserves offshore of Israel in the Mediterranean and onshore in the Negev Desert.

CONTACT: Dr. Joseph Elmaleh, chairman of Isramco, 212-888-0200, or John Swanson of Swanson Communications Inc., 212-683-4890, for Isramco.

#90108p4006 04/18/1990 ~PR Newswire

ST. PAUL, MN (APRIL 18) PR NEWSWIRE - Ecolab Inc. (NYSE: ECL) reported a loss of $(4.3) million, or $(.18) per share for the first quarter ended March 31, 1990, compared with a loss of $(7.7) million, or $(.28) per share for the same period one year ago.

First quarter losses result from ChemLawn's seasonally low January through March period.

The loss from operations of $(2.4) million for the first quarter was a substantial improvement over the comparable $(7.7) million loss last year. The first quarter reported loss also included $(1.9) million for dividends on convertible preferred stock issued in December 1989. The preferred dividend and a smaller number of shares outstanding brought about by Ecolab's $110 million common stock repurchase program completed in February 1990 increased Ecolab's first quarter 1990 loss per share; without these two related events, Ecolab's first quarter loss would have been $(.09) per share. The impact from the common stock repurchase program, offset by the preferred dividend, will increase earnings per share in future profitable quarters; for the full year the effect is expected to be negligible.

Ecolab's first quarter sales increased 14 percent to $269 million from $235 million last year.

Ecolab Services Group had sales of $155 million for the first quarter of 1990, an increase of 13 percent from $138 million for the same period in 1989. All divisions contributed to the increase, as they benefited from new product sales and new customer accounts added during 1989. Operating income for the Group of $22 million was up 36 percent from $16 million last year. The Group's operating margin was 14.1 percent of sales in the first quarter of 1990, up significantly from 11.7 percent in 1989, reflecting higher sales volumes, the effect of pricing actions implemented in 1989 and improved profitability from the Pest Elimination and Textile Care Divisions.

ChemLawn revenues increased 32 percent to $38 million for the first quarter of 1990 compared with $29 million last year, reflecting more timely applications this year due to ChemLawn's preparedness to take

advantage of an earlier spring season. ChemLawn's operating loss was $(21) million, compared to last year's loss of $(24) million. The improvement was due to higher revenue, close control of selling and administrative expenses, better field management and improvement in specialist productivity.

International sales increased 10 percent for the quarter to $76 million from $69 million in 1989. Operating income increased to $2 million for the first quarter of 1990 compared with $1 million in 1989, reflecting the strong sales increases of the Institutional and Klenzade businesses and continued improvement in gross profit margins.

Commenting on the first quarter results, Pierson M. Grieve, chairman, president and chief executive officer, said, "The numbers speak for themselves. We expect these trends to continue throughout 1990."

Ecolab also announced the acquisition of selected assets of Henkel's United States and Canadian cleaning and sanitizing business. The acquisition is not expected to have a material impact on Ecolab's 1990 performance.

Ecolab is a leading worldwide developer and marketer of premium cleaning, sanitizing and maintenance services for the hospitality, institutional and residential markets.

For the year ended Dec. 31, 1989, Ecolab reported sales of $1.3 billion and earnings of $2.7 million, after preferred dividends, or $.10 per share including a one- time charge of $31.5 million, or $(1.15) per share.

1989 earnings would have been $34.2 million, or $1.25 per share, without the charge. Ecolab shares are traded on the New York Stock Exchange and the Pacific Stock Exchange under the symbol ECL.

#90108p4007 04/18/1990 ~PR Newswire

FORT LAUDERDALE, FL (APRIL 18) PR NEWSWIRE - Alamo Rent A Car, Florida's largest car rental company and the nation's largest independently owned and operated car rental firm, today announced it has created three new consumer-driven optional Collision Damage Waiver products in Florida with the launch of the industry's first-ever "Waiver Savers", effective tomorrow, April 19, 1990.

Collision Damage Waiver (CDW) is an optional product available to renters who wish to waive responsibility for damage and theft of the rental vehicle, subject to the terms and conditions of the rental agreement.

CDW is generally purchased by those consumers who carry no personal auto insurance coverage, those whose personal credit cards provide no collision damage protection, as well as those who prefer not to file claims for damage or theft with their own insurance carrier fearing a rise in premiums, policy review or even cancellation, depending on the size of the claim.

"We expect 'Waiver Savers' to revolutionize the car rental industry in Florida, the nation's No. 1 vacation destination," said Charles D. Platt, Alamo president. "When renters choose Alamo in Florida, not only will they be guaranteed the best possible price and unrestricted unlimited free mileage statewide, but they will also be able to choose from a selection of CDW products that perfectly suit their needs, whatever they may be. This is a significant departure from the traditional 'all-or-nothing' approach to CDW coverage."

The three new consumer-protection products that make up the "Waiver Saver" series -- Waiver Saver 500, Waiver Saver 3,000, and Maxi Waiver Saver -- provide three choices of price and coverage options tailored to virtually every renter's needs.

"Waver Saver 500": Perfect Complement To Personal Auto Insurance Waver Saver 500, covers damages up to $500, equivalent to the vast majority of consumers' personal auto insurance deductibles. The new product, unique to the industry, is designed to complement personal auto insurance policies, by paying up to $500 for damage to the rental car, thereby eliminating any out-of-pocket expenses for the renter.

For only $3 per day, Waiver Saver 500, is available in all Florida Alamo locations. It was developed in direct response to the growing consumer desire for first-dollar collision protection that ensures no out-of-pocket expenses whatsoever, without duplicating coverage already provided by the renter's own auto insurance policy.

According to the National Association of Insurance Commissioners (NAIC), 60 percent of those who rent a car have automobile insurance. Other industry sources estimate that 90 percent of those who carry insurance have deductibles of $500 or less.

The company believes Waiver Saver 500 will be enormously popular among the many travelers who have opted for high deductibles on their own policies -- because of cost considerations -- and still want full protection when they rent a car.

SEMINOLE, FL (APRIL 18) PR NEWSWIRE - Gerald M. Benstock, chairman and president of Superior Surgical Mfg. Co., Inc. (AMEX: SGC), manufacturer of uniforms, career apparel and accessories, today announced that for the first quarter ended March 31, 1990, sales increased four percent to $28,697,458 compared with 1989 first quarter sales of $27,562,830.

Net income increased 21 percent to $1,644,764 or $.75 per share, compared to 1989 first quarter earnings of $1,362,409, or $.60 per share.

In making the earnings announcement, Benstock stated, "The growth in sales and net earnings gives us confidence in projecting another record sales year in 1990 and an earnings performance greater than our sales gain."

Superior Surgical manufactures and sells a wide range of uniforms, career apparel and accessories for the hospital and healthcare fields; hotels; fast food and other restaurants; and public safety, industrial, transportation and commercial markets.

Comparative figures for 1990 are as follows:

	Three Months Ended March 31,	
	1990	1989
	(Unaudited)	
Net Sales	$28,697,458	$27,562,830
Earnings before Income Taxes	$ 2,609,764	$ 2,162,409
Provisions for Income Taxes	$ 965,000	$ 800,000
Net Income	$ 1,644,764	$ 1,362,409
Net Income per Share	$ .75	$ .60
Average Shares Outstanding	2,198,301	2,269,196

#90108p4015 04/18/1990 ~PR Newswire

MAUMEE, OH (APRIL 18) PR NEWSWIRE - TRINOVA Corporation's (NYSE: TNV) sales in the 1990 first quarter were comparable with the 1989 first quarter, while income from continuing operations declined.

"Our sales benefited from a strong worldwide commercial aerospace market and continued strong non-U.S. industrial and automotive production," said Darryl F. Allen, president and chief executive officer. "Offsetting this was flat U.S. industrial production and depressed U.S. automotive production early in the quarter.

"Weak conditions in these key U.S. markets in January and early February had a negative impact on our 1990 first-quarter results," Mr. Allen said. "However, as the quarter progressed, we saw improvement in many of our markets, particularly U.S. automotive. Sales outside the U.S. increased 16 percent for the quarter, and our geographic and market diversity was a key in keeping total sales at last year's level.

"The renewed momentum we saw in March has carried forward into April, and

we remain optimistic for 1990," Mr. Allen said.

1990 first-quarter sales were $485.6 million compared with 1989 first-quarter sales of $484.3 million. Operating income in the 1990 first quarter declined to $34.4 million, from $40.7 million in 1989.

Net income declined to $14.5 million, from income from continuing operations of $19.5 million in the 1989 first quarter. The decline was due primarily to a $5.2 million decrease in plastics' operating income from a year ago as a result of the decrease in U.S. auto production.

1990 first-quarter income per share was 46 cents, compared with income per share from continuing operations of 57 cents in the 1989 first quarter. The tax rate in the 1990 first quarter was 39.5 percent compared with 36.7 percent in the 1989 first quarter. The higher effective rate in 1990 is due to a greater percentage of income in certain countries outside the U.S. where tax rates are higher than in the U.S.

During the 1990 first quarter, TRINOVA repurchased 1.6 million of its outstanding shares, for a total of 2.9 million shares purchased under its initial program to buy up to 3 million shares. The 2.9 million shares have been purchased at an average share price of $23.68. In January 1990, the Company announced a program to purchase an additional 3 million shares upon completion of the initial program.

Power and Motion Control First-Quarter Highlights

($ millions)	1990	1989	Pct. Change
Sales	$403.2	$385.2	4.7
Operating Income	36.6	36.5	.3
Operating Margin	9.1	9.5	
Order Intake	432.3	432.8	(.1)
Order Backlog (3/31)	685.9	601.9	14.0

"Our sales were adversely affected by softness in U.S. industrial production early in the 1990 first quarter," Mr. Allen said. "However, this was offset by strength in non-U.S. industrial and commercial aerospace sales in the quarter. While we saw an improvement in Aeroquip's profitability from a year ago, Vickers' results were negatively affected by a change in product mix. Order intake was comparable with a year ago, and we were encouraged by the improvement in March North American industrial orders over March 1989. Order backlog reached a record high during the quarter."

CONTACT: Warren N. Bimblick (investor), 419-867-2290; or Thomas J. Ainsworth (press), 419-867-2298; both of TRINOVA.

TOKYO (APRIL 18) PR NEWSWIRE - Marriott Food and Services Management, Royal Co., Ltd., and Sumitomo Corporation today announced that they are entering into a joint venture to provide contract food service management in Japan.

The joint venture company, Royal Marriott and SC Corporation, will be incorporated in June. Total investment in the company will be 200 million yen (approximately $1.25 million). Royal will provide 45 percent of the capital, Marriott 35 percent and Sumitomo 20 percent.

Royal Marriott and SC will initially focus on offering contract food service for business organizations, but will expand to the health care and education markets in the future. Preliminary plans call for the first account to open before the end of the year.

"This venture has strong benefits for all three partners," said Kyoichi Egashira, chairman and founder, Royal Co. "It will enable us to expand from restaurants into contract food services. With Marriott's contract food service expertise and systems and Sumitomo's marketing capabilities, we will be well positioned to bring to firms in Japan a level of contract food service that has not been available in Japan until now."

Richard E. Marriott, executive vice president and vice chairman, Marriott Corporation, said, "We are excited at the opportunity we have to enter the Japanese market, especially with our partners. Royal's commitment to quality food service and Sumitomo's understanding of the Japanese market will enable us to compete effectively in the coming years."

Hajime Fukui, executive vice president, Sumitomo Corporation, said, "Broadening our investments into a new area of business is a key goal for us. We see this joint venture as a way to take advantage of an attractive area of business, with two strong, well-respected food service partners from both sides of the Pacific."

Royal Co., Ltd., is a food service industry leader in Japan, with about 2,700 employees in 386 operations in Japan and 135 subsidiary and affiliate restaurants in Hawaii and Australia. Founded in 1950, its 1989 sales totaled 75,999 million yen (approximately $475 million). Royal's businesses include restaurant chains Royal Host and Butlers; specialty restaurants; bakeries; airport catering; and manufacturing of bread, cake and ice cream.

Sumitomo Corporation is an integrated trading company with a global network of 141 offices in 85 countries. It makes markets in principal commodities; distributes business and consumer products worldwide; and invests in ventures promoting global flow of trade, technology and services.

Marriott Food and Services Management provides food, custodial, grounds, plant operations and maintenance, laundry and child care services to approximately 3,000 business, health care and education facilities in North America. The $2.3 billion (approximately 368 billion yen) division is a key growth vehicle for Marriott Corporation (NYSE: MHS), a diversified hospitality company involved in lodging and services.

#90108p4022 04/18/1990 ~PR Newswire

NEW BRITAIN, CT (APRIL 18) PR NEWSWIRE - "As we reported April 3, softness in economic sectors important to Stanley has resulted in flat sales and reduced earnings," according to Richard H. Ayers, chairman and chief executive officer of The Stanley Works (NYSE: SWK).

Ayers noted today, "Net earnings for the quarter were $22.5 million, down from the $24.6 million reported a year ago. Earnings per share were $.53, down 7 percent from the $.57 reported last year on slightly fewer shares outstanding."

Net sales of $484.1 million were up slightly from the $480.6 million reported for the first quarter last year. The gain resulted from price increases of 5 percent (3.5 percent in areas excluding Latin America) offset by a 4 percent reduction in unit volume.

Gross profit margins were down as manufacturing activity in U.S. home improvement and consumer businesses was reduced to adjust to lower levels of sales than planned. At the same time, inventories were actually reduced compared with first quarter 1989. Operating expenses as a percent of sales were unchanged from last year's first quarter, while Interest-net expenses were slightly favorable.

Other-net expenses reflect the gain of $.14 per share on the sale of the company's drapery hardware business in Europe. The gain was more than offset by a $.10 per share addition made to contingent liability reserves and the effect of other non-material items of $.07 per share.

Net earnings as a percent of sales were 4.6 percent in the first quarter of 1990 compared with 5.1 percent last year. The effective tax rate was 40 percent, up slightly from 39 percent in first quarter 1989.

Ayers concluded, "We continue to believe that 1990 will be another record year for The Stanley Works -- both in sales and earnings. In view of the economic uncertainties for the balance of the year we are unable to

quantify the degree of improvement over 1989."

NEW YORK (APRIL 18) PR NEWSWIRE - Merrill Lynch (NYSE: MER) today reported 1990 first quarter net earnings of $41.3 million, or $.34 per common share (primary and fully diluted), compared with earnings from continuing operations of $35.5 million or $.29 per common share (primary and fully diluted) in the same period last year.

"Quarterly results improved despite a 5 percent decline in total revenues, reflecting solid progress in cost reduction, with operating expenses down in virtually every category. Our previously announced restructuring program is beginning to have a positive impact on costs, and we expect that its benefits will accelerate in subsequent quarters," said William A. Schreyer, chairman and chief executive officer, and Daniel P. Tully, president and chief operating officer.

The company reported that total expenses of $2.60 billion were reduced by 5 percent from the $2.73 billion reported a year earlier.

Total revenues in the quarter were $2.66 billion, versus $2.80 billion for the same period a year ago. While commissions, principal transactions, insurance, and asset management and custodial fee revenues increased, interest and dividend, investment banking and other revenues declined.

"The quarter's results reflected the continuing success of our asset-gathering and fee-based strategy," Schreyer and Tully noted. Total client assets increased to $336 billion, and assets under management increased to nearly $104 billion.

"The decline in investment banking revenues reflected lower levels of underwriting and merchant banking activities that continue to prevail throughout our industry," they said. "Nevertheless, we are pleased that Merrill Lynch maintained its number one ranking in domestic and global underwriting. We're also pleased that our swap and mortgage-related areas performed well."

Operating expenses, exclusive of the insurance business, also decreased 5 percent versus the prior year. Compensation and benefits expense declined 3 percent, occupancy including depreciation and amortization decreased 7 percent, and communications and equipment rental declined 12 percent. These declines resulted from intensive cost controls, the effects of the restructuring program and the effect of lower revenue-related compensation programs reflecting reduced activity.

#90108p4027 04/18/1990 ~PR Newswire

ATLANTA (APRIL 18) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) today reported earnings per share of $1.18 for the three months ended March 31, 1990, compared with $1.65 per share in the 1989 quarter.

Net income in the first quarter was $101 million versus $154 million in 1989. The quarterly results included Great Northern Nekoosa's earnings for the 23 days since Georgia-Pacific completed the purchase of its controlling stock interest on March 8.

Building products operating profits increased in the 1990 first quarter to $115 million from $99 million a year ago, while pulp and paper profits for the same period were $182 million versus $247 million in 1989.

Sales were $2.7 billion in the 1990 first quarter compared with $2.4 billion last year. Interest expense increased to $97 million during the quarter, compared with $66 million in the 1989 period, because of the debt associated with the acquisition of Great Northern.

"Lower prices for many of our pulp and paper products, in addition to the strike at our Toledo, Ore., linerboard mill, reduced Georgia-Pacific's profitability during the first quarter," said T. Marshall Hahn Jr., Georgia-Pacific's chairman and chief executive officer. "It appears, however, that pricing has stabilized in most markets. Tissue remains a strong performer, and we are seeing improvement in printing paper demand and pricing.

"The building products segment exhibited some encouraging signs during the quarter. Product prices began improving, with plywood prices especially strong due in part to restricted availability of timber in the Pacific Northwest."

#90108p4028 04/18/1990 ~PR Newswire

BRIDGEPORT, CT (APRIL 18) PR NEWSWIRE - Citytrust Bancorp, Inc. (NYSE: CYT) today reported a net loss of $7,395,000, or $1.78 per share, for the quarter ended March 31, 1990, compared to net income of $6,475,000, or $1.54 per share, for the first quarter of 1989.

"The loss was primarily attributable to a provision of $12.4 million to the company's loan loss reserve as a result of the continued deterioration of the Northeast real estate market," said George F. Taylor, chairman of the board and chief executive officer. Total non- performing assets of $285 million at March 31 represented an increase of $28 million over Dec. 31.

The loss was reduced in part by one-time gains of $7.4 million, which resulted from a $2.9 million gain on the sale of mortgage servicing rights a $2.6 million gain from the annuitization of a portion of the company's pension plan obligation, and $1.9 million of net security gains. These gains are part of the company's previously announced plan to increase capital and reduce assets.

The company also experienced a decline in net interest margin. This resulted from lost income associated with nonaccruing assets and high deposit costs in New England, which are approximately 80 basis points above the national average. "Our bank subsidiary, Citytrust, is competing in a local environment where banks are paying depositors the highest interest rates in the country," Taylor noted.

Citytrust Bancorp, Inc. is an independent Connecticut bank holding company. Its principal subsidiary, Citytrust, serves major markets throughout Connecticut and high-potential growth areas in New York through 46 retail branches and 11 business financial services centers. The corporation's other subsidiary, Capital Impact Corporation, is a Small Business Investment Company.

HOUSTON (APRIL 18) PR NEWSWIRE - Kelley Oil Corporation (NASDAQ: KOIL) announced today that total revenues for the year ended Dec. 31, 1989 were $35,815,000, up 86 percent as compared to total revenues of $19,270,000 for the year ended Dec. 31, 1988. Cash flow from operations for 1989 was $2,089,000 vs. $603,000 for the 1988 period, an increase of 246 percent.

Net income for 1989 was $192,000, an increase of $697,000 compared to a net loss of ($505,000) for 1988.

At year end 1989 there were 11,561,275 common shares outstanding, up six percent over the 10,900,000 common shares outstanding at year end 1988. Based upon average shares of 11,214,000, cash flow from operations per share increased 217 percent to $0.19 and net income per share was $0.02. The corresponding per share figures for 1988, based on average shares of 10,900,000, were cash flow from operations of $0.06 and net loss per share of ($0.05).

Reserves as evaluated by the company's independent petroleum engineers as of Jan. 1, 1990 were 14,510,000 Mcf of natural gas and 234,894 barrels of oil, condensate and natural gas liquids. Reserves as of Jan. 1, 1989, were 10,445,000 Mcf of natural gas and 82,584 barrels of oil, condensate and natural gas liquids. The discounted future net income (SEC basis) at Jan. 1, 1990 is $15,614,038, a value above the company's carrying cost for its oil and gas properties.

Kelley Oil Corporation is an independent oil and gas producer with oil and gas properties located primarily in Louisiana. Kelley Oil Corporation serves as the Managing General Partner of Kelley Oil & Gas Partners, Ltd. (AMEX:KLY), in which it owns interests aggregating 6.56 percent. It also serves as Managing General Partner of Kelley Partners 1988 and 1989 Development Drilling Programs and owns interests of 48.11 percent and 44.32 percent, respectively, in these publicly held programs. Concorde Gas, Inc., a wholly owned subsidiary, markets gas for the company, its affiliates and third parties.

Kelley Oil Corporation's common stock is quoted on the NASDAQ system under the symbol KOIL.

#90108p4034 04/18/1990 ~PR Newswire

HOUSTON (APRIL 18) PR NEWSWIRE - Nustar International Inc. today unveiled a new line of computer software products it said would sharply enhance the ability of businesses to develop and move information over electronic networks.

The Morse 2000 Information Server from Nustar was developed to help companies easily "publish" on-line information over telephone lines using desk top computers and other display devices including videotex terminals.

The software provides an efficient way to quickly develop, test, and

electronically distribute a wide range of information, including internal corporate, sales and personnel, instruction and training, plus information and ideas for sales people.

Nustar said Morse 2000 gives corporate managers a new electronic communications tool to keep employees and customers informed about company policies, products, and services.

This new software product will help companies reduce the cost and simplify the job of training people, Nustar said.

Morse 2000 includes an Authoring System and a Server System. The Authoring System is used to develop and test the information services prior to moving them to the Server System which is typically connected to a local or national gateway or by a direct link to a set of dedicated telephone lines.

The Server can operate on a computer as small as a 386 PC running a Unix/Xenix operating system, permitting information providers to readily operate electronic services from their own premises. The Authoring System runs on a standard MSDOS PC computer and features an "object oriented" development environment which includes an easy to learn command language and the ability to create on-screen navigation "buttons."

"The Authoring System is very user-friendly, making it simple for people with no computer programming skills to develop and distribute a wide range of educational, instructional, and need-to-know information," Amin J. Rahme, president of Nustar said.

"This is an information world -- getting the right information to the right person in a timely manner creates a competitive edge in today's business environment ... Morse 2000 is ideally suited to do just that," he said.

Nustar International is a private corporation that designs and markets software products and services for corporate and private users of telecommunications and information technologies.

WILMINGTON, DE (APRIL 18) PR NEWSWIRE - Shareholders of The Coca-Cola Company (NYSE: KO), at their annual meeting today, approved a two-for-one stock split and elected five directors.

The split applies to stock held by shareholders of record at the close of business on May 1. The additional shares will be mailed on May 11. Existing stock certificates will remain valid and outstanding. In approving the stock split, shareholders voted to increase the authorized

common stock of the Company from 700 million shares to 1.4 billion shares.

In other business, shareholders elected Cathleen P. Black, executive vice president/marketing of Gannett Company, Inc. and publisher of USA Today, to serve on the Company's Board of Directors for a term ending in 1993.

Re-elected to the Board, also for three-year terms, were Warren E. Buffett chairman and chief executive officer of Berkshire Hathaway Inc.; Donald R. Keough, president and chief operating officer of The Coca-Cola Company; James T. Laney, president of Emory University; and William B. Turner, chairman of the executive committee of W.C. Bradley Co. Shareholders also ratified the appointment of Ernst & Young as the Company's independent auditors for the fiscal year ending Dec. 31, 1990. Shareholders voted overwhelmingly against a proposal relating to South Africa and against a proposal relating to confidentiality in the voting of proxies.

RICHMOND, VA (APRIL 18) PR NEWSWIRE - Ethyl Corporation (NYSE: EY) today reported net income of $52.4 million, or 44 cents a share, for the first quarter of 1990, up slightly from 1989 income from continuing operations of $51.1 million, or 43 cents a share.

Insurance segment income, including slightly higher realized investment gains (equivalent to one cent per share), was up 24 percent for the first quarter of 1990, while chemicals segment operating profit was down six percent. Ethyl said First Colony's performance continues to be very strong. Chemicals results reflect sharply lower antiknock shipments, while non-antiknock chemicals operations overall were favorable compared to a year ago.

Ethyl's total net sales and insurance revenues were $609.7 million for the first quarter of 1990, up seven percent from $570.5 million for the first quarter of 1989. Insurance revenues increased 25 percent in the first

quarter from 1989, while chemicals net sales for 1990 declined three percent from 1989.

At the beginning of the third quarter of 1989, Ethyl spun off its aluminum plastics and energy businesses as Tredegar Industries, Inc., (NYSE: TG) the results of which were reported as discontinued operations in Ethyl's 1989 earnings. On this basis, first-quarter 1990 net income was below last year's net income of $56.4 million, or 47 cents a share, after including first-quarter 1989 income from discontinued operations of $5.3 million, or four cents a share.

Floyd D. Gottwald, Jr., chairman of the board, said: "We are generally pleased with the overall performance of Ethyl's diverse businesses in last quarter's economic environment."

NORWOOD, MA (APRIL 18) PR NEWSWIRE - Analog Devices, Inc. (NYSE: ADI) today reported that the plan the company initiated last year to purchase up to 2 million shares of its own common stock is substantially complete. At the same time, the company announced it may purchase up to 2 million additional shares on the open market from time to time over the next several months. The decision to consider purchasing more shares was based on the company's strong balance sheet and its continuing belief that the shares represent an attractive investment. Analog Devices currently has approximately 47 million shares of common stock outstanding.

With fiscal 1989 sales of $453 million, Analog Devices is a leading manufacturer of precision high peformance linear integrated circuits used in signal processing applications. The company also manufactures modular and board-level products and subsystems used in computerized data acquisition and measurement and control applications that involve processing information obtained from real-world sensors. The company employs approximately 5,000 people worldwide, with manufacturing facilities in Massachusetts, North Carolina, the United Kingdom, Ireland, the Phillippines and Japan.

PEAPACK, NJ (APRIL 18) PR NEWSWIRE - Fedders Corporation (NYSE: FJQ), the room air conditioner manufacturer, today announced that sales rose 5 percent in the first quarter ended March 31, 1990, to $112.5 million from $107.0 million in the prior-year quarter.

Earnings per share increased 22 percent as net income rose to $8.1 million or 44 cents per share, in the first quarter of 1990 compared with $6.8 million, or 36 cents per share fully diluted, a year earlier.

Chief Executive Officer Sal Giordano Jr. attributed the net income improvement primarily to "integration of the company's three acquisitions " as was anticipated. "Transition costs associated with those acquisitions, which commenced in late 1988, had put pressure on profit margins for most of 1989, even though sales rose sharply last year.

"For the balance of 1990, we expect continued sales and earnings growth -- as we realize additional benefits from integrating the acquisitions, plus ongoing productivity improvements," Giordano said.

DANBURY, CT (APRIL 18) PR NEWSWIRE - Union Carbide Chemicals and Plastics Company Inc. (UCC&P) today announced a 70 million pounds- per-year expansion of its ethanolamines capacity. The multi-stage expansion, slated for completion July 1, will boost UCC&P's ethanolamines capacity to 400 million pounds annually and bolster its position as the world's leading producer of these versatile chemicals.

According to W.E Shackelford, vice president of UCC&P's Industrial Chemicals Division, the expansion is the result of a series of low-cost debottlenecking projects at existing U.S. Gulf Coast facilities that increased production capacity and substantially improved reliability and flexibility.

Major end use markets for ethanolamines include liquid laundry detergents, oil refining, natural gas processing, cement and concrete production, urethane foam catalysts, intermediates for personal care products and industrial and institutional cleaners.

UCC&P, a wholly owned subsidiary of Union Carbide Corporation (NYSE: UK), is also the world's leading producer of ethylene oxide, the primary raw material needed for the production of ethanolamines.

#90108p4058 04/18/1990 ~PR Newswire

RESEARCH TRIANGLE PARK, NC (APRIL 18) PR NEWSWIRE - Northern Telecom (NYSE: NT) announced today that the company is implementing a recycling program in its Research Triangle Park facility as a part of its Earth Day activities. The company is involved in a variety of environmental awareness events related to Earth Day including phasing out the use of chlorofluorocarbons (CFCs) in the company's North Carolina plants, donating trees and shrubs to Triangle employees, sponsoring Earth Day Raleigh activities, and sponsoring an environmental forum at Duke University.

"Recycling results in cost savings for not only North Telecom, but the local and global communities as well," said Leah Burnett Jung, Regional Environmental Specialist. "Recycling reduces the amount of waste sent to local landfills which charge companies according to how much tonnage is dumped. In addition, it reduces the use of natural resources and it

reduces the need to locate new landfill sites."

On April 21, Northern Telecom's Research Triangle Park facility will remove equipment associated with CFC use. This action confirms the company's commitment made in January to completely phase-out CFCs in its North Carolina plants by the end of the year and worldwide by the end of 1991. Like many other electronics manufacturers, the company has been using CFCs, the most effective cleaning solvent available, for years in its manufacturing processes. CFC use became commonplace long before scientists were aware that the chemical contributed to the depletion of the earth's protective ozone layer. The Northern Telecom deadline is years ahead of national and international mandates, and the company is the first telecommunications firm to announce such an ambitious phase-out.

In celebration of the first Earth Day twenty years ago, Northern Telecom will set up booths at area facilities to increase employee awareness about environmental concerns.

"Each effort our employees make toward waste minimization, recycling, energy conservation and in choosing products that do not damage the environment adds to improving the world we live in," said Susan Bedford, Employee Services Administrator.

As a part of this celebration, the company will donate trees to its Triangle area employees whose names will be randomly chosen in a drawing during the Earth Day celebration. Trees absorb carbon dioxide from the air in the process of creating oxygen. Excessive carbon dioxide concentrations have been linked to global warming. Employees are encouraged to plant the trees at home. The company is coordinating similar activities at other facilities across the nation.

In addition, Northern Telecom recently sponsored an environmental forum at Duke University and is a sponsor of Earth Day Raleigh activities.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs approximately 22,000 people across the U.S.

BARRIE, ONTARIO (APRIL 18) PR NEWSWIRE - InterTAN Inc. (NYSE: ITN)

announced today that consolidated sales for the third quarter of its 1990 fiscal year were $191,357,000, an increase of 7 percent over prior year sales of $178,279,000. Net income for the three months ended March 31, 1990 was $7,008,000 compared to net income of $14,015,000 in the same quarter of the prior year. Earnings per share for the quarter ended March 31, 1990 decreased by 51 percent to $.79 based on 8,906,000 average shares outstanding compared to $1.60 based on 8,756,000 shares for the same quarter last year.

For the nine months ended March 31, 1990, consolidated sales totaled $538,634,000, up 5 percent from sales of $513,308,000 in the first nine months of fiscal 1989. Net income for the first nine months was $28,175,000, against earnings of $35,525,000 for the same prior year period. Earnings per share on average shares of 8,861,000 decreased by 21 percent to $3.18 for the nine months ended March 31, 1990 against $4.01 for the same period last year on 8,859,000 average shares.

"As had been indicated in our press release of March 29, 1990, softness in sales and resulting markdowns taken to reduce excess inventories, particularly in microcomputers, impacted gross margins and net earnings for the quarter and nine month period. Although the sales pace remains subdued, the company is making progress in reducing inventories," stated Robert E. Keto, president and chief operating officer.

#90108p4068 04/18/1990 ~PR Newswire

PHILADELPHIA (APRIL 18) PR NEWSWIRE - Rohm and Haas Co. (NYSE: ROH) today reported first quarter 1990 earnings of $54.1 million, or $.81 per share, a 2 percent increase over the first quarter of 1989.

Sales of $694 million also were 2 percent higher than the comparable 1989 figure.

"We are generally pleased with the company's financial performance," said J. Lawrence Wilson, chairman of the board. "The positive effects of modest sales increases, smoother plant operations and a favorable litigation settlement were dampened by continued sluggish economic conditions and higher financing costs related to our capital expenditure program."

The Polymers, Resins and Monomers (PRM) business group reported significant sales increases during the quarter. Lower raw material prices and strong manufacturing operations at monomer plants in Houston, Texas, helped PRM achieve a 9 percent earnings gain. The favorable litigation settlement with Rhone-Poulenc was a significant factor in the earnings

increase for Agricultural Chemicals. The Plastics business group encountered slower growth in its key markets, higher raw material prices and higher costs associated with new product introductions.

On a regional basis, European region sales were helped by stronger currencies, although earnings were diminished by a charge for waste-site accruals. Pacific Region earnings were hurt by the weakening Japanese yen. In Latin America, rapidly deteriorating economic conditions in Brazil and Argentina resulted in a loss for the region.

Wilson said that the company's performance in the first quarter confirms management's belief that its full-year 1990 operating earnings will be roughly equivalent to that of 1989.

WORCESTER, MA (APRIL 18) PR NEWSWIRE - Norton Company (NYSE: NRT) today said it was gratified by the swift passage and subsequent signing of The Act to Provide Protection to Massachusetts Corporations (H.5556) by the Massachusetts legislature and Gov. Michael S. Dukakis.

John M. Nelson, chairman and CEO of Norton said, "No longer will a Massachusetts company be vulnerable to the one-two punch of a simultaneous last-minute tender offer and proxy fight -- designed to stampede its board into making a hasty decision about the company's future."

"I want to thank the many friends of Norton Company who made this bill possible. I am especially grateful to Norton employees, who, in spite of everything, do not give up. Norton will continue its fight to remain independent," Nelson said.

DAYTON, OH (APRIL 18) PR NEWSWIRE - NCR's (NYSE: NCR) Open, Cooperative Computing strategy positions NCR for leadership in the new era of cooperative computing, said NCR Chairman and Chief Executive Officer Charles E. Exley, Jr. Exley spoke at NCR Corporation's annual meeting held here today.

"Open, Cooperative Computing represents a powerful solution to the fundamental information systems issues facing businesses today...a

solution that will allow NCR customers to make an orderly transition from today's environment to tomorrow, while preserving their current investments...a solution that positions NCR for leadership in this new era...and a solution that will create value for our shareholders and other stakeholders," he said.

Exley identified cooperative processing as the sixth era of business information processing, following batch processing, time sharing, departmental processing, personal computing, and networking. He said that the objective of NCR's Open, Cooperative Computing strategy is to link the "islands of automation" that have arisen as organizations have evolved their information systems over many years.

Shareholders approved the re-appointment of Price Waterhouse as NCR's independent accountants for 1990. They also voted to re-elect John J. Horan, Harold A. Poling, Frank P. Popoff, and R. Elton White to the board of directors for three-year terms expiring in 1993, and Charles A. Corry and David R. Whitwam for two-year terms expiring in 1992.

Shareholders voted against a proposal to terminate NCR's remaining economic relationships with South Africa. In 1989, NCR sold its South African subsidiary to unrelated parties. As part of the sale, NCR entered into contractual agreements which continue the sale of NCR products in South Africa through the purchasers of the subsidiary. The board of directors continues to oppose apartheid, and believes that the course chosen is the most advantageous for NCR, its shareholders and other stakeholders.

Shareholders also voted against a proposal to adopt the MacBride Principles, which pertain to equal opportunity employment by corporations conducting business in Northern Ireland.

Exley said that as a matter of corporate policy, NCR does not discriminate against employees or applicants for employment on the basis of religion. In addition, NCR complies with the laws in Northern Ireland prohibiting religious discrimination and preferential treatment in employment.

Shareholders declined to adopt a proposal calling for a confidential system of proxy voting.

NCR develops, manufactures, markets and supports business information processing systems for worldwide markets.

ROGERS, CT (APRIL 18) PR NEWSWIRE - Rogers Corporation (AMEX: ROG), reported record sales of $47.9 million in the first quarter, 13 percent above the $42.3 million in last year's initial period. Net income for the quarter was $497,000, or 16 cents per share, compared with $333,000, or 11 cents per share, in 1989. Expenses of 3 cents per share were incurred during the quarter for termination charges in connection with cost reduction actions.

Norman L. Greenman, president of Rogers Corporation, said, "Interconnection Products sales, up over 20 percent, accounted for the volume increase, but profits, while showing improvement, were held down by costs incurred as a result of the interruption since February in the production ramp of our major order from Motorola for multimetal layer TAB (Tape Automated Bonding) components. As mentioned in the 1989 Annual Report, that interruption stemmed from a process problem in assembly of our TAB components by the end-user computer manufacturer; and the problem is being addressed through an intense effort by all three companies."

Headquartered in Rogers, Conn., Rogers Corporation manufactures a broad range of engineering materials and components for the electronics and other selected industrial markets at 17 locations in the U.S., Europe and Mexico.

HOUSTON (APRIL 18) PR NEWSWIRE - United Savings Association of Texas FSB announced today that it has signed a definitive agreement with Commonwealth Mortgage of America, L.P. (NYSE: CMA) for the purchase of CMA's entire mortgage loan origination group.

CMA is among the nation's largest residential mortgage originators and produces approximately $3 billion in loans on an annualized basis out of 46 offices in 16 states. United Savings will assume CMA's warehouse of mortgages and its existing mortgage loan pipeline as part of the purchase of the loan origination group.

Chairman Lewis S. Ranieri commented, "United Savings is committed to becoming one of the nation's leading financial services firms, and this transaction is another step forward toward that major business goal."

President Kenneth H. Thorn added, "The Commonwealth group, when added to our existing loan origination and servicing operations, will give United one of the largest residential mortgage banking operations in the country."

Completion of the sale is expected in June and is contingent upon approval from the appropriate regulatory authorities. CMA will continue to originate loans until the sale is finalized and the transfer is completed.

CMA is a publicly traded limited partnership headquartered in Houston. It will continue to service a substantial portfolio of residential mortgage loans after selling the loan origination side of its business.

Houston-based United Savings is a federally chartered savings institution with $3.3 billion in assets and 19 branches in Texas.

#90108p4101 04/18/1990 ~PR Newswire

BRISTOL, CT (APRIL 18) PR NEWSWIRE - Barnes Group Inc. (NYSE: B), today reported a 15 percent increase in net income per common share for the first quarter of 1990 on a sales gain of 10 percent compared with the same period last year.

Sales for the first quarter totaled $141 million against $129 million last year. Earnings per common share for the quarter were 61 cents versus 53 cents a year ago. Net income applicable to common stock was $3.7 million, compared with $2.9 million in 1989.

Wallace Barnes, chairman and chief executive officer, said, "The company's first quarter results were encouraging, as operating profits at all three of our businesses were up over last year.

"Our Aerospace business staged a comeback in the first quarter compared with a poor quarter a year ago," Barnes said. "Including the results of Flameco, an aerospace parts fabricator acquired last October, sales were up 57 percent in the first quarter, and profits nearly doubled. The group's results were boosted by solid performance at its Windsor Manufacturing precision machining unit and at its Windsor Airmotive engine component overhaul facility."

Its Jet Die advanced fabrications unit also continued to show improvement, Barnes said. So did Flameco, which had an operating loss of $0.7 million in the first quarter on sales of $4.0 million, versus a fourth quarter 1989 loss of $1.2 million on sales of $3.1 million.

The Bowman Distribution group had an 8 percent sales gain for the quarter, as all of its operations had higher sales than a year ago, Barnes said. "Profits also increased, but not at quite the same pace, due primarily to continued investments in agent and field sales management training, and in its management information system," he said.

At Associated Spring, profits were up despite a 3 percent fall-off in shipments, Barnes said. "Results from our valve spring business continued to improve, and we benefited from sharply reduced group headquarters costs " he said. "Overall, orders for our spring products were satisfactory in the first quarter. We see no serious softening of the North American industrial market, although the automotive market is weak compared with a year ago."

The first quarter results reflected a $1.6 million foreign currency translation loss, almost entirely from Brazil, compared with only $25,000 last year, Barnes said. "The near-term prospects for our Brazilian spring business are highly uncertain, but for the longer term we remain optimistic about our subsidiary in that country," he added.

"The outlook for the company for the full year is positive," Barnes said. "We continue to look for moderate gains in sales, and a good rebound in earnings."

Based in Bristol, Conn., Barnes Group Inc. is a major distributor of consumable parts and supplies for the maintenance and repair market, and a leader in producing close-tolerance springs and precision components for aerospace, automotive and other durable goods markets.

#90108p4102 04/18/1990 ~PR Newswire

OAK BROOK, IL (APRIL 18) PR NEWSWIRE - Chemical Waste Management, Inc. (NYSE: CHW) today reported record first quarter net income, revenue and earnings per share.

Net income, for the quarter ended March 31, totaled $34,705,000, up 19.8 percent from $28,973,000 in the year-ago quarter. Revenue of $232,751,000 was 22.6 percent higher than the $189,828,000 reported in the first quarter of 1989. Earnings per share of $0.17 rose 21.4 percent over the $0.14 reported in last year's first quarter.

"Continuing growth, in the company's base business and in site cleanup projects of the Environmental Remedial Action division, both contributed to the company's record results," said Dean L. Buntrock, chairman of the board.

"Chemical Waste Management benefited from the continued strong demand for its hazardous waste management services that was evident all during 1989," said Jerry E. Dempsey, president and chief executive officer.

"The Environmental Remedial Action division completed the quarter with an excellent backlog of remediation projects, and we expect it to continue its strong performance in the months ahead," he stated.

"Chem Waste sees substantial opportunities ahead in 1990 in the markets we serve, and we have ambitious expansion plans underway to realize the growth opportunities available to us," Dempsey said.

"During the first quarter, the company acquired two environmental engineering and consulting companies, and these professional organizations will provide new capabilities for Chem Waste," Dempsey stated. These two companies, Sirrine Environmental Consultants and Enwright Environmental Consulting Laboratories, which are both located in Greenville, S.C., also will support our new subsidiary, Chem-Nuclear Environmental Services,

Inc. CNES is focusing its services in the growing federal facilities market, which we see as offering significant growth opportunities in both mixed waste (hazardous and radioactive) and hazardous waste remediation and management," Dempsey stated.

Chemical Waste Management completed trial burns in the first quarter at its new 150 million BTU per hour hazardous waste incinerator at Port Arthur, Texas.

After the end of the quarter, Alabama's governor signed into law a bill which would increase the tax on waste disposed of at the company's Emelle facility. Under the new measure, which is scheduled to take effect on July 15, 1990, the tax will be raised from the existing rate of $22.00 per ton to $40.00 per ton for in-state waste and to $112.00 per ton for out-of-state waste.

Company officials believe the legislation will disrupt the national effort to improve e GENERAL PURPOSE PASS-ALL UP AND RUNNING scriminates against interstate commerce. In addition, the five-fold increase in taxes on out-of-state waste will place an onerous burden on customers who use the company's Emelle facility. For these reasons company officials anticipate that the legislation will be challenged in court.

Chemical Waste Management has a network of facilities which it will seek to utilize in serving customers who are affected by the tax. However, the company is unable at this time to predict the extent of the impact the legislation will have upon its business.

LOS ANGELES (APRIL 18) PR NEWSWIRE - The Foothill Group Inc. (NYSE: FGI) today reported that net income for the first quarter ended March 31, 1990, was $2,101,000, or 20 cents per fully diluted share, compared with net income of $3,408,000, or 30 cents per fully diluted share, for the 1989 first quarter.

Total revenues in the 1990 first quarter were $23,575,000, compared to $24,318,000 in the 1989 first quarter.

Don L. Gevirtz, chairman and chief executive officer, said, "Foothill Capital, our primary core earnings contributor, performed very well and first quarter 1990 profits exceeded those in the 1989 first quarter. Foothill Thrift and the Capital Markets Division (parent company) performed at levels below the 1989 first quarter. Foothill Thrift experienced reduced revenues in the first quarter as a result of selling

$40 million in mortgage backed securities in 1989 and investing in short term investments with lower yields in 1990. This restructuring of assets will enable the Thrift to increase revenues by reinvesting these funds in its lending activities.

"Profitability of our Capital Markets Division was also affected in the quarter by the substantially lower level of realized gains on sales of investments as compared to the 1989 first quarter."

Total assets grew to $674,504,000 from $658,470,000 at the end of 1989. The Foothill Group specializes in providing innovative financial services through its three highly specialized, yet complementary operating units. Foothill Capital offers asset-based financing tailored to businesses whose credit needs require more unique, sophisticated types of loan programs. Foothill Thrift specializes in fully secured commercial real estate loans. The Capital Markets Division focuses on asset management activities, arbitrage trading and investing in companies in reorganization.

#90108p4106 04/18/1990 ~PR Newswire

PALATINE, IL (APRIL 18) PR NEWSWIRE - Square D Co. (NYSE: SQD) today reported net earnings per common share of $1.09 for the first quarter 1990 the same as a year ago, with sales and net earnings from continuing operations down about 1 percent from the first quarter of 1989.

Jerre L. Stead, chairman, president and chief executive officer, said sales were $396.5 million for the period ended March 31, 1990, down 1.3 percent from $401.7 million in 1989. He said net earnings from continuing operations were $27.1 million, down 1.4 percent from $27.5 million a year earlier. ''We expected a slowdown in the first quarter and actually did a bit better than we anticipated,'' said Stead.

After giving effect to the company's new convertible preferred stock dividend, earnings available for common shares were $25.5 million in the first 1990 quarter, compared with $27.6 million in 189. On a fully diluted basis, per-share earnings were $1.05 compared with $1.08 a year earlier.

Operating earnings from continuing operations were $42.7 million in the first quarter, down 10.4 percent from $47.7 million in 1989. Stead said this decline was largely offset by an increase in non operating income.

The Square D chief executive said that operating earnings of the Industrial Control Segment were lower than 1989 due to increased

expenditures for research and development, increased expenditures in Technical Services, and weaker year over year performance in the Power Protection Systems and the Automation Products Businesses. He said development expenditures for a new sensor product line, other new products and increased expenses to fund rapid growth of the Technical Services Division will enhance Square D earnings in the years ahead.

Stead said Electrical Distribution Segment operating earnings were up modestly compared to 1989, despite a slow market in residential and light commercial construction in the 1990 first quarter. Electric Distribution results reflect the improvements from productivity and other programs designed to improve profit margins.

''Overall, we are continuing to balance short-term performance with ur need to invest for long-term codmpetitive advantage. We expect 1990 to be an excellent year for Square D,'' said Stead.

He said that as of March 31, 1990, Square D had repurchased approximately 6.4 million of the 7.5 million common shares authorized since the company's share buyback program was instituted at the end of 1986. The company had an average of 23,385,000 common shares outstanding in the quarter ended March 31, 1990, down 7.9 percent from the year-earlier period.

Square D is a worldwide leader in industrial control and electrical distribution products, systems and services, and had 1989 sales from continuing operations of $1.63 billion.

WINTER PARK, FL (APRIL 18) PR NEWSWIRE - Due to the continued and rapid expansion of Philip Crosby Associates (PCA), several management changes have taken place.

Philip Crosby, founder chairman and creative director of PCA, the world's largest education and consulting firm dealing specifically with quality management, announced the following changes made by the board of directors:

Larry McFadin, formerly president and chief executive officer, was promoted to chairman. He will continue to serve as CEO.

Lance Arrington has been elected president and will continue as chief operating officer.

In order to assure continued focus on client service, Executive Vice President Jim Frankovich will be responsible for the Far East, Asia and Pacific operations; Executive Vice President Len Suminski will be responsible for the Americas; and Executive Vice President Ken Merbler will manage Europe, Africa and the Middle East. All three of these executive vice presidents will report to Lance Arrington.

Larry McFadin, who joined PCA in 1980, helped to develop the Quality Education System, the Quality Awareness Experience, and the Prevention Implementation Model. He also has served as president and chief operating officer from 1984 to 1988. Before 1984, he was president of the Creative

Services Division and executive vice president of PCA. He was also an account executive who worked with clients and was dean of the Quality College.

As well as assuming the duties of president, Lance Arrington will continue to be responsible for all of the firm's operations worldwide, including its international subsidiaries and joint ventures. He was responsible for building PCA into a global business enterprise. He has been a quality management professional for over 25 years in both the United States and abroad. Arrington joined PCA in 1979.

Philip Crosby founded PCA in 1979 to assist client companies in addressing and improving the quality of their products and services.

He is often referred to as the "Father of Zero Defects" and he is known as a pioneering guru of quality management. Crosby, an international spokesperson on quality management, is a bestselling author. Quality is Free, published in 1979, still remains on the business bestseller list.

#90108p4120 04/18/1990 ~PR Newswire

MINNEAPOLIS (APRIL 18) PR NEWSWIRE - TCF Financial Corporation (TCF) (NYSE: TCB) today reported net income of $3.2 million for the first quarter ended March 31, 1990, down from $5.1 million for the first quarter of 1989 which included a $4.1 million non-recurring gain.

First quarter 1990 net income was up from the $3 million earned for the 1989 fourth quarter. Earnings per share were 44 cents for the 1990 first quarter, compared with 71 cents for the 1989 first quarter and 41 cents for the 1989 fourth quarter.

Commenting on the company's performance, TCF Chairman and Chief Executive Officer William A. Cooper said, "Our 1990 first-quarter earnings are attributable to operating income rather than non-recurring gains. We benefited from an improved net interest margin and continued fee income growth." Cooper noted that the $4.1 million gain in TCF's 1989 first quarter came from the sale of loan servicing rights, which did not recur in the 1990 first quarter.

Cooper also said that TCF was impacted by changes mandated by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). Lower Federal Home Loan Bank stock dividend rates than those realized in the first quarter of 1989, and the effects of the recently enacted Office of Thrift Supervision (OTS) quarterly special assessment,

reduced 1990 first-quarter income before taxes by approximately $520,000 as compared to first quarter 1989.

Net interest income for the first quarter was $24.6 million, down slightly from $25.4 million for the 1989 first quarter, but up from $22.8 million for the 1989 fourth quarter. TCF's net interest margin for the 1990 first quarter was 2.38 percent, up from 2.08 percent for the 1989 first quarter and 2.13 percent for the 1989 fourth quarter.

TCF's one-year primary interest rate gap (a commonly used measure of interest rate risk) amounted to a negative $887.8 million or 19 percent of total assets at March 31, down from a negative $948.6 million or 20 percent at year-end 1989 and negative $1.6 billion or 30 percent at March 31, 1989. TCF's operating results remain susceptible to a rise in short-term interest rates.

Non-interest income (excluding the 1989 gain on sale of loan servicing) totaled $16.5 million in the first quarter, up 15 percent from $14.4 million for the 1989 first quarter. The increase was largely due to increased fee and service charge revenues and fees on annuity sales.

Non-interest expense (excluding the provision for real estate losses) totaled $35.6 million in the first quarter, up 9 percent from $32.6 million in the 1989 first quarter. TCF's expanded branch network, including 14 Cub Foods in-store branches added over the last 12 months, accounted for a significant portion of the increase in non-interest expense.

TCF provided $1.8 million for loan losses and $250,000 for real estate losses in the first quarter, compared with $5.3 million and $250,000, respectively, in the 1989 first quarter. Net loan charge-offs were $1.4 million in the first quarter, compared with $5.3 million in the same period last year. At March 31, the allowances for loan and real estate losses totaled $23.3 million, up slightly from $22.9 million at year-end 1989.

Under FIRREA, the Federal Deposit Insurance Corporation (FDIC) and the OTS have examination authority over thrifts. TCF is currently undergoing its first regular examination by the FDIC. The regulatory agencies may be applying more rigorous standards in their current examinations of financial institutions, including more conservative assumptions in the classification of assets, the calculation of net realizable value, and the related allowances for losses.

Non-performing assets (principally non-accrual loans and real estate acquired through foreclosure) were $113.8 million at March 31, up from $96.8 million at year-end 1989. While non-performing assets increased in the first quarter, accruing loans 90 days or more past due decreased by

$5.4 million to $19.1 million at March 31. As a result of the softening of the commercial real estate market, which affects both the performance of real estate loans and the disposition of real estate acquired through foreclosure, TCF may experience some additional growth in non-performing assets during the remainder of 1990. It also appears, as noted above, that regulators may apply more conservative assumptions in classifying loans secured by real estate. Approximately 90 percent of TCF's classified assets were committed prior to April 1985 when more conservative local underwriting standards were adopted by TCF's new management.

TCF recognized a $1.3 million extraordinary credit in the first quarter from the utilization of net operating loss carryovers, compared with $2.1 million in the corresponding prior-year period.

Total net loans were $3.8 billion at March 31, down $32.6 million from year-end 1989. Consumer loans outstanding declined $12 million due to a $50.6 million decrease in TCF's dealer finance portfolio; TCF ceased originating these loans in 1989. TCF's home equity loans increased $16.3 million to $528.3 million from year-end 1989, and its student loans increased $20.9 million to $62.8 million. Residential mortgage loans decreased $42.9 million from year-end 1989 to $593.4 million due to a lower level of loans held for sale. TCF's consumer and residential mortgage loans continue to perform in a satisfactory manner with delinquencies below national averages.

#90108p4121 04/18/1990 ~PR Newswire

LOS ANGELES (APRIL 18) PR NEWSWIRE - AT&T (NYSE: T) today reported that net income for the first three months of 1990 increased 12.5 percent to $668 million, or 62 cents per share, from $594 million, or 55 cents a share a year ago. Revenues rose to $8.892 billion from $8.659 billion.

At the company's 105th annual shareowner meeting here today, AT&T Chairman Robert E. Allen said, "These are solid results -- and a strong start toward making 1990 even more profitable than 1989."

AT&T said operating income increased 21 percent on revenue increases of 2.7 percent, while costs and expenses were essentially flat. Continued improvement in general and administrative expenses enabled the company to increase the number of people dedicated to sales and customer support.

Allen told shareowners gathered at the Los Angeles Convention Center that 1989 was a breakthrough year, characterized by a series of "bests" in the

new AT&T's history: best revenues, profits, earnings per share and stock price.

He said, "AT&T is moving forward into the decade of the 1990s, fleeter of foot, quicker in its response to customers and to changes in the marketplace, more alert to new targets of opportunity for growth."

Allen's confidence reflected that of the company's board of directors, which in March declared a 10 percent dividend increase.

Looking to the future, Allen said the essential issue is growth. Citing the growth potential from AT&T Bell Laboratories research, Allen said AT&T was separately announcing its commitment to introduce in about five years network equipment that will switch communications signals by pulses of light, producing a dramatic increase in the capacity -- and therefore the capabilities -- of those systems.

The company also broadened its base in the growing financial services market by launching in March the AT&T Universal Card to an exceptionally strong customer response.

Service revenues rose 5.4 percent from a year ago. Long distance volume rose for business, international and consumer telecommunications, increasing nearly 7 percent overall. Leading gainers were international, and business outbound (such as WATS) and inbound (such as 800 service) calling. Service revenues also reflect the acquisition of ISTEL Group Ltd. in the fourth quarter of 1989.

During the quarter, the company announced new safeguards to its 800 Service, including alternate routing paths from the local exchange to AT&T's network and a backup signaling network in case of trouble in the primary system.

AT&T won major contracts for integrated voice and data networks, including a $160 million deal with J. C. Penney, a $132 million agreement with Metropolitan Life and, just last week, a $121 million contract with Xerox.

The company introduced innovative services, such as network-based voice messaging for business and consumers and AT&T Language Line Service, which offers on-line translations of 143 languages and dialects. A separate company, AT&T ISTEL Global Messaging Service, Ltd., was set up to provide electronic messaging to multinationals in Europe and Asia.

AT&T Credit Corp. became part of a newly created subsidiary, AT&T Capital Corporation, and broadened its leasing capabilities by acquiring the assets of two divisions of PacifiCorp Credit, Inc. It increased customer leasing of AT&T's business communications equipment and data products, significantly adding to rental revenues.

Product sales advanced 1.2 percent from the same period in 1989, with increases in network telecommunications products and consumer products. Large business communications equipment and data products enjoyed increased customer acceptance, although sales of these products remained steady as customers increased leasing through Capital Corp. Sales were somewhat lower for other products, primarily key systems and small PBXs and special design products sold to the federal government.

Sales of consumer products continued to grow, with gains in cordless telephones and answering machines. During the quarter the company announced all consumer cordless phones will feature the Clarity Plus(TM) noise reduction system.

In business communications products, the Definity(TM) PBX and Audix Voice Messaging System continued to be successful. Over 1,500 Definity Communications Systems have been sold since the product was introduced last year. The company also made major market share gains in voice processing.

The company also announced a phone system that allows hotels to offer each guest a private voice mailbox at check-in, and introduced data communications products under AT&T Paradyne's COMSPHERE family name.

Sales of network telecommunications equipment rose compared with the year-ago quarter. Sales to domestic telephone companies were flat overall but continued penetration of the product line into new domestic and international markets boosted results. During the quarter, the company announced the sale of switching systems in Singapore and Poland.

Computer system sales showed strength in minicomputers and the new personal computer line. As demand for PCs increased, the company ramped up production at its Little Rock, Ark., plant.

AT&T entered an emerging software market for automating workflow for a variety of computing and communications tasks with the AT&T Rhapsody Business Orchestration Solution, which integrates electronic messaging, fax, word processing and spreadsheets.

Last week, AT&T announced it is selling substantially all the assets of its Synchronous Terminals Products business to Memorex Telex Corporation so it can focus on its primary mission of providing networked computing solutions.

In key systems and small PBXs, Merlin(R) System sales increased. Merlin Cordless, introduced in January, showed solid early sales as customer awareness continued to rise. The company introduced enhancements to its System 25 PBX this month.

Service margins increased due to continuing network efficiencies in maintenance, operations and operator services. Product margins declined somewhat, but were about flat with the year 1989, reflecting continued competitive pressures on prices.

At the end of the quarter, AT&T had 280,500 employees, compared with 283,500 at the end of last year. The company yesterday announced it had reached tentative agreement with the Communications Workers of America and International Brotherhood of Electrical Workers on a non-management retirement plan that will virtually double the number of workers eligible for a pension.

AT&T has 4,000 employees in Los Angeles, and about 231,000 shareowners in California. The year's annual meeting is the first to be held here, the third in California.

AMSTERDAM (APRIL 18) PR NEWSWIRE - Wolters Kluwer today issued the following statement:

Autumn 1989 Wolters Kluwer announced their policy of reducing printing activities. It was also made known that the continuity of the companies involved would be a key issue in the divestment process.

ODH Group (The Hague) has now submitted a combined bid for five companies; Salland Offset/De Lange van Leer, Wolters-Noordhoff Grafische Bedrijven, Reprohuis Wageningen, MediaWare and Publi Partners.

Total sales amounted to Dfl. 85 million in 1989; the companies employ over 500 people.

It is expected that this bid will lead to an agreement. ODH already holds a number of stakes in the communication industry; further expansion in printing is intended.

These intended divestments are in line with the strategy of Wolters Kluwer to concentrate on their core activities: information, education and scientific publishing, professional training and Dutch-language trade publishing.

CONTACT: Wolters Kluwer corporate communications in Amsterdam:

0-20-56-45-301, or H. de Vries of ODH Group in The Hague, 0-70-35-24-171, or Fern C. Lazar or Debra A. Wasser, 212-688-6840, both of Dewe Rogerson, for Wolters Kluwer.

#90108p4126 04/18/1990 ~PR Newswire

MINNEAPOLIS (APRIL 18) PR NEWSWIRE - Inter-Regional Financial Group, Inc. (IFG) (NYSE: IFG), today reported net earnings for the first quarter ended March 31, 1990, of $149,000, or 1 cent per share, compared with a net loss of $814,000, or 11 cents per share, in the first quarter a year ago.

Net revenues (revenues less interest expense) for the first quarter totaled $58,006,000, compared with $52,944,000 in 1989.

"We are pleased that IFG was profitable in the first quarter despite continued tough market conditions," said Irving Weiser, president and chief executive officer. "Both retail and institutional revenues improved at our two broker-dealers, leading to an 18 percent increase in commissions and more than compensating for a decline in investment banking revenues."

Weiser also noted that the first quarter results benefited from expense reductions of approximately $1.2 million at the parent company compared with the previous year's quarter, which were partially offset by severance payments at Dain Bosworth associated with the streamlining of the organization.

IFG provides full-service securities and investment banking services in 20 states through its subsidiary firms Dain Bosworth Incorporated, Minneapolis, and Rauscher Pierce Refsnes, Inc., Dallas.

#90108p4129 04/18/1990 ~PR Newswire

FINDLAY, OH (APRIL 18) PR NEWSWIRE - OHM Corporation (NYSE: OHM), a leading environmental services firm, today announced that it expects earnings for its first quarter ended March 31, 1990 to be in the range of $0.05 to $0.07 per share, substantially above analyst expectations and its loss during the first quarter of 1989 of ($0.13) per share. The company expects net revenues in the quarter to be approximately $47,000,000, a 43 percent increase over the first quarter of 1989.

In making the announcement, the company attributed the better than expected results to a broad based increase in business in its Remediation Services Group, including increased revenues from industrial clients as well as under its federal and state government contracts. The company said that the increased activity in its Remediation Services Group has continued into the second quarter.

OHM Corporation is a leading nationwide environmental services company with 30 locations across the United States and in Canada. The company provides a full range of environmental assessment, analytical, data management, design, engineering, remediation and waste treatment services to a broad base of industrial and government clients.

#90108p4132 04/18/1990 ~PR Newswire

PARSIPPANY, NJ (APRIL 18) PR NEWSWIRE - General Public Utilities Corp. (NYSE: GPU) today reported earnings per share of $1.40 for the first

quarter of 1990, compared to $1.39 per share for the first quarter of 1989.

Net income for the first quarter of 1990 was $77.5 million, compared to $80.4 million for the year-ago period.

Earnings per share benefited from earlier repurchases of common shares. The quarter marked an increase in residential and commercial customer sales. The benefits, however, were more than offset by the milder weather during the three-month period and increases in depreciation expense. This increased expense is associated with additions to utility plant, which were made to enhance system reliability in New Jersey. These same factors also had an impact on 12-month results.

For the 12 months ending March 31, 1990, earnings per share increased to $5.02 per share, from $4.39 per share. Net income increased to $279.5 million from $256.3 million for the 12 months ending March 31, 1989.

In 1990, both the Three Mile Island Unit 1 Nuclear Generating Station near Harrisburg, Pa., and the Oyster Creek Nuclear Generating Station, at Forked River, N.J., successfully restarted after the completion of scheduled outages. Plant performance allowed GPU to meet nuclear plant performance standards established by the New Jersey Board of Public Utilities for the 12 months ending Feb. 28, 1990. This resulted in the reversal of a provision for performance charges, thereby contributing to earnings for the quarter.

General Public Utilities is a registered electric utility holding company with three operating subsidiaries - Jersey Central Power & Light Co., Pennsylvania Electric Co. and Metropolitan Edison Co. The GPU System provides approximately 39 billion kilowatt hours of electricity for approximately 1.9 million customers.

#90108p4134 04/18/1990 ~PR Newswire

HOUSTON (APRIL 18) PR NEWSWIRE - American General Corp. (NYSE: AGC) today announced first quarter net income of $107.1 million, compared to $97.2 million reported in the first quarter of 1989. On a per share basis, net income increased 17 percent to 90 cents compared to 77 cents for the 1989 period. Operating earnings, which exclude realized gains, increased 18 percent to 86 cents per share in the first quarter compared to 73 cents in the first quarter of 1989. Total shares outstanding were 119.2 million during the first quarter of 1990, compared to 133.0 million for the 1989 period, reflecting in part the effect of American General's share repurchase program.

In commenting on the results, Harold S. Hook, chairman and chief executive officer, said, "The improved earnings in the first quarter are the hard-won rewards of a very complex and difficult restructuring program. We believe these results signal the beginning of a new era of progress for American General."

For financial reporting purposes, the company divides net income into four major components: three business segments and corporate operations.

During the quarter, total income for the three business segments increased to $130.1 million from $126.5 million in the 1989 period. Segment earnings for home service were $60.9 million in the quarter compared to $63.2 million for the 1989 period, reflecting abnormally high mortality experience in the 1990 quarter. The previously announced home service consolidation, which is expected to improve annual pretax earnings by $40 million, is underway with completion anticipated in early 1991. Special markets reported first quarter 1990 segment earnings of $40.2 million compared to $35.9 million for the 1989 period, reflecting a 26 percent increase in earnings for tax-qualified annuities. Earnings for the finance/real estate segment were $29.0 million in the first quarter compared to $27.4 million for the 1989 period. These results include record consumer finance earnings of $28.6 million, an increase of 12 percent. The improved earnings reflect the early results of the consolidation activity that followed the 1988 acquisition.

Corporate operations include realized investment gains, interest expense on debt related to acquisitions and share repurchases, and other income and expenses not allocated to the business segments. Corporate operations for the first quarter of 1990 resulted in a net charge of $22.9 million compared to $29.3 million for the 1989 period. This 22 percent improvement reflects lower debt outstanding due to the use of proceeds from the sale of the company's property-liability and group life and health insurance business in 1989.

American General Corp. is an insurance and financial services holding company headquartered in Houston.

#90108p4137 04/18/1990 ~PR Newswire

PHOENIX, AZ (APRIL 18) PR NEWSWIRE - Callahan Mining Corp. (NYSE: CMN) today reported a first quarter loss of $899,000, equivalent to $.12 per share, compared with a loss of $1,252,000, or $.16 per share, for the same period last year. Comparable revenues for the quarter were $3,438,000

versus $7,157,000 a year ago.

Callahan Chairman Charles D. Snead Jr., said the loss was attributed to a combination of "lower silver prices and shutdown costs at the Ropes Gold mine and Caladay silver project."

He also noted that output at the Galena mine, a major silver producer, was adversely affected by ground control problems encountered in the main shaft late in February. "The shaft has been shut down for repairs, reducing hoisting capacity by 38 percent. Repair work will take a minimum of three months to complete, during which time silver production is expected to decline by 20 percent," Snead said.

The average Handy & Harman silver price dropped 12 percent during the period ($5.19 per ounce vs. $5.93 per ounce a year ago). As a result, the Galena mine reported a loss during the quarter despite a 16 percent increase in the average grade of silver ore milled. A small loss was also incurred at the adjoining Coeur mine.

The Flexaust Co., Callahan's wholly owned manufacturing division, provided a 27 percent increase in pretax income to $293,000 from $231,000 a year ago. First quarter sales were $2,876,000 versus $2,904,000 a year ago.

MINNEAPOLIS (APRIL 18) PR NEWSWIRE - Control Data Corporation (NYSE: CDA) and Seattle Silicon announced today the signing of a letter of intent under which Seattle Silicon has agreed to purchase Control Data's VTC, Inc., subsidiary. VTC is a supplier of high-performance integrated circuits using CMOS and bipolar technologies.

The new company, to be headed by Amaury Piedra, Seattle Silicon's president and chief executive officer, will have combined annual sales in excess of $60 million. Terms of the agreement were not disclosed.

"There is a tremendous synergy between the two companies," said Piedra. "The new entity will bring some unique capabilities to the marketplace."

"We are confident that the new company will excel in product quality and customer responsiveness," said Lawrence Perlman, Control Data's president and chief executive officer. "Control Data's Government Systems business will continue to purchase VTC's unique CMOS integrated circuits from the new company for several important contracts."

The new entity will continue to operate the CMOS and bipolar fabrication facilities in Bloomington, Minnesota, substantially protecting VTC's employment base in that city. Control Data will retain ownership interest with approximately a 20 percent share in the new company.

Control Data, headquartered in Minneapolis, provides solutions for customers' complex data collection, processing and communications needs by integrating hardware, software and services.

Seattle Silicon, based in Bellevue, Wash., is a supplier of ASICs and ASIC design tools for high-end applications in the electronics market.

#90108p4144 04/18/1990 ~PR Newswire

NEW YORK (APRIL 18) PR NEWSWIRE - Capital Cities/ABC, Inc. (NYSE: CCB), reported revenues and earnings for the first quarter of 1990, in an announcement today by Thomas S. Murphy, chairman. Consolidated net income for the first quarter of 1990 was $106,303,000, an increase of 28 percent from the $82,773,000 earned in 1989. Earnings per share for the first

quarter of 1990 were $6.08, a gain of 32 percent over the $4.59 reported in 1989. Average shares outstanding for 1990 were 17,475,000 compared with 18,050,000 in 1989, the decline reflecting repurchases of the company's common stock in 1989 and 1990.

Results for 1990 and 1989 reflect reductions in entertainment programming and sports rights at the ABC Television Network from historic costs to fair market values recorded in connection with the acquisition of ABC. These reduced costs benefited per share earnings in 1990 and 1989 by approximately $0.10 and $0.50, respectively.

Net revenues for the first quarter of 1990 were $1,262,321,000, an increase of 13 percent over 1989, with the broadcasting operations increasing 15 percent. The ABC Television Network reported a significant increase in revenue as a result of strong advertising demand and the continuation of satisfactory audience delivery in all dayparts, except daytime. Video operations also reported significant revenue increases, while the television station and radio operations reported modest revenue improvements. Publishing revenues increased 6 percent, with much of the increase resulting from recent acquisitions.

Operating income for the first quarter of 1990 was $211,548,000, an increase of 29 percent from 1989, with broadcasting improving 35 percent. The ABC Television Network reported a very significant profit in the first quarter of 1990, compared with a modest profit in 1989 (both years excluding the effect of purchase price adjustments). The improvement resulted principally from the network's strong prime-time revenue performance. Operating earnings for the video operations were well ahead of last year, while the television stations improved slightly and radio operations declined. Publishing earnings decreased slightly, with gains by the Fairchild Fashion and Merchandising Group and the shopping guides being offset by declines at the other publishing operations.

Capital Cities/ABC operates the ABC Television Network and eight television stations, the ABC Radio Networks and 21 radio stations, and provides programming for cable television. The company publishes daily and weekly newspapers, shopping guides, various specialty and business periodicals, and books.

#90108p4146 04/18/1990 ~PR Newswire

NEW YORK (APRIL 18) PR NEWSWIRE - Marine Midland Banks, Inc., today reported that net income for the first quarter of 1990 was $6.0 million compared with $40.2 million in the first quarter of 1989.

Reflected in the quarter's results is the revenue and expense impact of a series of initiatives undertaken as part of an overall program to restructure Marine for profitable growth as a regional banking organization in the 1990s.

Major elements of the restructuring program include streamlining of operations, business repositioning and balance sheet reduction. First quarter earnings were affected by the following restructuring-related events:

-- The completion of sale of investments by Marine in Society Corporation and First Pennsylvania Corporation, which resulted in gains of $20 million and $9 million, respectively.

-- The sale of Marine's merchant credit card processing business to National Data Corporation, which resulted in a gain of $3.2 million.

-- The sale of a $160 million portion of Marine's national education loan portfolio, which resulted in a gain of $3.9 million.

-- A provision of $31 million to accommodate costs associated with staff reductions and the closing of out-of-state offices.

Reflecting Marine's balance sheet reduction program, total assets at the end of the first quarter were $25.7 billion, down from $26.8 billion last year and $27.1 billion at the end of 1989.

At March 31, 1990, Marine's estimated Tier 1 capital under regulatory capital adequacy guidelines for 1992 was 4.10 percent of risk adjusted assets, compared with 3.72 percent a year earlier and 3.77 percent at Dec. 31, 1989. The ratio of common equity to total assets at the end of the first quarter was 4.02 percent, compared with 3.79 percent a year earlier and 3.62 percent at year-end 1989.

Related to the restructuring program, Marine also announced that the formal commitment by its parent company, The Hongkong and Shanghai Banking Corporation Limited, to maintain Marine's capital has been extended through 1992 to support a minimum Tier 1 capital ratio of 5 percent, beginning at year-end 1990, significantly above regulatory capital adequacy guidelines for 1992 of 4 percent. A formal capital maintenance commitment has been in effect since early 1988.

Marine Midland is a major New York-based regional banking organization and a member of the HongkongBank group which, with assets of $133 billion, is one of the world's 30 largest banking groups.

OMAHA, NE (APRIL 18) PR NEWSWIRE - ConAgra Inc. (NYSE: CAG) has named James R. Tindall, 44, president and chief operating officer, ConAgra Prepared Food Companies, and a member of ConAgra's Office of the President.

Tindall joins ConAgra from The Quaker Oats Co., where he has been senior vice president and general manager, North American Foods.

Charles M. Harper, ConAgra's chairman and chief executive officer, said, "Jim Tindall is a highly respected food industry executive who brings a wealth of talent and experience to ConAgra. He is the best person in the food industry for this critical leadership position in our company."

Tindall has been with Quaker Oats since 1970. Before assuming his current position as senior vice president and general manager, North American Foods, he held other general management positions, as well as marketing, sales and product management positions. He has a bachelor's degree in economics from the University of Michigan and an MBA in marketing from DePaul University.

Omaha-based ConAgra is a diversified food company with annual sales of more than $15 billion.

SAN ANTONIO, TX (APRIL 18) PR NEWSWIRE - The board of directors of Valero Natural Gas Company, the general partner of Valero Natural Gas Partners, L.P. (NYSE: VLP), today declared a quarterly cash distribution of $.625 per unit to holders of the partnership's publicly traded preference units. A like amount was declared for the partnership's common units held by subsidiaries of Valero Energy Corporation, which have an approximate 49 percent interest in the partnership. The distribution is payable May 30, 1990 to holders of record at the close of business May 10, 1990.

Valero Natural Gas Partners, L.P. owns a 7,100-mile intrastate network of natural gas transmission and gathering lines throughout Texas, purchases and sells natural gas to distribution companies, electric utilities, other pipelines and industrial customers throughout the U.S., and provides gas transportation services to third parties. The partnership also owns 11 gas processing facilities and markets natural gas liquids to refineries, petrochemical plants and domestic fuel distributors.

STAMFORD, CT (APRIL 18) PR NEWSWIRE - GTE Corp.'s (NYSE: GTE) board of directors today declared a dividend of 73 cents per share on the company's common stock. It will be payable on July 1, 1990, to shareholders of record on May 22, 1990. The dividend will not be affected by a previously announced two-for-one stock split, which will become effective on May 23, 1990, if the proposal to increase the number of authorized shares of common stock is approved at the company's annual meeting later today.

Regular quarterly dividends also were declared as follows on the company's preferred stocks:

55 cents per share on the 4.40 percent preferred stock;
96.875 cents per share on the 7.75 percent preferred stock;
98.125 cents per share on the 7.85 percent preferred stock;
50 cents per share on the 4.00 percent convertible preferred stock;
54.5 cents per share on the 4.36 percent convertible preferred stock;
59.375 cents per share on the 4.75 percent convertible preferred stock;
62.5 cents per share on the 5.00 percent convertible preferred stock;
63.125 cents per share on the 5.05 percent convertible preferred stock;
66 cents per share on the 5.28 percent convertible preferred stock;
66.875 cents per share on the 5.35 percent convertible preferred stock;
68.75 cents per share on the 5.50 percent convertible preferred stock;
61.875 cents per share on the $2.475 no par preferred stock; and,
50 cents per share on the $2.00 convertible no par preferred stock.

Each of the preferred dividends is payable on July 1, 1990, to shareholders of record on May 22, 1990.

CALGARY (APRIL 18) PR NEWSWIRE - At its annual meeting of shareholders, held yesterday, Norcen Energy Resources Limited announced estimated results for the first quarter of 1990.

Edward G. Battle, president and chief executive officer reported that net earnings for the first quarter will be approximately $38 milion and cash generated from operations approximately $93 million, up 16 percent and 26 percent respectively from the comparable period of 1989.

Production of crude oil and natural gas liquids averaged about 59,400 barrels per day, up 24 percent and natural gas production averaged 266 million cubic feet per day, up 14 percent.

The company expects actual results to be available early in May. Norcen also announced today that regular quarterly dividends of 12.5 cents (Cdn) per share on both the Multiple Voting Ordinary Shares (NCN) and the Subordinate Voting Ordinary Shares (NCN.A), and 50.75 cents (Cdn) per share on the Series A, First Preference Shares (NCN.F) have been declared payable on June 1, 1990, to holders of record on May 11, 1990.

LITTLE ROCK, AR (APRIL 18) PR NEWSWIRE - ALLTEL Corporation (NYSE: AT) announced today that its earnings per share for the first quarter of 1990 were the best in the company's history.

First quarter earnings were 63 cents per share, up 5 percent from 60 cents a year ago, on 4 percent more average common shares outstanding. ALLTEL's net income registered a 9 percent improvement, advancing to $42,268,000 from the $38,955,000 reported in the first quarter last year. Revenues and sales were $323,728,000, up 17 percent from $275,909,000 in the corresponding quarter of 1989.

Earnings per share for the 12 months ended March 31, 1990 were $2.35, up 17 percent from $2.01 a year ago. Net income was $157,235,000, an increase of 21 percent over $130,136,000 last year on revenues and sales of $1,273,426,000, up from $1,081,635,000 in the corresponding period last year. The 12-month results of 1989 include a fourth quarter 1988 net, after tax, charge of $9.1 million representing gain/loss on investments and merger costs.

Excluding one-time adjustments, ALLTEL's net income was up 13 percent from $139.2 million in 1989 and earnings per share were up 9 percent from $2.16.

Joe T. Ford, ALLTEL president and chief executive officer, said, "Modest growth in telephone revenue contributed to ALLTEL's reduced growth rate during the quarter. The impact was minimized by intensified cost control efforts early in the year.

"Overall, non-telephone businesses made a contribution to operating income despite continued softness in manufacturing results.

"The increase in common shares reflects conversion of debentures and the

exercise of stock options, associated with the CP National merger, since the first quarter of last year."

ALLTEL Corporation (AT) provides local telephone service to more than 1.1 million customers in 25 states and has subsidiaries or investments in companies that provide cellular telephone and long- distance service, communications products and other related services.

#90108p4168 04/18/1990 ~PR Newswire

NEW YORK (APRIL 18) PR NEWSWIRE - John K. Ziegler, chairman and chief executive officer of Willcox & Gibbs, Inc. (NYSE: WG) has announced that he expects sales for the quarter ended March 31, 1990 to rise to about $138,000,000 and earnings, before unusual charges after- tax of approximately $2,000,000, to decline to about $3,300,000 compared with sales of $134,369,000 and earnings of $4,301,000 for the same quarter in the prior year.

Net earnings per share after the $2,000,000 charge, net of tax, will be about $0.09 compared with $0.31 for the comparable 1989 period.

Ziegler stated that the unusual charges consisted of a provision for estimated expenses resulting from a planned restructuring in several divisions of the company. The electrical distribution and covered yarn divisions are not involved in the restructuring.

Ziegler further stated that while sales of Consolidated Electric, the company's electrical supply division, increased about 9 percent compared with the prior year, the rate of growth was slower than that experienced in the year 1989.

This decrease in the rate of growth, Ziegler stated, was caused by the general slowing of construction activity in the company's market area. The company's apparel and covered yarn divisions both experienced decreases in sales and profits in the first quarter of this year compared to last year.

These declines are due to general economic conditions and to the general tightening of inventories by manufacturers, wholesalers and retailers.

With regard to the future, Ziegler said that while he believes the company's second quarter results should be better than the first quarter results before the unusual charges, they probably would still be below the results of the prior year's second quarter.

He believes that results in the covered yarn and apparel divisions in the later part of the year should be stronger than the first six months due to an expected return to the historic growth trends of the covered yarn division and improved profit margins resulting from the restructuring previously mentioned.

With regard to the Consolidated Electric division, Ziegler stated that, notwithstanding the increase in sales which Consolidated had in the first quarter, the continuing unsettled condition of the construction industry makes it difficult to project results for the balance of 1990 with any precision. "There is no doubt that Consolidated, and Willcox & Gibbs as a company, will continue to achieve good results," Ziegler stated, "but we will not forecast precise figures at this time."

#90108p4170 04/18/1990 ~PR Newswire

BOSTON (APRIL 18) PR NEWSWIRE - Liberty Mutual Insurance Company reported a net gain from operations of $116,812,000 for 1989, compared with a net gain from operations of $86,854,000 for 1988.

Net premiums written by the Boston-based companies totaled $6,445,195,000, a decrease of 4.9 percent, compared to a 6.2 percent gain in 1988. The companies recorded a net underwriting loss of $795,256,000 and declared dividends to policyholders of $183,509,000, while investment income for the year was $1,078,871,000.

Surplus and special reserves were increased by $116,812,000 in 1989, bringing the companies' total surplus to $2,441,303,000.

"Although we did achieve improved earnings, our after-dividend combined ratio increased from 112.5 percent to 114.6 percent," said Liberty Mutual Insurance Company President and Chief Executive Officer Gary L. Countryman. "As we told you last year, our number one challenge is to improve our underwriting performance. Because of the actions we took, we saw a clear break in our underwriting performance that signals improvement -- a break that occurred early enough to be clearly evident, but too late to prevent a rise in our combined ratio. For this reason, we look forward to a substantial improvement in our underwriting results in 1990."

Countryman added, "For the last several years we have been expressing our concern about the political environment your company faces and the risks it creates. We have responded in several ways -- one is to try and change the environment in an effort to make it less hostile for us and those we serve."

The 1989 Liberty Mutual Annual Report focuses on the urgent need for Workers Compensation reform. A special section highlights how much the stakeholders in Workers Compensation share in common, how much our systems of Workers Compensation are threatened, and the importance of working together to restore their efficiency and effectiveness.

Liberty Mutual provides a wide range of personal and business insurance, as well as financial services. It has been the leading writer of workers compensation insurance since 1936 and employs more than 23,000 people in over 340 locations throughout the United States and Canada. Based on total assets of over $35 billion, Liberty Mutual is one of the leading providers of insurance and financial service products.

NASHVILLE, TN (APRIL 18) PR NEWSWIRE - Harold Roitenberg, president of Roitenberg Investments, Inc., of Minneapolis, and one of the founders of the catalog showroom industry, has been elected to the board of directors of Service Merchandise Company, Inc. (NYSE: SME) at today's Annual Shareholders Meeting.

"We are delighted to have Mr. Roitenberg join our board," Raymond Zimmerman, Service Merchandise's president, chairman and chief executive officer, said in announcing the election. "His catalog showroom industry experience will be invaluable."

Mr. Roitenberg, 63, was chairman of Modern Merchandising Inc., a catalog showroom operator and publisher, from 1970 to 1982. The company, which owned and operated 79 stores and had annual revenues of about $800 million was sold in 1982 to Best Products Co. Inc. Mr. Roitenberg then established Roitenberg Investments, a venture capital and real estate investment firm.

Mr. Roitenberg's career in the catalog showroom industry began in 1950. He spent 10 years as vice president of Minnesota Wholesalers, a Minneapolis-based catalog showroom company, before founding Creative Merchandising and Publishing Inc., a catalog publisher, in 1960.

A native of Minneapolis, Mr. Roitenberg is a graduate of the University of Minnesota. He served in the U.S. Navy during World War II.

Mr. Roitenberg also serves on the boards of Syratech Corp. of Boston. He is a member of the advisory board of First Bank Minneapolis. His initial

term on the Service Merchandise board will be for one year.

Shareholders also reelected two board members to three year terms. They are Richard P. Crane Jr., a practicing attorney and partner in the law firm of Girardi, Keese & Crane, Los Angeles, and Charles V. Moore, president and director of BIL, Trainer Wortham Inc., Investment Counselors of New York City.

NEW YORK (APRIL 18) PR NEWSWIRE - Cambridge Capital Fund, L.P. announced today that it is extremely disappointed that Whitehall Corporation's (NYSE: WHT) board of directors rejected Cambridge's $20 per share cash merger proposal without offering shareholders any alternatives other than a continuation of past strategies and programs.

Cambridge stated that it finds it difficult of comprehend how Whitehall's board could find Cambridge's merger proposal inadequate based upon Whitehall's future business prospects apparently without using the assistance of an independent financial advisor and without having any formal projections of future performance.

Additionally, Cambridge noted that Whitehall's board continues to refer to Whitehall having cash and cash equivalents of $10 per share while failing to mention Whitehall's current income tax liability payable in 1990 of $3.86 per share.

Cambridge further announced that it reiterates the statement from its prior letter to Lee D. Webster, chairman of Whitehall, that Cambridge remains willing to negotiate all terms of its merger proposal, including price. Based upon expressions of interest Cambridge has received from major financing sources regarding their interest in participating in the transaction for both investment and strategic reasons, as well as the substantial internal funds of Cambridge and its affiliates under management, Cambridge remains confident that financing is readily available for its merger proposal.

Cambridge plans to press forward with it proxy solicitation for its nominees for directors with the goal of maximizing shareholder value in the near term. The Whitehall annual meeting is scheduled for Monday, April 23, 1990.

#90108p4188 04/18/1990 ~PR Newswire

NEW YORK (APRIL 18) PR NEWSWIRE - The News Corporation Limited has been awarded worldwide television and sponsorship rights to the next three World Swimming Championships by the Federation Internationale de Natation Amateur (FINA), the international body which organizes the events, it was announced.

Ion Tiriac, head of T-V Enterprises, an international sports promotions company, helped arrange the agreement, which runs through 1998.

The championships, which are regarded as the premier event in amateur swimming, occur every four years and serve as a prelude to the summer Olympics. The next event will be held Jan. 3-13, 1991, in Perth, Australia at the Superdrome, the world's largest swimming complex. Venues for the 1994 and 1998 FINA championships have yet to be decided.

"We look forward to working with FINA to enhance the image and heighten the profile of this very important sporting event," said Rupert Murdoch, chief executive of News Corp. "As international interest in swimming and diving has increased, the FINA championships have come to represent the pinnacle of world-class aquatic competition. This marks News Corp.'s entry into the international sports field."

"We are grateful to Ion Tiriac for putting us together with the Murdoch organization," said Mustapha Larfaoui, president of FINA. "With its extraordinary international presence and experience, News Corporation is well qualified to help us maximize exposure for the World Championships. In the United States, both ESPN and ABC have agreed to broadcast the event in 1991," Larafaoui said.

News Corp. said it has already begun to market the television and sponsorship rights to other broadcasters and advertisers worldwide.

The 1991 championships will be the first time the event has been held in the southern hemisphere. According to FINA officials, many participants are already eagerly anticipating warm-weather swimming in January -- the height of the Australian summer.

In addition to the climate, a major highlight in Perth will be the long-distance swimming World Cup, which will be held for the first time at the same time and place as the World Championships. The new category joins a complete roster of the more traditional competitive swimming, diving and water polo. Over 1,500 athletes representing dozens of countries and their respective amateur athletic organizations are expected to participate.

New Corporation publishes newspapers, magazines and books in the United States, Britain and Australia, and owns Fox, Inc., the television and motion picture company.

NEW YORK (APRIL 18) PR NEWSWIRE - TLC Beatrice International Holdings Inc. today announced that 1989 earnings from continuing operations were $15.6 million, a 100 percent increase over the $7.7 million reported in 1988. Earnings per share from continuing operations of 68 cents was also up significantly from the 14 cents per share reported in 1988.

Sales for 1989 increased 12 percent to $1.14 billion from the $1.02 billion reported in 1988. Operating income (before corporate expenses

and amortization of intangibles) increased 21 percent to $76.9 million from $63.5 million for the previous year. Significant gains by all three of the company's major businesses -- ice cream and desserts, snacks and food distribution -- and the inclusion of the results of the bottling operations for the first time in 1989 accounted for the increase.

Net income for 1989 was $87.9 million or $8.10 per share, an increase over the net loss of $9.6 million, or $1.77 per share, reported in 1988. Net income in 1989 includes income from discontinued operations of $86.3 million (after-tax) relating to the sales of certain non-core operations and an extraordinary loss of $14 million (after-tax) relating primarily to the write-off of deferred debt issue costs and other costs incurred in connection with the early retirement of approximately $377 million of acquisition-related debt.

TLC Beatrice International has paid down all of its acquisition- related debt, including all high-yield bonds.

Reginald F. Lewis, chairman, CEO and principal stockholder, said: "1989 was a year of excellent progress in pursuit of our goal to focus TLC Beatrice International on its core Western European food and distribution operations. Results from continuing operations for 1990 should significantly exceed 1989. Our disposition phase is substantially complete and we now plan to grow our business and build on our strengths which include a diversity of products and markets and a strong, decentralized management."

TLC Beatrice International is an international food company with operations in wholesale and retail food distribution in France and the manufacture and marketing of ice cream, processed snacks and other grocery products throughout Western Europe. The company is comprised of 20 operating units, doing business in 15 countries throughout Western Europe and other parts of the world. Many of these companies hold significant market share positions within their respective markets.

#90108p4204 04/18/1990 ~PR Newswire

HARRISBURG, PA (APRIL 18) PR NEWSWIRE - Labor and Industry Secretary Harris Wofford today said a $500,000 federal grant will enhance Pennsylvania's efforts to provide training and employment services to workers left jobless by the closing of the Fruehauf truck trailer plant near Middletown.

The Casey Administration petitioned the U.S. Department of Labor for financial assistance in helping the workers find jobs. Wofford said the funds, allocated from a special fund for dislocated workers, will help at least 300 former Fruehauf employees.

Wofford made the announcement at the office of the Susquehanna Employment and Training Corp. (SETCO), which operates job training programs in Dauphin, Cumberland, Perry, Lebanon and Juniata counties.

"These funds will help the Fruehauf workers take part in the retraining, job search, career counseling and other programs they'll need to continue their lives with good jobs," Wofford said.

"This grant will help all of us -- the state and federal governments and community agencies -- continue our unique partnership that will make a real difference to several hundred central Pennsylvanians and their families."

The Department of Labor and Industry organized a "rapid response" effort to provide job training and employment programs for the workers soon after the company first announced layoffs last summer.

Assisting with the effort have been Local 488 of the Allied Industrial Workers, SETCO, Fruehauf and community organizations.

A survey conducted by the department, SETCO and the union determined that just over 300 workers said they could use reemployment assistance. The department used that survey to justify its request for the federal funds.

SETCO will help the workers with services that include remedial education, classroom instruction, on-the-job training, job search assistance and support services.

More than 500 workers have been idled so far, with the remaining 200 scheduled to be laid off when the plant shuts down next month.

COLUMBIA, MD (APRIL 18) PR NEWSWIRE - Shareholders who attended the annual meeting of The Ryland Group, Inc. (NYSE: RYL) today received news about the company's anticipated first quarter results.

At the meeting, Chairman and Chief Executive Officer Charles E. Peck said that preliminary data indicates that the first quarter of 1990 may show as much as a 30 percent increase in earnings for the company. However, Peck also noted the continued decrease in the number of new homes sold, down 12

percent from 1989's first quarter, as evidence of a homebuilding market that has been slowing for the past six months.

In other business, Ryland elected James A. Flick, Jr. to its board of directors. Flick, 55, is executive vice president of USF&G Corporation, headquartered in Baltimore.

Also announced at the meeting, the shareholders approved the re-election of the directors to serve until the next annual meeting of stockholders, as well as the adoption of a new stock option program and the re-appointment of Ernst & Young as auditors for the company.

Ryland's first-quarter earnings will be reported on Thursday, April 26, 1990.

The Ryland Group, Inc., one of the nation's largest homebuilders, has built more than 90,000 homes since it was founded in 1967.

LOS ANGELES (APRIL 18) PR NEWSWIRE - Brentwood Associates, a major leveraged buyout and venture capital firm, announced today the completion of its first acquisition in almost two years. The $140 million management buyout of Los Angeles-based Mobile Technology Inc. (MTI) is one of the first leveraged transactions completed in 1990.

MTI is the nation's leading provider of diagnostic imaging and treatment shared services, an emerging segment of the health care industry. Founded in 1983, MTI is considered the pioneer and the dominant provider of mobile magnetic resonance imaging (MRI) services to hospitals across the country. MRI is a non-invasive diagnostic tool with an expanding variety of applications in neurology, cardiology and orthopedics. As a shared services provider, MTI owns and operates a fleet of mobile MRI units which visit a network of hospitals on a regular schedule.

MTI's revenues in 1989 were $76 million and the company's 465 employees serve approximately 400 hospitals in 35 states. The shared diagnostic treatment services market is projected to reach $1 billion in size over the next five years.

Fred Warren, a Brentwood partner, said, "MTI's leadership position in its market, coupled with a superb management team, supports our expectations for future growth. The transaction was structured to provide the company with adequate financing and flexibility to fund its continued expansion."

MTI President and Chief Executive Officer Ronald D. Van Horssen said, "The restructuring was designed to facilitate our continued growth. The opportunities in our market are tremendous as hospitals search for cost-effective access to exciting new technologies such as MRI. Teaming up with Brentwood creates a partnership with a strong financial group whose philosophy is to grow a company rather than sell assets or adopt a no-growth strategy to finance the restructuring. Brentwood's reputation and approach as an equity sponsor were critical factors in obtaining the financing."

The composition of the financing behind this LBO includes $23 million of Brentwood and management equity, $60 million of senior secured financing and $60 million of subordinated debt.

William Barnum, also a Brentwood partner, said, "MTI is the first transaction we have completed in nearly two years. After a period of high prices and hotly contested auctions, we believe the recent turmoil in the debt markets has presented us with an opportunity to acquire companies at prices more in line with historic levels. The risk-reward tradeoff has returned to a level at which we are more comfortable."

Brentwood Associates, with over $470 million in assets, is making its first investment in an LBO fund it raised approximately 18 months ago.

COLUMBUS, ID (APRIL 18) PR NEWSWIRE - Arvin Industries, Inc. (NYSE: ARV), reported sales of $395 million for the first quarter, an increase of 7

percent over last year's $369 million. Net earnings for the first quarter were $2.2 million or one cent per share compared to last year's net for the quarter of $2.8 million or nine cents per share.

Arvin Chairman and CEO James K. Baker said, "Using last year's first quarter as the yardstick, we increased sales and operating earnings, but suffered on the earnings per common share line due to the newly- issued convertible preferred stock.

"The first quarter was weaker than our plan because of softness in the U.S. original equipment market and labor problems at a major customer in Europe. The first quarter is expected to be the low quarter in this earnings trough which we've been in since early 1988 due to restructuring our company. We remain confident that our results for the balance of the year will show significant improvement."

Arvin Industries, Inc., an Indiana corporation, is a global company whose products are sold in more than 100 countries in North and South America, the European Common Market, the Pacific Rim and the Third World.

YAVNEH, ISRAEL (APRIL 18) PR NEWSWIRE - Orbot Systems Ltd. today announced that it filed a registration statement relating to the proposed initial public offering of 3,000,000 ordinary shares; all of the ordinary shares will be sold by the company. The planned offering is expected to be made in mid-May and is structured as a dual syndicate. Shearson Lehman Hutton Inc. and Alex. Brown & Sons Incorporated will manage the United States offering and Shearson Lehman Hutton International, Inc. and Alex. Brown & Sons Incorporated will lead manage the international offering.

Orbot Systems Ltd. is a leading producer of automatic optical inspection systems for printed circuit boards. In addition, the company produces automatic optical inspection systems for multi-chip modules, an emerging advanced interconnection product. The company believes it is the only producer of commercially available dedicated inspection systems for multi-chip modules. The company is also engaged, through a subsidiary in Israel, in the design and development of automatic optical inspection systems for use at various stages in the manufacture of semiconductors, applications which the company believes have significant commercial potential.

Copies of the prospectus being used with this offering can be obtained in the near future from the Prospectus Department, Shearson Lehman Hutton

Inc., 250 West Street, New York, N.Y. 10013, or the Prospectus Department, Alex. Brown & Sons Incorporated, 345 California Street, 24th Floor, San Francisco, CA 94104.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

JACKSONVILLE, FL (APRIL 18) PR NEWSWIRE - The board of directors of Barnett Banks, Inc. (NYSE: BBI) today approved a 10 percent increase from $.30 to $.33 per share in the quarterly cash dividend paid on Barnett common stock. Based on this, the 18th such increase in as many years, the new indicated annual dividend is $1.32. A regular quarterly dividend of $.625 also was declared on the company's Series B Preferred Stock.

The dividends on Barnett common and preferred stock are payable on Tuesday July 3, to shareholders of record at the close of business on Monday, June 11.

In other action by the board, Tampa executive Clarence V. McKee was

elected a director, filling the vacancy created by the retirement of W. Ashley Verlander, chairman of American Heritage Life of Jacksonville. McKee is chairman, chief executive officer and co-owner of WTVT Holdings, Inc., licensee of WTVT, Channel 13, the CBS affiliate in Tampa.

Prior to moving to Tampa, McKee practiced communications law in Washington D.C. and served in a variety of political and appointive posts. In 1982, he was appointed by President Reagan to the Board of the Legal Services Corporation, the federally funded agency which administers government legal assistance to the poor. Earlier, he served on the staff of two U.S. Senate Committees as well as the Federal Communications Commission.

In Tampa, he is a director of Barnett Bank of Tampa, Florida Progress Corporation, the Florida Power Corporation and Talquin Corporation. He is a member of the Board of Governors of the Florida Association of Broadcasters and a trustee of the Florida Network on Youth and Family.

Five directors were reelected by shareholders -- James L. Broadhead, president and chief executive officer of FPL Group, Inc., North Palm Beach; Joe B. Cordell, president and chief executive officer of Walter Industries, Inc., Tampa; Albert D. Ernest Jr., president and chief operating officer of Barnett Banks, Inc.; Frederick H. Schultz, Jacksonville investor and former vice chairman of the Federal Reserve Board of Governors; and John A. Williams, chairman of Post Properties, Inc., Atlanta.

Barnett is a two-state banking company with 565 offices and consolidated assets of $29.3 billion. Its stock (BBI) is listed on the New York Stock Exchange.

#90108p4260 04/18/1990 ~PR Newswire

BELLEVUE, WA (APRIL 18) PR NEWSWIRE - Puget Sound Power & Light Co. (NYSE: PSD) today reported stable earnings on slightly lower operating revenues for the first quarter of 1990 compared to the same period last year.

The company attributed lower operating revenues to warmer winter temperatures during the quarter as compared to the extremely cold temperatures a year earlier. However, power costs for the period also declined, the result of warmer temperatures and more favorable hydro conditions.

The company reported income for common stock of $47.7 million on operating

revenues of $264.6 million for the three months ending Mar. 31. On a per-share basis, the company earned 86 cents.

For the same period last year, the company's income for common stock was $47.1 million on operating revenues of $274.3 million and its earnings per share were 85 cents.

For the 12-month period ending Mar. 31, the company reported income for common of $105 million on operating revenues of $878.1 million and earnings per share of $1.89. This compares with income for common of $117.1 million on revenues of $844 million and earnings per share of $2.15 for the 12-month period ending Mar. 31, 1989.

The first quarter of 1990 marks the first time in three years that the company has not credited accumulated deferred investment tax credits (ADITC) to non-operating income. First-quarter earnings for 1989 included $700,000 of ADITC. For the 12-month period ending Mar. 31, the company reported $22.4 million of ADITC. Earnings for the 12 months ended Mar. 31 1989 include $18 million of ADITC. The non-cash investment tax credits were previously authorized by the company's state regulatory Commission to supplement earnings for a three-year period through the end of 1989.

DEARBORN, MI (APRIL 18) PR NEWSWIRE - CMS Energy Corporation (NYSE: CMS) today announced net income of $103.3 million or $1.27 per share in the first quarter of 1990, compared with $106.3 million or $1.29 per share in the same quarter of 1989.

The 2.8-percent decrease in first-quarter net income occurred primarily as a result of lower electric and natural gas sales due to unusually warm winter weather. The first quarter of 1990 was the warmest in lower Michigan in 69 years.

Net income for the 12 months ended March 31, 1990, totaled $309 million or $3.77 per share compared with $299 million or $3.64 per share for the 12 months ended March 31, 1989. The 12-month totals reflect an increase in electric sales (kWh) and gas deliveries and the company's ongoing capital refinancing program.

CMS Energy Corporation is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth- largest combination utility.

ARLINGTON, VA (APRIL 18) PR NEWSWIRE - Systemhouse Inc. (NASDAQ: SHKIF; Toronto and Montreal: SHK) of Arlington today announced that its San Francisco branch has been awarded a $4.2 million contract to provide computer systems and integration services for a new marine terminal owned by NYK of Tokyo, the world's largest shipping company. The contract comes through Vickerman, Zachary, Miller a California Corporation (VZM) of Oakland, the maritime architectural/engineering firm contracted by NYK to consult on the building of the new terminal at the Port of Los Angeles.

Systemhouse, as the prime contractor, will deliver all computer systems associated with the project. These systems will handle such functions as terminal control, inventory, yard and vessel planning, and decision support, all of which are involved with the management of container traffic including in- and out-bound trucks and vessels, scheduling, and ship loading.

In providing the systems, Systemhouse will utilize unix-based hardware as well as graphics planning software from Navis Corporation, real-time control software from MTCS (Maritime Terminal Computing Systems), and decision support software from the Pritsker Corporation. Systemhouse will also perform all the networking and peripheral integration. When completed, the system will also interface to NYK's worldwide communications network through North American centers in Long Beach, Calif., and Secaucus, N.J.

Following the Port of Los Angeles installation, plans call for similar systems to be implemented at NYK terminals in the San Francisco Bay area and Pacific Northwest.

OAK BROOK, IL (APRIL 18) PR NEWSWIRE - Federal Signal Corporation (NYSE: FSS) today reported record first quarter earnings of $.35 per share, 13 percent higher than the $.31 per share reported in 1989's first quarter. Sales and incoming orders also increased strongly while backlogs reached new highs.

Net income of $5.4 million increased 12 percent over 1989's first quarter net income of $4.8 million. First quarter sales increased to $107.1 million in 1990 compared to $96.5 million reported in last year's first quarter. New business increased 10 percent while backlogs increased to $189.8 million, 21 percent higher than a year ago.

Joseph J. Ross, chairman, president and chief executive officer, stated, "Our solid performance in the first quarter, evidenced by significant increases in sales, earnings, incoming orders and backlogs, provides the impetus for another year of record sales and earnings. We are optimistic that 1990 will be another year of substantial accomplishments of our strategic and financial goals and continued increases to our shareholder value."

Federal Signal Corporation, listed on the New York Stock Exchange, is a manufacturer and worldwide supplier of public safety, signaling and communications equipment, fire trucks, emergency and street sweeping vehicles, parking control equipment, custom on-premise signage, carbide cutting tools, precision punches and related die components.

PASADENA, CA (APRIL 18) PR NEWSWIRE - Conversion Industries Inc. (AMEX: CVD) and Energy Reserve Inc. (OTC) have announced that their respective wholly owned subsidiaries, Conversion Industries USA Inc., and ERES Cogenics Inc., have signed a 50/50 project partnership agreement to develop, own and operate a combined enhanced oil recovery facility and a 20.5 megawatt cogeneration power plant on the oil and gas leases of Energy

Reserve Inc. in Kern County, Calif. The total project cost is expected to be approximately $50 million.

The cogeneration plant will supply 160,000 pounds of steam per hour for enhanced recovery of heavy oil reserves, and 20.5 MW of electrical power generation will be sold to San Francisco-based Pacific Gas and Electric Co. (PG&E). At full production the enhanced oil recovery is expected to produce approximately 2,500 barrels of oil per day for sale by the partnership. All permits are in the final stages, and a total project turn-key engineering, procurement and construction contract with Beacon Construction Co. Inc., an affiliate of the Bechtel Group Inc., is being completed. Project construction is expected to commence in May 1990, and will include, as a part of the steam flood enhancement, a rework of existing oil wells and drilling of additional new oil wells on the 640 acre leases concurrently with the construction of the cogeneration plant.

The cogeneration facility will consume approximately 7.2 million cubic feet per day of natural gas anticipated to be supplied by Colin Energy Corp. (Toronto: CN.), a subsidiary of Conversion.

Conversion Industries is a fully integrated independent power producer. In addition, the comapny owns 51 percent of Colin Energy, a Calgary, Alberta-based producer of oil and natural gas.

WILMINGTON, DE (APRIL 18) PR NEWSWIRE - Rollins Truck Leasing Corp. (NYSE PSE: RLC) today reported its results for the second fiscal quarter and the six months ended Mar. 31, 1990.

As previously announced, the company's name was changed from RLC Corp. to Rollins Truck Leasing Corp. on Jan. 25, 1990.

Revenues from continuing operations in the second quarter increased by 5 percent to $79,841,000. Earnings from continuing operations were $3,133,000 or $.17 per share for the second quarter compared with $3,011,000 or $.16 per share in 1989.

For the six months ended Mar. 31, 1990, revenues from continuing operations were $160,382,000, a 6 percent increase over the first six months of 1989. Full-service leasing, guaranteed maintenance, commercial rental and dedicated contract carriage revenues all improved over last year. Earnings from continuing operations were $7,987,000 or $.43 per share, up from $7,839,000 or $.42 per share reported in 1989.

The company said it was pleased with the results achieved in this usually weak second fiscal quarter despite the continued softness in many sectors of the economy. Continued emphasis on expense control and any improvement in the economy should produce further growth during the second half of fiscal 1990.

Rollins Truck Leasing Corp. is one of the largest full-service truck leasing and rental companies in the United States. The company services more than 18,000 vehicles from more than 175 locations throughout the country.

#90108p4319 04/18/1990 ~PR Newswire

LOS ANGELES (APRIL 18) PR NEWSWIRE - Union Exploration Partners, Ltd. (NYSE: UXP), today declared a first quarter 1990 cash distribution of 49.20 cents per unit, payable May 15, 1990, to unitholders of record May 1 1990.

This compares with a cash distribution of 62.19 cents per unit for the first quarter of 1989. The decrease between the two periods was largely the result of settlements in 1989 of several contract disputes with natural gas pipeline companies. This is partially offset by higher prices for crude oil and natural gas in the first quarter of 1990, coupled with lower amortization of debt principal.

Unocal Corporation (NYSE: UCL) and its wholly owned subsidiary, Union Oil Company of California, currently hold 241.2 million units, 95 percent of the 253.1 million units outstanding. Union Oil is the managing general partner of UXP, a limited partnership which holds substantially all of Unocal's oil and gas exploration, development and production business in and near the Gulf of Mexico.

#90108p4321 04/18/1990 ~PR Newswire

LOS ANGELES (APRIL 18) PR NEWSWIRE - First Interstate Bancorp (NYSE: I) today reported net income of $127.2 million ($2.23 per share) for the quarter ended Mar. 31, 1990, versus income of $132.2 million ($2.81 per share) a year ago. The 1990 per share amount primarily reflects the impact of the Corporation's issuance of 8.625 million shares of common stock on Feb. 22, 1990.

Before an extraordinary item and the cumulative effect of an accounting change, earnings from operations were $97.1 million for the 1990 quarter, up from $94.3 million a year ago. The 1990 amount includes $6.8 million of previously unrecognized tax benefits. The cumulative effect of an accounting change in the first quarter of 1990 resulted in a $30.1 million ($0.57 per share) benefit and was due to the adoption of Statement of Financial Accounting Standards No. 96, "Accounting for Income Taxes." The year ago quarter included a $21.8 million ($0.48 per share) extraordinary item for previously unrecognized tax benefits and a $16.1 million ($0.35

per share) benefit for the cumulative effect of a change to mark-to-market accounting for swap transactions.

The net interest margin increased nine basis points to 4.76 percent from the fourth quarter 1989. Consolidated taxable-equivalent net interest income decreased $55.2 million, or 8.7 percent, from the first quarter of 1989 to $581.6 million in the 1990 quarter. The lower level of net interest income was in large part due to the Corporation's disposition of various non-strategic assets.

The Corporation recorded a total provision for possible credit losses of $91.8 million for the 1990 first quarter, compared to $135.8 million in the like 1989 quarter. The decrease reflects lower provisions at First Interstate Bank of Texas, where liquidating reserves were established in the fourth quarter.

Noninterest income was $243.7 million for the first quarter 1990, versus $259.9 million for the 1989 period. Foreign exchange trading losses accounted for a decrease of $30.5 million, while other service charges, collection and exchange charges, commissions and fees declined $17.3 million. These decreases were partially offset by a $29.9 million increase in earnings from trust fees, service charges on deposit accounts and other income.

Noninterest expense increased a moderate 1.6 percent to $615.1 million at Mar. 31, reflecting higher ORE expenses. Before ORE expenses, noninterest expense was down 3.5 percent, primarily reflecting the results of restructuring and other major efforts by the Corporation to reduce the controllable, recurring elements of noninterest expense.

At Mar. 31, 1990, the allowance for possible credit losses was $1,299 million, up $120 million from the same date a year ago. The increased allowance includes the $100 million provision recorded in the fourth quarter of 1989 for real estate loan concentrations. The current allowance equals 114 percent of nonperforming loans, compared to 78 percent at Mar. 31, 1989.

Nonperforming assets totaled $2,047 million at Mar. 31, 1990, down from $2,082 million at Mar. 31, 1989, and $2,111 million at yearend 1989. Approximately 74 percent of total nonperforming assets were real estate related at Mar. 31, 1990, versus 71 percent a year ago and 77 percent December 31, 1989. "While modest, this is the third quarter in which the level of nonperforming assets has been reduced," said Pinola.

At Mar. 31, 1990, deposits totaled $45.9 billion, up from $43.6 billion a year ago. Loans, net of unearned income and deferred fees, totaled $36.6 billion at Mar. 31, 1990, and $37.7 billion at Mar. 31, 1989. Total assets were $57.4 billion at the end of the first quarter 1990, up 1.2

percent from $56.7 billion a year ago, but down 2.8 percent from $59.1 billion at December 31, 1989.

First Interstate provides the largest geographical coverage of any retail and business banking system in the United States. Including licensees, First Interstate Banks operate nearly 1,200 full-service offices in 21 states. These offices serve five million households in more than 650 communities, including seven of the 10 fastest growing metropolitan markets in the U.S. Other offices serve U.S. and international customers in 19 countries.

COSTA MESA, CA (APRIL 18) PR NEWSWIRE - Mr. Svendsen, chairman of the board of the managing general partner of Standard Pacific L.P. (NYSE: SPF) announced that the board of directors has declared a $.45 per unit cash distribution payable May 31, 1990 to unitholders of record on May 15, 1990.

Svendsen also reported that the board of directors has approved the 1990 quarterly distribution policy of the partnership which is to pay approximately 60 percent of per unit partnership earnings in the form of distributions. Svendsen further stated the $.45 distribution rate will be reviewed each quarter and may be changed if general economic conditions warrant. As in prior years, the February 1991 distribution will be based on the results of operations for the full 1990 year.

Standard Pacific L.P. operates primarily as a geographically diversified builder of medium-priced single family homes with a majority of its operations in California. In addition, Standard Pacific L.P. assists homebuyers in obtaining financing for home purchases through its wholly-owned subsidiary, Standard Pacific Savings F.A. The company is also engaged in the manufacture and marketing of movable and acoustical office partitions and office furniture through its wholly-owned subsidiary Panel Concepts L.P.

#90108p4330 04/18/1990 ~PR Newswire

OGDEN, UT (APRIL 18) PR NEWSWIRE - Thiokol Corp. (NYSE: TKC) today reported net income of $10.5 million or 54 cents per share for its third quarter ended Mar. 31, 1990. This represents a 19 percent increase on the same basis as the prior year's $8.8 million or 47 cents per share. Reorganization costs and other unusual charges related to the July 1, 1989

spinoff from Morton Thiokol Inc. adversely impacted the prior year's third quarter net income by 94 cents per share or $17.9 million, producing a net loss for that quarter of 47 cents per share or $9.1 million. Net sales for the current quarter were $285.7 million which represents a 7 percent decrease from last year's $308.7 million.

Net income for the nine months ended Mar. 31, 1990 is $29.2 million or $1.51 per share. This represents a 17 percent increase on the same basis as the prior year's $24.9 million or $1.31 per share. Net income, after unusual charges, for the nine months ended Mar. 31, 1989 was $7 million or 37 cents per share. Net sales for the nine months ended Mar. 31, 1990 were $842.3 million or a 3 percent decrease compared to last year's $871.5 million.

Space sales of $147 million increased 12 percent in the third quarter while earnings of $12.2 million were up 56 percent over the prior year. Increasing Space Shuttle production activity and higher margins accounted for the significant increases. Increased Star motor sales and profits offset lower sales and profits on the Castor IV program.

Third quarter Strategic sales declined 25 percent to $46.6 million while profits decreased to $4.1 million from $4.8 million. Peacekeeper sales declined by $17.4 million due to fewer deliveries. Trident sales increased 17 percent over last year's third quarter due to increased production activity.

Tactical sales for the quarter decreased 33 percent from $65.4 million last year to $43.9 million. Related income declined 30 percent to $3.8 million. Most of the sales decrease resulted from a 53 percent decline in Standard Missile sales due to lower unit prices and fewer scheduled motor deliveries than prior year's third quarter. However, Standard Missile income increased for the quarter due to lower per unit production costs. HARM earnings declined due to higher than anticipated production costs.

Ordnance sales decreased 3 percent to $48.2 million and earnings fell 14 percent to $1.4 million for the third quarter. These declines are the result of lower production levels at the government-owned, company-operated ammunition plants.

Interest income increased $1.8 million for the third quarter and $4.9 million for the nine months ended Mar. 31, 1990 over the like periods in the prior year. These increases are a result of management's efforts to better utilize working capital resulting in higher cash and cash equivalent balances.

Thiokol manufactures and markets high technology solid propulsion systems, ordnance, and composite products for space and defense.

HOUSTON (APRIL 18) PR NEWSWIRE - Regal International Inc. (NYSE: RGL) today announced a net loss of $2,814,000 compared to a net loss of $3,925,000 in 1988.

Net loss per common share was 19 cents for 1989 compared to a net loss of 27 cents per share for 1988. With recent financing developments and the settlement of certain liabilities and expensive litigations, company management sees an acceleration of this improving trend and anticipates an operating profit in 1990.

Regal International Inc. is primarily engaged in the manufacture and sale of rubber products for marine and oilfield applications.

JACKSONVILLE, FL (APRIL 18) PR NEWSWIRE - Sales for the 12 weeks ended April 4, 1990 were $2.3 billion, a $136.4 million increase, or 6.2 percent over the comparable quarter ended April 5, 1989. For the 40 weeks ended April 4, 1990, sales were $7.5 billion, an increase of $470.8 million, or 6.7 percent over the previous year. Identical store sales increased 5.5 percent year-to-date compared to 1.4 percent for the previous year.

Net earnings for the 12 weeks ended April 4, 1990 were $42.0 million, or $1.07 per share, compared with $37.4 million, or $0.93 per share, a 12.3 percent increase. For the 40 weeks ended April 4, 1990, net earnings were $108.9 million or $2.75 per share, as compared with $92.2 million, or $2.30 per share in 1989, an 18.1 percent increase.

James Kufeldt, president stated: "We are pleased to report another double digit increase in net earnings and a 7.2 percent increase in store average volume. Large stores, over 35,000 square feet, accounted for 37 percent of our sales this quarter."

"The increase in earnings for the quarter is the result of the hard work of our associates in controlling expenses, while offering lower retail prices to our customers."

During the first 40 weeks of fiscal 1990, the company opened 28 new stores averaging 38,200 square feet, acquired three stores, averaging 42,300 square feet, enlarged or remodeled 26 stores and closed 36 stores,

averaging 25,100 square feet. As of April 4, 1990, retail space totaled 37.0 million square feet, a 1.3 percent increase over the prior year-end. Currently, there are 30 new stores under construction. The company plans to open 46 new stores in the current fiscal year. Winn-Dixie (NYSE: WIN) had 1,224 stores in operation on April 4, 1990 compared with 1,238 last year.

STAMFORD, CT (APRIL 18) PR NEWSWIRE - ABB Asea Brown Boveri Ltd. (ABB) announced today it has formed a major new process instrumentation group.

The new operation, to be known as ABB Kent-Taylor, combines the worldwide resources of the Taylor Instrument Division, based in Rochester, N.Y., and of the process instrumentation business of ABB Kent, based in Luton, England.

ABB Kent-Taylor is expected to have combined annual sales of more than $250 million and has approximately 3,000 employees. John Notley, head of the ABB instrumentation business area which includes ABB Kent- Taylor, said "Uniting these two well-established organizations offers our customers one of the broadest and most complete lines of process control instrumentation available anywhere in the world."

"I expect the synergy of the new group to create a dynamic presence in the market that will enable us to supply innovative instrumentation and technology for the process and power industries, and continued application expertise, service and support to our customers," Notley added.

Notley stated that ABB Kent-Taylor will supply a complete range of industrial and process instruments and controls, from process sensors and transmitters, to advanced monitoring and control instrumentation.

The total sales in the area of ABB instrumentation including water meters, control valves, analyzers and test and measurement equipment is now in excess of $550 million per year.

ABB Kent-Taylor has worldwide manufacturing capabilities and comprehensive sales and service facilities located in more than 70 countries. It is part of the ABB Group, Zurich, the world's leading electrical engineering company with total annual sales of about $25 billion and 215,000 employees in 140 countries.

In the United States, Asea Brown Boveri Inc. provides products and

services for the power, automation, environmental control, transit and other markets.

#90108p4350 04/18/1990 ~PR Newswire

WORCESTER, MA (APRIL 18) PR NEWSWIRE - Norton Company (NYSE: NRT) today filed suit in federal court in Boston claiming that BTR and ER Holdings have already triggered the Massachusetts Control Share Acquisition statute (Chapter 110D) through their simultaneous tender offer and proxy solicitation.

The lawsuit further alleged that the effect of triggering Chapter 110D is that neither the shares tendered to ER Holdings (nor proxies in respect of such shares), nor any shares to be purchased by ER Holdings pursuant to its tender offer, will be eligible to vote for any purpose unless shareholders who meet certain tests under the statute subsequently elect otherwise.

Chapter 110D is triggered when beneficial ownership of more than 20 percent of the voting power of a corporation subject to the statute is acquired. Norton's lawsuit claims that ER Holdings has already acquired beneficial ownership of tendered Norton shares within the meaning of Chapter 110D by deliberately ignoring the voting procedure established by Chapter 110D and instead seeking proxies to replace the Norton board.

Among other relief, Norton asked the court to enjoin the voting of any proxies in respect of shares tendered to ER Holdings at or in connection with any meeting of Norton shareholders, as well as to declare that the election of any director, or approval of any transaction, accomplished through the voting of any tendered shares (absent a Chapter 110D vote), is of no force or effect. Norton has requested the federal court to refer this new suit to the Massachusetts state courts. Norton says that the new suit involves a pure question of interpretation of Massachusetts law that should be decided by the state courts, not the federal court.

GLENDALE, CA (APRIL 18) PR NEWSWIRE - ATI Medical Inc. (AMEX: ATI) today announced it has completed a private placement of $4.0 million in 10-1/4 percent convertible subordinated debentures with private institutional

investors. Specific terms were not disclosed.

Paul E. Stevenson, president and chief executive officer, said the funds would be used for general working capital. "We plan to utilize these funds in expanding ATI's capacity to serve the growing rental market for medical equipment," he said.

ATI Medical rents medical equipment primarily to hospitals as well as the entertainment industry through 53 offices in major cities across the country. ATI also sells medical equipment and certain disposables and markets through its subsidiary, CAMS Inc., a software system to monitor equipment usage within hospitals.

The company posted net earnings of $1.7 million, or 31 cents per share, on revenues of $24.1 million for the six months ended Jan. 31, 1990.

JACKSONVILLE, FL (APRIL 18) PR NEWSWIRE - The board of directors of Winn-Dixie Stores, Inc. (NYSE: WIN) today elected George E. (Mickey) Clerc 54, a vice president. It is the first time in the company's 65-year history that the director of advertising has received this recognition.

Best known to the media as the "voice of Winn-Dixie," Clerc has additionally served as the company's spokesperson and public relations contact.

Clerc came to the company in 1961 as assistant advertising director in the Jacksonville Division. In 1965 he was promoted to advertising director of the company's Louisville, Ky. Division, and a year later assigned to Miami, the company's largest operating division. He was named corporate director of advertising in 1979.

He attended the University of South Carolina and Jacksonville University. His early career included newspaper reporting, broadcast announcing and copy writing, and a substantial background in advertising with two major retailers.

Winn-Dixie operates 1,225 supermarkets in 13 Sunbelt states.

NEW YORK (APRIL 18) PR NEWSWIRE - Chemical Bank and The Greater New York Savings Bank (NASDAQ: GRTR) announced today that they have signed an agreement for Chemical to purchase The Greater's Manhattan branch, located at Broadway and 79th Street. The branch, which The Greater opened in 1968 has deposits of $118 million.

The sale is subject to regulatory approval and a due diligence review by Chemical of the branch's assets and deposit liabilities. The terms of the transaction were not disclosed.

Gerard C. Keegan, president and chief operating officer of The Greater, stated: "The sale of our only Manhattan branch permits us to place an even stronger focus on our branch system in Brooklyn and new expansion on Long Island. We appreciate the opportunity we had to serve our loyal Manhattan customers and are confident they will be well-served by Chemical."

With this sale, The Greater will have nine branches in Brooklyn, one in Queens and one in Nassau County. The Greater will open its first Suffolk County branch next month in Medford and two additional Nassau branches later this year in Oceanside and Hicksville.

"The purchase of this large, modern branch reflects Chemical Bank's commitment to the retail banking business," said Alan M. Silberstein, senior vice president, Chemical Bank. He noted that Chemical's Consumer Banking Group had a record year of profitability in 1989 and experienced the fastest balance growth and greatest market share increase of the New York banks.

"The upper west side is a very attractive marketplace, and this new location will enhance our already strong consumer franchise," he added.

The Greater New York Savings Bank is an FDIC-insured, New York State-chartered stock savings bank with assets of $3.1 billion, deposits of $2.2 billion, and total stockholders' equity of $210 million or 6.76 percent of total assets, at Dec. 31, 1989.

Chemical Bank is FDIC-insured, and is the principal subsidiary of Chemical Banking Corporation (NYSE: CHL), the nation's sixth largest bank holding company, with assets of $74 billion.

#90108p4371 04/18/1990 ~PR Newswire

MELROSE PARK, IL (APRIL 18) PR NEWSWIRE - Alberto-Culver Co. (NYSE: ACVA, ACV) today announced record sales and earnings for the second quarter and first six months of its fiscal year.

Sales for the second quarter ended March 31, 1990 increased 7.8 percent to $194.7 million, up from $180.6 million in the same period last year. Net earnings were up 18.8 percent to $7.5 million or 28 cents per share compared to $6.3 million or 24 cents per share in fiscal 1989.

Six-month sales grew 8.2 percent to $371.1 million compared to $343.1 million for the same period last year. Net earnings rose 19.1 percent to $14.0 million or 53 cents per share compared to 1989's $11.8 million or 45 cents per share.

Leonard H. Lavin, chairman and chief executive officer of Alberto- Culver, said that the company accomplished a major objective for both the quarter and the six-month period by increasing profits as a percentage of sales.

"Alberto-Culver continues to progress despite the difficult and ruggedly competitive marketing climate prevalent throughout the industry," said Lavin. "And this goal will be pursued during the balance of the fiscal year as the company maintains its policy of investing heavily in advertising, promotion and product development."

Lavin noted the company was particularly pleased with the results turned in by its Sally Beauty Co. subsidiary and International Division during the quarter.

"Sally enjoyed an excellent second quarter, rebounding strongly from first quarter results that while good, were less than expected due to frigid temperatures during December," he said. "The International Division also continued its dramatic growth, posting an outstanding second quarter and six-month period."

The company today also declared its regular quarterly dividend of 5 cents per share on both its Class A and Class B common stock payable May 20, 1990, to shareholders of record May 4, 1990.

"While cautiously watching this year's more challenging business environment, we anticipate a continuation of the company's consistent sales and earnings increases for fiscal 1990," Lavin said.

#90108p4375 04/18/1990 ~PR Newswire
DENVER (APRIL 18) PR NEWSWIRE - Public Service Co. of Colorado (NYSE: PSR) Wednesday reported revenues and earnings for the first quarter, ended Mar. 31.

For the 1990 first quarter, the company reported net income of $42.3 million, or 74 cents per share, on revenues of $448.3 million. Earnings were down slightly, compared to the like period during the previous year. First quarter results for 1989 showed net income of $43.7 million, or 77 cents per share, on revenues of $544.7 million.

For the 12 months ended Mar. 31, 1990, net income was $147.5 million, or $2.56 per share, on revenues of $1.64 billion. By comparison, net income was $105 million, or $1.76 per share, on revenues of $1.66 billion for the like 12-month period a year ago. Results for the 12-month period ended Mar. 31, 1989 included additional Fort St. Vrain defueling and decommissioning expenses of $63.8 million ($39.6 million after-tax) or 75 cents per share recorded in the 1988 third quarter.

Richard C. Kelly, senior vice president of finance and chief financial officer, said earnings for the quarter were impacted by the effects of lower electricity rates and reduced natural gas deliveries caused by warmer than normal weather.

The temporary rate decreases were the result of an agreement reached in 1988 with the staff of the Colorado Public Utilities and the Office of Consumer Counsel.

Kelly also noted that the weather during the first three months of 1990 was approximately 10 percent warmer than the like period in 1989.

#90108p4385 04/18/1990 ~PR Newswire

LOS ANGELES (APRIL 18) PR NEWSWIRE - Northrop Corporation (NYSE: NOC) today reported an increase in net income and a 24 percent rise in its business backlog for the first quarter of 1990.

Net income for the quarter ended March 31, 1990, was $96 million, compared with $9.7 million recorded in the first quarter of 1989. Earnings in the first quarter of this year included a gain of $67.1 million from the sale of the company's headquarters complex. The balance of the after-tax gain, $22.8 million, will be deferred and amortized into income over the 10-year lease of Northrop's corporate space in the building it now occupies.

Net income prior to the building sale gain was $28.9 million. Earnings per share for the first quarter were $2.04, compared with 21 cents in the same period last year. Earnings per share excluding the building sale gain were 62 cents.

Northrop's first quarter sales totalled $1.28 billion, the same level of sales recorded in the first quarter of 1989. At March 31, 1990, Northrop's business backlog was $5.7 billion, up 24 percent from the $4.6 billion reported a year earlier.

A slight increase in aircraft segment sales offset a small decrease in the missiles and unmanned vehicles segment. The company's revenue from production work on the B-2 Advanced Technology Bomber offset lower volume in the research and development phase of the B-2 program and fewer deliveries of shipsets for the F/A-18 Hornet and 747 jetliners.

Operating profit in the company's aircraft business segment was reduced as a result of a decline in F/A-18 and 747 sales, and lower rates of operating margin on these sales.

Northrop's electronics business segment operating results in the first quarter of 1990 improved over the comparable quarter of last year when a $26 million provision was made for cost growth in the research and development phase of the ALQ-135 electronic countermeasures system for the F-15. First quarter operating profits continue to suffer from increased costs and lower sales at the Precision Products Division, which for the last nine months has been suspended from receiving new Government contracts.

PANAMA CITY, Panama (APRIL 18) PR NEWSWIRE - GTE Corp. (NYSE: GTE) is donating equipment and cash, valued at $250,000, to aid Panama's economic redevelopment and to help restore nationwide telecommunications services that were disrupted in late December when U.S. troops invaded the country.

Doug Mullen, director-international for GTE Information Services, announced GTE's support today during an address before the American Chamber of Commerce here. Mullen also will address the Panamanian Chamber of Commerce, Industry and Agriculture, during a luncheon meeting Thursday.

The GTE executive returns to Panama this week for the first time since his release as a hostage. Mullen and CBS News producer Jon Meyersohn were held hostage Dec. 20-23, 1989, by members of the Panama Defense Force (PDF) and Dignity Battalion who supported General Manuel Noriega.

Commenting on Panama's future, Mullen told the business leaders: "History will say of this generation of Panamanians that they did not yield to crisis and confusion; that they held their country together and strengthened its resolve in a new and strong democratic government.

"It is my hope, and GTE's," he said, "that in some small way, our gift to the people of Panama will help them as they embark on their new course."

GTE Corp. is a leader in its three core businesses -- telecommunications, lighting and precision materials -- providing products and services worldwide. Its subsidiaries operate in 46 states and 41 countries, with combined revenues and sales of $17.4 billion and net income of $1.4 billion in 1989.

MIDLAND, TX (APRIL 18) PR NEWSWIRE - Parker & Parsley Development Partners L.P. (AMEX: PDP) today announced record results for the year ended Dec. 31, 1989. Net income was $11.7 million, or $2.02 per unit, on total revenues of $71.7 million compared to a net loss of $7.9 million, or a loss of $1.69 per unit, on revenues of $38.8 million during 1988. Net cash provided by operations was $33.3 million in 1989, an increase from the $14 million reported in 1988.

At Jan. 1, 1990 the Partnership's proven reserves, in accordance with the SEC presentation method, were valued at $149 million, a 10 percent increase from the Jan. 1, 1989 value of $134 million. In addition, the

Partnership established an outstanding reserve replacement rate relative to reserves produced in 1989 of 575 percent. This was primarily accomplished through the acquisition of Parker & Parsley Petroleum Co. in May.

Production costs, as a percentage of oil & gas revenues increased slightly to 45 percent from the 1988 level of 43 percent. Depreciation, depletion and amortization ("DD&A") for 1989, as a percentage of oil & gas revenues, decreased to 46 percent versus 58 percent in 1988.

Weighted average Units outstanding for the year equalled approximately 5.7 million, compared to 4.6 million the year before. As of Dec. 31, 1989, there were 5.8 million Units issued and 5.5 million outstanding.

Parker & Parsley Development Parnters L.P. is a master limited partnership engaged in the development, production, and acquisition of oil and gas properties located in Texas, Oklahoma, Louisiana, New Mexico and Colorado. PDP currently has over $180 million in assets and over 4,000 properties.

#90108p4401 04/18/1990 ~PR Newswire

MIAMI (APRIL 18) PR NEWSWIRE - Capital Bancorp today reported a first-quarter 1990 consolidated net loss of $720,000, or $(.16) per share, compared with net income of $2.0 million, or $.45 per share, for the first quarter of 1989. Consolidated figures include the results of Capital Bank Capital Factors, Inc., and Capital Trading Group, Inc.

Capital Bancorp stated the loss has no effect on the company's major subsidiary, Capital Bank, which reported earnings of $2.1 million in the first quarter of 1990.

The bank holding company attributed the decline in its first quarter results to losses incurred by Capital Trading Group, Inc., a wholly owned export trade subsidiary of Capital Bancorp, and to provisions for losses on the liquidation of the trading subsidiary.

Capital Bancorp has decided to discontinue its trading company operations before the end of the year because of operating losses sustained in 1988 and 1989, higher risks associated with inventory and investments in joint ventures and regulations that impose restrictions on bank holding company-affiliated trading companies.

"After carefully eveluating our lines of business, we have concluded that our financial and human resources are best deployed by focusing on our

core businesses: real estate lending, international banking, commercial lending, factoring and retail account services," said Abel Holtz, chairman and president of Capital Bancorp.

At March 31, 1990, Capital Bancorp's total assets were $1.04 billion compared with $920 million a year ago, and net loans totaled $610 million compared with $559 million. Deposits amounted to $795 million, compared with $699 million a year earlier. Stockholders' equity was $60.6 million at March 31, 1990 compared with $57.2 million at March 31, 1989.

At March 31, 1990, Capital Bank's primary capital ratio stood at 7.8 percent and Capital Bancorp's primary capital ratio was 6.7 percent.

Capital Bancorp, a Florida bank holding company, is the parent of Capital Bank, which has 27 South Florida offices and a factoring subsidiary, Capital Factors, Inc. Capital Bancorp is affiliated with $290 million-asset Capital Bank of California based in Los Angeles and $108 million-asset Capital Bank, N.A. based in Washington, D.C.

RICHMOND, VA (APRIL 18) PR NEWSWIRE - The board of directors of Reynolds Metals Company (NYSE: RLM) today elected J. Wilt Wagner and Douglas M. Jerrold corporate vice presidents.

Mr. Wagner, 48, general manager of the company's Mill Products Division, was elected vice president and general manager of the division, and Mr. Jerrold, 40, corporate director of tax affairs, was elected vice president tax affairs.

Joining the company in 1964 as an industrial engineer, Mr. Wagner held a variety of engineering and operations positions within the company's Flexible Packaging Division before being named manager of the Reynolds Bellwood, Va. printing plant in 1975. He was appointed business manager of the Flexible Packaging Division's foil unit in 1978 and was promoted to operations manager of the foil unit the following year.

In 1980, Mr. Wagner was named general business planning manager for the Recycling and Reclamation Division and was promoted to general manager of the reclamation division the next year. He became manager of the company's Listerhill, Ala. alloys plant in 1983, was appointed Mill Products Division operations manager in 1988 and named division general manager in 1989.

A native of Cocoa, Fla, Mr. Wagner graduated from the University of

Florida with a bachelor's degree in industrial engineering and earned a Master of Commerce degree from the University of Richmond.

Mr. Jerrold, who joined Reynolds in 1983 as manager of federal taxes, became director of federal tax affairs in 1986 and was promoted to corporate director of tax affairs in 1987.

He began his career as an accountant with Deloitte-Haskins & Sells and, prior to joining Reynolds, held tax positions as assistant vice president at Omni Care, Inc. and Fuqua Industries, Inc.

A native of Long, Island, N.Y., Mr. Jerrold earned an A.B. degree in economics from Hamilton College and his M.B.A. degree from Rutgers University. Mr. Jerrold also is a certified public accountant.

TORRANCE, CA (APRIL 18) PR NEWSWIRE - Vision Ten Inc. announced today that it has reached an agreement with a private group of investors providing for an infusion of approximately $1.25 million in exchange for an approximately 28 percent equity interest in Vision Ten.

The funds will be used for working capital, debt reduction and for supporting the sales and marketing efforts of Vision Ten's Rita! (Radiographic Imaging, Transmission & Archive) system.

"We strongly believe the need for this new technology in several markets paves the way for Rita! technology, not just in the medical market, but also in geophysical, industrial, military and others," said a spokesman for the private group.

Briefly, Rita! allows for high resolution X-ray images to be converted from film to digital form, optically archived and distributed to multiple locations within a facility or to other locations. The compact unit, which includes the film digitizer, monitor, control panel, hardware and software, occupies less than eight square feet and carries a list price of less than $60,000.

Rita! was initially introduced to the medical community at the Radiological Society of North America convention in November 1989 and has been placed in the non-destructive testing industry since June 1989. Several medical institutions are presently operating with the workstations.

Vision Ten manufactures and markets the digitizing workstation for diagnostic and image management applications.

MORRIS TOWNSHIP, NJ (APRIL 18) PR NEWSWIRE - Allied-Signal Inc. (NYSE: ALD) announced today that, at the request of U.S. Trade Representative Carla Hills, it has agreed to a postponement in the consideration of the company's petition for relief from unfair Japanese targeting of amorphous metals.

The purpose of the postponement is to allow the USTR to initiate immediate discussions between the two governments into the issues raised in the Allied-Signal complaint. It is expected that these talks will result in the opening of the Japanese market for amorphous metal alloy transformer cores.

If these discussions do not obtain a satisfactory solution for Allied-Signal within 150 days, the USTR will initiate a full investigation under Section 301 of the Trade Act of 1974. The USTR has acknowledged that Allied-Signal's petition meets the legal standards for an unfair trade investigation.

"The recently announced progress in the trade talks between the United States and Japan holds out the promise that trade issues between the two nations can be resolved in a more businesslike and less confrontational manner," said Edward L. Hennessy, Jr., Allied-Signal chairman and CEO. "We hope that Allied-Signal's case will demonstrate that this process can work. We look forward to cooperating with the U.S. Trade Representative to achieve that result."

In March, Allied-Signal petitioned the USTR to take action to open the Japanese market to amorphous metals, charging that the Japanese have targeted such products for their own dominance.

"The whole issue in this case is access to the Japanese markets for amorphous metals," according to David C. Hill, Allied-Signal senior vice president-engineered materials. "We want to get on with the job of selling our products through our joint venture with several Japanese companies, which we have been trying to do for the past decade."

In the petition filed in February, Allied-Signal presented evidence to the USTR that Japanese government agencies and businesses, working in concert, have successfully taken steps to keep the company out of the Japanese market for amorphous metal alloys, a material invented by Allied-Signal and for which it holds hundreds of U.S., European and Japanese patents.

WASHINGTON, DC (APRIL 18) PR NEWSWIRE - Nationale-Nederlanden N.V., the Netherlands-based insurance group, announced today that it has reached an agreement in principle to purchase through a U.S. subsidiary approximately 22 percent of the outstanding stock of AIM Management Group Inc. and all of a new issue of convertible preferred stock, with an option to acquire a majority interest in the future.

AIM Management Group ("AIM"), headquartered in Houston and its principal subsidiaries are engaged primarily in the business of providing investment management to institutional and retail mutual funds. Some of the major mutual funds under AIM's management are:

-- AIM Weingarten Fund; -- AIM Summit Fund; -- AIM Constellation Fund; -- AIM Charter Fund; -- Short-Term Investments Co; -- Tax-Free Investments Trust. As of Dec. 31, 1989, AIM's assets under management were approximately $13.3 billion. AIM has a staff of 150 people.

"We are very excited about the association with such a fine organization," said Joseph H. Youngs, chairman and chief executive officer of Nationale-Nederlanden North America Corp. ("NNNA"), headquartered in Washington, D.C., the management company which oversees Nationale-Nederlanden's operations in North America.

"This will provide us with an opportunity to enter this rapidly growing sector of the financial services industry through a well-established operation with quality staff and management," according to Lynn H. Johnston, deputy chairman and president of NNNA, who will become NNNA's representative on AIM's board of directors.

Nationale-Nederlanden N.V. is the largest insurance group in the Netherlands and one of the leading insurance groups in the world with operations in 21 countries. Assets at Dec. 31, 1989 were in excess of $48 billion and 1989 revenues amounted to approximately $12 billion.

Nationale-Nederlanden operates in North America through eight life insurance companies and nine property and casualty insurance companies. In 1989 the total revenues of the North American operations were about $2.7 billion, and total assets were in excess of $6.5 billion.

BURBANK, CA (APRIL 18) PR NEWSWIRE - Mortgage and Realty Trust (NYSE: MRT) today announced second quarter unaudited operating results as follows:

Periods ended	Quarter		Six months	
March 31,	1990	1989	1990	1989
Net income	$4,670,000	$4,814,000	$9,633,000	$10,091,000
Net income per share	$.43	$.45	$.88	$.94
Average shares outstanding	11,037,000	10,769,000	11,000,000	10,743,000

On April 12, the trust filed for reorganization under Chapter 11 of the

U.S. Bankruptcy Code. In view of these proceedings, no dividend was declared.

The trust intends to promptly present a plan of reorganization in order to be discharged from the Chapter 11 proceedings in time to make a dividend payment prior to June 15, 1991, thereby preserving its status as a real estate investment trust for the fiscal year ending Sept. 30, 1990. Should this timing not be met, the income reported for the six months ended March 31, 1990, would be reduced by a provision for income taxes of approximately $3,800,000.

Mortgage and Realty Trust is a self-administered real estate investment trust with investments in floating-rate real estate loans and real estate equities nationwide. The trust's common shares are traded on the New York Stock Exchange under the symbol MRT.

#90108p4438 04/18/1990 ~PR Newswire

PARIS (APRIL 18) PR NEWSWIRE - Bernard Attali, chairman of the Air France Group, unveiled new global operating strategies today, strengthened by the international carrier's recent alliances with UTA and Air Inter.

Attali also announced a net profit of FF 841.3 million (approximately $148 million) for Air France for the fiscal 1989 year, a drop of 27 percent from 1988. Net profit of the parent company was FF 685.1 million, compared to FF 1,208.1 million in 1988. The consolidated results of Air France and its subsidiaries in 1989 were adversely affected by start-up costs related to the new airline EuroBerlin.

Attali explained that the Air France Group strategy hinged on a "firm coordination" approach which will "preserve the identity of each company, while assuring the most efficient synergy between them."

Some of the examples of these strategies, to be implemented in the third quarter of 1990, were outlined as follows by Attali:

-- The Paris-San Francisco service will be operated solely by UTA, nonstop and with more convenient services. Air France will withdraw from that market, and will continue to serve the Paris-Los Angeles market with all nonstop flights.

-- There will be a new daily service between Paris-Orly Airport and Newark Airport. It will be operated by Air France and specially coordinated to connect with Air Inter flights between Orly and the French provinces.

-- Direct flights linking New York with ten French provincial cities, some of which were introduced by UTA via the Newark gateway, will be operated by Air France from JFK Airport.

-- The UTA product will be brought into line with the Air France product without necessarily using identical markings.

The alliance between Air France, UTA and Air Inter, Attali said, will serve to establish equal opportunities in a competitive, global environment. "It enables us to create synergy, achieve economies of scale, position the national market within the international market, offer the best possible service, and be better equipped to face the strong foreign competition ahead."

The executive also noted that other 1990 programs of the international air carrier will feature the opening of 12 new routes and five new destinations -- Graz, Cardiff, Dresden, Munster and Bologna; increased frequency of flights to some 40 destinations, and the launching of several marketing campaigns, including the new line of Le Club products for business clientele.

#90108p4442 04/18/1990 ~PR Newswire

ARLINGTON, VA (APRIL 18) PR NEWSWIRE - More than 10,000 federal government workers are now using a new dedicated telecommunications network to place calls to other government offices and to the general public.

This past weekend, Chesapeake and Potomac Telephone Company (C&P), a Bell Atlantic Company (NYSE: BEL), placed into service the first stage of the new Washington Interagency Telecommunications System (WITS) for workers at several agency locations in the District of Columbia.

WITS, which uses integrated services digital network (ISDN) technology and includes its own operations center, repair bureau and business office eventually will provide voice and data services to 130,000 government employees.

The WITS Operations Center, located at GSA's regional headquarters, provides a single point of contact for agencies needing repairs or installations. The center also functions as a telephone company business office for users of WITS, receiving and processing customer orders and comments.

C&P's principal subcontractor on the project, AT&T (NYSE: T), will work from the Operations Center to install and maintain customer premises equipment.

WITS also provides GSA with a System Quality Assurance Center to oversee the performance of the C&P team providing the service. The government has electronic access to computers in the Operations Center and can simply and automatically verify, measure and evaluate the system's usage and performance. There also is a Demonstration Center where representatives form federal government agencies can test equipment available to them.

Government workers will be brought onto the new system in three phases. The first, which began last weekend, will connect 40,000 federal employees to the dedicated network by the end of May. The 10,000 employees placed into service last weekend included workers at GSA, the Veteran's Administration, the Federal Emergency Regulatory Commission, the United States Information Agency, the National Archives, the Department of Labor, and the Department of Treasury.

C&P Telephone Company serving Washington, is one of seven Bell Atlantic telephone companies. The others are New Jersey Bell, Bell of Pennsylvania Diamond State Telephone serving Delaware, and the C&P Telephone Companies serving Maryland, Virginia and West Virginia. Bell Atlantic also owns subsidiaries that provide business systems, cellular communications, computer maintenance and financial services in national and international markets.

SANTA ANA, CA (APRIL 18) PR NEWSWIRE - Ingram Micro D announced record first quarter sales for the period ending Mar. 31, 1990. For the first quarter, the company had sales of $323,400,000, a 34 percent increase over the first quarter of 1989, when Ingram Computer and Micro D, operating separately, recorded combined sales of $241,800,000.

Ingram Micro D's focused marketing divisions - Technical Products Division (TPD), which focuses on the advanced product categories of networking, communications, UNIX/XENIX, graphics/CAD and high-end CPUs/workstations, and Macintosh Products Division (MAC D) - both posted record sales results for the quarter. MAC D exceeded $50 million in sales for the first time and TPD posted sales just under $40 million.

Though a private company, Ingram Micro D follows the practice of making its quarterly sales results public to assist vendors and the financial community in tracking the growth of the microcomputer marketplace.

Ingram Micro D Inc. is the world's largest distributor of microcomputer hardware, software, peripherals and accessories, marketing and distributing more than 6,000 products from over 500 of the world's top developers. It serves as a wholesale distributor to over 40,000 reseller customers in the United States, Canada and Europe. Ingram Micro D Inc. operates two international subsidiaries, Ingram Micro D Ltd. of Canada and Ingram Softeurop of Belgium. The company is headquartered in Santa Ana and its 1989 sales topped $1 billion -- the first ever microcomputer products distributor to pass this milestone.

#90108p4452 04/18/1990 ~PR Newswire

BOSTON (APRIL 18) PR NEWSWIRE - Fifteen billion dollars annually are a lot of dollars to lose.

And the Internal Revenue Service (IRS) continues to lose close to $15 billion each April, according to Management Scientist Sidney Moglewer. That's roughly 10 percent of the federal deficit.

Moglewer and 1,849 others will present their studies, on everything from AIDS to Soviet Military Analysis to water pollution treatment, from May 7 to 9, 1990, at The Institute of Management Sciences (TIMS) and Operations Research Society of America (ORSA) national conference at Caesar's Palace, Las Vegas, Nev.

Moglewer took Money magazine's 1989 Survey of Income Tax Returns from 50 different tax preparers, as his sample. Money has found that not one of the 50, selected from across the country, (30 CPAs, 12 from franchise firms, five independent enrolled agents and three from national accounting companies) computed taxes due in the same way. In other words, they came up with 50 different totals from the same tax return. Some 19 of these underestimated taxes due.

"Many tax preparers advertise that they can save anyone dollars on their taxes," Management Scientist Moglewer points out, "and their business success may depend on their ability to do so."

Tax preparation fees ranged from $250 to $2,500, for the same return, with an average fee of $865. Over 40 percent of the preparers charged under $600. There was no correlation between the fees charged and the estimated taxes -- a high fee did not guarantee a low tax.

IRS Favors Professionals "Some observers of the IRS have reported that

there tends to be a bias in the IRS in favor of returns prepared by professionals," says Moglewer. "You are less likely to be audited, if you have a professional tax preparer do your return."

Actual IRS statistics indicate that audits are performed on one-half percent to 12-1/2 percent of returns, depending on income level.

By projecting the tax preparers in the sample onto the 541,000 professional tax preparers in the nation (who prepare 46 million tax returns each year), Moglewer found that underestimated tax preparer returns produced a shortfall of $14.3 billion or 10 percent of the federal deficit in the sampled year (1988). A cursory look at 1989 seems to figure the same way.

"It looks like a 10 percent improvement in the federal deficit can be achieved through better IRS regulation of professional tax preparers," Moglewer concluded.

Meantime, if one wishes to take a chance on facing an IRS audit, Moglewer points out, a taxpayer could select three different professional tax preparers -- ones with the lowest fees -- and submit the return with the lowest tax. You may end up among the 87 to 99-1/2 percent of underestimated tax payers whose returns go unaudited.

The Institute of Management Sciences is a not-for-profit professional association of better than 7,700 management scientists in 77 countries and the U.S., who apply scientific principles to management problems. BALTIMORE (APRIL 18) PR NEWSWIRE - Baltimore Bancorp (NYSE: BBB), the

parent company of The Bank of Baltimore today reported moderately higher net income of $5,116,000 or $.40 per share for the first quarter of 1990 compared to net income for the same period in 1989 of $5,013,000 or $.39 per share.

Harry L. Robinson, chairman of the board and chief executive officer stated that the first quarter earnings benefited from continued growth in loan portfolios, modest loan losses and tight control over operating expenses. Robinson stated that the first quarter of the year produced higher interest margins then either of the two previous quarters and that the corporation expected this favorable trend to continue.

At March 31, 1990 the corporation's stockholders equity was $240,579,000, or 6.95 percent of its total assets of $3,461,466,000. Baltimore Bancorp operates a banking network of 51 offices in Maryland.

CALGARY (APRIL 18) PR NEWSWIRE - Shell Canada (Toronto, Montreal: SHC) and the Altamont Gas Transportation Project today announced Shell's withdrawal from the project as an equity interest partner. Shell continues to support the project through its negotiations to contract for 100 mmcf/d of natural gas capacity on the Altamont pipeline.

Shell believes that Altamont is an important project which will provide additional pipeline capacity, through an alternate pipeline system, for Canadian natural gas in the California market. ''We are pleased to have been involved in developing the project to this point,'' said Cliff Paulson, vice president of Natural Gas and Sulphur Marketing. ''We regret we cannot continue to participate as an equity partner, due to other contractual obligations.''

Jerry van der Linden, Altamont's Project Manager said ''Shell has been a significant contributor to the success of the project and we are sorry they must discontinue participation as a partner.''

''The Altamont partners, Tenneco Gas, Petro-Canada, Amoco Canada and Entech, Inc. (a subsidiary of Montana Power) will absorb the Shell equity. Tenneco Gas becomes the leader of the project in mid May 1990 and with their extensive experience, the project will be progressed through the regulatory process in a timely manner.''

The Altamont Project is seeking to build a pipeline to transport 700 mmcf/d of gas from the Port of Wild Horse, Montana to inter-connect with the proposed Kern River pipeline near Opal, Wyoming. The Kern River pipeline would then transport the gas to markets in Southern California.

CONTACT: Fred Klein of, 403-232-4144, or Adrienne Lamb, 403-232-3892, of Shell Canada Limited; Altamont Gas Transportation Project, 403-296-4229.

SCHAUMBURG, IL (APRIL 18) PR NEWSWIRE - Motorola, Inc. (NYSE: MOT) today announced that David K. Bartram, currently senior vice president and assistant general manager, Communications Sector, has been promoted to senior vice president and executive director- Europe. The appointment is effective immediately.

In his new position, Bartram will report to and act on behalf of the Motorola Chief Executive Office to lead and harmonize the company's activities in Europe.

Gary L. Tooker, president and chief operating officer of Motorola, Inc., said, "Motorola has been an active and significant member of the European business community for more than 40 years, and Dave has been a significant contributor for many of them.

"In addition," Tooker added, "the startling changes in the political climate and the momentum towards freedom and democracy in Eastern Europe simply serves to reinforce our earlier decision that for Motorola to reach its true potential in Europe in the 1990s, we need a corporate-wide focus in this region of the world."

Areas of emphasis for Bartram in his new position will include creation and leadership of strategic initiatives among Motorola businesses operating in Europe. He will be asked to focus on those customers, suppliers and government executives who are keys to Motorola's success in an increasingly integrated European market. The product organizations at the sector and group level will continue to manage their respective European operations.

Bartram, a native of Lexington, Ky., has served in Motorola's Communications Sector for 29 years in a progression of management roles in distribution and international operations. Motorola's Communications Sector is a world leader in the design and manufacture of two-way radios, pagers and other forms of electronic communications systems.

Motorola, Inc. is one of the world's leading manufacturers of electronic equipment, systems and components.

NEW YORK (APRIL 18) PR NEWSWIRE - WMS Industries Inc. (NYSE: WMS), announced today that, in response to adverse financial information recently publicly released by Divi Hotels N.V., WMS deems it appropriate at this time to write-down the value of its investment in the common stock of Divi notwithstanding the existence of an agreement with the Palmer Group which would, under certain circumstances, permit WMS to sell Divi shares to the Palmer Group at a price of $9.50 per share (approximately WMS' average cost per share of Divi stock). The write- down of the Divi investment will result in WMS reporting a loss for the third fiscal quarter compared with a profit of $6,335,000 in the third quarter of the prior fiscal year. This fiscal year's third quarter will also be affected because a new video game which was scheduled for release in the third quarter was not completed in time and is being released in the fourth quarter. In addition, hotel/casino operations in Puerto Rico were adversely affected by lower average room rates which were necessary to maintain occupancy levels in light of some weakness in the Caribbean market during the winter months.

WMS expects final results for the March 1990 quarter to be available in two or three weeks.

WMS Industries Inc. is engaged in the design, manufacture and sale of coin-operated amusement games and the ownership and operation of hotels and casinos.

NEW ORLEANS (APRIL 18) PR NEWSWIRE - Ocean Drilling & Exploration Co. (ODECO) (NYSE: ODR), The Energy Recovery Fund of Bethesda, Md., and SSP Partners, L.P., whose investors are comprised of the general partners of the New York investment banking firm of Goldman, Sachs & Co., today announced the sale of ODECO's wholly owned subsidiary, Sub Sea International Inc.

The purchaser is Sub Sea Acquisition Corp., a joint venture of The Energy Recovery Fund and SSP Partners, L.P.

The base price of Sub Sea International was approximately $60 million. Sub Sea International, headquartered in New Orleans, was founded in 1969 to provide the offshore oil and gas industry with diving and underwater

construction and inspection services. The company has approximately 800 employees and presently conducts operations in the Gulf of Mexico, North Sea, South China Sea and offshore Australia and New Zealand.

Sub Sea Acquisition Corp. said it plans to aggressively develop the diving company's current business line as well as explore new opportunities in the offshore service sector. The new owners intend to buy or lease a new New Orleans facility as soon as possible.

Ocean Drilling & Exploration Co. is a 61 percent-owned subsidiary of Murphy Oil Corp. (NYSE: MUR) of El Dorado, Ark.

CHICAGO (APRIL 18) PR NEWSWIRE - United Airlines announced today it has received authority from the National Transportation Agency of Canada to operate nonstop flights between San Francisco and Toronto.

This authority, coupled with the U.S. Department of Transportation authority which was granted last month, clears the way for United to inaugurate service May 1.

"The San Francisco-Toronto route represents another step in our aggressive international expansion program,'' said Stephen M. Wolf, chairman and president of United. ''The new service will reinforce United's position as the leading international carrier serving the Bay Area. The flights are timed so that customers flying from Toronto to Pacific destinations can make convenient connections in San Francisco to Tokyo, Osaka, Hong Kong, Seoul and Taipei.''

United will operate one daily round-trip flight with Boeing 737-300 aircraft. The eastbound flight will depart San Francisco at 12:30 p.m. and arrive in Toronto at 8:27 p.m. The westbound flight will depart Toronto at 8:15 a.m. and arrive in San Francisco at 11:02 a.m.

#90108p4513 04/18/1990 ~PR Newswire

DALLAS (APRIL 18) PR NEWSWIRE - Maxus Energy Corp. (NYSE: MXS) filed a registration statement today with the Securities and Exchange Commission for an offering of 9,000,000 common shares. Approximately $67.5 million of

proceeds from this offering will be used to fund the restructuring of an agreement with The Prudential Insurance Co. of America.

Under the new agreement, Maxus will repurchase 500,000 shares of Maxus' currently outstanding $9.75 cumulative convertible preferred stock from Prudential. In addition, 750,000 of the remaining $9.75 preferred shares will become nonconvertible. Holders of the 750,000 nonconvertible shares will be entitled to receive an additional cash payment of 25 cents per share per quarter. Certain covenants relating to the $9.75 preferred will also be waived or amended by Prudential.

The balance of proceeds from the offering, after payment of a $1.5 million restructuring fee to Prudential and other fees and expenses, will be added to working capital for general corporate purposes.

Chairman C.L. Blackburn said, "The new Prudential agreement will reduce our annual preferred stock dividends, reduce the number of fully diluted common shares outstanding and increase stockholders' equity."

Maxus' obligations under the agreement with Prudential are subject to the company's receipt of at least $67.5 million in net proceeds of the offering. The Prudential agreement will reduce the number of $9.75 preferred shares outstanding from 3,000,000 to 2,500, 000; reduce the number of common shares required to be reserved for conversion of the $9.75 preferred by approximately 10,000,000 shares; reduce the number of $9.75 preferred shares to be redeemed annually, beginning in 1994; and reduce the number of Maxus Board members that Prudential is entitled to elect from three to two.

The representatives of the underwriters for the offering are Merrill Lynch Capital Markets, Goldman, Sachs & Co. and Prudential-Bache Capital Funding.

Three million shares of $9.75 cumulative convertible preferred stock were sold to Prudential for $300 million in February 1987 in connection with the restructuring of Diamond Shamrock Corp. into Maxus and Diamond Shamrock Inc.

A registration statement relating to these securities has been filed with the SEC, but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.

This announcement shall not constitute an offer to sell or the solicitation of any offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

When available, a written prospectus may be obtained from the Communications Department, Maxus Energy Corp., 717 N. Harwood Street, Dallas, Texas 75201.

WASHINGTON (APRIL 18) PR NEWSWIRE - James Madison Limited (AMEX: JML) (NASDAQ-NMS: JMLC), a $907 million bank holding company, today reported that it earned $657 thousand in the first quarter of 1990.

First quarter 1990 net income of $657 thousand, or 7 cents per share, represents a 19 percent increase from the $554 thousand, or 5 cents per share, recorded in the corresponding quarter of a year ago. JML recorded a $930 thousand net loss, or 9 cent per share, in the fourth quarter of 1989. The increase from first quarter 1989 is primarily due to increased net interest income despite lower interest rates, and increased non-interest income. The increase in first quarter net income over that of the fourth quarter of 1989 reflects an additional $2.5 million provision for loan losses recorded in that period.

Total assets advanced to $907 million from $797 million at Mar. 31, 1989. Total deposits were $628 million and $605 million at Mar. 31, 1990 and 1989, respectively. Total assets and deposits declined from year-end levels due to seasonal year-end increases.

James Madison Limited is a registered bank holding company located in Washington. The JML financial family of banking subsidiaries includes: Madison National Bank; Madison Bank of Maryland; Madison National Bank of Virginia; and United National Bank of Washington. Non- banking subsidiaries include: James Madison Mortgage Company; James Madison Financial Corporation; and JML Systems Management, Inc. The company's Class A Common Stock is listed on the American Stock Exchange (JML), and its Common Stock traded on the NASDAQ National Market System (JMLC).

HOUSTON (APRIL 18) PR NEWSWIRE - Republic Waste Industries Inc., of Houston has entered into a letter agreement to acquire CSC Disposal Inc. of Avalon, Texas.

CSC owns and operates CSC Landfill, a 254-acre site 45 miles south of

Dallas. The site, in operation since 1979, has approximately 17 million cubic yards of available remaining permitted air space. In the transaction, Republic will also acquire an option to purchase 250 acres continguous to the site. Both properties join land to be acquired for construction of the Federal Government's super-conducting super-collider.

CSC also operates CSC Roll-Off Service, a waste hauling company. As consideration for the acquisition of CSC Disposal, Republic will pay $1.4 million of cash and $1.44 million in Republic common stock, and will assume $974,000 in debt owed by CSC. Additional consideration in the form of common stock will be paid based on performance of the company in future years.

Chairman Sonny Sothard of CSC will continue to be actively involved in the acquired company's operations.

The transaction is subject to completion of due diligence and approval of the Republic board of directors.

In February, Republic acquired Russ Fetrow Engineering Inc. an environmental engineering and consulting company headquartered in Salem, Ore.

Republic, whose shares trade over the counter under its former name, Republic Resources Corp., recently changed its name and announced its intention to enter the solid waste collection, processing and disposal industry. The company was previously involved in oil and gas production, exploration, lubricant blending and packaging.

STAMFORD, CT (APRIL 18) PR NEWSWIRE - In response to inquiries about a lawsuit filed by Norton today, BTR plc stated, "This latest scheme by Norton and the Norton board of directors shows just how desperate the Norton board is.

"Norton and its board appear to be trying to twist and turn every which way to ignore the reality of our offer and the strong message being sent by Norton shareholders. Ironically, the board is supposed to represent the shareholders.

"One has to wonder what the board will attempt next to try to prevent a level playing field for our offer. We view today's legal maneuvering by Norton and its board as without merit and a frivolous waste of company assets. Notwithstanding this latest attempt to divert attention from next Thursday's shareholders meeting, BTR remains determined to press forward with its cash tender offer."

#90108p4567 04/18/1990 ~PR Newswire
SEATTLE (APRIL 18) PR NEWSWIRE - The Boeing Co. (NYSE: BA) recently gave $1.47 million to the city of Renton as part of its agreement to mitigate impacts associated with the company's planned expansion of its Renton facility, Boeing said today.

The agreement by Boeing to provide the funds came as a result of negotiations with the city of Renton during the past year.

Boeing said the money recently transferred to the city will be used for two separate projects.

An $820,000 traffic mitigation fee will help pay for improvements to reduce congestion at Interstate 405 ramps and to smooth traffic flows in north Renton. As part of the traffic mitigation, Boeing also will continue to work with the city of Renton and Metro-Transit to implement a transportation management program to ease traffic congestion and reduce the volume of single-car commuters.

Boeing also paid $650,000 into a city of Renton escrow account toward the design and construction of a floating walkway from the mouth of the Cedar River along the Boeing-owned lake shore eastward up to property now owned by Puget Power.

Also as part of the plan, Boeing will donate its existing Lake Washington boathouse, valued at $350,000, to the Renton Parks Department. The boathouse, on the southern shore of Lake Washington, was used for testing

Boeing's commercial jetfoil boats.

Another measure will include formation of a committee to study noise impacts on the community with data provided by various sources. Boeing also will provide $200,000 for future noise mitigation measures to be proposed by the committee and approved by city officials. The committee will comprise city of Renton representatives, community residents and Boeing representatives.

Boeing also will install signs along the Cedar River trail near engine run-up positions near the Renton plant. The signs will alert joggers and walkers that an engine run may take place in their vicinity.

HOUSTON (APRIL 18) PR NEWSWIRE - VAALCO Energy Inc., an oil and gas exploration and production company based in Houston and operating principally in The Philippines, is pleased to announce the acquisition of the remaining 49 percent minority interest in its controlled operating subsidiary, Alcorn International Inc. (AII).

With this acquisition VAALCO now owns 100 percent of AII. AII's net profit interest in five oil fields offshore The Philippines is valued in excess of US $41,000,000 as at Dec. 31, 1989 by Gruy Engineering Corp. (Gruy) in its Valuation Report dated March 20, 1990 prepared for VAALCO. This valuation is based upon Gruy's estimate of proved oil reserves of 4,571,726 bbl. valued on an unescalated basis, discounted 15 percent. In its report, Gruy also estimated probable and possible oil reserves in excess of 9,700,000 bbl.

By the terms of the acquisition agreements made with TMOC Petroleum Inc. (TMOC) (as to approximately 34 percent of AII) and Virgil A. Walston Jr. and Charles W. Alcorn Jr. (as to approximately 15 percent of AII), VAALCO will pay TMOC a purchase price of US $20,610,000 and issue 90,000 shares of Cumulative Preferred Stock,

Series A (the ''Series A Preferred Shares'') to Walston and Alcorn. VAALCO has made an initial payment of US $5,610,000 to TMOC, with the balance of the purchase price to be paid on or before June 28, 1991. The Series A Preferred Shares carry a cumulative 10 percent annual dividend, payable quarterly, and are redeemable by VAALCO at any time upon payment of US $25 plus accrued dividends, per share.

VAALCO expects to fund the balance of the purchase price payable to TMOC

from operations and from a new offering of its common stock to be made this spring, following the listing of VAALCO's common stock for trading on the Toronto Stock Exchange.

#90108p4573 04/18/1990 ~PR Newswire

SAN ANTONIO (APRIL 18) PR NEWSWIRE -- National Bancshares Corp. of Texas today reported a net loss for the quarter ended March 31, 1990, of $28.5 million. The net loss was attributable to, among other factors, a low level of net interest income and high levels of expenses, especially costs and expenses of nonperforming real estate. For the first quarter of a year ago, the corporation realized a net loss of $43.7 million.

Net interest income for the quarter ended March 31, 1990, was $8.1 million compared to $12.7 million for the quarter ended March 31, 1989. The decrease in net interest income was largely due to a lower volume of earning assets held by the corporation, the erosion of the corporation's shareholders' equity and an increase in the ratio of nonperforming assets to total earning assets.

Total earning assets for the corporation were $1.5 billion at March 31, 1990, compared to total earning assets of $1.7 billion at Dec. 31, 1989, and $1.9 billion at March 31, 1989. The corporation's average shareholders' deficit has increased from $90 million in the first quarter of 1989 to $235 million in the first quarter of 1990.

The need to fund the deficit with interest-bearing liabilities has decreased the corporation's net interest income. Nonperforming assets expressed as a percentage of total earning assets were 17.71 percent at March 31, 1990, compared to 14.99 percent and 14.00 percent at Dec. 31, 1989, and March 31, 1989, respectively. The effect of such items has adversely impacted the corporation's net interest margin, which was 2.18 percent for the first three months of 1990 and 2.69 percent for the first three months of 1989.

The corporation's provision for possible credit losses totaled $4.5 million for the first quarter of 1990, compared to $18.0 million for the first quarter of 1989. Net chargeoffs amounted to $10.0 million for the first three months of 1990, compared to $19.3 million for the first three months of 1989. The corporation's allowance for possible credit losses was $105.6 million, or 8.94 percent of loans outstanding, at March 31, 1990, as compared to $110.0 million, or 7.51 percent, at March 31, 1989.

Nonperforming assets totaled $271.5 million at March 31, 1990, compared to

$268.7 million at the end of 1989 and $269.7 million at March 31, 1989. Nonperforming assets at March 31, 1990, include $126.8 million of repossessed assets, primarily real estate, compared to $133.8 million and $158.8 million at Dec. 31, 1989, and March 31, 1989, respectively. Net expenses and losses incurred in connection with maintaining and disposing of such repossessed assets totaled $6.6 million for the three months ended March 31, 1990, and $20.9 million for the three months ended March 31, 1989.

The loss for the quarter increased the shareholders' deficit of $225.6 million at Dec. 31, 1989, to a deficit of $254.1 million as of March 31, 1990. Shareholders' deficit at March 31, 1989, was $125.4 million.

The corporation's regulatory primary capital was eliminated during the first quarter of 1989. The equity position of virtually all member banks continues to erode.

At March 31, 1990, nine of the 12 member banks had capital ratios below the minimum regulatory requirements.

Eight of the member banks, namely NBC Bank-San Antonio, N.A., NBC Bank-Houston, N.A., NBC Bank-South Texas, N.A., NBC Bank-Seguin, N.A., NBC Bank-Boerne, N.A., NBC Bank-Uvalde, N.A., NBC Bank-Austin, N.A., and NBC Bank-Kerrville, N.A., had negative equity capital as of March 31, 1990. Of the eight banks with negative equity capital, all of these except NBC Bank-Seguin, N.A., NBC Bank-Boerne, N.A., and NBC Bank-Uvalde also lacked primary capital.

The board of directors of the corporation believes the only viable solution to the corporation's pressing need for capital is a recapitalization involving assistance from the Federal Deposit Insurance Corp. (FDIC), and is continuing to work toward the consummation of the previously announced FDIC-assisted transaction.

As part of the recapitalization, Equimark Corp. and certain other sophisticated investors will provide the corporation with approximately $116 million of new equity capital (net of expenses).

The FDIC will provide the corporation's banking subsidiaries with cash and promissory notes in an amount that will virtually eliminate the negative net worth of the subsidiary banks after certain of their assets are revalued to fair value.

The FDIC will also protect the corporation's banking subsidiaries against losses that might be incurred with respect to certain troubled assets and provide limited indemnities with respect to pending litigation and other matter.

The FDIC has clearly stated that it will provide this assistance only if the affirmative vote of the holders of two-thirds of the shares of Common Stock issued and outstanding is received, if 85 percent in principal amount of the corporation's $25 million 10 percent Convertible Subordinated Debentures due 2006 are tendered in the exchange offer to holders of those debentures, and if the other transactions contemplated by the proposed recapitalization are consummated.

The FDIC will not acquire any equity interest in the recapitalized corporation. The board of directors believes that if the proposed recapitalization plan is not consummated the corporation would likely be forced to seek protection from its creditors under the federal bankruptcy laws.

Recently, the corporation was informed in a letter from the senior staff of the FDIC that the FDIC would not approve any offer to holders of the company's $25 million issue of 10 percent Convertible Subordinated Debentures due 2006 that is on more favorable terms than those contained in the exchange offer.

The letter also stated if the requisite 85 percent of the outstanding principal amount of the debentures outstanding are not tendered, the FDIC will be unwilling to provide assistance to the NBC Banks on an open-bank basis.

The corporation has also been advised that, in a recent meeting with representatives of Equimark Corp., the senior staff of the FDIC reaffirmed that if the recapitalization is not consummated because the requisite 85 percent of the outstanding principal amount of the debentures outstanding are not tendered, and as a result the insolvent NBC member banks are closed by their chartering authority, the FDIC will seek to apply the cross-guarantee provisions of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 against the corporation's remaining solvent banks, if any, which would likely result in the closing of those banks.

National Bancshares Corp. of Texas is a multi-bank holding company based in San Antonio with member banks located in San Antonio, Houston, Corpus Christi, Austin, the Rio Grande Valley and several other communities in Central and South Texas.

CONTACT: Jack C. Hebdon Jr. of National Bancshares Corp. of Texas, 512-225-2511.

#90108u0188 04/18/1990 ~United Press International

MEXICO CITY (APRIL 18) UPI - Cuban authorities, who for the past three weeks have jammed U.S.-sponsored TV Marti programs, began tests Tuesday to

block signals of Radio Marti, the official Cuban news agancy Prensa Latina said.

Prensa Latina, in a dispatch monitored in Mexico City, said Washington had launched an ''informative invasion of the island, thereby unleashing a psychological and disinformation war'' against Cuba.

''In the current stage of tests, the jamming systems will operate on a frequency of 1,180 Khz, medium wave, which in the national territory comes under the control of Cuban authorities, as established by international regulations,'' Prensa Latina said.

The frequency, according to Prensa Latina, was assigned to the United States strictly for internal use in 1950 under international telecommunications agreements.

Prensa Latina said Washington took an ''arbitrary, provocative and aggressive step in giving up this facility to launch a service of Voice of America (Radio Marti) directed exclusively against Cuba.''

''That is how Radio Marti appeared, supposedly obliged to operate under the legal prescriptions approved for the Voice of America,'' Prensa Latina said.

Officials for Voice of America were not immediately available for comment Tuesday night.

The agency said the 50,000-watt transmissions of Radio Marti are capable of reaching all of Cuba 24 hours a day. The program has correspondents in more than 50 countries and operating costs of $11 million a year, Prensa Latina added.

Test transmissions of TV Marti, designed to complement the 5-year-old radio broadcasts, began March 27 and have been jammed by Cuban technicians sending competing signals on the same frequency from powerful Soviet-built transmitters.

While few, if any, Cubans have seen the TV Marti programs, Radio Marti has acquired a substantial audience among the Caribbean island's 10.5 million people since it began in 1985.

Prensa Latina said Cuba had not interfered with the programs before because it was ''carrying out a struggle with Third World debt.''

When the radio program was first launched, Cuban President Fidel Castro suspended an immigration agreement signed in 1984 with the United States. The agreement was later resumed.

#90108u0192 04/18/1990 ~United Press International
(APRIL 18) EDITORIAL SAMPLER:

THE BOSTON GLOBE

Since the celebration of the first Earth Day 20 years ago next Sunday only modest advances have been made in creating a better environment. True, technology has improved in many areas, but people have changed little. They drive more than ever. They use more electricity. They possess short memories, forgetting the sacrifices they were compelled to make during energy shortages.

In 1970, then-Sen. Edmund S. Muskie, Democrat from Maine, warned that the price for a healthier, cleaner environment would be high, and not merely in dollars.

''A cleaner environment will cost heavily in foregone luxuries, in restricted choices, in higher prices for certain goods and services, and in hard decisions about our national priorities,'' he said.

Americans have been reluctant to give up luxuries.

... Some critics blame the organizers of the first Earth Day for focusing too much on governmental solutions, on regulating business.

Barry Commoner, the most uncompromising of the environmentalists, chides the older national environmental organizations in Washington for taking ''the soft path of negotiation, compromising with corporations about how much pollution is acceptable. The people living in the polluted communities don't want to control pollution, they want to stop it.''

Former Sen. Gaylord Nelson of Wisconsin, who conceived the idea for the first Earth Day, wisely predicts that it will take a full generation to infuse a conservation ethic in people. He has worked to bring this about in his home state by requiring children be taught such an ethic all through school.

Earth Day should not be allowed to become a self-congratulatory event that hails scant progress while ignoring the kind of unselfish behavioral changes that people must make in order to bring aobut a healthier planet.

DELAWARE COUNTY (PA.) DAILY TIMES

Twenty years ago an estimated 20 million Americans took part in Earth Day demonstrations, rallies and other observances to mark the first major national day of environmental protest. ...

It sure doesn't seem like 20 years ago but that's a fact and it's also a fact that Earth Day is alive and well.

On Sunday, Apr. 22 some 3,600 events are planned nationwide to launch what organizers hope will be an environmental decade.

Overall there is more of a global focus this year. Observances are slated for 135 nations, and 100 million people around the world are expected to take part. ...

There's little doubt that ordinary people are more concerned about their environment than they were 20 years ago. According to a recent Gallup Poll 83 percent of Americans say they have changed their habits in some way to protect the environment.

Another indicator of the public's concerns is business's changing stance. Rather than ridiculing environmental worries, industry is trying to get under the green umbrella. It is too early to know whether this is more than a public relations campaign, but a lot is happening.

Obviously there's much to be done but with some firm leadership much can and hopefully will be accomplished.

Earth Day will be a perfect time for all of us to participate in some activity or at least to reflect on saving our planet before it's too late.

THE TENNESSEAN, NASHVILLE, TENN.

There seems to be growing discussion, if not concern, about the length of such games as basketball and football.

In basketball, particularly in tournament situations, the final 2 minutes can last five times as long. In football, the time outs can extend the game.

Not long ago, the Washington Post had an article saying the NFL was seeking ways to shorten the game.

Changing the rules certainly shouldn't be all that difficult. One quick thing both sports could do is to end what is popularly referred to as ''television time outs.'' That could shorten things considerably without changing any rules. But of course, since television is a hefty contributor to both college athletics and professional sports, who is going to blow the whistle on the broadcasters?

#90108u0193 04/18/1990 ~United Press International
(APRIL 18) UPI - An UNconfirmed report quotes the Washington, D-C, bureau chief for the Soviet news agency Tass as saying President Gorbachev plans to restore gas supplies to Lithuania on Wednesday. The Soviet journalist reportedly made the remark to C-I-A Director William Webster at a reception Tuesday night. Moscow Tuesday said it was cutting natural gas deliveries to Lithuania because the republic refused to revoke independence legislation.

Earlier Tuesday, President Bush said the United States is considering ''appropriate responses'' if the Soviet Union makes good its threat of an economic embargo against Lithuania. Senate Republican leader Robert Dole of Kansas says ''there are things we can do in Congress'' if the situation worsens. However, Dole emphasized any measures would be taken in consultation with the administration.

China's official People's Daily newspaper says at least one town suffered ''severe damage'' from a strong earthquake that rocked the westernmost province on the Soviet border Tuesday. The quake measured six-point-four on the Richter scale. Details of casualties were NOT immediately available.

It was shake, rattle and roll as a series of aftershocks to a late February earthquake jolted parts of Southern California Tuesday. In all, four sizable aftershocks hit the area... loosening chimney bricks in Pomona but causing NO serious damage or injuries.

THE MUNCIE (IND.) STAR

Congress has moved into a new phase. It no longer practices micro-management on foreign policy. The new mode is micro-obstruction.

It comes at an interesting time. For six months the administration has endured charges by politicians and pundits that it is too timid in reacting to change and challenge at home and abroad. Recently the majority leader of House Democrats has escalated such talk. Rep. Richard A. Gephardt (D.-Mo.) declared we should extend aid to the Soviet Union and sell Soviets our high technology. Never mind that they have not asked for the aid.

It is two months since President Bush asked Congress for an urgent $500 million supplemental appropriation to help restore the economy and infrastructure of Panama. That's the country where Bush timidly kicked out dictator-drug profiteer Manuel Noriega in December, some might remember.

Two months after the fact the president's appeal has not cleared a committee in either chamber of Congress.

The speaker of the House says he hopes for early action. Early action would have been early February, six weeks ago.

ST. LOUIS POST-DISPATCH

Beleaguered officials in Colombia have been hit with another major setback in their anti-drug campaign. The nation's Supreme Court has ruled that the government must return millions of dollars in property seized from alleged drug traffickers.

This marks a low point in an 8-month drug war, which never reached its mission of arresting leading traffickers. Although 15 lower-level traffickers have been extradited, the cartels have threatened to murder more government officials if others are sent to the United States to face drug charges. That threat has led some officials to call for negotiations with the cartels.

This means Colombia is about where it was in the early 1980s, when the cartels resorted to violence in an attempt to force the government to negotiate. Although the government refused to negotiate then, it did back away from efforts to shut down the cocaine laboratories. It now appears that officials may eventually call off the current anti-drug campaign, which has been praised as the solution to drug problems by the Bush administration.

The truth of the matter is that Colombia can't fight this battle alone. It needs the moral support of not only the United States but the entire Western world, which consumes almost all the illicit drugs. That support can best be expressed not with weapons but with a sustained focus on education and treatment programs.

Western nations also must keep the heat on to discourage money-laundering operations, which make the trafficking possible. ...

Sustained efforts against money laundering outfits, along with intensified education and treatment efforts, would do more to curb the drug traffic than would violent attempts to smash cartels.

LOUISVILLE (KY.) COURIER-JOURNAL

Providing a sound network of child care - like maintaining adequate schools - represents both an economic development issue and a critical social need for metropolitan Louisville as well as the rest of the nation.

Historically, that has proved a tough concept to sell - particularly to those for whom ''child care'' meant a spouse at home. But time, the American work force, and the world have changed profoundly.

Now Congress is thrashing out the first national child-care legislation in decades. The community must make no mistake: If it wants low-income families to become self-sufficient and if it wants moderate-income families to survive, access to good, affordable child care is essential.

Data from the U.S. Department of Labor indicate that by 1995 roughly two-thirds of all new labor force entrants will be women, and 80 percent of them will expect to have children sometime during their working careers. Child care is an issue that will only get bigger.

(APRIL 18) EDITORIAL SAMPLER:

WYOMING TRIBUNE-EAGLE, CHEYENNE, WYO.

George Schultz is not the only prominent Republican to publicly differ with the Bush administration's tip-toe policy on the Soviets' harsh treatment of the Lithuanian independence movement. Pat Buchanan, a member of the Reagan administration for a time, has done likewise. Buchanan bluntly observed: ''As the awesome might of Moscow slowly crushed Lithuania last week, George Bush abruptly withdrew his moral support. Bush has a large account of trust with the American people. Last week he drew it down.''

This is a moral question and Americans are moral people who think in moral terms. Holding a gun to the heads of the Lithuanians is not going to solve any problems for the Soviets; it is only going to worsen them, for them and the West. Soviet leader Mikhail Gorbachev had better realize that. So had George Bush. But most of all President Bush needs to realize the moral imperative involved in Luthuania. These people need freedom now, not later for later may be never.

HOUSTON CHRONICLE

Nations around the world emerging from decades of oppression are showing a tendency to choose artists as their leaders. That should not come as a great surprise.

In Eastern Europe, artists such as playwright Vaclav Havel, president of Czechoslavakia, and music professor and pianist Vytautas Landsbergis, fragile president of Lithuania, have kept the yearning for freedom alive and expressed in the face of communist jails and torture. In Peru, which

has alternately suffered socialistic or military rule, a leading presidential contender is novelist Mario Vargas Llosa, who bases his campaign on individual rights and initiative. Vargas Llosa faces a runoff in June after failing to win a majority in last week's election.

Of all peoples, Americans should be least surprised at the prospect of artists in high places. We twice elected an actor - one who conveyed the values we most admired and said the things we most wanted to hear - to be our president and leader of the Free World. While the task of government demands a taste for the practical, there are times when the artist's capacity for vision, emotions, expression and leadership carries the day.

SAN JOSE (CALIF.) MERCURY NEWS

You don't have to see many dolphin carcasses floating behind tuna boats to decide that ''setting on dolphin'' is an unacceptable way to catch tuna.

Because dolphins swimming on the surface accompany yellowfin tuna in the eastern tropical Pacific Ocean, fishing boats use them to find the tuna deeper down. Some then catch tuna by putting out a purse-seine net that captures both dolphins and tuna. Dolphins, which breathe air, drown. About 10,000 per year are killed.

There are other ways to catch tuna and to its credit, Star-Kist last week announced that it would no longer accept any tuna caught by purse-seining. The company will relay on independent monitors aboard the tuna boats. The two other major canners, Chicken of the Sea and Bumble Bee, followed hours later, although their verification policies were not spelled out.

Dolphins aren't out of danger. Although those three tuna canners hold 70 percent of the U.S. market, foreign canners don't have the same policy. Fewer than 20,000 dolphins annually are killed by U.S. boats.

Yet the Star-Kist initiative is an important start. Star-Kist can't save all the dolphins; it can try to save the ones that are killed putting tuna in Star-Kist cans. Star-Kist's announcement immediately put pressure on other canners in the United States.

As with the U.S. ban on whaling, that pressure can be expanded internationally.

#90108u0211 04/18/1990 ~United Press International

(APRIL 18) UPI - The Justice Department Tuesday cracked down on bank accounts containing Colombian drug profits. Federal prosecutors ordered 173 banks in 22 states and the District of Columbia to turn over financial records on a total of 754 accounts. The government sought to freeze more

than 75 percent of the accounts in which it says nearly 400-Million dollars in drug profits were deposited.

An official from the U-S Embassy in Bogota says cocaine production in Colombia has dropped 20 percent since last August... due to the government's war against narcotics traffickers. But the official says traffickers from Bolivia, Brazil and Peru are making up the difference on the U-S market.

The U-S Embassy in Panama City says Panama and the United States signed an accord Tuesday establishing a wide-ranging program to fight drug trafficking and drug consumption in the Central American nation. One goal of the one-year program is the reduction of drug money laundering through the Panamanian banking system.

PANAMA CITY, PANAMA (APRIL 18) UPI - A human rights group accused U.S. troops of waging a campaign of persecution after soldiers detained and questioned members of an agricultural cooperative.

The Panama City-based Popular Human Rights Coordination group said at a news conference Tuesday that U.S. troops questioned and briefly detained several members of a cooperative in Santa Fe, about 120 miles southeast of the capital.

''We want to denounce the situation ... with the cooperative,'' said Judy Martinez, a member of the human rights group. ''(The action by the troops) shows a lack of respect for the right of Panamanians to live in peace.''

The U.S. Southern Command had no immediate comment on the complaint.

Martinez said the actions of the U.S. troops are unconstitutional and a violation of human rights, and accused them of conducting ''a campaign of persecution.''

She said the group is calling for U.S. troops to withdraw from Panama.

There are now about 13,000 U.S. troops in Panama, the same number as before the Dec. 20 U.S. invasion that ousted former military strongman Manuel Antonio Noriega, who is in Florida awaiting trial on drug-trafficking charges.

Most of the troops remain at U.S. bases, but about 500 soldiers work in Panama City and in rural areas to help local police and to look for arms caches and suspected subversive activity.

Gen. Marc Cisneros, commander of U.S. Army forces in Panama, said in a recent interview that most of the 500 troops would be withdrawn from the streets by June.

On March 29, April 3 and April 6, soldiers questioned members about the cooperative's links to Nicaragua and Cuba and asked for the names of

cooperative members who had traveled to those countries, Martinez said. She said the troops had searched the house of one member for arms.

Alexis Barrios, a member of the cooperative La Esperanza de Los Campesinos said U.S. troops told him ''they had received information that I had arms in my house. They searched my house with a metal detector.''

Encarnacion Rodriguez and Francisco Manzane, also members of the cooperative, said U.S. troops on twice asked for a list of people the cooperative had sent to Nicaragua and asked if they were involved in training guerrillas.

Jose Isabel Pena said U.S. soldiers accused him of receiving weapons training in Nicaragua.

Pena acknowledged that the cooperative sends members to Nicaragua and other countries, but added that the trips are for administrative and other types of training.

Also, Panama and the United States signed an accord Tuesday establishing a wide-ranging program to fight drug trafficking and drug consumption in Panama, the U.S. Embassy announced.

Under the one-year agreement, signed by U.S. Ambassador Deane Hinton and Panama's vice minister of government and justice, Ramon Lima, Panama will receive $465,000 in U.S. funds.

In the past 10 years, drug trafficking and money laundering in Panama flourished because the country's bank secrecy laws allow customers to hold unnumbered accounts.

#90108u0351 04/18/1990 ~United Press International

(APRIL 18) UPI - Lithuanian President Landsbergis Tuesday pledged the republic will survive... despite Moscow's announcement that it was cutting natural gas deliveries. The move came after Lithuania ignored an ultimatum to rescind independence legislation. But a unconfirmed report quotes the Washington, D-C, bureau chief for the Soviet news agency Tass as saying President Gorbachev already is planning to restore gas supplies to Lithuania Wednesday.

The 150 Jewish settlers who sparked controversy when they moved into the Christian Quarter of the Old City of Jerusalem say they'll abide by a judge's decision. A three-judge district court panel Tuesday overturned an injunction barring the settlers' eviction and ordered another hearing in the case that's sparked tension between Palestinian Christians, Moslems and Israeli Jews. The Greek Orthodox Church, which owns the house, is

seeking to evict the settlers.

Police at the Austin campus of the University of Texas intervened Tuesday when- in the words of one officer- things ''got a little heated'' during an attempt by an atheist group to burn an American flag. A crowd of angry students, some armed with fire extinguishers, confronted the group. Police ended up escorting the atheists from the rally. NO one was arrested and NO charges were filed in the incident.

An estimated 15-hundred of Harvard University's 65-hundred undergraduates skipped classes Tuesday to protest the lack of women and minorities on the faculty. A Harvard spokeswoman says eight-point-seven percent of the university's 641 tenured professors are women and seven-point-three percent members of minority groups. NO comment from the school's deans on the boycott, which came a week after a similar protest by law school students.

-30- 1944

#90108u0355 04/18/1990 ~United Press International

(APRIL 18) UPI - The Federal Trade Commission Tuesday charged the nation's largest mail-order dealer in art with selling about five-Million dollars in fake works attributed to the late Salvador Dali. The F-T-C says Collectors' Guild Limited Incorporated portrayed the pseudo-Dalis as ''sound investments'' that could appreciate substantially in value. NO comment from the New York-based company.

The author of ''The Bunker,'' the 1978 book on Adolf Hitler's final days, is dead at the age of 72. James O'Donnell died Monday of cancer at Brigham and Women's Hospital in Boston. O'Donnell... who became Newsweek magazine's Berlin bureau chief in 1945... bribed his way past a Russian private into the bunker where Hitler committed suicide and found a mass of written materials, including diaries. He later interviewed several survivors of the infamous bunker while researching his book.

#90108u0360 04/18/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (APRIL 18) UPI - Prosecutors questioned former Communist Party boss Milos Jakes and two others about their roles in the 1968 Warsaw Pact ''Prague Spring'' invasion, Interior Minister Richard Sacher said.

Jakes, the man behind the post-1968 purge of the Prague Spring reformers, was questioned in Prague for several hours Tuesday, but prosecutors have yet to charge him.

Alois Indra and Karel Hoffmann, both former hard-line Central Committee

members, also were interrogated, but they too have yet to be charged in connection with the Soviet-led invasion that crushed the Prague Spring democracy movement.

Prosecutors said they have yet to determine whether the statute of limitations would prevent the three from facing treason charges for actions taken more than 20 years ago.

Czechoslovakia also said it would ask other Warsaw Pact countries for access to their archives to help its investigation. Interior Ministry officials said the Soviet Union has not answered its request for information about the invasion.

Sacher, who has been under increasing pressure to speed up the dismantling of the StB secret police, said Tuesday he had received calls of support from President Vaclav Havel and other top political leaders.

Sacher has defended his slow pace saying he wants to avoid a violent reaction by disenchanted StB men.

''Radical steps still need to be taken, but I would say that so far we have avoided a second Romania,'' he said, referring to the bloody backlash in that country by secret police forced from power.

The StB has been dissolved three times since the communists lost control of Czechoslovakia in a people's revolution last December, and in theory officers are under house arrest and have had to turn in their weapons.

But reports have continued surfacing of ongoing StB activity. Last week, police investigators found microphones hidden in the walls of the home of Jan Urban, the chairman of the reformist party Civic Forum.

There also have been increasing fears that StB files could show that many leading public figures had collaborated with the secret police.

''The public has the impression the StB has not completely stopped its work,'' said Jane Ryslinkova, a spokeswoman for Civic Forum. ''The battle with the StB is still going on and we must decide how to wage it.''

Senior Civic Forum leaders have hinted several times that Sacher be fired, although they have refrained from calling publicly for his removal.

#90108u0379 04/18/1990 ~United Press International

STATELINE, NV (APRIL 18) UPI - Former heavyweight boxing champion George Foreman, overweight and out of shape, had little trouble Tuesday night in knocking out Mike Jamison in a heavyweight bout at Caesar's Lake Tahoe

resort.

Foreman, who weighed in at 260 pounds, took control in the second round and battered Jamison nearly at will until finally opening a cut under his eye in the fourth round. Then, with 2:16 left in the round, Foreman buried Jamison under an avalanche of punches and forced referee Mils Lane to stop the fight.

The victory ran Foreman's streak to 21 straight victories since he returned to the ring after a lengthy retirement.

Jamison also returned to the ring after a three-year hiatus in which he was a sparring partner of former heavyweight champ Mike Tyson.

The victory ran Foreman's record to 66-2 with 62 knockouts, while Jamison fell to 17-15.

Foreman now is expected to fight promising heavyweight Adilson Rodrigues before squaring off against Tyson early next year.

In the undercard, three young Soviet professionals each came away with rather impressive victories over undistinguished foes.

Alex Artemiev scored a third-round knockout of Matt LeCur. Artemiev's brother, Sergei, stopped Donald Townsend of Las Vegas with a pair of right hands in 1:40 of the second round of his bout.

Heavyweight Yuri Vaulin had an easy time with Paul Bradshaw, who worked as a bodyguard for the singing groups the Jacksons and the Commodores. Vaulin knocked him out at 1:57 of the first round.

#90108u0459 04/18/1990 ~United Press International

(APRIL 18) UPI - Chicago Bulls rookie Stacey King is becoming a veteran just in time for the playoff drive.

King, the Bulls' top pick in 1989, scored 16 points off the bench Tuesday night, including a key free throw with 5.3 seconds left, to help rally the Bulls to a 111-105 victory over the Boston Celtics.

The loss snapped a six-game winning streak for the Celtics, who dropped two games behind the idle Philadelphia 76ers in the Atlantic Division.

''King played quite well and has come a long way,'' Boston coach Jimmy Rogers said. ''Their young kids have stepped forward.''

The old kid, Michael Jordan, scored 12 of his 35 points in the fourth quarter and added 11 rebounds, as the Bulls snapped their two-game losing skid, which followed a nine-game winning streak.

Chicago, 54-25, needs one more victory or a Philadelphia loss to clinch home-court advantage through the first two rounds of the playoffs.

''I'm playing with a lot of confidence now,'' King said. ''Whenever you're playing with a lot of confidence, you feel that you can practically do anything.

''The guys have been really great with me. They keep working the ball to me and working with me and keep telling me to go out there and relax. That's the whole key, as long as I'm relaxed and just playing and letting the game come to me like I have been doing the whole second half of the year, we think it's going to happen.''

What almost happened in the final minute was more like disaster.

The Bulls appeared to have wrapped the game up after a Jordan free throw with 1:14 left, making the score 105-98. But Boston made a furious comeback, running off consecutive baskets by Kevin McHale, Reggie Lewis and Jim Paxson to close to within 105-104 with 25.9 seconds to go.

McHale scored 22 of his team-high 28 points in the second half, while Reggie Lewis added 24 and Larry Bird 23.

''The Bulls are showing they've practiced hard, and their young guys are there,'' Bird said. ''It's no longer just Michael.''

-- AROUND THE NBA --

In other games, Atlanta pounded New Jersey 118-95, Washington beat Orlando 129-127, Los Angeles nipped Seattle 102-101, Cleveland defeated Milwaukee 96- 88, Dallas downed Utah 97-96, Houston blasted Sacramento 112-97, and Denver slashed Minnesota 99-88.

HAWKS 118, NETS 95

At Atlanta, Dominique Wilkins scored 36 points to lead Atlanta to an easy victory over New Jersey. The Hawks, 39-41, got 16 points and 13 rebounds from Moses Malone. John Battle added 14 points and John Long came off the bench to score 13. New Jersey, 17-62, was led by Dennis Hopson with 20 points while Jack Haley and Purvis Short each scored 19.

BULLETS 129, MAGIC 127

At Orlando, Bernard King scored Washington's last 11 points, including a 15-foot baseline jumper with two seconds left, to lift the Bullets. King finished the night with 32 points. Jerry Reynolds scored a team-high 26 points for Orlando.

LAKERS 102, SUPERSONICS 101

At Seattle, Magic Johnson's 15-foot running hook shot with eight-tenths of a second remaining in the game paced Los Angeles. The victory, Los Angeles' third in a row, guarantees the Lakers, 61-18, the best record in the NBA and the home court advantage throughout the playoffs. James Worthy topped the Lakers with 22 points. The Sonics were led by Dale Ellis with 28.

CAVALIERS 96, BUCKS 88

At Milwaukee, John Williams scored 19 points, hauled down 11 rebounds and blocked 5 shots to pace the Cavaliers and keep Cleveland one-half game in front of Atlanta for the final Eastern Conference playoff spot. Jay Humphries led the Bucks with 22 points

MAVERICKS 97, JAZZ 96

At Dallas, Derek Harper started Dallas on a 23-2 run in the first half and the Mavericks survived a fourth-quarter Utah comeback. The Jazz saw its Midwest Division lead over San Antonio sliced to one game. Karl Malone paced the Jazz with 39 points and Roy Tarpley added 17 for the Mavericks.

ROCKETS 112, KINGS 97

At Houston, Eric ''Sleepy'' Floyd scored 22 points, including 15 in the fourth quarter, to boost the Rockets. Sacramento's Danny Ainge led all scorers with 27 points and Antoine Carr added 21.

NUGGETS 99, TIMBERWOLVES 88

At Minneapolis, Michael Adams scored 15 of his 22 points in the second half and Lafayette Lever added 21 to lead Denver. The Nuggets, 41-38, currently hold the seventh playoff spot in the Western Conference and hold a one-game lead on Houston and a two game advantage over Seattle.

#90108u0498 04/18/1990 ~United Press International

(APRIL 18) UPI - Cincinnati had to wait two weeks for Opening Day this year but for Reds fans it was worth it.

Cincinnati, traditional host of the major-league opener, lost the honor this year due to the spring training lockout. The lockout postponed the first week of the season and the revised schedule forced the Reds to spend the first two weeks of the season on the road.

The Reds returned from their initial road trip of the 1990 season unbeaten after six games and improved that to seven Tuesday with a 2-1 victory over the San Diego Padres.

Under the spotlight created by the Pete Rose gambling investigation, the Reds struggled last year. But this year under Lou Piniella, the Reds are off to their best start since 1980 when they won their first eight games.

''Lou must be a genius,'' said winning pitcher Tom Browning. ''We're 7-0.''

''It was fun to finally play in front of the home fans,'' said Piniella. ''It's great to open with seven straight wins, but we've got to keep battling every game.''

The Reds have drawn first blood in each of their games thus far, scoring first while collecting at least nine hits in each game.

''Everything is flowing real well right now,'' said Reds shortstop Barry Larkin, who had three hits, boosting his average to .594 (19-for-32). ''We're relaxed, confident and comfortable.''

Cincinnati's Billy Hatcher, who collected three singles, and Mariano Duncan, who had two hits, singled in runs in a two-run second inning to provide the winning margin.

''They didn't hit me that hard today,'' said losing pitcher Andy Benes, ''but they're hot and the balls they hit are finding the holes. One through nine, the Reds are a very good team. They're not going up there to walk, they're swinging the bat.''

Browning, 2-0, yielded seven hits over six innings, making only one mistake - a leadoff home run to Benito Santiago in the seventh. Randy Myers pitched the ninth inning for his third save, getting pinch-hitter Joey Cora to bounce out with runners on first and second to end the game.

''Anytime you win seven in a row, you've got to be playing good ball,'' added San Diego Manager Jack McKeon. ''I was impressed with the Reds in spring training. In fact, I've been impressed with them the past four years.''

Elsewhere in the National League, Montreal shaded Philadelphia 2-1, Pittsburgh pounded St. Louis 7-2, Chicago nipped the New York Mets 8-6 in 13 innings, and Los Angeles topped San Francisco 10-5.

In the American League it was: New York 4, Detroit 1; Toronto 8, Baltimore 2; Chicago 2, Boston 1; Kansas City 4, Cleveland 2; Texas 6, Milwaukee 2; Oakland 7, California 5; and Minnesota 6, Seattle 5.

-- AROUND THE NL --

EXPOS 2, PHILLIES 1

At Montreal, Delino DeShields delivered a tie-breaking grounder in the seventh inning to help the Expos to their fourth straight win. With one out and runners at first and third, DeShields grounded to second but shortstop Dickie Thon failed to complete the double play, making Drew Hall 1-1, the winner. Steve Frey pitched two innings for his third save. Todd Frowirth, 0-1, was the loser.

PIRATES 7, CARDINALS 2

At Pittsburgh, Neal Heaton scattered five hits over 7 2-3 innings and Bobby Bonilla and Jose Lind each drove in two runs during a six-run third inning to lift the Pirates. Heaton, 2-0, walked two and struck out four in winning his seventh straight decision dating back to last year. Greg Mathews, who missed all of last season following elbow surgery, fell to 0-2.

ASTROS 5, BRAVES 3

At Houston, Franklin Stubbs belted a two-run homer and Glenn Wilson added a solo shot for the Astros, who handed the Braves their fifth straight loss. Mark Portugal, 1-1, allowed two runs and six hits over 5 2-3 innings striking out four and walking one. He retired 12 in a row during one stretch. Dave Smith earned his second save, pitching two innings. John Smoltz, 0-2, took the loss.

CUBS 8, METS 6, 13 INN.

At New York, Howard Johnson's throwing error scored two runs in the 13th inning, giving the Cubs the victory. Johnson's two-out error on a Ryne Sandberg grounder allowed Joe Girardi and Jerome Walton to break a 6-6 tie. Reliever Jeff Innis, 0-1, took the loss. Paul Assenmacher, 1-0, who gave up one run in his two innings of work, got the win. Dean Wilkins worked the bottom of the 13th for his first save.

DODGERS 10, GIANTS 5

At San Francisco, Eddie Murray and Mike Scioscia drove in two runs each and the Dodgers kept the Giants winless in their first four home games this year. Scioscia belted his third home run of the season in the four-run eighth inning and singled in a run in the ninth. Don Aase, 1-1, picked up the win in relief for the Dodgers. Atlee Hammaker, 0-1, suffered the loss.

SEATTLE (APRIL 18) UPI - The Air Force has agreed to pay up to $27 million of The Boeing Co.'s cleanup costs at two hazardous waste dumps in King County, Wash.

The agreement was revealed in a deposition taken as part of a suit between Boeing and its insurance companies over who is liable for the cleanup costs at Western Processing in Kent and Queen City Farms in Maple Valley.

This was the first indication that federal tax money could be involved in paying for cleaning the two sites. Neither Boeing nor the Air Force has mentioned the agreement publicly before.

Instead, the company has demanded its insurers pay for the cleanup. The aerospace manufacturer has estimated its share could be as much as $80 million.

In the deposition, Stephen Trautwein, a local Air Force contract manager, said the cleanup was not considered part of ''ordinary and necessary business costs'' - a boilerplate term that generally includes expected expenses in a business arragement.

In this case, said Trautwein, the cleanup costs at the two sites were negotiated as a separate item between Boeing and the Air Force contract officers.

''It is not standard procedure to reimburse a contractor for hazardous waste cleanup costs,'' a Pentagon spokesman in Washington, D.C. said Tuesday.

However, a spokeswoman at the Air Force Contract Management Division in Albuquerque, N.M., which oversees Boeing's Air Force contracts, said the Air Force agreed to pay its share of the cleanup costs at the two sites because the service considered the cleanups ''necessary and normal business expenses.''

She could not immediately explain Tuesday how the service reached its conclusion or why it apparently conflicted with Trautwein's deposition.

And a Boeing spokesman said Tuesday, ''In general, these costs are recognized as usual and accepted costs of doing business. It was something we worked out with Boeing.''

Sources said Boeing has already spent about $40 million at the two dump sites, but it could not be learned whether the Air Force has paid for any of that yet.

Trautwein said in his deposition that he took no part in the negotiations. He declined further comment.

Another source, who helped negotiate the contract, said Tuesday that Air Force officials did not know how much it would cost to clean up Western Processing and Queen City Farms.

At the two King Count sites, Boeing dumped 24 million gallons of toxic waste over nearly 30 years until the Environmental Protection Agency closed the dumps in the early 1980s.

Insurance attorneys introduced evidence in federal court last week indicating the company failed to heed warnings going back to the early 1950s that its hazardous waste dumping would pollute the sites.

#90108u0549 04/18/1990 ~United Press International

WASHINGTON (APRIL 18) UPI - Sen. Lloyd Bentsen, D-Texas, introduced legislation Wednesday that would provide access to health care for an additional 2.5 million poor children by the year 2002.

The Senate Finance Committee chairman's bill would extend coverage under the Medicaid program to all children under age 19 whose family income is below the federal poverty line, currently $12,675 for a family of four.

''It is a modest expectation that all children in families with incomes this low should qualify for Medicaid benefits. I would like to go further '' Bentsen said. ''But it is important to keep improving health-care coverage for pregnant women and children, even if we take a few steps at a time.''

Medicaid, which helps pay for health care for the poor, is financed by states and the federal government. Eligibility is determined by states using federal guidelines, creating wide variations among states.

As recently as 1987, half of America's poor children did not qualify for Medicaid, Bentsen said. But both Congress and the states have acted recently to increase eligibility.

Last year, Congress, responding to a U.S. infant mortality rate that ranks 22nd in the world, required Medicaid coverage for pregnant women and children under 6 in families with incomes below 133 percent of poverty.

To give states time to adjust to his bill, Bentsen's proposal would phase in the new coverage, starting in 1991 and ending in 2002, when 2.5 million more children would be covered. An estimated 31 million to 37 million Americans, about a third of them children, now have no health insurance.

Bentsen, joined in sponsoring the Medicaid Child Health Act of 1990 by Sens. John Chafee, R-R.I., and Donald Riegle, D-Mich., stressed that the bill would save money in the long run.

''It is said an ounce of prevention is worth a pound of cure, and that's particularly true with health care for young children. Every $1 spent on prenatal care saves more than $3 in health care in the first year of a child's life. And for every $1 we spend on immunizations, we save $10 in health care costs later on,'' Bentsen said.

''We are seeing an alarming increase in the incidence of childhood diseases that could have been prevented with such routine treatment as a timely, basic set of immunizations. Yet too many families can't afford that,'' he said.

The legislation also would give the states the option of phasing in coverage more quickly and covering children with incomes up to 185 percent of poverty.

Other provisions would help provide home care for children with AIDS, help hospitals care for children with costly illnesses and set up outreach services to make sure youngsters eligible for aid get it.

#90108u0562 04/18/1990 ~United Press International

BOGOTA, COLOMBIA (APRIL 18) UPI - Cocaine production in Colombia has dropped 20 percent since last August because of the government's declared war on narcotics trafficking, a U.S. official said.

An official from the U.S. Embassy in Bogota who specializes in the anti-drug campaign, said the drop in production has been made up by traffickers in Bolivia, Brazil and Peru.

The official, who asked that he not be identified by name for security reasons, told a group of foreign journalists the United States also had information casting doubt on reports of a split in the powerful Medellin drug cartel.

Associates of Medellin drug chief Pablo Escobar issued a statement Monday condemning their leader for a deadly bomb attack. That led to suspicions a division had opened up between Escobar and the Ochoa Vazquez brothers - Juan David, Fabio and Jorge Luis - who are considered by U.S. authoritites to be the chief members of the Medellin Cartel.

The embassy official said Escobar's activities have diminished in his home province of Antioquia and Colombian authorities are making further inroads

into his area of influence.

The U.S. official said the Medellin cartel ''continues to operate, controlling a part of cocaine trafficking.''

Colombian authorities say the Medellin and Cali cartels control 80 percent of the cocaine smuggled into the United States.

Colombia launched a campaign against drug production Aug. 10, prompting Colombian drug lords to declare a war on the government that has claimed at least 150 lives and seen 100 terrorist attacks.

The U.S. official said Gustavo Mesa Meneses, captured three weeks ago during a police raid, is one of the key figures in the cartel's military organization.

(APRIL 18) UPI - Around the world... around the clock... the latest news from U-P-I.

Lithuania's natural gas supply is in doubt today. The Kremlin ordered the supply of natural gas to the rebellious republic sharply curtailed yesterday. However, one report says President Gorbachev plans to restore gas supplies today. The report quotes the Washington bureau chief for the Soviet news agency, Tass.

Lithuania's oil supplies also are reported threatened. A spokeswoman for Lithuania says an employee of the republic's oil refinery got a call from Moscow, saying oil supplies will be cut off today.

Congress will return from its Easter recess today. In the coming weeks, all-out partisan warfare is likely on the budget, campaign finance reform and anti-crime measures. But child care and clean air legislation probably will receive final congressional approval without much fighting between the parties or between the chambers.

Congressman Barney Frank says he will run for re-election. The Massachusetts Democrat made the announcement yesterday... even though the House Ethics Committee has NOT ruled on Frank's ties to a male prostitute. Frank says he has to give other potential candidates time to make their choices.

The Bush administration says the United States will NOT rejoin the United Nations Educational, Scientific and Cultural Organization. The State Department says UNESCO never has been more poorly managed and is still swayed by international politics. The U-S pulled out of UNESCO six years

ago.

An analysis of 37 studies shows Americans probably could reduce their risk for colon cancer by as much as 40 percent if they ate more high-fiber foods. The National Cancer Institute and Philadelphia's Fox Chase Cancer Center analyzed the studies involving about 10-thousand people.

#90108u0594 04/18/1990 ~United Press International

BANGKOK, THAILAND (APRIL 18) UPI - Two American women and three Nigerians, two of them pregnant, were arrested for allegedly trying to smuggle 13 pounds of heroin worth about $60,000 out of the country, police reported Wednesday.

Americans Iris Louise Merriouns, 30, and Jieun Kim, 21, were arrested along with three Nigerians; Victor Olalekan Bamidele, 36, Codelia Kokumo Edinbusnji, 30, and Oluwole Olufemi Oniyidi, 28, said Lt. Col. Amaresrit Wattanavibol, assistant chief of the Metropolitan Narcotics Unit.

While the home towns of the two Americans were not immediately known, Merriouns was born in California and Kim is a native Korean, police said. Their passports were issued in Washington, police said.

Police estimated the seized heroin was worth about $60,000 in Thailand but could be sold for 100 times that amount in the United States.

The suspects were arrested Monday night at a Bangkok mansion, and police found about 13 pounds of heroin in their briefcases, Amaresrit said. Bamidele and Oniyidi tried to escape by jumping from the third floor of the mansion, Amaresrit said. They were seriously hurt and were being treated at Police Hospital.

The two pregnant women, Merriouns and Edinbusnji, had been assigned to be the carriers and ''will have no choice but to deliver their babies in jail '' Amaresrit said.

A conviction for drug trafficking could be punishable with death.

''We were tipped off by U.S. and Canadian anti-drug authorities to keep them under close watch,'' he said.

Since the beginning of the year, Thai police reported that about 50 Nigerians have been arrested and more than 220 pounds of heroin has been seized from them.

The Thai Foreign Ministry plans to impose visa requirements on Nigerians entering Thailand as part of an effort to stop a Nigerian drug connection.

#90108u0610 04/18/1990 ~United Press International

OKLAHOMA CITY (APRIL 18) UPI - The Oklahoma teachers' walkout gained strength as two of the state's biggest school districts joined the protest for education reform and higher teacher salaries.

The Putnam City School District, fourth largest in the state, joined the protest Tuesday. The school board in Oklahoma City, the state's largest city and second-largest school district, voted Tuesday to use a leftover snow day to close schools on Thursday and allow teachers to join the walkout.

Oklahoma City Superintendent Arthur Steller ordered U.S. flags at schools in his district to be flown upside down - an international signal of distress - until an education reform and funding bill becomes law.

The walkout started Monday and was scheduled to continue through Friday with daily rallies and picket lines encircling the Capitol.

Thousands of teachers stayed away from classrooms to protest the state Senate's rejection of a $230 million package that would have raised teacher salaries, consolidated some schools, and aimed to produce a more equal level of education quality and finance across the state.

Approximately 345,000 students, or 60 percent of the state's school-goers, were out of class Tuesday, state Secretary of Education Sandy Garrett said.

''We have been told (through the Senate's action) we really don't care about reform in education - only money for salary increases,'' Oklahoma Education Association President Kyle Dahlem, one of the organizers of the walkout, told teachers gathered at the Capitol's south steps Tuesday.

''Well, let us put it to you this way: Adequate salaries for teachers and other school employees is education reform.

''We make no apologies for doing everything we can to get more money for salaries,'' Dahlem said. ''Adequate salaries will help to attract and retain the most talented of our young people.''

Gov. Henry Bellmon said he was ''impressed by the degree of involvement of educators in this process,'' and appeared to go out of his way to accommodate the teachers when he said the action should not be called a strike.

''The way this is happening is in many cases boards of education have granted teachers the privilege of taking time off provided it is made up at the end of the term. That's hardly a strike,'' the governor said.

Some have questioned the legality of the teachers' action. The state's other teachers' organization, affiliated with the American Federation of Teachers, considers the action illegal.

Dahlem said about 150 of the state's 604 school districts were closed Tuesday and she encouraged more to join in the ''withholding of services'' to protest the Legislature's failure to approve the education package.

The OEA, the state's largest teachers' union, asked its members to withhold services for a week in protest.

Dahlem said although only about one-fourth of the state's school districts

were involved, many of those that were participating were urban districts with larger enrollments.

#90108u0625 04/18/1990 ~United Press International

JERUSALEM (APRIL 18) UPI - Court officials were set Wednesday to implement an eviction order against Jewish settlers who moved into the Christian Quarter of Jerusalem's Old City, but it was unlikely the families would move until the order is appealed.

District Judge Ruth Orr ruled late Tuesday the eviction order sought by the Greek Orthodox Church, the owner of the 72-room house, was valid.

Police gave the eviction order to a court officer to carry out the ruling, but lawyers for the settlers were expected to appeal to the High Court before it could be implemented.

The settlers told the judge they had permission to live in the house from a Panamanian company that reportedly bought the lease for several million dollars from the previous tenant, Martyros Matossian, who has disappeared.

The church said it initiated legal action against Matossian, an Armenian, in 1982. Greek Patriarch Diodoros I said the church wanted the house for religious purposes and wanted the Jewish families out as soon as possible.

The presence of the 150 Jews in the Christian Quarter has raised tensions and strained the fragile relationship between Arabs and Jews. Most Christians in the Old City are Palestinian or Armenian.

While lawyers fought in court, a dozen Border Police and riot police kept watch outside the century-old house, which is close to the Church of the Holy Sepulchre, one of the holiest sites in Christianity.

Speaking to reporters in the street outside the house, David Ben-Ami, a spokesman for the settlers, said the Jewish families would abide by the court decision, but were not preparing to leave.

The 20 Jewish families and 60 individuals moved into the house April 11, during the Christian Holy Week in what many Christians saw as a provocation. The Jews said they had a right to live anywhere in Jerusalem.

#90108u0651 04/18/1990 ~United Press International

BEIJING (APRIL 18) UPI - Police experts urged a nationwide inspection of computer equipment after discovering a potentially damaging computer virus that has affected thousands of units, an official newspaper reported

Wednesday.

The English-language China Daily said the virus was detected April 13 and is known as the ''Jerusalem'' program. It followed detection of five other computer virus types in hundreds of computers in Beijing.

A ''virus'' is a rogue program entered into a computer system surreptitiously, usually as a prank or deliberate sabotage. A virus can contain sometimes irreversible instructions to damage a system, such as erasing its memory.

The China Daily said officials at a computer monitoring center under the Ministry of Public Security, the national police agency, have confirmed the presence of the Jerusalem virus.

''Thousands of computers have already been infected,'' the newspaper said. ''Officials are urging a complete check of the country's computers and (memory) disks.''

Along with the nationwide inspection, police urged any new virus detections to be reported to local agencies.

Computer viruses are a relatively new phenomenon in China, but the China Daily said five other kinds have already been detected in computers in Beijing.

The newspaper said one virus affected 50 terminals at a computer center at a university in Beijing, forcing it to suspend operations. A chemical plant had to slow production for a month because of a virus in its computer system, it said.

#90108u0657 04/18/1990 ~United Press International

BEIJING (APRIL 18) UPI - A strong earthquake Tuesday rocked China's westernmost Xinjiang province on the border with the Soviet Union, causing ''severe damage'' to at least one town, the official press reported.

The state-run People's Daily newspaper said the quake, measuring 6.4 on the Richter scale, occurred at 10:59 a.m. Tuesday. It placed the epicenter at 39.5 degrees latitute and 74.5 degrees longitude near the Sino-Soviet border and west of the Chinese town of Wuqia.

The temblor caused ''severe damage'' in the town of Maoertukayi, 50 miles west of Wuqia and close to the border with Soviet Central Asia. Details of casualties were not immediately available, the report said.

Neighboring towns of Wuqia, Kashgar and Shufu felt a ''strong tremor.''

The report said officials from the State Seismological Bureau had been sent to Xinjiang to investigate.

An earthquake monitoring official in Beijing contacted by telephone said the seismological bureau had no further information.

Xinjiang's remote, mountainous western region has been hit by earthquakes in the past. A 6.4 quake with strong aftershocks shook western Xinjiang in 1987.

Western Xinjiang and the border region around Kashgar also have been shaken recently by ethnic unrest. China reportedly sent troops to the area two weeks ago to quell rioting by hundreds of ethnic Moslems, who share linguistic and cultural roots with Turkish minorities in neighboring Soviet Asian republics.

#90108u0709 04/18/1990 ~United Press International

MANILA, PHILIPPINES (APRIL 18) UPI - About 500 demonstrators chanting ''Down with imperialism'' rallied Wednesday at the U.S. Embassy and vowed to disrupt exploratory talks set for May 14 on the future of key American bases in the Philippines.

''There is nothing to talk about,'' Robert de Castro, vice chairman of the militant League of Filipino Students, told the crowd. ''We urge the government of President Corazon Aquino to serve the notice of termination immediately.''

The United States maintains the giant Clark Air Base and Subic Bay Naval Complex - Washington's largest and oldest overseas facilities - and four smaller installations under a 1947 treaty that expires in 1991.

Exploratory talks are to begin May 14 in Manila to determine whether formal negotiations should be held for a renewal of U.S. basing rights in its former colony.

De Castro said militants will hold rallies at the site of the talks in Manila and also at U.S. facilities at Clark, Subic, Wallace Air Station and Camp John Hay, all north of the capital.

''A new era in our struggle will begin on May 14,'' said de Castro amid chants of ''Bases, bases: pests, pests.'' ''Prepare yourselves,'' he said. ''Condition your bodies. The struggle ahead will be tough and difficult.''

Some 100 anti-riot policemen, supported by a Special Weapons and Tactics team, guarded the embassy gates but no incidents were reported during the two-hour rally of left-wing demonstrators, police said.

Foreign Affairs Secretary Raul Manglapus told reporters Wednesday the fact that Manila has agreed to the preparatory talks shows the negotiation of a new treaty is ''possible.''

Any new treaty needs ratification from the Philippines' independent-minded Senate, where sentiment against the U.S. bases is strong.

Rear Adm. Roger Rich, representative of the commander-in-chief of the U.S. Pacific Fleet, said in an interview with U.S. military television it was ''in the interest of both nations'' for the United States to remain in the region for stability.

He said both Manila and Washington should find a ''common ground'' to maintain the facilities.

#90108u0763 04/18/1990 ~United Press International

(APRIL 18) UPI - Congress returns from its Easter break... Lithuania stiffens against Moscow... civil rights leader Ralph Abernathy dies... details of those stories and more, next, from United Press Internatioanl.

Congress will resume its session today after its week-long Easter break.

The Senate and House are expected to settle on child-care and clean air legislation in the coming weeks without a lot of fuss. But all-out partisan warfare is likely over the budget, campaign finance reform and anti-crime measures.

Both chambers have approved child-care measures, leaving it up to House-Senate conferees to negotiate a final draft. The Senate has approved a clean air bill and House action is scheduled for early May.

Democrats are ready to go ahead on the fiscal 1991 budget without Republican help... working on the assumption that there will have to be an accommodation with the White House sometime this year.

Also, the Democrats have failed to reach an agreement with Republicans on campaign finance reform. Democrats plan to push their proposal and attempt to crack previously solid G-O-P opposition.

President Bush is anxious to see final action on a money bill to help Panama and Nicaragua. This could lead to a fight on the whole question of foreign aid.

The House has approved 420-Million dollars for Panama and 300-Million for Nicaragua. The Senate did NOT act, despite the president's entreaties. The

Senate Appropriations Committee is scheduled consider the funding this week.

The House and Senate Budget Committees are expected to open public debate this week on the budget resolution... which sets spending limits and savings levels and determines revenue needs.

-30- 1877

#90108u0774 04/18/1990 ~United Press International

(APRIL 18) UPI - A black leader who helped Martin Luther King Junior overcome his shyness and rise to the forefront of the civil rights movement... the Reverend Ralph David Abernathy... is dead at 64.

Abernathy died of a heart attack yesterday in Atlanta's Crawford Long Hospital.

The Reverend Joseph Lowery followed King and Abernathy as leader of the Southern Christian Leadership Conference. Lowery says- quote- ''A stalwart soldier in the army of justice has fallen.''

President Bush called Abernathy- quote- ''a great leader in the struggle for civil rights for all Americans and a tireless campaigner for justice.''

Another eulogy came from Andrew Young, a former rights worker, former mayor of Atlanta and former United Nations ambassador. Young says there probably could NOT have been a civil rights movement without Abernathy. Young says Abernathy helped King emerge as a leader.

Abernathy and King organized the Montgomery bus boycott in 1955 after Rosa Parks refused to give up her seat to a white rider. The two Baptist ministers plus other black clergymen formed S-C-L-C in 1957... and the organization became the backbone of the rights movement.

Abernathy became head of S-C-L-C following King's assassination in 1968 and led the group for more than a decade.

#90108u0783 04/18/1990 ~United Press International

(APRIL 18) UPI - The Bush administration has told Congress the United States will NOT rejoin the United Nations Educational, Scientific and Cultural Organization, which the U-S pulled out of in 1984 along with Britain and Singapore.

The State Department cited that the move is based on the group's ineptness.

Assistant Secretary of State for International Organizations John Bolton

says this analysis is founded in the fact that the group allocates 70 percent of its budget on its ''top heavy staff in Paris.''

This figure compares to what Bolton says is a seven-percent allocation to alleviate illiteracy, one of the stated purposes of the agency.

Another reason for the adminstration move is a U-S perception that UNESCO is overly political and fails to come close to its manifesto of serving as a clearinghouse for information.

The annual U-S donation to the group had been 50-Million dollars. The State Department says the United States, as a non-member, may be able to exert more pressure on the agency to reform.

The fraud and racketeering trial of former Philippine first lady Imelda Marcos is scheduled to resume this morning in New York.

During yesterday's proceedings, a Philippine shipping magnate testified in the span of 10 years he deposited 25-Million dollars to Swiss accounts managed by the man federal prosecutors say was the Marcos's personal banker.

Jose Reyes told prosecutors that the Philippine National Oil Company told him to make the deposits. Normally, the money would have gone to the oil company.

Reyes took the stand after his wife. Dr. Angelita Reyes, told the court that when she went to the Marco's residence after they were ousted from power four years ago, she found papers indicating they had at least two Swiss bank accounts.

Dr. Reyes said there were documents indicating the accounts were held in the pseudonyms of ''Jane Ryan'' and ''John Lewis.''

Mrs. Marco and her late husband, Ferdinand, are accused of diverting money from the Philippine treasury for their own benefit in real estate and art investments around the world.

BANGKOK, THAILAND (APRIL 18) UPI - The military government of Burma revoked martial law in eight Rangoon townships prior to national elections next month, Rangoon radio reported.

But Western diplomats and U.S. officials say the jailing of opposition

leaders, limits on political campaigning, bans on public meetings and government control of the press make it unlikely the elections will be free and fair.

The State Law and Order Restoration Council, the ruling military junta, revoked martial law in eight Rangoon townships with immediate effect, the radio said Tuesday.

''Presently, the law and order and regional peace and tranquility situation has improved in the areas in the jurisdiction of the Rangoon military command,'' it said.

The eight townships are North Okkalapa, South Okkalapa, Shwe Pyitha, Hlaing Thaya, Dagon Myothit, Thingangyun, Thaketa, and Dawbon, it said.

Some of those areas were the scenes of massive protests and violent clashes between the army and demonstrators demanding free democratic elections in 1988.

The junta, which seized power in September 1988 to crush the protests, has said more than 500 people died in those clashes but diplomatic sources have put the death toll at more than 1,000.

The military set elections for May 27, but opposition political leaders have expressed doubts about the fairness of the elections because hundreds of political activists have been arrested, including the three most prominent opposition leaders.

In addition, the government has evicted tens of thousands of Rangoon residents from areas known to be centers of opposition support, diplomats report. They were sent to start new lives on vacant land dozens of miles from the cities where they worked and would have voted.

TOKYO (APRIL 18) UPI - Japan has added the names of 582 people to a list of more than 2,000 Chinese boat people it has determined are economic refugees who should be sent back to China, the Justice Ministry said.

A flood of boat people fleeing China arrived in Japan last summer seeking refugee status, but Japan has turned them down after determining they came in search of a better standard of living and because Japan has no policy of accepting Chinese refugees, political or economic.

With the addition of the 582 people Tuesday, the Justice Ministry has now determined 2,647 of the 2,804 Chinese boat people should be deported.

The Japanese have sent 792 Chinese nationals back and are making plans to return the other 1,855. The refugees are being held in detention centers until arrangements can be made to return them.

Japan accepts a small number of Vietnamese refugees but has not accepted Chinese refugees for political or other reasons.

Some of the Chinese nationals told Japanese authorities they were Vietnamese when they first arrived in Japan, Japanese officials said.

When the Justice Ministry determined they were not Vietnamese and came to Japan for economic reasons, the ministry decided to deport them.

WASHINGTON (APRIL 18) UPI - America's merchandise trade deficit plunged by 30.4 percent in February to $6.49 billion - the lowest level since December 1983, the Commerce Department said Wednesday.

February imports fell by 7.6 percent to $38.1 billion from $41.3 billion, with a market $1.2 billion decline in imports of oil and petroleum products, according to the monthly report compiled by the department's Census Bureau. There was also a decline in computer imports in February.

Exports slipped by only one percent to $31.6 billion in February from $31.9 billion in January, even though there was a $1.1 billion, or 51 percent, increase in the export of aircraft and other transportation equipment, the department said.

The nation's overall February trade deficit is the lowest since $5.7 billion in December 1983, a government spokesman said. Total imports of oil and petroleum products slid to $4.8 billion in February from $5.9 billion in January, leading to a $2 billion deficit with the Organization of Petroleum Exporting Countries, the Commerce Department said. In January the trade deficit with OPEC stood at $2.6 billion.

Nonetheless, the United States remains very dependent on oil and petroleum from other countries as its domestic production declined dramatically over the past decade with the plunge in oil prices.

Among the other factors contributing to the February decrease in the trade deficit was a $300 million, or 7.5 percent, decline in the import of consumer durable goods, those expensive items made to last three or more years, such as major household appliances, the department said.

There was also a $400 million, or ten percent, fall in the import of consumer nondurable goods such as textiles and shoes, the government

report said.

For February, the nation's trade deficit with Japan stood at $3.1 billion after dipping to $2.9 billion in January, while the nation recorded a $960 million trade surplus with Western Europe in February after a deficit of $310 million in January, the Commerce Department said.

SANTA MONICA, CA (APRIL 18) UPI - Elizabeth Taylor, hospitalized for more than a week with a sinus condition and fever, said Tuesday she has now been diagnosed with pneumonia but does not have AIDS as has been rumored.

''I would like to dispel the plethora of rumors that have been circulating that I have an AIDS-related condition,'' Taylor said in a statement. ''I feel it is important that people should not be afraid to be tested for AIDS.''

Taylor, 58, said she has had an annual physical and has been tested for AIDS, and the results of those tests ''are negative.'' The two-time Oscar winner has been at the forefront of public education efforts on the AIDS crisis and has raised millions of dollars for AIDS research.

Taylor was transferred by ambulance Tuesday from Daniel Freeman Marina Hospital in Marina del Rey, where she had undergone treatment for a ''severe'' sinus condition, to St. John's Hospital a few miles away in Santa Monica.

Her physician, Dr. Patricia Murray, an infectious disease specialist, said the actress was transferred after she was diagnosed as having pneumonia and a persistent high fever. Her sinus condition ''has abated somewhat,'' Murray said.

''She was taken to St. John's ... for tests. She's feeling fine and is undergoing tests, but she's not in any danger,'' said a family member who asked not to be identified.

Taylor, who was admitted to Daniel Freeman April 9, was to be kept under observation until further tests have been conducted and their results are known. The actress was being treating intravenously with antibiotics.

''I have been advised by my physician to remain hospitalized and I expect to make a full recovery,'' Taylor said.

The violet-eyed actress won best acting Oscars for her portrayals in the films ''Butterfield 8'' and ''Who's Afraid of Virginia Woolf.''

(APRIL 18) UPI - There's an unconfirmed report that Moscow plans to follow up its curtailment of natural gas to Lithuania by implementing an embargo of oil supplies to the maverick republic. President Gorbachev yesterday ordered natural gas supplies cut to the Baltic state after it failed to meet Sunday's deadline of backing off its call for independence. President Bush says he's keeping an eye on Lithuania and considering ''appropriate responses.''

President Bush yesterday reiterated that the international community must collect more scientific data before charting a course to combat global warming. But his comments failed to convince some European delegates at the conference. One West German representative said it's logical to amass more information. But he added that it isn't logical to take NO steps to curtail the primary cause of the problem- carbon dioxide emissions.

The Bush administration yesterday told the U-S Supreme Court that the Constitutional right of free expression does NOT extend to destroying the U-S flag. Arguing on behalf of the White House, the Justice Department told the high court that flag-burning runs contrary to the nation's shared values. The court agreed earlier this month to rule on the constitutionality of an anti-flag burning law passed last year by Congress.

A published report suggests that the prevalence of the AIDS-virus among the teen-age population may be higher than previously thought. According to data compiled by the U-S army, about one in three-thousand teens who've applied for military service since October 1985 and March 1989 tested positive for the virus. There were roughly equal numbers of men and women infected.

#90108u0971 04/18/1990 ~United Press International
(APRIL 18) UPI - A new study seems to support proponents of the argument that a person's heredity plays a role in whether that person becomes alcoholic. Research published yesterday says scientists have found a gene that appears to be linked to alcoholism. But the study's authors say the findings are preliminary and that a variety of factors may cause the disease.

Congress returns from its Spring break today. Lawmakers face a series of issues that could result in all-out partisan warfare. Among the tasks facing the legislative body is the 1991 fiscal budget. Democrats say they are ready to go it alone if they can't get Republicans to act in a

bipartisan fashion. There's also dissent between the parties over campaign finance reform.

Diplomatic sources say Moscow and Washington are quietly urging India and Pakistan to practice restraint. The two countries have experienced increasing tensions along their border and issued impassioned statements to each other that hostilities can lead to military action. The sources indicate the Americans and Soviets are acting independently to try to kindle a dialogue between the neighbors.

A six-member panel in Philadelphia has decided to use the proceeds from Benjamin Franklin's estate to help educate young Philadephians in the trades and applied sciences. Yesterday's announcement came on the 200th anniversary of Franklin's death, the date Franklin instructed his trust was to be terminated. Since his demise, Franklin's four-thousand-dollar bequest has grown to 520-thousand dollars.

#90108u0984 04/18/1990 ~United Press International

ANALYSIS BY HELEN THOMAS

WASHINGTON (APRIL 18) UPI - President Bush says he does not buy ''some of those elitist theories about the decline of America.''

''I don't believe it,'' he said. ''I don't think the American people believe it. I don't believe our allies believe it.''

He made the remarks in an interview with a group of foreign correspondents recently.

Asked if he liked the phrase ''first among equals'' as a description of his vision of America's place in the network of democratic alliances, he said:

''Well, I think many of our allies look to us as the first among equals, given the blessing of the size of our gross national product and given our historic commitment to the security of others.''

He added that ''the realities of the world are such that many look to us as essential - in this instance the security of Europe. Certainly, we've got to be dealt with on trade matters.''

The word at the White House is that privately the president is concerned about the economy, something Americans have been concerned about for some time.

In addition, the balance of trade picture, the imbalance in terms of Japan

the $3 trillion national debt, the huge deficit have put the United States in a worriesome position.

Is the White House whistling in the dark? The astronomical bailout figure for the savings and loan debacle that is bandied about runs from $200 billion to $500 billion.

So the problems are out there, unfortunately at a time when it would be salutary if Uncle Sam were feeling flush and could encourage along, with money and technology, the incredible political changes taking place in the world, particularly in Eastern Europe.

The United States has an important stake in keeping its leadership role. Bush certainly believes that. He is pushing for France to return to the military arm of NATO after a dramatic pullout by President Charles de Gaulle years ago.

In the same interview, he said that he did not want to sound ''chauvinistic'' but he did not believe the American people want to relinquish the privilege of having an American in the role of supreme commander of NATO, which has been the custom for more than 40 years.

''People view the American presence as stabilizing, as having played a significant role in preserving a peace that, in terms of European history, is a long one,'' he said. ''And I don't want to have this coming out in a chauvinistic sense, but I think the American people have to feel the American presence is wanted, and part of the command structure.

''I think, it contributes to the view that we have an important role to play and the Europeans want us to have an important role to play.''

So while the political face of Europe is changing, and Germany will soon be reunified, there is a strong desire on the part of the Europeans to permit the United States to retain a dominant voice in its security affairs.

But the day is coming, and U.S. leaders have to prepare for it, when America will be less important in the scheme of things on the continent. It would be foolhardy for them to lull themselves into the fallacy that the United States will retain its primacy in a prosperous Europe.

The United States still has the dynamism, energy and ideas to lead in a more democratic world. But not if it becomes bogged down in debt and has to take a back seat to less hamstrung competitors.

It has provided a security umbrella for the West and Japan, and bankrolled the world in the fight against communism.

But American officials have to know the time could come when the United States may be invited out, and if not that drastic, at least, lose its place as No. 1.

#90108u0988 04/18/1990 ~United Press International

TOKYO (APRIL 18) UPI - Japan's Finance Ministry has decided to completely liberalize interest rates on all kinds of deposits, including postal savings, toward the end of 1993, national dailies reported Wednesday.

The newspapers, Nihon Keizai Shimbun and Yomiuri Shimbun, said the decision calling for a step-by-step process will be incorporated in Japan's proposal to be presented at U.S.-Japanese negotiations on financial issues in May. The Finance Ministry declined comment on the reports.

The proposal calls for gradually expanding the scope of deregulation on interest rates toward total liberalization at the end of 1993, the papers said.

In the initial step, they said, interest rates on small-lot money market certificates linked with interest rates on certificates of deposits will be liberalized in the fall of this year.

Interest on MMCs will then be linked with already decontroled rates on large-lot time deposits exceeding ten million yen, the equivalent of $65,000, the reports said.

They said the minimum deposit for small-lot MMCs, currently set at one million yen, or $6,500, will be lowered to 500,000 yen, or $3,200 in the second step.

After these steps are completed, interest rates on time deposits of three million yen, or $19,000, or more will be decontrolled in late 1991, the papers said.

The scope of liberalization will be expanded to cover all deposits of more than 500,000 yen, they said. By the end of 1993, interest rates on all kinds of deposits, including postal savings, will be totally liberalized, the dailies said. The Posts and Telecommunications Ministry and financial institutions have been informed of the Finance Ministry program, the dailies said.

Under U.S. pressure, the Japanese government has been speeding up the process of liberalizing interest rates on deposits and savings since 1984. The Finance Ministry introduced the market-rate large-lot time deposit system with the minimum amount of one billion yen, or $6.5 million, in

late 1985.

#90108u1000 04/18/1990 ~United Press International
PARIS (APRIL 18) UPI - The Air France group Wednesday posted consolidated net profits of $148 million for 1989, a drop of 27 percent from 1988.

President Bernard Attali said consolidated turnover in 1989 was $7 billion an increase of 11.8 percent.

Attali blamed the downturn in profits in part on a strike by Air France ground staff from October 1988 to January 1989.

He said the dispute cost the French national carrier an estimated $118 million.

WASHINGTON (APRIL 18) UPI - President Bush, monitoring the crisis in Lithuania, is considering options that might affect U.S.-Soviet relations but direct intervention is not one of them, White House press secretary Marlin Fitzwater said Wednesday.

Fitzwater said the president has held meetings on a regular basis to analyze Soviet President Mikhail Gorbachev's latest warnings to the independence-minded Baltic republic and to consider options ''targeted to the problem.''

''We have options obviously,'' Fitzwater said. ''We just can't afford to discuss them at the moment. The U.S.-Soviet relationship is what is at stake here ... so the options would have to have some effect on the relationship.''

He said that Bush remembers the example of the failed 1956 Hungarian uprising, when there was a lot of vocal ''breast beating and when the tanks rolled in we couldn't do anything.'' Soviet tanks and troops crushed the revolt and doomed the regime of Hungarian leader Imre Nagy.

''We're not going to have direct intervention in that country,'' Fitzwater said of the Lithuanian crisis. ''We have to back off and to say what can we do that gives us leverage. We're talking about policy discussions that influence our relationship.''

He said, ''Obviously we're calibrating the U.S. response.''

Bush warned the Kremlin on Tuesday that the United States would make ''appropriate responses'' if fuel supplies are curtailed to the Lithuanian people. But he did not elaborate.

Speculation on options has centered on superpower negotiatons under way since the thaw in the U.S.-Soviet relationship and the December summit in Malta. The two countries have been discussing treaties on civil aviation, trade, investment, taxes and maritime transportation.

Fitzwater indicated there is ''no thought at this point'' of calling off the scheduled summit meeting between Bush and Gorbachev May 30-June 3. Fitzwater said Bush remains in ''good spirits'' despite his concerns over Lithuania and he sees the summit ''not only as an opportunity to discuss the outstanding issues such as arms control'' but also a chance to air differences over Lithuania.

''There is a lot to discuss,'' Fitzwater said. ''We've got a lot of agenda items.''

Bush flies to Key Largo, Fla., on Thursday to meet with French President Francois Mitterrand. The situation in Lithuania, German reunification and the future of the NATO are expected to dominate the talks.

During the past weekend Bush met with British Prime Minister Margaret Thatcher in Bermuda to review allied positions on the same subjects.

#90108u1046 04/18/1990 ~United Press International

MOSCOW (APRIL 18) UPI - West Germany and the Soviet Union signed an agreement Wednesday to send a German astronaut to the Mir space station in 1992.

The accord with the Soviet Glavkosmos space agency will make West Germany the second nation along with France to go into space with both the Americans and the Soviets.

In 1983, Ulf Merbold flew on the Columbia shuttle fron Nov. 28 to Dec. 8 and a second shuttle flight with a West German astronaut is scheduled.

France has made one shuttle flight with the Americans, and has twice sent astronaut Jean-Loup Chretien to the Mir space station in flights with the Soviets.

Nikolai Semyenov, a spokesman for Glavkosmos, said the West Germans will pay $9 billion for the eight-day flight, which will take place in the second half of 1992.

The contract was signed in Moscow Wednesday between Glavkosmos and the German Aviation and Astronautics Research Institution based in Cologne.

But the West Germans will have to get in line to await their turn in what is a busy launch program under the Soviet program of making foreigners pay for flights instead of free propaganda flights with socialist countries.

A Japanese astronaut will go into space Dec. 2, and next year an English astronaut will go the Mir. A French astronaut will then make another flight.

Austria will then send an astronaut on a joint flight with the Russians, and a West German flier will lift off from Baikonur in the second half of 1992.

''The sooner we start the selection process, the better,'' said Semyenov, the spokesman at Glavkosmos.

Semyenov explained that the new ''pay as you go policy'' made sense and derided the former joint flights for the glory of communism.

''It should have been earlier this way and this is the way it will be done in the future,'' he said.

#90108u1084 04/18/1990 ~United Press International

TORONTO (APRIL 18) UPI - Nickel producer Inco Limited Wednesday reported first-quarter earnings of $67.7 million, or 64 cents a share, a significant drop from $276.3 million, or $2.60 a share, in the year ago period.

Revenues fell to $734.5 million down from $1.12 billion in 1989's first-quarter. In 1989, Inco reported earnings of $753.4 million, or $7.11 a share, and revenues of $3.95 billion.

Inco said the results reflected lower realized nickel prices which averaged $3.69 a pound in the first quarter of 1990, compared with a record average price of $6.59 a pound a year earlier.

The company's primary metals division - comprising nickel, copper, platinum, gold, silver and cobalt - saw its first-quarter operating earnings chopped to $110 million from $543 million in the 1989 period. The drop was attributed to lower realized prices, lower deliveries and higher unit costs.

Inco, the world's largest non-communist nickel producer, operates mines, smelters, refineries, rolling mills, forging plants and research labs in Canada, the United States, the United Kingdom and Indonesia.

Inco produces a range of primary metals and alloys and engineered products and manufactures blades, discs, rings and other forged and precision-machined components.

#90108u1092 04/18/1990 ~United Press International

HOUSTON (APRIL 18) UPI - American General Corp. has mailed a letter to its shareholders asking for their support in a proxy fight with Torchmark Corp., an Alabama insurance company trying to take over the insurance giant.

"CAUTION - We urge you not to sign any Torchmark proxy card you receive," American General said on the cover of a letter sent Tuesday to its 35,000 shareholders.

Harold S. Hook, American General chairman and chief executive officer, told shareholders Torchmark's original $6.4 billion buyout offer, announced March 26, was not credible because it came with threats and an arbitrary 48-hour deadline. The company needed more time to evaluate such an offer, and it is willing to consider any serious acqusition proposals, Hook said.

Torchmark, based in Birmingham, Ala., withdrew its acquisition offer in favor of a proxy fight. Torchmark is trying to persuade American General shareholders to vote for its slate of candidates at the May 2 annual

meeting.

American General is holding an election for six of its 15 board seats. Torchmark is offering candidates for five of the seats. It is not contesting Hook's seat.

"If the Torchmark nominees are elected, five of the 15 directors - fully one-third of the full board - will be individuals chosen by Torchmark ... We believe Torchmark's actions indicate that it never intended for its proposal to be seriously considered by a board which did not include its hand-picked nominees," the letter to shareholders said.

Torchmark also is asking American General shareholders to vote for a resolution that asks American General's board to appoint a committee of independent directors to evaluate acquisition proposals and to hire an investment banker to seek buyers for the company.

The proxy materials state Torchmark's five nominees own a combined 3,270 shares of American General stock. Three of the candidates bought their stock, a total of 2,020 shares, on March 29 and March 30 - just days after Torchmark made its original offer. Another candidate added 100 shares on March 29 to the 400 shares he already owned. American General has about 120 million shares outstanding.

American General is a Houston-based insurance and financial services holding company with assets of $32 billion and total equity of $4.4 billion.

#90108u1093 04/18/1990 ~United Press International

CAIRO, EGYPT (APRIL 18) UPI - Egypt has a plan to eliminate all weapons of mass destruction from the Middle East but at the same time is defending Iraq's right to retaliate with chemical weapons against an Israeli attack.

Egyptian Foreign Minister Esmat Abdel-Meguid said in a letter delivered Tuesday to U.N. Secretary-General Javier Perez de Cuellar that all nuclear chemical and biological weapons should be banned from the volatile area, and called on all states in the region, including Israel and Iraq, to comply.

Abdel-Meguid also called on the United Nations to help establish verification measures to ensure full compliance.

There was no immediate reaction from Israel but Abdel-Meguid said he hoped Israeli leaders would react positively to the mutual verification clause of his proposal. ''I would welcome such a statement from (Israel) on that '' he said.

At the same time, Abdel-Meguid defended Iraq's right to defend itself against an Israeli attack. ''Do you expect them to sit tight, like a sitting duck?'' he asked.

Iraqi President Saddam Hussein, whose suspected attempt to smuggle 40 U.S.-made nuclear triggers through London last month failed, told visiting U.S. Senate minority leader Robert Dole, R-Kan., last week that his country is willing to get rid of its weapons of mass destruction if Israel does the same.

Saddam this week revealed he ordered his military commanders to launch missiles with chemical warheads on Israeli targets if the Jewish state launched a nuclear strike on Iraq, pushing tension in the region to levels not seen since the last Arab-Israeli war, in 1973, according to press reports.

President Bush and other Western leaders have expressed concern about the recent escalation in the Mideast arms race, which one U.S. diplomat in the region said was ''getting out of control.''

Iraq has said it does not possess nuclear weapons, but made it clear it had chemical weapons and would use them to wipe out half of Israel if the Jewish state repeated a 1981 bombing raid on an Iraqi nuclear reactor under construction near Baghdad.

Military experts believe Israel is the only country in the Middle East with nuclear weapons, although Iraq and Egypt are developing nuclear programs. The experts said Iraq, Syria, Egypt, Saudi Arabia and Israel also have medium-range ballistic missiles capable of delivering a nuclear or chemical warhead anywhere in the Middle East.

''If the arms race continues, we will reach a state of MAD, or mutually assured destruction,'' Abdel-Meguid told reporters at the Cairo Foreign Press Association.

The foreign minister said he recognized that some states might be reluctant to move quickly on his proposal, but some movement is nevertheless necessary.

''We would like to see movement as quickly as possible,'' he said. ''Time is very important ... even if we move slowly, we must move.''

Cairo-based Western diplomats said since Israel is the only country in the region believed to have nuclear weapons, its attitude would be crucial to the success of the Egyptian initiative.

''The Israelis have nuclear weapons as a last resort, a deterrent,'' one

envoy told United Press International in an interview. ''For them to give up this deterrent they must get something in return ... the key will be whether Israeli policy makers decide the mutual elimination of all chemical, nuclear and biological weapons matches their security interests at the present time.''

DETROIT (APRIL 18) UPI - The first circulation report since the joint operating agreement business merger linked the Detroit News and Detroit Free Press showed their Sunday edition selling No. 4 in the nation.

The Detroit Newspaper Agency announced Tuesday the average sale of 1,270,420 for the period ending March 31 still trails pre-merger separate sales, but executives blamed the loss on the elimination of duplicate readership.

Circulation figures filed last week by the publishers of the News and Free Press with the Audit Bureau of Circulations show the joint Sunday edition reaches 64 percent of the households in the six-county Detroit metropolitan area, the DNA annoucnment said. The paper united their business operations under the Detroit Newspaper Agency on Nov. 19.

The three Sunday newspapers still outselling the News and Free Press are the New York Times (1.66 million), the New York Daily News (1.53 million), and the los Angeles Times (1.42 million.) The 1.27 million copy average was down from the average total of 1.5 million papers sold separately by the two newspaperes.

The report set the daily circulation of the morning and evening newspapers at a combined 1.17 million copies, reaching 59 percent of the homes in the metropolitan area.

"These figures should please our advertisers, who ought to feel reassured that, in spite of the changes brought by the JOA, these two outstanding newspapers continue to offer excellent penetration in the Detroit area," said Joseph Ungaro, DNA pesident and CEO.

On the daily side, the sales of two newspapers remained relatively close. The News enjoyed an average lead of 13,284 daily papers in the city zone (Detroit and some close-in suburbs), while the Free Press held a 57,233 lead in the retail trading zone (the balance of the six-county area.)

SAN FRANCISCO (APRIL 18) UPI - Three earthquakes, ranging in magnitude

from 4.1 to 5.4 on the Richter scale, rattled the Bay Area Wednesday on the 84th anniversary of the great 1906 earthquake.

There were no immediate reports of damage or injuries from the quakes, which came in a 16-minute period shortly before 7 a.m. "We've had three pretty strong ones this morning," said Pat Jorgenson, public affairs director for U.S. Geological Survey in Menlo Park.

The quakes came on the 84th anniversary of the great 1906 San Francisco earthquake and one day after the six-month anniversary of the 7.1 quake on Oct. 17 that killed 62 people and caused millions in dollars of damage in Northern California.

The epicenter was locate four miles east-southeast of Watsonville, which was hit hard by last year's quake. The first temblor, a 4.5 on the Richter hit at 6:37 a.m. and was followed five minutes later by a 4.1 quake. The third came at 6:53 a.m. and measured 5.4. The three quakes were felt strongly in the Bay Area, especially the South Bay Area, Jorgenson said.

Parts of Southern California were jolted Tuesday by seven sizable aftershocks to a Feb. 28 5.5 magnitude earthquake. The largest was 4.6, centered three miles west of Upland in San Bernardino County, about 36 miles east of downtown Los Angeles. It frazzled nerves and shook loose chimney bricks but caused no serious damage or injuries.

(APRIL 18) UPI - A federal undercover drug operation that cost one customs agent his life in a helicopter crash was completed in Miami yesterday. Five people were arrested. 400-thousand dollars and nearly three tons of cocaine were seized.

Philadelphia Mayor Wilson Goode says it's more important to save lives than to rescue bankrupt thrift investors. Goode told a U-S House panel yesterday drug treatment programs get one-fifth the money savings and loans get.

A Hispanic police officer convicted of manslaughter in the deaths of two black men in Miami last year is hospitalized. Officials say William Lozano apparently tried to commit suicide. He's listed in stable condition.

A Massachusetts state police detective has been sentenced to 18 to 30 years in prison for stabbing a prosecutor. John Mace was accused of trying to kill the prosecutor to cover up his theft of 118-thousand dollars from the state.

A human rights group accuses U-S troops in Panama of persecuting Panamanians. G-I's briefly detained and questioned members of an agricultural co-operative. The U-S Southern Command had NO immediate comment.

The former chief of Romanian intelligence says he's been told it's ''business as usual'' for the security service despite Romania's revolution. He says about 17-thousand of the 20-thousand officers are still in place.

Researchers say the sea otters rescued from the Alaska oil spill have fared badly. 45 rescued otters were fitted with radio transmitters. 23 survived. The others are dead or missing.

ROME (APRIL 18) UPI - Lithuania's president has invited Pope John Paul II

to visit the breakaway Soviet republic and to establish full diplomatic relations with his government, the Italian news agency ANSA said Wednesday.

ANSA quoted Lithuanian representative Stasys Lozoraitis as the source of its report. Lozoraitis, the Baltic state's recently appointed representative to the United States and the Vatican, is currently in Washington, and the ANSA agency interviewed him by telephone.

Lozoraitis said Lithuanian President Vytautas Landsbergis sent a personal message to the pope early this month, inviting him to visit Lithuania and to establish full diplomatic relations with his government.

''But the papal visit could not be expected to take place before 1992, even if everything goes well,'' the Lithuanian diplomat said.

The Vatican has never accepted the annexation of strongly Catholic Lithuania by the Soviet Union in 1940 and Lithuania has continued to maintain a diplomatic representative accredited to the Vatican.

''At this time the role of the pope can be very important to unblock the situation,'' Lozoraitis told the Italian agency. ''His moral authority is enormous and John Paul knows very well the situation in Eastern Europe and in Lithuania in particular.

''I am convinced he will leave nothing undone to try to launch a dialogue between Lithuania and the Soviet Union,'' he said. ''We are not yet in a phase of Vatican mediation but this could firm up through Apostolic Nuncio (ambassador) Colasuonno who will be going to Moscow in the next few days.''

Archbishop Francesco Colasuonno was named by the Holy See as its ''official representative at a personal level'' to the Soviet government March 15, when the Vatican and the Soviet agreed to establish permanent diplomatic contacts, just short of full diplomatic relations.

Pope John Paul II has adopted a cautious stance toward Lithuania's tussle with Moscow over its drive for independence, apparently in order not to disturb the Vatican's recently improved relations with the Soviet Union.

In a brief message translated into Lithuanian during his Easter Sunday appearance in St. Peter's square, the pope expressed the hope that Lithuanians will achieve their independence aspirations ''through a respectful and comprehensive dialogue.''

This followed the pope's meeting in the Vatican Saturday with top Soviet diplomatic adviser Vadim Zagladin.

Almost simultaneously Saturday the Vatican announced the pope had sent a message to the president of the Lithuanian Bishops' Conference in which he

said, ''In these hours of trepidation and of hope, I am particularly close to the Lithuanian church.''

MOSCOW (APRIL 18) UPI - A man apparently seeking to share the spotlight of Lithuanian independence hijacked a Moscow-to-Leningrad jetliner Wednesday and ordered it flown to the republic's capital of Vilnius by claiming to have a bomb.

The diversion of Aeroflot Flight 2443 ended peacefully in Vilnius, where the bomb turned out to be a large box of matches.

An official of the Lithuanian Interior Ministry, reached by telephone from Moscow, said a passenger got up about 10 minutes after Flight 2443 took off and threatened to blow up the plane unless it flew to Vilnius.

The hijacker told a stewardess he wanted Lithuanian President Vytautas Landsbergis to meet him at the Vilnius airport so they could have their picture taken together.

The hijacker, identified as Igor Kalugin of Moscow, was told Landsbergis was too busy to meet the plane.

The man also demanded pictures taken with the rest of the Lithuanian leadership and said he wanted to take photos of events in the republic, which set off a crisis by declaring independence from the Soviet Union March 11.

''Quite a comic, eh?'' the Lithuanian official said. ''It was all very calm.''They (the stewardess and the hijacker) even had some coffee together.''

The official Soviet news agency Tass said the hijacker had been registered at a mental hospital.

WASHINGTON (APRIL 18) UPI - Jennifer Fitzgerald, deputy chief of U.S. protocol and a former aide to George Bush, was fined $648 by the Customs Service for failing to declare the true value of two fur coats from Argentina, officials said Wednesday.

Anita Stockman, a spokeswoman for the State Department, said the investigation of the case is ongoing.

Stockman confirmed that the investigation began in January after an anonymous tip was received on the ''hot line'' of the department's inspector general. The caller said that Fitzgerald, traveling on a U.S. government aircraft, had failed to declare some items when she returned to Andrews Air Force Base from South America.

Ed Kittredge, a spokesman for the U.S. Customs Service, said Fitzgerald was summoned to the Office of the Special Agent in Baltimore on March 23, where she was assessed $648 under the Custom Fraud Statute. He said the case was handled as a civil matter, not as as a criminal case.

According to the Customs Service, Fitzgerald, who had traveled to Argentina as part of an official U.S. delegation, returned with a raincoat purchased abroad, which she declared to be worth $300. She did not mention in the customs declaration that the coat was lined with nutria fur.

The customs agent appraised the coat to be worth $1,100 and Fitzgerald was asked to pay a penalty of $440.

For a fur cape worth $1,300 that she failed to disclose altogether, Fitzgerald was assessed $208.

The customs spokesman said he could not explain why a partial disclosure resulted in a larger fine than concealing an item altogether.

''As far as the U.S. Customs Service is concerned, the matter is closed. She wrote two checks and she paid her fine,'' Kittredge said.

But Stockman said that for the State Department the ''matter is still open.'' Stockman could not disclose any details of the inspector general's investigation.

Fitzgerald, a political appointee, is deputy to U.S. Chief of Protocol Joseph Reed. She served as a personal assistant to Bush when he was ambassador to China and when he was vice president.

Stockman said the investigation of Fitzgerald ''was handled in a routine manner.''

BONN, WEST GERMANY (APRIL 18) UPI - The Canadian Air Force suspended some training flights over West Germany Wednesday while investigating the collision of two fighter jets that sent a shower of burning debris down on the city of Karlsruhe.

An air force spokesman said only flights to train for air interception had been suspended and that routine missions would continue.

Commander of the Canadian Forces Europe, Maj.-Gen. Brian Smith, said in a statement that he had ''ordered the suspension of all Canadian Forces CF-18 air-to-air combat training in West Germany until the causes of yesterday's crash of two CF-18 fighter aircraft in Karlsruhe has been identified.''

The two fighter jets collided Tuesday at about 10,000 feet on an interception exercise over the central West German city of Karlsruhe.

A pilot, identified as Capt. Timothy Kirk Leuty, was killed in the crash, apparently because he was unable to eject from his plane. The second pilot Capt. Reginald Decoste, managed to bail out and parachute onto a highway. The air force said he was in good condition.

One civilian was slightly injured by falling debris. Police said parts of the burning planes were discovered in more than 200 sites in and around the city center.

West German Defense Minister Gerhard Stoltenberg said the Canadian Air Force had been asked ''to establish the causes of the accident swiftly and comprehensively.''

PASADENA, TX (APRIL 18) UPI - A federal report to be released Thursday on a Phillips Petroleum Corp. plastics plant explosion is expected to trigger action on several dozen lawsuits filed after the blast.

Forty-nine suits have been filed against Phillips by injured workers and the families of those killed in the Oct. 23 explosion, said attorney Blake Tartt, a partner with Fulbright & Jaworski, which is representing Phillips.

Most of the victims' attorneys have been holding off on time-consuming evidence gathering until the Occupational Safety and Health Administration issues its report in hopes they can base many of their damage claims on the federal findings, one plaintiff's attorney said.

OSHA reportedly will find the Phillips plant had 23 safety standard violations at the time of the explosion, which killed 23 and injured 120. OSHA will not rule on the cause of the blast.

The explosion occurred while workers were cleaning hardened plastic out of a polyethylene reactor loop, where chemicals are churned to make plastic. Officials have determined a valve was open when it should have been closed. Gases that spilled out of the loop were ignited by a nearby flame, causing the explosion.

It is not known how much OSHA might fine Phillips for the violations, but one source told the Houston Chronicle that Phillips is afraid OSHA may make "some kind of big splash" as a message to other chemical makers that safety officials mean business.

Phillips has three co-defendants in most of the lawsuits pending in state district court. They are Fish Engineering & Construction, the Houston firm that was performing contract maintenance on the reactor loop when the

blast occurred; H.B. Zachry Co., the San Antonio, Texas, company that built the plant; and United Engineers & Constructors, a Philadelphia firm whose Denver subsidiary designed the reactor.

Phillips already has paid about $5.5 million to settle claims for small damage, such as broken windows or damaged cars, caused by the blast. It will be another month or two before the company's attorneys begin discussing settlements with injured workers or families of those killed.

CAIRO, EGYPT (APRIL 18) UPI - Egypt said Wednesday that the $2 billion it receives every year in U.S. aid benefits the United States as much as Cairo, and warned against diverting U.S. tax dollars earmarked for Egypt to emerging democracies in Eastern Europe or Central America.

''The United States is keen to have a strong, stable and moderate Egypt that promotes peace in the area,'' Esmat Abdel-Meguid, Egypt's foreign minister, told foreign correspondents in Cairo.

''You have to look (at U.S. aid) as a two-way traffic. ... It benefits both Egypt and the United States,'' Abdel-Meguid said.

U.S. Senate minority leader Robert Dole, R-Kan., said before his Mideast tour last week that it was reasonable to reduce aid to Egypt and Israel, the largest beneficiaries of U.S. assistance, by 5 percent and divert the funds to emerging democracies in Eastern Europe or Central America.

Dole's remarks sparked concern in Egypt, which is experiencing

difficulties servicing its $50 billion foreign debt and has come to rely heavily on U.S. aid as a safety net for its economic and military needs.

Israeli diplomats said they were optimistic the U.S. Congress would not reduce some $3 billion in annual economic and military aid to the Jewish state ''at a delicate time in the peace process.''

After talks with Egyptian leaders earlier this month, Dole said he did not anticipate any immediate cuts in U.S. aid to Egypt and Israel, but warned that the United States, with a debt of more than $3 trillion and interest payments of $180 billion a year, would ''need to examine our programs.''

Dole made it clear that Egypt was in a unique position, ''because of the strong friendship and their unique position in the world.''

''I wouldn't anticipate cutbacks, but we need to re-examine aid,'' he said.

U.S. diplomats said that, of some $2 billion that goes to Egypt in the form of U.S. aid every year, $170 million was in the form of food aid, mostly U.S. wheat, while $815 million was economic aid and most of the remainder was military aid.

Abdel-Meguid said he welcomed pro-democracy changes in Eastern Europe, but said any weakening in U.S.-Egyptian ties would not benefit the East Europeans or the Americans.

''I think we have good relations with the United States, and they continue to be good,'' he said. ''We don't envisage any cut in aid, and such an issue has not come up in discussions between our two governments.''

#90108u1322 04/18/1990 ~United Press International

CLEVELAND (APRIL 18) UPI - The use of more efficient lights is adding up to giant energy savings.

The General Electric Co. reported Wednesday that enough of their miser incandescent and fluorescent products were sold in the United States during the 1980s to save 17 million megawatt hours of electricity.

"That is enough energy to power the city of Cleveland for almost two years " said John Breen, general manager of GE's Lighting Technology Division. "This savings in energy generation reduced the amount of carbon dioxide emitted into the atmosphere by an estimated 27 billion pounds."

Breen said GE Lighting began putting an emphasis on efficient lighting products during the early 1970s, but some products were developed even earlier.

"This savings has a positive impact on the environment by cutting down on the amount of carbon dioxide, sulfur dioxide, and nitrogen dioxide emitted into the Earth's atmosphere," said Breen.

With Earth Day approaching, GE Lighting experts used data provided by the Cleveland Electric Illuminating Co. to provide various examples of energy savings.

GE said that since the introduction of its Lucalox high pressure sodium vapor lamps in 1965, about 80 million megawatt hours of electricity have been saved with the use of the lamps in roadway and factory applications. It would take the Perry nuclear power plant 7.5 years to produce that much power.

The company also said the use of Watt-Miser Quartzline lamps, a replacement for standard quartz lighting in applications like stadium, tennis court, and amusement park lighting, helped save more than 100,000 megawatt hours of energy since this product entered the market in 1983.

The use of multi-vapor lamps, introduced in 1964, in place of mercury lighting, has helped realize a savings of about 60 million megawatt hours of energy - enough power to light the Statue of Liberty for 500,000 years, GE said.

#90108u1368 04/18/1990 ~United Press International
WORCESTER, MA (APRIL 18) UPI - BTR PLC defiantly vowed Wednesday ''absolutely'' to pursue a takeover of Norton Co. despite the hurried enactment of a tough new state anti-takeover law aimed at foiling the British conglomerate's efforts.

''It doesn't diminish our determination to move forward with the offer,'' said a spokesman for the London-based firm, who declined to be quoted by

name.

The bill, which Gov. Micahel S. Dukakis signed into law during ceremonies Wednesday morning in Worcester, where Norton is the biggest employer, prohibits public companies from replacing more than one-third of their boards of directors during any annual stockholders' meeting.

The spokesman said the new law may change BTR's strategy ''to the extent that in a worst case scenario you sit on the board for a year'' until a second annual meeting allows election of a majority of board members.

And, he said, BTR ''absolutely'' is prepared to wait that long if it has to.

Norton's chairman and chief executive officer, John M. Nelson, had a different interpretation of the effect of the law.

''No longer will a Massachusetts company be vulnerable to the one-two punch of a simultaneous last-minute tender offer and proxy fight - designed to stampede its board into making a hasty decision about the company's future.''

Meanwhile, a public relations firm hired by Norton distributed copies of a letter Rep. Ronald V. Dellums, a California Democrat, sent to President George Bush asking that the president block the acquisition because of BTR's ''very disturbing and unacceptable record of activity in South Africa.''

Dellums letter said the president had the authority to stop the acquisition under a 1988 trade act.

The Massachusetts law, designed specifically to help Norton fend off the $75-a-share, $1.64-billion takeover attempt by the British conglomerate, was passed by voice votes in both houses of the state Legislature Tuesday.

''This bill ... protects good, solid Massachusetts companies from being victimized by hostile takeovers,'' Dukakis said Tuesday after it was approved.

''Norton is one of our best corporate citizens. Its hardworking, dedicated employees deserve to have their futures assured and should not fear that their livelihood is in danger of being eliminated,'' he said.

Norton, the world's largest manufacturer of abrasives and grinding wheels, is attempting to fight off the takeover bid by BTR, which recently announced it had acquired 65 percent of Norton's shares.

Norton officials and workers, and members of the Worcester legislative

delegation, say they fear that BTR will cut operations and lay off employees if the takeover attempt succeeds.

The company rejected a $1.6 billion offer by BTR last month, and the British firm promptly launched a proxy fight in an effort to replace the Norton board of directors with another that would complete the takeover deal.

The bill is an attempt to plug a loophole in an anti-takeover law approved last year, which imposes a waiting period of up to three years once a hostile takeover attempt is announced. The law did not cover proxy battles.

BTR Chairman John Cahill, who met with Dukakis and other lawmakers in Boston last month, has maintained that Norton, which employes 16,000 workers, will remain a ''free standing unit'' based in Massachusetts.

The takeover attempt was sparked when Norton announced disappointing earnings for 1989 and its stock fell from $60.50 a share to $45.75. The company is currently $122 million in debt.

Senate Commerce and Labor Committee Chairwoman Lois Pines, D-Newton, applauded the measure.

''This bill gives the company additional time to consider how it might maintain its independence. Norton is faced with the prospect of having all its incumbent directors replaced with new directors who support BTR's bid '' she said.

''When we passed legislation last year, we thought we had dealt with the latest corporate takeover efforts,'' she said. ''We hadn't adequately contemplated this particular route which BTR has adopted.''

But Ralph Whitworth, the director of the Washington-based United Shareholders Association, denounced the legislation.

''This is an unprecedented assault on the most fundamental right of shareholders, the right to elect a board of directors to represent their interests in corporate affairs,'' Whitworth said.

#90108u1371 04/18/1990 ~United Press International

WASHINGTON (APRIL 18) UPI - The top lawyer for the Department of Housing and Urban Development told Congress Wednesday that a major operator of subsidized housing - now barred from new HUD business - piled up riches while his tenants lived in squalor.

The focus of the comments was A. Bruce Rozet, who owns Housing Resources

Management Inc. and was suspended from new deals with the agency Jan. 26 pending further investigation.

The firm is the nation's second-largest operator of federally assisted low-income housing. Rozet, of Santa Monica, Calif., is involved in 331 housing projects in 40 states and Puerto Rico.

HUD General Counsel Frank Keating told a House Banking, Finance and Urban Affairs subcommittee, ''Mr. Rozet and his companies have been quick to collect property management fees, even at the expense of needed project repairs.''

He said Rozet's profits have been ''substantial and by his own admission, he's a very rich man.''

Keating added, ''Just because the investment didn't work out as planned does not mean the owner should continue to reap the benefits of ownership and control without the costs or the responsibility associated with those benefits.''

When Rozet appeared before the committee Feb. 27, he said 15 percent of his properties are troubled. But he blamed HUD for not providing enough money for needed repairs and adequate security.

Keating accused Rozet of underestimating his problems, saying Rozet is involved in more than 100 ''financially or physically troubled properties, nearly one-third of his portfolio, not 15 percent.''

HUD's inspector general is investigating Rozet's company while it is under suspension. While Rozet's current contracts may proceed, he is not permitted any new contracts during the suspension. Keating said Rozet could be banned from future dealings with the government and fined.

Elaine Johns, president of the tenants' council of Tyler House, a Washington apartment building in Rozet's portfolio, told the subcommittee of deplorable conditions.

''Although it is painful for me to say, Tyler House has become a slum,'' Johns said, citing drug sales in stairwells, lack of heat or hot water in the winter, broken elevators, roach and rodent infestation, accumulated garbage and a leaky roof.

''For years, the owners of Tyler House have received substantial monthly rent payments from tenants, in addition to generous housing subsidies. In return, the tenants received almost nothing in the way of basic services '' Johns said.

Now that HUD has taken over the property, Johns said improvements have

been made but more are needed.

Keating said HUD's suspension of Rozet's Housing Resources Management was based on the following evidence:

-The company sought HUD assistance for vacant units at Vernon Manor and Morningstar Apartments in Tulsa, Okla.

-It misused HUD reserve funds for repair work at Sursum Corda Village Apartments and Tyler House in Washington. It also submitted false statements concerning the funds.

-A false billing invoice submitted by an electrical contractor working at Morningstar and Vernon Manor.

-It misused or misappropriated security deposits at Vernon Manor and Morningstar and at Southgate Apartments in Watonga, Okla., and Cedarwood Apartments in New Orleans.

-The company failed to list its previous administrative sanctions by HUD's Oklahoma City and Washington field offices on applications for multifamily projects.

#90108u1386 04/18/1990 ~United Press International
PARIS (APRIL 18) UPI - The private automobile group Peugeot S.A. Wednesday posted a net consolidated profit of $1.8 billion in 1989, an increase of 16.4 percent over 1988, despite a strike last fall in the concern's car division.

President Jacques Calvet said the group's turnover in 1989 was $27 billion an increase of 10.5 percent over the previous year.

Calvet said the strike at Peugeot automobile plants last autumn cost the company an estimated $619 million.

#90108u1410 04/18/1990 ~United Press International
PUERTO VALLARTA, MEXICO (APRIL 18) UPI - The United States, the European Community and developing countries could iron out their differences in the troubled Uruguay Round trade liberalization talks before the end of the year, a European Community official said Wednesday. "We have problems on a number of issues, but not on all issues," said Nico Wegter, chief EC spokesman.

In an interview with United Press International, Wegter said he was

optimistic about the outcome of a meeting set for Thursday and Friday of trade and commerce ministers representing 29 key member countries belonging to the General Agreement on Tariffs and Trade, known as GATT.

The Uruguay Round, begun in 1986, faces a December deadline for resolving issues in the trade talks. "We are not coming here to have official negotiations. ... We are here to clarify our positions, to have informal talks. It is an informal meeting," Wegter said. "It is a very good occasion to clarify our positions."

The meeting, scheduled to begin formally Thursday, is considered crucial and is likely to determine if GATT governments are ready to draw up a rough agreement package by the end of July. However, "quite a lot of things have to be done" between now and then, Wegter conceded.

The EC official added that another ministerial level meeting will be held - probably Dec. 7-12 - to put the final touches on a rough draft. About 160 delegates representing 29 countries will participate in the meetings at Puerto Vallarta, a Pacific resort some 375 miles northwest of Mexico City.

The Japanese delegation, which consists of 32 officials, is one of the largest. Heading the U.S. team is trade representative Carla Hills, who arrived Tuesday.

Wegter said there are a number of disagreements between Europe and the United States, especially on issues of agriculture and textiles, but he said some sort of agreement by the end of the year is not out of the question. "There is a possibility of getting a common line before the end of year with the United States," Wegter said.

The United States has been adamant about freer policies on farm trade, demanding reductions and limits on what it calls outdated agricultural export subsidies supported by the EC.

The EC, in turn, has accused the United States of employing unilateral protectionism to improve its balance of trade. At the same time, developing countries have complained that industrialized nations ignore their demands for better access to markets. Wegter said that both the developing and developed countries seem to agree on many issues about access to better markets and investment rules.

"We would also like to see that services, intellectual property and trade-related matters are also negotiated in the Uruguay Round. They are also in the interest of developing countries," Wegter said.

#90108u1412 04/18/1990 ~United Press International

NEW YORK (APRIL 18) UPI - The head of Eastern Airlines testified in bankruptcy court Wednesday that the airline's management was forced to revise its business plans due to unexpected delays in selling off assets.

A major setback to Eastern, which filed for bankruptcy protection 13 months ago, was a delay in the sale of its Latin American routes to American Airlines, said Phil Bakes, Eastern's president and chief executive officer, at a hearing in U.S. Bankruptcy Court in New York.

Bakes took the witness stand at the hearing to consider Eastern's unsecured creditors' request for the appointment of a trustee to oust current management and find a buyer for the ailing airline. Also under consideration is Eastern's request for $80 million in proceeds from asset sales to fund operations through mid-year.

Texas Air Chairman Frank Lorenzo also was scheduled to testify at the hearing before U.S. Bankruptcy Court Judge Burton Lifland. The creditors, who are owed $980 million, say they have lost all faith in the management of Eastern and of its parent, Texas Air Corp. Negotiations to sell the Latin American routes to American began in March but faltered last summer, Bakes said.

Collapse of the talks forced Eastern to retain the routes, build up feeder flights into Miami and expand service to the Caribbean to make the best use of planes and pilots, he said.

By keeping the Latin American routes, Eastern took a different form than was portrayed in the company's first business plan, drawn up in April 1989 Bakes said.

"It would be a larger carrier, with more employees and more airplanes than had been projected, and an airline with different financial results," he said. The unsecured creditors argued in court papers that the decision to retain the Latin American routes caused a "financial bloodbath" at Eastern.

Under current management, Eastern has lost $1.2 billion, missed financial projections by hundreds of millions of dollars and revised its business plan several times since the bankruptcy filing, the creditors have argued.

Bakes said the only other options, after talks with American collapsed, would have been abandoning the routes altogether or operating them without building up flights into Miami for connecting passengers.

Eastern has since reached a tentative agreement to sell the routes to American for $350 million. The deal still requires approval by the U.S. Department of Transportation.

Eastern's first business plan assumed the sale of $1.8 billion in assets by the end of 1989, including the sale of the Latin American routes by last September, Bakes said. Those routes provided annual revenues of about $300 million, he said.

Eastern also faced a "substantial delay" in negotiating a sale of assets to Midway Airlines, Bakes said. Eastern also has sold its Northeastern shuttle between Boston, New York and Washington for $350 million to New York developer Donald Trump.

The sticking point in talks last summer was American's request that Eastern's sister carrier, Continental Airlines, drop an antitrust suit over American's computer reservations system, he said.

The two carriers have since reached a settlement regarding the antitrust suit. Eastern filed for bankruptcy protection in March 1989, five days after three of its major unions launched crippling strikes.

#90108u1418 04/18/1990 ~United Press International

BURBANK, CA (APRIL 18) UPI - Roy Disney, nephew of Walt Disney and chief of the animation department at Disney Studios, knows how to say no to drugs.

Disney has spearheaded an unprecedented cooperative effort among the major television networks and animation studios to go far beyond the words of the ''just say no'' effort against alcohol and other drugs.

He is the executive producer of ''Cartoon All-Stars to the Rescue,'' the first entertainment program ever simulcast by all major networks.

It is expected to be broadcast on nearly 1,000 stations. The half-hour program will air Saturday, April 21, at 10:30 a.m. Eastern time, on the three major networks, Fox Broadcasting, hundreds of independent stations and cable outlets and on the major networks in Canada and Mexico.

In the United States, more than 20 million children between the ages of 5 and 11 are expected to watch the show.

The half-hour program also is the first television show in which cartoon characters from different animation studios intermix. Modeled after Charles Dickens' ''A Christmas Carol,'' the program depicts the cartoon characters guiding a young boy through a tour of his past, present and future while driving home the message of the dangers of drugs.

Oscar winner George C. Scott will be the voice of Smoke, an evil apparition representing the dangers of drugs.

The characters include Alf, Bugs Bunny, The Chipmunks, Daffy Duck, Garfield, Slimer, The Smurfs and Michaelangelo, one of the Teenage Mutant Ninja Turtles. Disney donated Huey, Dewey and Louie, three Muppet Baby characters, Winnie the Pooh and Tigger.

Disney, in an interview, said the level of cooperation between the major animation studios was impressive because of the traditional reluctance those studios have about releasing their characters.

''Letting someone use one of our characters is not something we do lightly '' he said. Disney receives - and almost always turns down - a stream of requests to use Disney characters to promote products or causes outside the realm of the Walt Disney Co.

Disney decided several months ago to let eight Disney characters perform in the special and agreed to serve as executive producer.

''There was some thought about using Mickey Mouse and Goofy, but we decided that we should go with younger-type characters you'd expect to see on Saturday morning,'' Disney said.

The Academy of Television Arts & Sciences initially proposed the idea as part of its drug education program. The show will be re-broadcast on a number of outlets in the following week.

McDonald's, which is funding the special, has been giving out free viewing guides for parents and children at its 11,000 restaurants. After the show, McDonald's and Buena Vista Home Video plan to distribute 350,000 free videos of the show to elementary schools, community groups, libraries and to video stores for free rental.

The studios are allowing their characters to be used free of charge and the voice actors who performed worked for minimum scale and waived residual fees.

''There was really no hesitation when the Academy approached me, because I think this particular problem is very adaptable to this kind of approach '' Disney said. ''I think it's important that we try to get this message to children at as early an age as possible.''

Disney said executives from some of the other studios were concerned about how their characters would be handled. ''Every producer asked right off the bat something like, 'My character is not going to be smoking dope, is he?' But it's not like that at all.''

''My job as executive producer has largely been a question of coordinating a huge number of disparate elements and keeping feathers from being

ruffled,'' he said. ''But considering how tough that could be, it's been an incredibly easy job since everyone feels it's such a good idea.''

This television program is not the first time Disney characters intermixed with those from other studios; they had previously done so in the 1988 hit film ''Who Framed Roger Rabbit?''

''I assure that this is not the start of a trend of using all the different stduios' characters at the same time,'' Disney said. ''I think both projects were very unique.''

''On the other hand, anything's possible in Hollywood.''

#90108u1434 04/18/1990 ~United Press International

GDANSK, POLAND (APRIL 18) UPI - Nine years ago, when Solidarity leader Lech Walesa opened the first congress of the first independent labor union in the East bloc, Soviet and other communist leaders watched in fear that the ''Polish disease'' would spread.

The annual Solidarity congress that opens Thursday in a free Poland will mark how far the labor union turned political organization has come, but it will also be a reminder of the widespread problems it faces.

Three months after that first congress, Gen. Wojciech Jaruzelski, now Poland's president, imposed martial law, banned the union and sent thousands of its activists, including Walesa, to prison.

But Solidarity was strong and determined, boasting almost 10 million members when it was formed after a nationwide strike in 1980.

A decade later, now that it has emerged from exile to control the Polish government and become a beacon to the rest of Eastern Europe, Solidarity has only 2 million members and seems less determined.

''The union is very weak and its future is unclear,'' said Zbigniew Bujak, a former underground activist.

During a recent panel discussion on Solidarity at Warsaw University, Bujak said the weakness stems from that fact that hundreds of its best activists are now deputies or senators in the Polish Parliament or are officials in the government, which Solidarity took over last August.

But another activist, Maciej Jankowski, contends Solidarity's weaknesses come from within the organization.

Jankowski said the union has spread itself too thin by embracing too many

political issues, neglecting its union activity in the process of becoming the opposition to the Communist Party.

''The union took care of poetry and police, and all that weakened the union,'' he said.

Many political analysts have come to the same conclusions.

The major issues facing the 1990 congress will undoubtedly be the same issues that have dogged Solidarity since its birth - whether it should concentrate on being a trade union, or a national political movement.

''The Solidarity trade union so far has not found its place in the complicated landscape of the Polish economy,'' the government paper Rzeczpospolita wrote on the eve of the congress.

''Under the new economic circumstances, people need the union more and more,'' it said. ''People have no clear view of what their union is striving for.''

Walesa, whose popularity has slid by 37 percent since last November, is aware of the difficult task he will face when he tries to unite the congress behind him this week.

The Nobel Peace Prize winner, who recently announced he is running for union chairman and president of the country, has been criticized by Poles angry with the Solidarity government's tough economic measures.

''You promised us better living conditions and it is worse,'' said a woman textile worker during a recent television program with Walesa, referring to the tough anti-inflation measures taken Jan. 1 by the new Solidarity government.

"Why are there so many unemployed?" asked another worker on the same program.

''Either they (the delegates) will kick me out or they will try to limit my powers,'' Walesa told workers at the Elblag mechanical plant in northern Poland last week.

In an attempt to raise his own prestige, Walesa has sharply criticized Jaruzelski in the past week.

But his presidential bid does not seem to have caught the popular fire he expected, said aides, who also indicated Walesa was taken aback by the criticism on the television program.

Walesa will vie for the job of union chief with four other candidates, but

none of them seems to be a match for the long time Solidarity leader.

''I am not afraid of anybody. I am only afraid of God,'' Walesa said recently about his competition.

The Solidarity congress, which will be held over six days with 487 delegates, will be addressed by AFL-CIO President Lane Kirkland, who was banned by communist authorities from attending the first congress.

''The American people, including unionists, welcome the birth of democracy and liberty in Poland,'' Kirkland said on arriving in the country.

PESHAWAR, PAKISTAN (APRIL 18) UPI - A bomb exploded in a town near the Afghan border Wednesday, killing three people and wounding 28, officials and hospital sources said.

Officials said the device was hidden in a suitcase left near a bus stop in Parachinar, 70 miles southwest of Peshawar city and 12 miles from the Afghan border. They said it exploded around 1 p.m.

The blast damaged several shops and cars. Hospital sources said three people, including a 12-year-old boy, were killed and 28 wounded, 10 of them critically.

No one claimed responsibility for the explosion and officials would not speculate on who may have been responsible.

But officials have blamed previous bomb blasts that have killed scores of people during the past several years in Peshawar and surrounding Northwest Frontier Province on agents of the communist government in Kabul attempting to destabilize Pakistan for its support for Afghan guerrillas.

Wednesday's incident, however, follows a lull of several months in such attacks.

#90108u1463 04/18/1990 ~United Press International
WASHINGTON (APRIL 18) UPI - The United States and NATO, following a conventional arms pact, should be able to halt a Soviet attack on Europe without having to rely on short-range nuclear weapons, a Pentagon report said Wednesday.

The newly released unclassified version of the ''1990 Joint Military Net Assessment'' is a strange blend of the old and new views of the Soviet threat by U.S. military leaders.

For example, the report notes the Soviet Union's Warsaw Pact allies can no longer be counted on to join the Soviets in an attack, but it assumes in its assessment that Warsaw Pact ''forces are intact and politically reliable.''

This may be due to the timing. The report's assessments were made at the end of 1989, as democratic reforms in Eastern Europe were beginning to take place, while its summary refers to the changes and offers an optimistic view.

The classified version of the annual report was sent to Congress by Defense Secretary Dick Cheney March 6. It was prepared by Gen. Colin Powell, chairman of the Joint Chiefs of Staff, the Joint Chiefs, the U.S. military commands and the intelligence community.

''Even if it assumed that the Soviets can rely on NSWP (non-Soviet Warsaw Pact) military forces for the present, fiscal year 1990 U.S. and allied forces are sufficient in a conventional conflict to prosecute all elements of the national military strategy, except the successful forward defense of Central Europe,'' the report said.

''NATO forces could mount a strong defense and exact high attrition, but not without loss of territory - primarily because WP (Warsaw Pact) forces continue to maintain a numerical superiority,'' it added.

Once the U.S.-Soviet conventional force reduction pact currently under negotiation is implemented, the report said, ''the potential for termination of such a conflict on terms favorable to the United States is much improved.''

''The probability that NATO would need to resort to the use of non-strategic nuclear forces is assessed to decrease with elimination of conventional force asymmetries,'' it added.

At the same time, however, the Pentagon said no one should look for the withdrawal of short-range nuclear weapons from Europe.

''Even in an environment of conventional parity, NATO's nuclear forces will continue to contribute to deterring conventional attack and will serve as a fundamental component of U.S. deterrence of Soviet use of nuclear weapons,'' the report said.

U.S. officials hope to obtain a conventional arms agreement in Vienna this year to reduce the 325,000 U.S. and 600,000 Soviet troops to 195,000 each in Central Europe, with the United States allowed to keep an additional 30,000 in other sections of Europe.

The Pentagon report said that, because of the dissolution of the Warsaw Pact through the reforms in Eastern Europe, the Soviets would have to consider conducting an attack on the West by themselves.

''This said, the probability of a global conventional war with the Soviets is assessed as low,'' it said.

#90108u1465 04/18/1990 ~United Press International

LONDON (APRIL 18) UPI - The last seven inmates occupying Strangeways Prison defied authorities for the 18th day Wednesday, one of them taunting firefighters by taking a shower beneath the spray of water cannons deployed to try to make their holdout miserable.

An official from the Home Office, which oversees the nation's 125 penal

institutions, said there have been no negotiations since Monday with the rebels remaining inside the wrecked facility in Manchester, 200 miles northwest of London.

''Negotiations have not been restarted,'' she said. ''Our negotiating team are standing by, but the prisoners are not wanting to talk with them. Obviously, we cannot negotiate if there is nobody to speak with.''

Strangeways governor Brendan O'Friel has refused to use force to dislodge the last inmates occupying the wrecked prison, occupied since April 1 in an uprising originally sparked by overcrowding and poor conditions.

Authorities have been using intimidation tactics to compel the gradual surrender of the inmates, who have been able to resist because they have stockpiled food behind their barricades inside a central building, from which they can control access to the jail's five main wings.

Sirens, blaring music, firecrackers and swooping helicopters allhave been used to try and wear down the holdouts, along with firing jets of water through smashed windows to try and make their sleeping areas unusable.

Firefighters again turned on the hoses when three prisoners emerged onto the roof and began breaking down a wall to gain improved access to the area, where they can be seen by television cameras.

One prisoner minutes later came out on the roof dressed in his underpants, laughing as he soaped himself and took a shower in a display of contempt for the tactic.

When the water stopped, another inmate came out wearing a prison officer's hat. He sipped a cup of hot tea and ate food, apparently to show they still had provisions inside the occupied areas, which are reported to be defended by flammable barricades, spears and missiles.

Three prisoners surrendered on Sunday because of food poisoning, but the Home Office would not estimate how much food remained.

''The governor has made it clear that he wants to bring this to a peaceful conclusion,'' the official said.

#90108u1471 04/18/1990 ~United Press International

(APRIL 18) UPI - The Commerce Department says the nation's merchandise trade deficit plunged by 30-point-four percent in February. The six-point-four-BILLION deficit was the lowest for any month since December 1983. Imports fell by seven-point-six percent in February to 38-point-one-BILLION from 41-point-three-BILLION in January. There was

marked one-point-two-BILLION-dollar decline in imports of oil and petroleum products. There was also a decline in computer imports in February.

NASA says a test-firing this morning was ''a good one.'' Space agency engineers successfully tested a new hydraulic power unit aboard the shuttle Discovery. The good test will allow NASA officials to evaluate whether the shuttle can be launched Tuesday, instead of Wednesday. Discovery will carry the Hubble Telescope into space. Agency insiders say managers are leaning toward advancing the flight one day, if possible.

Lebanon's Christian military leader says an explosion at his headquarters was caused by a shell confiscated from rival Christian forces. A statement from General Michel Aoun says the shell was being transported when it exploded at his Strike Force base near Beirut. Police say three soldiers were killed and dozens of others were wounded by the explosion. Aoun says two soldiers were killed.

Tens of thousands of New York City residents are having a tough time getting to work and school this morning. A water main burst beneath Manhattan's Upper West Side... pouring water into streets and tunnels. The water halted subway service on two lines beneath Central Park West. Ian Michaels, a spokesman for the city Department of Environmental Protection, says the water main dates back to 1893.

-30- 1877

#90108u1478 04/18/1990 ~United Press International

(APRIL 18) UPI - Jury selection is set to begin in Boston today in the trial of a Christian Science couple charged with manslaughter in their son's death. The trial judge was ordered by a higher court to question jurors' religious views in public. David and Ginger Twitchell are accused of allowing their son to die by denying him medical help in favor of their faith's spiritual healing.

A San Francisco jury has ordered the University of California Medical Center to pay one-half-Million dollars to a family of Jehovah's Witnesses. James Lunsford and his wife sued because the medical center gave their son a blood transfusion... against their wishes. An attorney for the family says it's the first time a suit based on religious objections to blood transfusions has been successful in a U-S court.

The Montana Health Department says it will seek a court order to stop bomb shelter construction near the Yellowstone National Park. The state wants work halted on the Church Universal and Triumphant's 756-person fall-out shelter complex until an environmental impact statement is updated. 31-thousand gallons of fuel leaked from the shelter's tanks last week.

A smoker who allegedly thought his nicotine fit constituted an emergency could go to prison. Milton Trautman called the 911 emergency number in Madison, Wisconsin, to have cigarettes delivered. He faces a maximum sentence of nine months in jail and a 10-thousand-dollar fine if convicted of the crime of making a false alarm. Trautman was released on a signature bond pending trial... with the condition he never contact the emergency center unless he has an emergency.

#90108u1481 04/18/1990 ~United Press International

BOGOTA, COLOMBIA (APRIL 18) UPI - Colombia is investigating a cocaine cartel arms deal that brought Israeli-made arms from a pair of Caribbean islands into the hands of private drug armies in jungles outside Bogota, the defense ministry said.

The guns were seized in January and February on ranches owned by slain drug czar Jose Rodriguez Gacha, who used them to arm private death squads believed to have committed dozens of rural massacres and selective killings in recent years.

When questioned by Colombia about the arms, Israel said the weapons had been sold to the islands of Antigua and Barbuda in the beginning of 1989, the Defense Ministry said in a communique published Wednesday in Bogota newspapers.

''On April 3 the Colombian mission to the Organization of American States informed the government of Antigua and Barbuda of its rejection and protest against this act, and demanded an exhaustive investigation,'' Defense Minister Gen. Oscar Botero said in the communique.

Antigua and Barbuda denied selling the guns to the drug lords, and could not immediately provide information on how the weapons ended up in Colombia.

''The government of Antigua and Barbuda established a special committee ... to investigate why the arms in question were sent to Colombia,'' the communique read.

''The Colombian government has been receiving information about the development of the investigation, and is maintaining permanent contacts with the governments of Israel, Antigua and Barbuda in order to achieve complete clarity about these actions,'' Botero said.

The arms, found in two raids earlier this year on ranches west of the capital, included Galil machine guns, submachine guns, M-72 rocket launchers and various other weapons.

The ranch complex was named Fredy 1, after Rodriguez Gacha's son who was shot to death by police alongside his father.

Rodriguez Gacha, considered the military chief of the powerful Medellin cocaine cartel, was gunned down in December when he tried to shoot his way out of a police ambush in northern Colombia.

Rodriguez Gacha allegedly hired Israeli and British mercenaries to train his private armies, who then turned their guns on leftist activists and opponents to the cocaine empire.

Rodriguez Gacha is the only head of the powerful drug syndicate trapped by police since the administration of President Virgilio Barco launched an anti-cartel offensive last August. Medellin drug lord Pablo Escobar is still at large.

Authorities upped the ante on Escobar this week by doubling the price on his head to more than $400,000. Escobar is the head of the Medellin cartel and is wanted for extradition to the United States on drug charges.

Police also said some of the 24 bodies uncovered in a common grave in northwest Colombia were identified as some of the more than 40 leftist peasants kidnapped by a right-wing death squad in January.

Six of the decomposed bodies were identified by relatives by clothing as some of the abducted peasant supporters of the leftist Patriotic Union party, said Manuel Bulla Duenas, chief of the Cordoba state judicial police.

The common graves were discovered last week on a ranch owned by Fidel Castano, an alleged paramilitary leader who ran death squads for Rodriguez Gacha.

Castano, who denies the charges, was blamed by the Patriotic Union for the March 22 assassination of the party's presidential candidate, Bernardo Jaramillo, who was shot to death at the Bogota airport.

The Patriotic Union reported it has lost more than 1,000 members and sympathizers to right-wing death squads with links to the drug traffickers and the army.

(APRIL 18) UPI - TODAY'S PEOPLE

TAYLOR'S SUBSTITUTE: Director Mike Nichols agreed to pinch-hit for the ailing Elizabeth Taylor at Wednesday night's Art Against AIDS fund-raiser

in Chicago. Taylor, 58, is hospitalized in Santa Monica, Calif., with pneumonia, a sinus problem and a fever and issued a statement to quash the reports that she has AIDS. ''I would like to dispel the plethora of rumors that have been circulating that I have an AIDS-related condition,'' she said. ''I feel it is important that people should not be afraid to be tested for AIDS.''

GALWAY'S SUBSTITUTE: An intestinal problem forced flutist James Galway to cancel his opera debut this week. Galway was to have been part of Rossini's ''La Gazza Ladra'' (''The Thieving Magpie'') with the Opera Company of Philadelphia but came down with diverticulitis and will be hospitalized for several days. Galway was to play the part of the magpie in Monday's production but his wife, Jeanne Galway, who had rehearsed to play the role in Friday's production, stepped in for him. Galway also was forced to withdraw from a special project with the Tokyo String Quartet in Los Angeles because of the illness.

ELTON AND RYAN: Ryan White's mother says she'll never forget Elton John for the support he gave her and Ryan in the boy's final days before dying of AIDS. ''They were very close,'' Jeanne White said in an interview on ABC's ''Good Morning America'' Wednesday. ''I don't know I would have managed without him really. That man, he shed as many tears over Ryan as I did - a truly wonderful person. He was always there when we needed him. I couldn't have done it without him.'' White also talked about finishing the AIDS education book for children that Ryan started.

EARTHLY MATTERS: There are two new songs appropriate for Earth Day. One is Alabama's ''Pass It on Down,'' which was inspired by the pollution in bassist Teddy Gentry's favorite fishing hole. ''The song came about not because of saying, 'Hey, we're going to sit down and write an ecology song ' but out of an experience,'' Gentry said. ''Me and my son were fishing one day in the river. A friend of mine told me, 'You know you can't eat any of the fish that feed off the bottom there.' And it kind of hit me real strong because I'd lived there all my life'' ... Saxophonist Paul Winter, who has been a musical apostle for the environment for the past two decades, has a new release, ''Earth, Voices of a Planet,'' that was recorded as a 20th anniversary tribute to Earth Day. The songs were inspired by each of the seven continents and the musicians are accompanied by the rumbles of African elephants, the calls of Weddell seals, the songs of an Amazonian wren, the nurturing sounds of the killer whale.

CASE NOT CLOSED: The author of a new book about Boston's bizarre Stuart case says the mystery is far from being resolved. Ken Englade says his book ''Murder in Boston'' raises questions that local reporters and authorities have not answered. Authorities now believe Charles Stuart killed his wife, Carol, last October - after first blaming the shooting on a black man - and wounded himself to make his story look good. They say his guilt then led him to kill himself in a leap from a bridge a few weeks

later. That's not good enough for Englade. ''I think the attitude in Boston right now is that Chuck did it - Chuck shot Carol and he jumped off the bridge - and what I'm trying to say is that is not necessarily so,'' he said. ''I definitely think he's involved but I'm not sure he's the guy who pulled the trigger.

#90108u1517 04/18/1990 ~United Press International

PARIS (APRIL 18) UPI - Conservative leader Valery Giscard d'Estaing Wednesday urged President Francois Mitterrand to negotiate an enhanced role in NATO for France when he meets President Bush in Florida Thursday.

Bush and Mitterrand are scheduled to meet at a resort on the island of Key Largo for a day of talks on the future of the Atlantic alliance and other topics. Differences between the two leaders over how NATO should adapt to the crumbling Soviet empire in Eastern Europe are expected to dominate the meeting.

Mitterrand was scheduled to arrive at Key Largo late Thursday morning for an informal chat with Bush, to be followed by lunch and more talks in the afternoon. A joint news conference by the two leaders will conclude the visit, French officials said.

A senior official at the Elysee Palace, France's foreign ministry, said ''there is no serious problem'' between Paris and Washington over how NATO should change as Soviet influence in Europe declines.

But U.S. officials privately have expressed irritation recently at France's emphasis on the increased role of the European Community and the 35-member Conference on Security and Cooperation in Europe in European security matters, which Washington believes should fall under NATO's control.

''There simply is a rather hazy situation,'' the French official said. ''The meeting should allow both sides to see each others' projects clearly.''

Former president Giscard called on Mitterrand to use the talks to reverse France's 1966 withdrawal from the integrated military command of NATO. Armed with an independent nuclear deterrent, Paris remains a maverick member of the alliance.

''France must be the promoter of the redrafting of the Atlantic Pact into a Euro-Atlantic pact, where she would accept a greater implication for herself,'' Giscard told Le Monde newspaper.

''France cannot be favorable to a new pact and at the same time invoke the

motives that keep us at a distance from an alliance piloted by the United States,'' said Giscard, the head of the center-right Union of French Democracy federation.

France could forge a new role in NATO ''on condition that there is a common Franco-German approach,'' Giscard said. This would mean revising ''our concepts concerning nuclear arms and our pre-strategic arms program.''

The Elysee official said differences could arise in Florida if Bush presents a plan for reinforcing NATO ''that goes too far.''

''France always has rejected NATO becoming an organism for (concerted action) on questions affecting the entire world. If the Americans were truly demanding on this, one would have a problem. One could not accept (NATO) in this form,'' the Mitterrand aide said.

The Elysee official said he doubted Bush would endorse recent British calls for France to be re-integrated fully within NATO.

''The Americans never have asked for anything officially on this. During private contacts, they even distanced themselves from the English campaign '' the official said.

In an interview with the Times of London published Tuesday, Bush rejected a proposal floated in some French defense circles that would place a French commander at the head of a new NATO integrated command.

Elysee spokesman Hubert Vedrine said earlier this week Paris and Washington agree on the need for a re-united Germany to be integrated into NATO while taking ''the necessary precautions that this not be aggressive toward the Soviet Union.''

As well as the future of NATO, the talks are expected to range over the situation in the Baltic states and developments in South Africa, French officials said.

Bush and Mitterrand will meet in a pair of oceanside homes owned by Republican Party financiers Richard Farmer and Carl Lindner in a posh private resort on Key Largo.

#90108u1530 04/18/1990 ~United Press International

BEIRUT, LEBANON (APRIL 18) UPI - A shell struck a school bus Wednesday during fighting between rival Christian forces in east Beirut, sparking a fire that killed 15 passengers - most of them students on their way home from class, witnesses and police said.

Three hours earlier, the war-battered Christian enclave was rocked by an huge explosion at the headquarters of dissident military leader Michel Aoun. The general's forces said a confiscated shell exploded in transit, killing three soldiers.

The bus was struck by a shell apparently fired by rival Christian militiamen at a street patrolled by Aoun's troops in east Beirut, police and witnesses said. Police said the shell hit the bus' gasoline tank, engulfing the 20-seat vehicle in flames.

Police and witnesses said at least 11 of the 15 passengers who burned to death were young students, the oldest in their teens.

''That was horrible. Rescuers pulled bones and black pieces of flesh from the bus that turned into a black metal skeleton,'' a cameraman told United Press International.

''It was one of the ugliest things I have ever seen since the start of the (Lebanese) civil war,'' said the veteran cameraman, who asked not be named.

Police said at least four other passengers were hospitalized with burns, including three women teachers taken to Sacre Coeur Hospital.

''I survived by a miracle,'' a 30-year-old teacher identified only as Teresa told reporters at the hospital. ''A roaring fire suddenly erupted and quickly spread aboard the bus. I slipped through a window near my seat.''

Weeping women rushed to the hospital in the suburban district of Hazmiyeh, inquiring about their children and other relatives.

The bus was carrying students returning home in the Christian region from school in west Beirut when the vehicle was caught in fighting between rival Christian forces, police said.

Aoun's radio station accused Samir Geagea's militia gunners of hitting the bus ''and committing the massacre,'' but the militia denied the charge and initially claimed a car bomb was responsible.

Three hours earlier, a huge explosion occurred at Aoun's principal barracks in the hillside district of Yarze, 5 miles southeast of Beirut, collapsing the two-story building, killing three soldiers and wounding others, police said.

Yarze is near the Presidential Palace of Baabda, where Aoun has been since he was appointed head of a military cabinet in September 1989.

Police said three officers were among the wounded, including the commander of Aoun's 700-man Strike Force, Capt. Antoine Abi Samra.

Abi Samra had led major battles against Geagea's gunmen in the bloody struggle for control of the 310-square-mile Christian enclave that broke out Jan. 31, killing at least 922 people and wounding 3,010 others.

Analysts speculated sabotage was behind the explosion as part of the warfare between Aoun and Geagea. A statement from Aoun's forces said the blast occurred when a shell confiscated from Geagea's militia exploded in transit.

Aoun, who commands 15,000 regular troops, has vowed to crush the 10,000-member militia to establish himself as the sole strongman in the Christian enclave.

In west Beirut, rival Amal Shiite militiamen and pro-Iranian militants engaged in sporadic street fighting and killed one person, bringing the death toll of two days of inter-Shiite violence to 12 dead and 39 wounded.

At least 1,000 people have died in two years of violent warfare between Amal and Hezbollah for control of Lebanon's 1.5 million Shiites.

PHILADELPHIA (APRIL 18) UPI - Consolidated Rail Corp. reported Wednesday first-quarter earnings of $25 million, or 43 cents a share, a 58 percent drop from earnings of $60 million, or 88 cents a share, posted in the 1989 quarter. Revenues totaled $823 million in the latest quarter, down from $872 million in the same period last year.

Chairman, President and Chief Executive Officer James Hagen attributed Conrail's slackening financial performance to flat freight volumes, higher interest rates on money borrowed to buy back outstanding stock and unspecified one-time expenses.

#90108u1551 04/18/1990 ~United Press International

WASHINGTON (APRIL 18) UPI - Backstairs at the White House:

White House press secretary Marlin Fitzwater must feel like a pariah sometimes in his own special stronghold. The problem is he smokes cigars.

His former secretary banished him from his office area whenever he wanted to relax and smoke a cigar.

Much to the delight of reporters and cameramen, he used to retreat to the press center to have a puff or two. On those occasions, he would put his feet up and survey the scene and reporters could pick up a morsel or two of information.

But, alas, a vigilant reporter, who has crusaded against smoking in the press room, gave him his marching orders. So Fitzwater no longer wanders down to smoke and chat.

He has been forced to go outside in the West Wing area, rain or shine. That's the way the world is for even one of the most powerful men in the White House.

For reporters, it could be a health boon, but it is a loss of access that is precious when a press spokesman is operating on 10 cylinders and rushing from meeting to meeting as they do in the Bush White House.

The president isn't afraid of reporters. It is a rare chief executive who will wander into Fitzwater's office where there could be reporters hanging out in the late afternoon or early evening. He also often pokes his head in the press room on his way back to the mansion for dinner after a day in the Oval Office.

His departure is usually a signal that the official day is done and the press can wrap up. But often it means that he is going to pop into the family quarters for a brief time and then head for his favorite Chinese restaurant.

So off the motorcade goes to Falls Church, Va., to the Peking Gourmet restaurant, where the president indulges to his heart's content.

Reporters also can order their favorite dishes and at the same time keep an eye on the president.

At least half the White House press office staff will remain in Dallas on May 12 when President Bush and his entourage move on to Houston for other events.

The staff will remain in Dallas to attend the wedding of assistant press secretary Jay Allison of Midland, Texas, and Melissa Compton of the White House Media Office, who used to work in the press office.

Allison's father, James Allison, used to work for Bush in the oil business in Midland and they are old friends. But it appears the President and Mrs.

Bush, who have been invited to the wedding, have other commitments.

Aides said that the Bushes also have a policy against attending weddings because they might be disruptive to others in view of the security measures that have to be taken. Some presidential families also have refrained from attending weddings because they do not want to steal the show from the principals.

The wedding will take place in the Episcopal Church of Incarnation. The couple will have their honeymoon in the British Virgin Islands.

Bad weather seems to follow the president at summit meetings abroad. No one who was there will forget the hurricane-size storm that prevailed during the summit meeting with Soviet leader Mikhail Gorbachev on Malta last December.

The summit meeting on Friday, Apr. 13, with British Prime Minister Margaret Thatcher in Bermuda was marked by rainy weather with 35 mph winds.

But the weather does not deter Bush. He played 18 holes of golf in such weather and loved it with the wind and the rain in his face. His golfing pals, including Secretary of State James Baker and White House chief of staff John Sununu, did not seem as happy to be there, to put it mildly.

#90108u1559 04/18/1990 ~United Press International

KUALA LUMPUR, MALAYSIA (APRIL 18) UPI - More than 5,600 Vietnamese boat people have been denied entry to Malaysia and growing U.S. concern over Malaysia's policy could affect trade and tourist agreements, organizations representing refugees said Wednesday.

Court Robinson from the U.S. Committee for Refugees and Lionel Rosenblatt representing Refugees International said that since May 1989 a total of 5,661 boat people had arrived in Indonesia claiming they had been towed away from Malaysia despite the government's denials it was practicing a push-off policy.

''Only Indonesia's good behavior in accepting the refugees has averted a tragedy and a huge loss of life,'' Rosenblatt said.

Boat people arriving on Galang island, Indonesia's refugee facility, claim they had been towed out to sea for up to 36 hours by naval and marine police craft after being refused permission to land in Malaysia.

''Fast towing is being employed,'' Rosenblatt said ''This is dangerous and

their are reports of boat people screaming in terror as they were towed through high seas.''

Some boat people said they had been hidden away in forest camps on the Malaysian mainland before being herded into boats and towed back out to sea.

''We believe there are at least three detention areas the authorities use '' Robinson said.

One group claimed they were kept in a forest camp for three months before being towed out towards the Indonesian island. Even refugees who scuttle their boats are not spared but are detained before being regrouped and then sent on their way.

Tran Quoc Thanh was one of 159 boat people rescued by a commercial ship on Feb. 8, and landed on the Malaysian shore.

''The Malaysian government took us into a forest and left us there for 10 days,'' he wrote in a letter to his rescuer.

Tran described how his group was given a new boat which was towed out to sea on Feb. 19, by a navy ship.

''They showed us the direction for Galang island and we arrived there on Feb. 22,'' he added.

Details of the boat people's plight came to light following protests from the U.S. administration and the United Nations High Commissioner for Refugees who expressed grave concern over Malaysia's policy.

The United States has ''vigorously protested the denial of first asylum to Vietnamese at all appropriate levels of the Malaysian government,'' U.S. State Department spokeswoman Margaret Tutwiler said Tuesday.

Malaysia's Prime Minister Mahathir Mohamad denied his country has begun towing Vietnamese boat people away from its waters and attacked the designated resettlement countries for not fulfilling their promises to offer a permanent home for the boat people.

Robertson warned pressure was mounting in the U.S. over Malaysia's refusal to offer first asylum.

''If this is not resolved through diplomatic channels,'' he warned, ''groups will have to take to pocketbook pressure.''

Rosenblatt said he had warned Malaysian officials that in California, which has a population of more than 700,000 Vietnamese boat people,

congressmen were already contemplating trade embargos against Malaysia.

''We talked about the growing concern which could spill over to trade and the tourist industry unless first asylum is restored,'' he said.

#90108u1574 04/18/1990 ~United Press International

PORTLAND, OR (APRIL 18) UPI - Environmentalists welcomed but the wood products industry challenged a new General Accounting Office study that concludes one in four timber jobs nationwide will be eliminated over the next 50 years as mills modernize.

The study, issued Tuesday and based on U.S. Forest Service statistics, shows that relatively newer Western mills will experience fewer job losses than the rest of the country.

The report predicts there will be 13 percent fewer timber jobs on the West Coast by the year 2040. Nationally, the study predicts automation will contribute to a 27 percent drop in timber jobs in the same period, despite a 55 percent jump in the amount of timber harvested.

The study concluded that timber industry employment will "decline considerably over the period because of labor productivity gains" stemming from mill renovations.

The study did not take into account a new proposal by a panel of federal scientists to further restrict timber cutting to help preserve the northern spotted owl, which lives in the Northwest's older forests.

Environmental groups greeted the study as evidence to support their argument that timber industry employment is shrinking because of automation and that more trees should be saved for their recreational value. "That's consistent with what we see as the long-term trend," said Andy Kerr, conservation director of the Oregon Natural Resources Council.

But Jim Geisinger, president of the Northwest Forestry Association, disputed the study's results. "I would question the accuracy of job projections 50 years out," said Geisinger, whose group predicts a loss of thousands of timber jobs due to cuts in timber harvests from national forests.

"The preservation community loves to say jobs will be lost regardless of timber supply. But that's a red herring," Geisinger said. "If you don't stay competitive with other regions, you won't have any industry."

The GAO study was conducted in response to questions from Rep. Sander Levin, D-Mich., who opposes a proposed capital-gains tax cut for the

timber industry.

#90108u1578 04/18/1990 ~United Press International
KATMANDU, NEPAL (APRIL 18) UPI - Opposition groups completed Cabinet nominations Wednesday for the nation's first multi-party government in nearly 30 years and sent them to King Birendra for approval, opposition officials said.

''I see no hitch,'' said P.L. Singh, an aide to the leadership of the opposition Nepali Congress Party who delivered the list of nominees to the palace. ''There is no question of a rejection of the proposed government.''

Prime Minister-designate Krishna Prasad Bhattarai, who is acting president of the Nepali Congress Party, was among the proposed Cabinet members. Bhattarai, 65, said he was assigned the crucial foreign and defense portfolios, as well as royal palace affairs.

Three other members of the center-left Nepali Congress were among those nominated to the 11-member Cabinet, along with three members of the United Left Front communist alliance and two independents.

As previously agreed, the two remaining Cabinet posts were to be named by the king and were expected to become known later Wednesday in the Himalayan kingdom of nearly 19 million people, opposition sources said.

The Cabinet, whose members are to divide up 22 ministries, is expected to be installed Thursday.

Asked if the provisional government would work, United Left Front leader Shana Pradhan - who was among the Cabinet nominees and was expected to handle the ministries of commerce and industry - said, ''I hope it will be workable. We are going to work and it will work.''

The multi-party government was the fruit of weeks of massive pro-democracy demonstrations that began Feb. 18, paralyzing the capital and leaving at least 53 people dead in crackdowns by troops and police.

Wednesday, Home Minister Nain Bahadur Swanr, who supervises the police force, gave a statement before a three-member panel investigating the deaths and damage during the protests. The official announcement on Swanr's statement did not reveal the contents, saying it would ''not be appropriate.''

The committee began investigating this week and is to report in a month on the government's handling of the protests that led the king earlier this week to disband the 29-year-old partyless system forbidding political

opposition.

The monarch also authorized opposition parties to form an interim government pending elections, which Bhattarai has promised within a year.

A list of the proposed Cabinet members was sent to the royal palace Wednesday for Birendra's approval after a three-hour meeting at the home of Ganesh Man Singh, 75, supreme leader of the Nepali Congress Party.

The king's approval was not expected until Thursday.

Prime Minister Lokendra Bahadur Chand, who is presiding over the transfer of power to the interim government, said in a statement to Nepal's official news agency he and his ''political colleagues'' would provide ''full cooperation for the right and constructive policies of the new government for consolidating democracy and nation-building.''

Chand, appointed early this month to defuse the democracy movement and whose resignation became a key opposition demand, also said he regretted the ''unfortunate and irreparable'' loss of lives and property during the unrest.

Aside from Bhattarai, other Congress party members gaining Cabinet posts were onetime political prisoner Yog Prasad Upadhaya, Mahendra Narayan Nidhi, a deputy speaker of Parliament dissolved in 1960, and a youth leader from Katmandu, Marshal Julum Sakya.

A Congress party source said Upadhaya, assistant secretary-general of the Nepali Congress Party, was nominated for the important home ministry job, which oversees the police.

The nominees from the communist United Left Front were Pradhan as well as Nilambar Acharya and Jalnath Khanal.

Two independents selected by the NCP and the leftist front were Devendra Raj Pandey, a U.S.-trained economist and former finance secretary, and Mathura Prasad Shrestha, a human rights leader and professor of medicine at the teaching hospital in Katmandu, Congress Party sources said.

A Congress party source also said Pandey would take the important finance ministry. Pandey, acting president of the Human Rights Organization of Nepal, played a major role in the pro-democracy movement.

The Nepali Congress Party held power for 18 months after being elected to office in Nepal's first general elections in 1959, but King Mahendra, father of the present king, dismissed the legislature in December 1960 and introduced the partyless panchayat form of government dominated by the royal palace.

#90108u1587 04/18/1990 ~United Press International
NEW YORK (APRIL 18) UPI - Chemical Bank has agreed to purchase the Manhattan branch of the Greater New York Savings Bank, at Broadway and 79th Street on the Upper West Side, the banks announced Wednesday.

Acquisition of the branch, with deposits of $118 million, reflects Chemical's strategy of aggressive expansion in retail banking, a bank executive said. Chemical said its consumer banking group enjoyed record profits in 1989, and had the fastest growth of deposits and market share of any New York City bank.

Acquisition of the branch "reflects Chemical Bank's commitment to the retail banking business," said Alan M. Silberstein, a Chemical senior vice president. "The Upper West Side is a very attractive marketplace and this new location will enhance our already strong consumer franchise."

Gerard C. Keegan, president of Greater New York, said sale of his bank's only remaining Manhattan branch would enable his institution to concentrate on its core operations in Brooklyn and expand on Long Island.

Greater New York has nine branches in Brooklyn and one each in Queens and Nassau County. In May it will open a branch in Medford, Suffolk County. Later in the year it will open new branches in Oceanside and Hicksville, in Nassau County, the bank said in a statement.

Chemical's parent, Chemical Banking Corp. is the nation's sixth largest bank holding company with assets of $74 billion. Greater New York Savings Bank has assets of $3.1 billion and total deposits of $2.2 billion.

CHICAGO (APRIL 18) UPI - The Board of Trade Clearing Corp., the independent clearing house for the Chicago Board of Trade, will provide processing services for the New York Cotton Exchange's clearing house under a contract approved Wednesday. Directors of Commodity Clearing Corp. the independent clearing house for the New York exchange, unanimously approved the contract.

Roger Lutz, president of Board of Trade Clearing Corp., said the agreement "may lead to further common processing in the futures industry and and make U.S. markets even more efficient than our foreign competition."

Commodity Clearing Corp. and its clearing members will use the Chicago clearing house's trade entry and matching system as well as clearing

processing. But the New York company will continue to establish its own performance-margin requirements and maintain fiduciary responsibility over its clearing members.

BONN (APRIL 18) UPI - East and West Germany will eliminate border controls between the two countries in time for the summer holidays, officials discussing German reunification said Wednesday.

West German Interior Minister Wolfgang Schaeuble and his East German counterpart Peter-Michael Diestel, meeting in Bonn Wednesday, said the move would coincide with a planned economic and monetary union seen as a key step toward reunification of the two states divided since Germany lost World War II.

The ministers told a news conference the two Germanys will seek to coordinate their immigration policies toward other countries, so that immigration controls will only be necessary at ''Germany's outer borders.''

They said border controls at the inner-German frontier will be abolished before the holiday season begins this summer, and that police in the two countries would step up cooperation, particularly in the fight against drugs and terrorism.

The meeting of the two officials came amid a flurry of activity by East and West German ministers, paving the ground for German reunification.

West German Foreign Minister Hans-Dietrich Genscher held a first meeting with his East German counterpart Marckus Meckel Tuesday, just one week after the formation of the first non-Communist government in East Germany's 40-year history.

Chancellor Helmut Kohl and East Germany's new conservative Prime Minister Lothar de Maiziere are due to meet in the near future, but no date has been set yet.

Kohl, who is currently on holiday in Austria, told officials of his conservative-led coalition government that he would not agree to cancel scheduled West German elections in December and hold all-German elections early next year instead.

A government spokesman quoted Kohl as saying that preparations for German unification should make it possible to hold all-German elections by late 1991.

Otto Graf Lambsdorf, who heads the Free Democratic Party - the junior partners of Kohl's Christian Democratic Union - had earlier suggested that all-German elections be held in spring 1991, in lieu of the December West

German elections.

Kohl also said he was willing to meet Social Democratic Party leader Hans-Jochen Vogel next week to discuss the government's plans for monetary unification with East Germany, the spokesman said.

The spokesman rejected earlier accusations by Vogel that Kohl was treating the currency union as his personal business.

The economic union entails the adoption of the West German currency and economic system in East Germany.

De Maiziere is expected to outline East German views on the planned union when he delivers a major government statement to parliament in East Berlin Thursday.

#90108u1606 04/18/1990 ~United Press International

WASHINGTON (APRIL 18) UPI - Secretary of State James Baker warned Wednesday that Soviet actions in Lithuania threaten its ''commercial contacts'' with the United States at a time the two countries are pursuing a closer trade relationship.

In an appearance before the House Ways and Means Committee to discuss the economic situation in Eastern Europe, Baker repeated President Bush's calls for ''dialogue'' to resolve tensions between Moscow and the rebellious Baltic republic.

Soviet President Mikhail Gorbachev has said Lithuania must rescind its independence laws or face a cutoff of vital supplies. Lithuanian officials were told Tuesday natural gas supplies would be curtailed, but shipments continued Wednesday.

At the White House, press secretary Marlin Fitzwater said the administration knew of no cutoff of supplies, but added U.S. officials would not ''try to spend a whole lot of time reading the tea leaves about what might happen.''

Baker repeated the U.S. position that Lithuania - as well as Latvia and Estonia - were incorporated illegally into the Soviet Union as part of a 1939 deal with Nazi Germany. The administration, however, has refused appeals from Lithuania that the United States recognize its independence.

While declaring that the ''people of Lithuania must not be denied their rights,'' Baker said it is ''time to engage in a dialogue, and not merely talk about having a dialogue'' about Lithuanian independence.

Baker repeated Bush's low-key warning that ''appropriate responses'' would be made to a Soviet crackdown, while also acknowledging thar Gorbachev's success in efforts to reform Soviet political and economic life is important to the United States.

''It's in our interest to see the reform process go forward in the Soviet Union so it will be more committed to internal progress than external expansion,'' he said.

''But some of our bilateral commercial contacts with the Soviet Union may be more directly in their interest than in ours. And those contacts are being put at risk by Soviet actions - even short of force - in Lithuania.
...

''Our willingness and ability to take steps that benefit perestroika in the near term is, to be sure, affected by Soviet behavior. Perestroika, glasnost and democratization cannot be divisible. The reform process won't go foward and succeed if it is applied in some republics and denied in others.''

Baker said later it would be ''difficult'' for ''commercial aspects of our relationship'' to survive if force were used against Lithuania, but he refused to speculate about specific possible U.S. responses.

In particular, the secretary declined to speculate about the impact of a crackdown on granting the Soviet Union most favored nation trade status, which would require a waiver of the 1974 Jackson-Vanik amendment linking free emigration to improved trade relations.

Baker said the administration would seek a waiver if the Soviet Union passes laws codifying liberalized emigration policies and reaches agreement with Washington on technical trade questions.

He said he believed the Supreme Soviet would consider liberalized emigration laws May 22, meaning such laws could be in place when Bush and Gorbachev hold their May 30-June 3 summit in Washington.

Baker said disputes over intellectual property rights were holding up a technical trade agreement but negotiations would resume soon.

#90108u1642 04/18/1990 ~United Press International
NEW YORK (APRIL 18) UPI - Pfizer Inc. reported Wednesday first-quarter net income of $251.9 million, or $1.50 a share, five percent higher than the $240.8 million, or $1.43 a share, earned in the same period in 1989. Sales totaled $1.5 billion in the latest quarter ended April 1, up from $1.4 billion in the 1989 quarter.

But the company's income from operations sank to $305.4 million in the most recent quarter from $322.8 million a year earlier, reflecting higher costs incurred in the areas of marketing, distribution, and administration and in research and development.

In the 1990 quarter, Pfizer recorded a pretax gain of approximately $39 million on the sale of the DeKalb-Pfizer Genetics seed partnership. The partnership accounted for pretax income of about $10.5 million in the 1989 quarter. Strength in the U.S. dollar during the most recent quarter reduced sales growth by two percent, the company said.

During the 1990 quarter, two recently launched products - the cardiovascular drug Procardia XL and the antifungal product Diflucan - contributed more than $90 million in sales, according to Pfizer.

BOMBAY, INDIA (APRIL 18) UPI - Authorities seized a West German-owned ship and a Singapore-registered vessel after discovering a total of 1,400 smuggled gold bars valued at $3.37 million on them, customs officials said Wednesday.

Officials said two West German seamen were taken into custody but no arrests were made in connection with the contraband on the second ship.

The gold was discovered aboard the ''Ville de Colombus,'' a West German-owned container vessel, and the Singapore-registered ''Maersk Clementine,'' both of which arrived in Bombay from Dubai, customs officials reported.

Acting on a tip, customs officials boarded the ''Ville de Colombus'' on Saturday and interrogated the 12-man crew. During a search Sunday

authorities discovered 1,100 unregistered gold bars in one of the vessels containers, officials said.

They said the gold weighed about 283 pounds and was worth about $2.65 million.

Officials, again acting on a tip, boarded the ''Maersk Clementine'' on Monday and discovered 300 gold bars weighing about 77 pounds and valued at about $720,000.

On Feb. 25, some 300 gold bars were found in a search of ''Eagle Nova,'' a container vessel that also had arrived in Bombay from Dubai.

Two crewmen were arrested in connection with that incident.

#90108u1674 04/18/1990 ~United Press International

(APRIL 18) UPI - The nation's merchandise trade deficit in February reached its lowest level in more than six years. The February red ink plunged by 30-point-four percent, falling to six-point-four-BILLION dollars. The monthly deficit is the lowest since December 1983, when it was five-point-seven-BILLION dollars. February imports sank to 38-point-one-BILLION dollars, while exports slipped one percent, to 31-point-six-BILLION dollars.

Protesters chanting ''down with imperialism'' rallied outside the U-S Embassy in Manila, urging the Philippine government to end a deal allowing U-S military bases. The League of Filipino Students vows to disrupt talks next month on the future of Clark Air Base and Subic Bay Naval base. Those talks will determine whether formal negotiations will be held to renew U-S basing rights in the Philippines.

Senator Lloyd Bentsen introduced a bill that would provide access to health care for an additional two and one-half-Million children by the year 2002. The Texas Democrat heads the Senate Finance Committee. The plan would extend coverage under the Medicaid program to all children under age 19 whose income is below the 12-thousand 675 dollars a year for a family of four.

#90108u1680 04/18/1990 ~United Press International

CHICAGO (APRIL 18) UPI - Aggressive selling during the final minutes pressured grain and soybean futures to session lows Wednesday on the Chicago Board of Trade.

Closing prices were lower, except for slight gains in May wheat and in soybean meal. Trading was choppy throughout the day.

Commercial buying triggered an early rally, but the market soon gave up the gains and drifted the rest of the session.

Corn and soybeans traded in narrow ranges and were at or near session lows at the final bell.

September corn made a contract high of $2.72 1/4 before the sell-off began and closed one-quarter cent lower on the day. Corn had early support from scattered export business. Romania was in the market for corn and Mexico was expected to bid Thursday for 250,000 tons.

Soybeans were pressured by the weakness in corn and soybean oil. July beans encountered resistance at the highs and were 2 1/2 cents lower at the close. The ever-increasing harvest activity in South America also kept soybeans on the defensive.

Beneficial moisture in the Wheat Belt and predictions of warmer temperatures by the weekend pressured new-crop wheat. May was a half-cent higher with locals and commercials the featured buyers.

At the close, corn was off 1/4 to 1 1/4, soybeans down 2 to 3 1/2, wheat up 1/2 to down 1 3/4 and oats unchanged to off 1/2.

#90108u1693 04/18/1990 ~United Press International

BUCHAREST, ROMANIA (APRIL 18) UPI - Romania's government wants to put former dictator Nicolae Ceausescu's private luxury train back on the tracks to draw big-spending tourists for trips through Eastern and Western Europe, tourism officials said Wednesday.

Ceausecu's five presidential yachts would also be available for foreign and Romanian tourists as part of a scheme to attract desperately-needed hard currency, said acting Minister of Tourism Mircea Manole.

For cash-carrying Western visitors, ministry officials are considering offering a package deal that would include a train ride through several European capitals followed by a leisurely cruise down the Danube in one of the yachts.

''We're trying to think of a name for the grand trip that doesn't include the name 'Ceausescu,''' Manole said. ''Any suggestions?''

Ceausescu's lavishly-appointed yachts and train are just a few of the amenities the autocratic communist ruler allowed himself before a revolution overturned his government and a firing squad ended his life Dec. 25, 1989.

Both are furnished with a luxury most Romanians can only dream of, although Ceausescu's tastes generally leaned toward the gaudy.

''The idea was to intimidate,'' said Mariu Marius, a 30-year-old architect familiar with Ceausescu's decorating style. ''He had no taste, and mixed up grandiose styles which don't go together at all.''

The largest of Ceausescu's yachts, the Mircea Cel Mare, is named after the grandfather of the historical Dracula, the Transylvanian prince Vlad the Impaler, and is built to accomodate 78 guests. So far it has only carried two - Ceausescu and his wife, Elena.

Manole said the cruises aboard the train and yachts will be ''very deluxe '' in keeping with the ministry's goal of luring big-spending, cash-carrying foreign tourists.

The official emphasis on ''civilized tourism'' is expected to draw a half-million visitors to Romania this year, he said.

If the scheme to use the remnants of Ceausescu's personal empire as tourist attractions, the former dictator may ironically aid Romania's economic recovery.

Besides the boats and trains, another huge draw is the House of the Republic, the massive, unfinished palace in Bucharest Ceausescu built for his family and communist party leaders.

Despite such attractions and Romania's many natural tourist lures such as the Black Sea coast and the colorful Transylvanian countryside, Romania still has has a long way to go before it becomes a first-class tourist destination.

#90108u1708 04/18/1990 ~United Press International

(APRIL 18) UPI - Two apparently mild earthquakes shook the San Francisco Bay area 10 minutes apart this morning... on the 84th anniversary of the great 1906 earthquake. There were NO immediate reports of damage or injuries in the tremors, which struck at about 6:30 and 6:40 a-m, P-D-T. Parts of southern California had been jolted yesterday by several sizable after-shocks from a February 28th quake.

NASA engineers are evaluating the results of a test-firing of a substitute hydraulic power unit on the shuttle Discovery at Cape Canaveral. If all looks good, officials may decide to advance the launch of the shuttle from next Wednesday to Tuesday. The mission to launch the Hubble Space Telescope was postponed just four minutes from blast-off on April 10th when the power unit malfunctioned. The new unit was installed over the weekend and was test-fired this morning.

The Easter Bunny- or one of its helpers- visited Jimmy Quick of Clinton, Iowa, over the weekend, but he's NOT pleased. And he says the police haven't been much help. Quick says he returned home after a weekend away and found chocolate bunnies and a sign that said ''hoppy Easter'' in his apartment. Police say they will NOT pursue the case because there was NO sign of forced entry and nothing was taken. Quick is NOT happy. He says none of his friends confessed, so he suspects the candy is poisoned and he won't eat it.

#90108u1820 04/18/1990 ~United Press International
WASHINGTON (APRIL 18) UPI - A congressional report released Wednesday accused the Bush administration of failing to correct long-standing safety flaws at the nation's troubled nuclear weapons facilities.

The report, produced by the General Accounting Office, the investigative arm of Congress, said that only 34 percent of 1,731 identified safety problems at 18 Energy Department facilities have been corrected. The figures were compiled from internal Energy Department data.

''Department of Energy and its contractors have been slow to correct the health and safety problems, and there have been delays in developing corrective action plans to resolve the environmental problems,'' the report said.

Congressional critics of the Energy Department were quick to cite the report as evidence that, contrary to pledges made by the administration, the department has performed poorly in addressing critical safety issues at the ailing plants.

''It is shocking that nuclear hazards requiring immediate attention got no attention at all,'' said Sen. Howard Metzenbaum, D-Ohio.

Rep. George Miller, D-Calif., said the study proves that the department ''is unwilling or unable to force its contractors to operate in a safe and environmentally responsible manner.''

Miller and Metzenbaum, who requested the report, were particularly annoyed with the disclosure that only 41 percent of the 113 ''highest priority problems'' at the plants have been resolved.

At the Lawrence Livermore Laboratory in Livermore, Calif., for example, investigators found that four of 14 high priority health and safety violations remain unresolved.

An Energy Department spokesman said the department has not seen the report and declined to comment on the results.

Energy Secretary James Watkins has said the department performed poorly in correcting safety problems at weapons facilities prior to his appointment in 1988.

At a congressional hearing last month, Watkins said his department is moving as quickly as possible to address saftey and health hazards at the plants. But the Navy admiral said cleanup efforts would lag unless

Congress increases Energy Department funding.

But the report cited internal problems at the department that had nothing to do with actual cleanup measures.

It said that Energy Department data showed that contractors of 18 weapons facilities had reported the completion of corrective actions on 765 safety flaws. Yet 174 of those actions await department approval.

The General Accounting Office report is the most recent assessment of the department's progress in correcting safety hazards identified by government investigators.

It discloses safety violations at some of the most troubled plants, including the Savannah River nuclear plant in South Carolina, the Feed Materials Production Center near Fernald, Ohio, the Rocky Flats nuclear weapons plant in Colorado and the Hanford Nuclear Reservation in Washington.

The report notes that only 46 of the 186 safety and health violations at the Fernald plant have been remedied since 1986 when government officials disclosed that highly contaminated waste had leaked into nearby groundwater.

At the Hanford site, 89 of 294 violations have been resolved. At the closed Rocky Flats plant, nearly half of the 262 safety violations remain unresolved.

In addition, only one of the 79 violations at the Savannah River plant has been resolved. That plant also is closed. The department has said it hopes to reopen Savannah River sometime in 1991.

MOSCOW (APRIL 18) UPI - Lithuania's parliament refused Wednesday to rescind independence laws as demanded by Mikhail Gorbachev but offered a two-week moratorium on new acts if the Soviet government agreed to talks.

The crisis over Lithuanian independence continued to be marked by little action despite serious threats, with a Soviet official denying Wednesday Moscow had ordered a cutoff of oil and gas to the secession-minded republic.

Gorbachev issued an ultimatum Friday, saying if Lithuania did not rescind its March 11 declaration of independence and other laws asserting sovereignty within two days he would cut off key supplies. The republic ignored the threat but there was no action from Moscow when the deadline arrived Sunday.

In its first official response to the ultimatum, the republic's Supreme Council said it would not pass new ''political legislative acts'' until May 1 if Gorbachev agreed to ''preliminary parliamentary consultations.''

The resolution also called on Moscow to refrain from violence, ''including economic violence,'' against the republic.

On Tuesday, the director of the Soviet Western Trans Gas company sent a telegram to Lithuania saying Mosocw had ordered gas supplies ''sharply curtailed'' and a worker at the republic's major oil refinery said it had also been informed of an imminent cutoff.

The reported move brought criticism from the West, and President Bush said he was considering ''appropriate measures'' against the Soviet Union.

But gas and oil continued to flow uninterrupted, and on Wednesday the Soviets denied they had ordered a cutoff.

''We have received no instructions on this score from the Council of Ministers,'' Aklim Mukhamedzyanov, the Soviet deputy oil and gas industry minister, told the official Tass news agency.

At the State Department in Washington, Nyoka White, a spokeswoman for the European bureau, said that ''the latest information, as of this morning, is that the pipelines are still flowing and there are no signs of any change.''

Analysts have said there would be serious shortages in the republic within a month if gas and oil supplies were cut off, but Lithuanian President Vytautas Landsbergis has vowed economic blackmail will not weaken the republic's resolve.

The parliament resolution Wednesday called for ''maximum conservation of all resources'' because of the threats.

The republic depends on the Soviet Union for oil, gas, metal, chemical products, cotton and timber. Lithuania produces food and manufactured goods, but officials in Vilnius have pledged to ''set a good example'' by fulfilling commitments for deliveries to other parts of the Soviet Union despite Moscow's threats.

Lithuania has been looking to Scandinavian and other Western countries to help if Moscow does cut off energy supplies. The republic's prime minister Kazimeiera Prunskiene, traveled to Norway Wednesday on a two-day visit that will include talks with the country's oil and gas producers.

Feb. 24 elections in Lithuania - the first free local elections since the republic was annexed by Moscow in 1940 - were dominated by the Sajudis nationalist movement that promised to work for secession.

The new parliament declared independence at its first meeting March 11, and has since passed dozens of laws asserting local sovereignty.

In Washington, White House spokesman Marlin Fitzwater said U.S. officials were watching the situation closely and considering options for an American response ''targeted at the problem.''

''The U.S.-Soviet relationship is at stake here ... so the options would have to have some effect on the relationship,'' Fitzwater said.

Landsbergis said Tuesday he would like the United States to take a more definite stand in favor of Lithuanian independence.

U.S. policy has never recognized the incorporation of Lithuania and the other two Baltic republics into the Soviet Union, but the Bush administration has been treading softly on the issue of secession.

In Paris, Foreign Minister Roland Dumas said Wednesday he asked the European Community to name a committee of experts to study the problems of Lithuania and examine what action the West might take on behalf of the Lithuanian people.

''The latest decisions by the government of Moscow could have heavy consequences,'' he said. ''This justifies more than ever the need for dialogue.''

#90108u1841 04/18/1990 ~United Press International

BEIRUT, LEBANON (APRIL 18) UPI - A pro-Iranian group believed to hold three U.S. hostages said Wednesday it intended to release one of the captives within 48 hours in response to Syrian efforts and an urgent appeal by Iran.

Islamic Jihad For the Liberation of Palestine made the declaration in a one-page statement delivered to a Western news agency in the Moslem sector of the Lebanese capital.

''In response to an urgent appeal by the Islamic Republic of Iran to make a goodwill initiative to close this (hostage) file and in respect to Syrian efforts, we have decided to move this issue by releasing an American captive within 48 hours,'' the group said.

Attached to the statement was a Polaroid photograph showing U.S. captive Jesse Turner bony and haggard. The hostage appeared to be wearing a white T-shirt and wearing a thick, dark beard.

It was not clear whether the photograph meant the group intends to release Turner, but analysts suggested the fact he was shown alone in the photo may mean the captors intend to set him free.

A Bush administration official would not say whether the administration had independent confirmation of the reports.

''We've seen the reports. We have no comment on them,'' the official said.

Turner, 42, a professor at the American-affiliated Beirut University College, was kidnapped along with two other U.S. professors and a native of India on Jan. 24, 1987.

In an interview with Cable News Network, Badr Elkhazen Turner said she had

heard nothing about a possible release of her husband prior to the declaration issued Wednesday.

''It might be my husband or not,'' she said from Dubai, United Arab Emirates. ''I'm not sure what I'm going to do. I'm very confused and very anxious to know about anything.''

The Lebanese native said she was five months pregnant when her husband was kidnapped and has since given birth to their daughter, JoAnne.

''It was very hard and I felt very lost without him,'' Mrs. Turner said.

Jesse Turner was an associate professor of mathematics and computer science at Beirut University College. A Boise, Idaho, native, he received a bachelor's degree in psychology from Boise State University and a master's and doctorate degrees from the University of Idaho.

The two other U.S. captives who were snatched from the Beirut college compound by armed elements disguised as policemen were Robert Polhill, 55, a professor of accounting, and Alann Steen, 50, a professor of mathematics.

The Indian hostage, Mithileshwar Singh, Beirut University College chairman of business studies, was freed in the autumn of 1988.

Jesse Turner's mother, Estelle Ronneburg, said news of a possible release raised her hopes but she was ''trying to keep them under control.''

''It's just very difficult, you know,'' said Ronneburg, who works at a bank in Boise, Idaho. ''I don't think I'll really believe it until I actually touch him and give him a big hug and a kiss. It's been three years and almost three months, so it's been a long, long, long time.

''The last time they released one of the four professors, everybody thought it was going to be Alann Steen and it turned out to be Dr. Singh '' Ronneburg said.

''I really don't know much of anything else. I'm still in a state of shock more or less,'' she said.

The pro-Iranian group called on Washington to dispatch John Kelly, the State Department's undersecretary for Middle East and Asian affairs, to Syria to work out the details of the planned release.

''Measures should be completed by the presence of John Kelly in Damascus to coordinate some final steps in 48 hours,'' the group said.

State Department spokesman George Malleck said Kelly is traveling overseas ''on a long-standing commitment,'' but that he was not in the Middle East

and did not have plans to go there.

The Jihad has repeatedly called for freeing some 400 Arabs imprisoned in Israel, but the group made no clear mention of any conditions for a hostage release.

Both Washington and Tel Aviv have pledged not to make deals with terrorists or terrorist states.

#90108u1843 04/18/1990 ~United Press International

ABIDJAN, IVORY COAST (APRIL 18) UPI - The government, bowing to political protests and French diplomatic pressure, suspended and effectively scrapped Wednesday a package of wage cuts designed to curb public spending officials said.

A meeting of the government's Political Bureau recommended that an inter-ministerial committee review and study the austerity program of pay and price cuts agreed in July 1989 with the World Bank and International Monetary Fund, official sources said. This in effect amounted to burying the wage cuts in red tape, Ivory Coast analysts said.

The cuts led to the most serious rioting the Ivory Coast has seen since the West African nation obtained independence from France in 1960.

The inter-ministerial committee is to be chaired by Alassane Quattara, the governor of the West African Central Bank. No time limit has been set on the committee's discussions.

The 18-month austerity program was introduced March 31 in an effort to help the Ivory Coast economy recover from the adverse effects of falls in world prices for its main exports, cocoa and coffee.

Pressure from France, which retains close links with Abidjan, also is believed to have led to the review of the measures by President Felix Houphouet-Boigny, 85, the oldest leader in Africa.

The salary cuts included reductions of up to 40 percent for all public sector workers earning more than $300 per month.

Employees of the state postal and telephone services who were to see salary reductions last week eventually received their full pay unchanged after doubts about the effectiveness of the cuts arose, official sources say.

The government is believed to have had some difficulty introducing price cuts aimed at easing the affect of the pay cuts. Reductions in the cost of

food, rents and other prices have been resisted by the business community despite government attempts to ensure that the cuts are introduced.

It is not yet clear whether the scrapping of the pay cuts will lead to a reform of the price cuts as well.

The austerity measures caused an uproar among Ivory Coast's 97,000 public sector workers. The capital, Abidjan, has been the scene of a series of running battles between the armed forces and protestors.

Abidjan University and all schools in the city were closed March 3 in a bid to disperse student protesters. Although they were re-opened two weeks ago, the academic year was completely abandoned April 7 after riots throughout the country led to the death of a student in the town of Adzope.

#90108u1858 04/18/1990 ~United Press International
MANAGUA, NICARAGUA (APRIL 18) UPI - Contra rebels are near agreement with Nicaragua's incoming and outgoing governments on plan to disarm the rebel movement and end the country's 8-year-old civil war, Contra leaders said Wednesday.

''A draft of the cease-fire has been drawn up and approved in principle by the sides involved, and there is only the technical part to establish,'' a Contra commander who asked not to be identified told United Press International.

A Contra delegation in Managua entered a second day of talks with members of the outgoing Sandinista government and officials of President-elect Violeta Chamorro's National Opposition Union.

The commander said dates had not yet been set for the Contras to gather in security zones where U.N. peace-keeping forces and representatives of the Nicaraguan Catholic Church would monitor the laying down of arms by the rebels.

Nevertheless, the commander and other Contra leaders said they appeared near agreement with the Sandinistas and the National Opposition Union, known by its Spanish acronym, UNO.

A copy of the draft agreement obtained by UPI said that ''the Nicaraguan resistance and the Nicaraguan government agree to cease all military hostilities, as well as any other type of operations that could lead to the resuming of hostilities.''

The plan calls for Sandinista troops and security forces to stay away from the security zones during the disarmament, and for the armed forces to abstain from flying over the security zones.

President Daniel Ortega, who is scheduled to hand over power to Chamorro April 25, has called for complete disarmament before the transition, but Contra leaders said Wednesday that would be impossible.

''We know that the principal objective of the Sandinistas is that we complete the disarmament before April 25,'' Contra spokesman Oscar Sovalbarro, known as Commander Ruben, told reporters.

''But we believe that, in such little time, it is not possible to complete by then,'' he said.

The agreement is also expected to include promises by the Nicaraguan government to respect the freedom and security of the Contras, and for humanitarian aid to be supplied to the Contra troops and their families to ease their transition to civilian life, the Contra commander said.

The Contra commander said the security zones had not been finalized, although they would be along guidelines set at earlier meetings between the Contras and members of Chamorro's 14-party coalition.

Aristides Sanchez, a civilian member of the Contra negotiating team, said the rebels were also seeking pledges of reconstruction of some of the war-torn areas of the Central American country.

''We know that Nicaragua is in a serious economic condition,'' Sanchez said. ''We also know that Nicaragua has undergone eight years of civil war. We want to see the reconstruction of the countryside.''

The seven-member Contra delegation arrived Tuesday morning from their headquarters in Tegucigalpa, Honduras, and met with Chamorro before beginning the negotiations, which are being monitored by Managua Archbishop Miguel Obando y Bravo and representatives of the United Nations and the Organization of American States.

Maj. Gen. Joaquin Cuadra, head of the Sandinista delegation and chief of staff of the army, said Tuesday he is confident the disarmament can be completed prior to April 25.

#90108u1914 04/18/1990 ~United Press International

WASHINGTON (APRIL 18) UPI - The Supreme Court ruled Wednesday a federal judge went too far when he ordered an increase in property taxes in Kansas City, Mo., to pay for a school desegregation plan.

But the court sanctioned the intended result of the order - to force Kansas City to pay for the desegregation plan - and as a result it approved what it viewed as a less intrusive plan proposed by the 8th U.S. Circuit Court of Appeals.

That plan would require the school district to levy the property taxes necessary to pay for the desegregation program, allowing the district to ignore state law that prohibits certain increases in property taxes.

Justice Byron White, writing for the court, called the district judge's order an ''extraordinary event'' that not only ''intruded on local authority but circumvented it altogether.''

He concluded, however, that ''a court order directing a local government body to levy its own taxes is plainly a judicial act within the power of a federal court.''

While all members of the court agreed with the result of the case, Justice Anthony Kennedy, joined by Chief Justice William Rehnquist and Justices Sandra Day O'Connor and Antonin Scalia, issued a warning about the path the court took.

''This assertion of judicial power in one of the most sensitive of policy areas, that involving taxation, begins a process that over time could threaten fundamental alteration of the form of government our Constitution embodies,'' Kennedy said.

Missouri Attorney General William Webster, commenting on the somewhat tortured decision, said the ruling poses new questions that must be resolved.

He said the court's ruling that a judge cannot simply order a tax increase ''leads to the question then of who does have the authority to levy taxes to pay for constitutional violations of law. The answer as stated by the court in this case is the local school board.

''We view this as a positive step in that these school board members are elected and therefore accountable to those whom they represent. We would hope this means they will exercise some fiscal responsibility in preparing a budget to fund their share of the desegregation costs approved by the district court.

The court's action comes in the longstanding school desegregation suit from Kansas City, first filed in 1977 by the Kansas City Missouri School District and a group of children, charging the state had maintained segregated schools in the district and failed to eradicate them.

The case took various twists and turns before federal courts found the school system was a segregated duel system and ordered a remedial plan to desegregate. The wide-ranging plan called for such things as upgrading schools themselves, hiring new teachers and creating magnet schools to attract more white students.

The cost of the programs was estimated to be about $260 million.

Part of the cost was to be paid by the state with the rest to be paid by the school district. A federal judge eventually ordered an increase in the district's property tax and authorized the sale of $150 million in capital improvement bonds to pay for the plan.

Seeking high court review, the state said the case ''presents fundamental questions about the permissible goals of a desegregation remedy.''

''These orders are simply an abuse of federal remedial power,'' the state maintained.

''Thanks to the orders below, (the school district) has now become a judicial enclave, where the court selects the programs to meet its chosen goals, directs state and local officials to execute these programs, and then sets tax rates to supply additional funding.''

The school district and the children who originated the suit argued against review.

WASHINGTON (APRIL 18) UPI - The House Merchant Marine and Fisheries Committee voted Wednesday to reverse a Supreme Court decision that allows offshore oil drilling to proceed over the objections of coastal states.

The measure was adopted on a voice vote as part of a major overhaul to the 1972 Coastal Zone Management Act.

Thirty-five states and territories that lie along the Atlantic, Pacific, Gulf of Mexico or Great Lakes are eligible for federal aid if they develop coastal management plans under the law. Twenty-nine have approved such programs.

One part of the law requires that federal activities affecting a state's coastal waters must be certified as ''consistent'' with the coastal management plan of that state.

But the Supreme Court, in a 1984 case known as Watt vs. California, ruled that provision does not apply to the Interior Department's proposed sale of oil and gas drilling rights off California because the area is outside the state's immediate coastal area.

The bill clarifies that a state can rule out any federal activities deemed contrary to its coastal management plan under the law, regardless of whether those activities take place ''in or outside of the coastal zone.''

Federal offshore oil leasing is not mentioned specifically, but committee Chairman Rep. Walter Jones, D-N.C., said ''it is precisely my intention'' to overturn the Supreme Court ruling on offshore drilling.

The legislation would allow the president to override a state's objections if he finds the federal activity is in the ''paramount interest of the United States.''

WASHINGTON (APRIL 18) UPI - House Democrats, putting themselves on a collision course with President Bush, proposed a ''visionary'' $1.2 trillion fiscal 1991 budget Wednesday that would cut defense spending $8.3 billion more than Bush wants.

House Budget Committee Chairman Leon Panetta, D-Calif., introduced his five-year budget plan at a news conference attended by House Speaker Tom Foley, D-Wash., and other House Democratic leaders.

The plan seeks a 25 percent Pentagon spending cut by fiscal year 1995 and said the defense budget could but slashed as much as 50 percent by the year 2000 ''if national security conditions warrant.''

''You're looking at some significant reductions in terms of weapons systems if you're going to even have half a chance of reaching these numbers,'' Panetta said.

House Democratic leader Richard Gephardt, D-Mo., called the party's spending plan ''a visionary budget'' that ''represents a true consensus among the members.''

Rep. Bill Frenzel, R-Minn., said he would oppose Panetta's plan but said it likely would become the basis for later high-level budget talks between Congress and the White House. He called for Democratic plan ''the outer limit'' in negotiations with Bush.

Foley said defense cuts in the Democratic budget likely will not be affected by events in Lithuania, where the Soviet Union has threatened retaliation against the independence-minded republic.

''I do not see any likelihood of actions taken in Lithuania that would materially affect our defense numbers,'' Foley said.

Panetta's plan would spend an extra $6 billion to fund new child care, infrastructure, education, science, transportation and other domestic programs and eliminate many of the domestic spending cuts Bush proposed in the budget he submitted to Congress in late January.

The Panetta plan also calls for raising $13.9 billion in new revenues next year to help pay for the new programs and reduce the reficit - the same revenue amount Panetta contends Bush called for in his budget.

It also calls for raising another unidentified $9.1 billion called for by

Bush - a figure that included $3 billion saved from IRS reforms and $4.2 billion in various user fees.

The Democratic proposal would bring the fiscal 1991 budget deficit down to $63.8 billion, just under the $64 billion deficit target set by the Gramm-Rudman balanced budget law. Panetta said his plan would achieve a budget surplus by fiscal year 1995, largely through defense cuts.

Foley predicted the Democratic plan would pass the House, possibly next week, but said he expects little Republican support.

The budget resolution, as the non-binding spending, savings and revenue blueprint is known, is a congressional guideline and does not go to Bush for his signature or veto.

The House Budget Committee is scheduled to begin public hearings on the plan Thursday while the Senate Budget Committee is expected to begin public hedarings on its own budget plan next week.

The Democratic budget proposed Pentagon spending of $295.5 billion next year and $285.9 billion in defense budget authority, which is the amount that can be obligated next year but spent in 1991 and in later years.

That is $8.3 billion less than the $303.7 billion in defense outlays proposed by Bush and $21 billion less in defense budget authority Bush proposed.

In addition to the defense cuts, the Democratic budget plan would:

-Remove, for the first time, use of the huge Social Security trust fund surplus to mask the size of the deficit.

-Include funds for NASA to build its space station.

-Sharply reduce, from $13.9 billion to $4.2 billion, the cuts Bush proposed in entitlement programs, such as Medicare and federal retirement programs. The Democratic plan would chop Bush's proposed $5.5 billion cut in Medicare to $2.1 billion.

-Provide a 4.1 percent pay raise to federal workers and the military.

#90108u2021 04/18/1990 ~United Press International

MEXICO CITY (APRIL 18) UPI - The Mexican government demanded Wednesday that the U.S. State Department explain the circumstances surrounding the arrest and alleged kidnapping of a Mexican physician indicted in the 1985 torture-slaying of U.S. narcotics agent Enrique Camarena.

The Foreign Ministry issued its communique regarding the doctor's arrest as attorneys general from 32 countries were scheduled to begin two days of meetings at the Mexican Pacific resort of Ixtapa, 250 miles south of Mexico City, to discuss production and trafficking of narcotics.

According to reports published in Mexico, the U.S. Drug Enforcement Administration paid abductors $50,000 to kidnap Dr. Humberto Alvarez Marchain and spirit him to the United States.

The Foreign Ministry said the Mexican government is seeking a clarification of the circumstances of Alvarez's arrest, saying the Guadalajara physician ''could have been illegally detained in Mexico with the participation of U.S. authorities.''

''The Mexican government has launched an investigation into possible kidnapping and illegal transfer out of the country of Alvarez,'' the ministry said.

Alvarez, 42, was arrested at the El Paso International Airport April 3 by federal drug agents and flown several days later to Los Angeles, where he is to stand trial as one of 19 suspects in the February 1985 torture and murder of Camarena and his pilot. The two were killed while investigating drug trafficking activities in northwest Mexico.

DEA officials have declined to comment on the kidnapping charges.

U.S. Attorney General Richard Thornburgh, who is to attend the meeting in Ixtapa, has ordered an investigation into the arrest.

Mexican Attorney General Enrique Alvarez del Castillo will preside over the meeting, which will also be attended by representatives of 20 other countries as observers.

A source in the Mexican attorney general's office told the Los Angeles Times that the government of Mexico believes ''without a doubt'' that Alvarez was kidnapped. The source was not identified.

''All we're investigating is who participated, where it was and how he was introduced into the United States,'' the source said.

U.S. officials charge that Alvarez, a gynecologist, observed the torture and administered drugs to revive Camarena so that he could undergo still more questioning.

Alvarez's lawyer, Robert Steinberg, told the newspaper Alvarez was abducted from his office in Guadalajara on April 2 by four or five men in civilian clothing who identified themselves as Mexican federal police,

presented badges and announced that he was under arrest for performing illegal abortions.

The doctor was put into a car and driven north to an unidentified town, where the party spent the night before boarding a small airplane, the newspaper said. Alvarez claims that an American DEA agent was present in Mexico, participating in his arrest, Steinberg said.

If a DEA agent was involved in the apprehension of Alvarez in Guadalajara, it would mark the first time that the agency has taken advantage of a controversial new Justice Department legal opinion that gives its agents the authority to take part in the ''snatching'' of fugitives abroad.

Thornburgh's chief spokesman, David Runkel, said that Alvarez's arrest was ''not within the purview'' of that ruling because it did not involve U.S. agents going into another country.

Alvarez, who is being held without bail, is scheduled to go on trial May 1 along with four other defendants in the case, including Juan Ramon Matta Ballesteros, a convicted drug trafficker who was captured in Honduras in 1988 by military officials and deported to the United States.

WASHINGTON (APRIL 18) UPI - Two-thirds of the 1,596 U.S. Navy accidents in the 1980s went unreported by the news media and 40 percent of the total involved nuclear-powered submarines, the Greenpeace organization said Wednesday.

In a report titled ''Naval Safety 1989: The Year of the Accident,'' the anti-nuclear environmental group said the Navy's accident record last year was actually one of its safest of the decade.

''The explosion aboard the USS Iowa and the safety stand-down focused national attention on the U.S. Navy's accident record last year,'' said Greenpeace research coordinator Josh Handler, co-author of the report. ''But contrary to popular belief, 1989 was by no means the Navy's worst year for sheer numbers of accidents.''

The report said the Navy had 106 accidents in 1989, second fewest of the decade behind 1988's 83 accidents. The Navy had 248 accidents in 1981.

While the Navy said it had 69 major accidents involving ships and 43 involving aircraft in 1989 for a total of 112 mishaps, it agreed with Greenpeece that 1988 and 1989 ''were two of our safest years in recent naval history.''

Greenpeace, which obtained previously unreleased Navy records, said that 990 Navy accidents during the 1980s - or two-thirds of the total - went unreported by the news media.

''Forty percent of the 1,596 U.S. naval accidents during the 1980s happened to nuclear-powered submarines,'' Greenpeace said. ''One quarter (161) of the submarine accidents involved strategic ballistic missile submarines.''

Amy Wickenheiser, co-author of the Greenpeace report, said ''naval secrecy is a serious obstacle to a full accounting of naval safety. Until the public knows the extent of the danger posed by these accidents, it is impossible to fully assess the risks.''

Greenpeace said that worldwide, the worst accident of 1989 was the sinking of the Soviet Mike-class submarine off Norway in April.

Greenpeace said that accident raised the number of nuclear warheads on the ocean floor from 48 to 50 and the number of naval nuclear reactors from seven to eight.

The report concluded that about half of the 99 ships and submarines involved in accidents worldwide in 1989 were nuclear-capable, mainly aircraft carriers, and attack and ballistic-missile submarines.

(APRIL 18) UPI - Lithuanian officials say oil and gas supplies continue normally today, despite reports yesterday that the Soviet Union was

''sharply curtailing'' the flow. However, the Soviet news agency Tass says the reports of a cutoff of fuel to Lithuania ''are completely groundless.'' The Lithuanian parliament is debating a response to last week's ultimatum by Soviet President Gorbachev.

The Italian news agency ANSA says Pope John Paul has been invited to visit Lithuania and establish full diplomatic relations. Lithuania's representative to the United States and the Vatican is quoted as saying Lithuania's president sent a personal invitation to the pontiff earlier this month. The Vatican NEVER accepted the annexation of strongly Catholic Lithuania by the Soviet Union in 1940. Lithuanian diplomats say the visit could NOT occur before 1992.

A Lithuanian interior ministry spokesman says a man apparently trying to share the spotlight of Lithuanian independence hijacked an Aeroflot plane to the republic's capital today by claiming to have a bomb. The Moscow-to-Leningrad flight was diverted to Vilnius , where the hijacking ended peacefully. What the hijacker said was a bomb turned out to be a large box of matches.

The Christian Forces Militia of Samir Geagea denies that it is responsible for the shelling of a school bus in Beirut today. The blast killed 11 people, 10 of them young students. Witnesses say the shell came from Geagea's forces, who were exchanging artillery with rival Christian troops. Police and witnesses say the shell set the bus on fire and 11 people burned to death.

WASHINGTON (APRIL 18) UPI - The House Merchant Marine and Fisheries Committee voted Wednesday to overturn a Supreme Court decision that allows offshore oil drilling to proceed over the objections of California and other states.

The measure was adopted as part of a major overhaul of the Coastal Zone Management Act, a 1972 law strengthening the federal role in cleaning up coastal waters.

Thirty-five states and U.S. territories that lie along the Atlantic, Pacific, Gulf of Mexico, or Great Lakes are eligible for federal grants and technical assistance if they develop coastal management plans under the law. Twenty-nine have approved programs.

One key provision of the law required federal activities affecting a state's coastal waters to be "consistent" with the coastal management plan of that state.

But the Supreme Court, in a 1984 case known as Watt vs. California, ruled this provision does not apply to the Interior Department's proposed sale of oil and gas drilling rights to vast tracts of the sea floor off California.

The court held oil and gas lease sales, because they lie outside California's immediate coastal area, are not activities that "directly affect" the coastal zone as the law defines it, and therefore need not meet the consistency test.

The bill gives a state the authority to rule out any federal activities deemed contrary to its coastal management plan under the law, regardless of whether those activities take place "in or outside of the coastal zone."

Federal offshore oil leasing is not mentioned specifically, but the bill's chief sponsor, committee Chairman Walter Jones, D-N.C., said, "it is precisely my intention" to overturn the Supreme Court ruling on offshore drilling.

The legislation, approved by the committee on a voice vote, allows the president to override a state's objections if the chief executive finds the federal activity is in the "paramount interest of the United States."

Rep. Douglas Bosco, D-Calif., plans to offer an amendment when the bill reaches the House floor to expressly spell out offshore oil and gas leasing as activities covered by the law, said Mitch Stogner, an aide to Bosco.

Bosco believes "very strongly that language has to be air-tight in its applicability to offshore oil drilling," Stogner said.

Committee passage of the bill comes as the public awaits a decision by President Bush on the future of two delayed lease sales off California and a third off Florida.

In February 1989, Bush indefinitely postponed those three lease sales - comprising nearly 22 million acres of the continental shelf - while a Cabinet-level task force re-evaluated the environmental consequences. The task force submitted its recommendations in a confidential report early this year and Bush is expected to announce his decision soon.

In the meantime, Congress has imposed a moratorium on those lease sales and others around the country involving a total of 84 million acres of sea floor. The moratorium remains in effect through September 1990.

#90108u2126 04/18/1990 ~United Press International

NEW YORK (APRIL 18) UPI - American advertisers are aiming too much at the

young to make effective use of the $170 billion they will spend on network television in the 1990s, a CBS marketing presentation said Wednesday.

"Coming of Age: Targeting the Middle of the Market," by CBS Marketing and Ephron, Papazian & Ephron, documents the claim that it will cost advertisers more money, without larger returns, to market to the young as the country grows older.

"The key demographic for the '90s is the 35-54 age group, the aging baby-boomers who have the strongest economic value for advertisers," said Thomas Leahy, president, CBS marketing. "Today, the median age of prime time viewers is 44. By 1995, it will rise to 47 and by 2000 it will stand at 49.

"This creative component of the advertising community has recognized this, as has the marketing community. But it is not yet reflected in the media-buying practices. Now is the time to switch this demographic criterion for use in evaluating network television opportunities." The study also found:

The median age of the total population now is 33, the oldest it has ever been. It will reach 36 by the year 2000, when the median age of the consumer-targeted adult population will be 43.

America's pocketbook also is graying. With education the leading indicator of wealth, since 1979 there has been a large increase in the college educated among the 35-44 age group.

In a study of 42 corporate-buying advertisers involving 313 brands spending $1.7 billion, who specified 18-49 as their target age group, half of the consumers proved to be 41 and older.

#90108u2182 04/18/1990 ~United Press International

WASHINGTON (APRIL 18) UPI - A House subcommittee temporarily shelved action on reforming the federal crop insurance program Wednesday because members could not agree on a new system, leaders said.

''It's accurate to say the situation is rather fluid,'' said Rep. Glenn English, D-Okla., chairman of the House Agriculture subcommittee on conservation and credit.

The Bush administration has proposed termination of the program at the end of this crop year, with the replacement to be a permanent disaster relief program at the Agriculture Department. Farm-state congressmen want to salvage crop insurance, but there has been little agreement within the insurance industry or on Capitol Hill of how to do that.

English said his panel would turn its attention to writing conservation provisions for the new farm policy law while waiting to see if a widely supported insurance plan can be developed.

He stressed the subcommittee would look at a number of alternatives but declined to describe them. English is sponsor of one plan that would automatically cover 30 percent of a farmer's normal yield. Additional coverage could be purchased.

''I don't think the members of the subcommittee have arrived at a point where there's a good solid consensus,'' English said in an interview. ''I think that (a consensus) is important.''

To be successful, a reform plan must ensure higher farmer participation and save money, English said.

Rep. E. Thomas Coleman, R-Mo., the GOP leader on the subcommittee, said the panel was looking at ideas that ranged from direct government payments to farmers to a system of privatized insurance delivery.

''We haven't yet determined what program is going to fly,'' Coleman said.

Agriculture Secretary Clayton Yeutter has said it would cost too much to fix the current system, which has swallowed $5 billion in subsidies in the past decade. Farmer enrollment has been so low Congress enacted three special disaster-aid programs in the last four years.

A House staff member noted if there is no action on crop insurance, the current program would remain in place - if money is appropriated to run it. No legislation has been proposed to eliminate the crop insurance or to set up the disaster program favored by the White House, he said.

The administration has said a reform plan like English's could cost from $1.8 billion to $2.4 billion a year - more than the $1.4 million average cost of insurance subsidies and disaster payments in recent years. Congressional analysts have estimated English's plan would cost $1.1 billion annually.

#90108u2207 04/18/1990 ~United Press International

NEW YORK (APRIL 18) UPI - The dollar tumbled in New York trading Wednesday as an important reduction in the February U.S. trade deficit failed to satisfy the high expectations of market participants. Also putting the U.S. currency under pressure was a bond market selloff amid rumors of heavy Japanese selling of U.S. securities.

Currency traders said news that the U.S. trade deficit declined by $2.8 billion in February to $6.49 billion - the smallest since December 1983 - not only failed to boost the dollar but set off a round of selling. Expectations of a much better number created disappointment, and the

dollar's decline was hastened by stop-loss selling.

"It was surprising," said Carl Amendola, assistant vice president with the Bayerische Hypotheken-und Wechsel Bank. "Although the market was hoping for a better number, a $2.8 billion improvement was nothing to scoff at."

Cost-of-living data released this week raised perceptions of a "slow growth, inflationary environment" in the United States, Amendola said. This has cooled global investor interest in dollar-priced investments.

In late New York trading, the dollar was quoted at 1.6725 West German marks, down from 1.6775 marks Tuesday. Against Japan's currency, the dollar was quoted at 158.20 yen, sharply off from 159.77.

Amendola and Marcy Nathan, a Hill Samuel International Corp. assistant vice president, said the dollar was also weakened by a wave of large Japanese sales of both U.S. government securities and U.S. stocks. Amendola reported market talk that the Japanese government wants capital to come home to boost the yen and refloat domestic markets.

Also inducing Japanese investors to sell U.S. bonds is the view that the dollar has peaked out against the yen, said Raymond Stone, a managing director of Stone & McCarthy Associates Inc. in Princeton, N.J.

With sentiment on the dollar increasingly bearish, he said, investors might want to "lock in currency gains" by selling dollar-denominated instruments and converting that capital back into yen.

Other dollar rates: 1.4795 Swiss francs, down from 1.4900; 5.6225 French francs, off from 5.6375; and 1,228.75 Italian lire, off from 1,232. The British pound moved up to $1.6390 from $1.6360.

In Europe, the dollar fell against the major currencies despite the U.S. trade gains.

In Frankfurt, it closed at 1.6725 German marks, off from Tuesday's close of 1.6800. In Zurich, it eased to 1.4805 Swiss francs against 1.4920.

National Westminster Bank analyst Ken de la Salle said the unit probably fell because dealers feared a narrower trade deficit "could put pressure on the United States government to bring down interest rates."

The dollar also fell in Paris and Milan, closing at 5.6465 French francs against 5.6490, and at 1234.60 Italian lire, against 1235.10. In London, the pound rose to $1.6370 against $1.6315.

Earlier in Tokyo, the dollar moved up on expectations of a major fall in the trade deficit, closing at 159.87 yen compared to 159.83 yen after

rising to a high of 160.18 in moderate volume.

Republic National Bank in New York closed cash gold at $376.50 an ounce, up from $375.25 Tuesday. The New York Commodity Exchange settled gold at $376.10 an ounce, ahead from $375.20. In Zurich, gold rose to $376.75 an ounce from $374.20. In London, the metal moved up to $375.25 an ounce from $374.

Republic closed cash silver at $5.09 an ounce, down from $5.11. Comex spot silver declined to $5.065 an ounce from $5.093. Zurich silver rose to $5.11 an ounce from $5.10. London silver climbed to $5.12 from $5.07.

-30- 3799

#90108u2229 04/18/1990 ~United Press International

NEW YORK (APRIL 18) UPI - The stock market closed sharply lower Wednesday in moderate trading as a jump in interest rates sent the blue chips to their biggest loss in almost two months.

The Dow Jones industrial average, which rose 2.71 Tuesday, slumped 32.89 to close at 2732.88. It was the steepest decline since a 38.74-point drop Feb. 20.

Among broader market gauges, the New York Stock Exchange composite index fell 1.98 to 186.93 and Standard & Poor's 500-stock index fell 3.96 to 340.72. The price of an average share tumbled 37 cents.

Declines pounded advances 1,047-477 among the 1,992 issues crossing the NYSE tape. Big Board volume totaled 147,130,000 shares, versus 127,990,000 shares traded Tuesday.

The market opened higher after news that America's merchandise trade deficit plunged by 30.4 percent in February to $6.49 billion, the lowest level since December 1983.

February imports fell 7.6 percent to $38.1 billion from $41.3 billion, with a marked $1.2 billion decline in imports of oil and petroleum products, according to the monthly report compiled by the department's Census Bureau.

But once bond prices began to plunge for a second day in a row, sending yields up sharply, the market retreated. "The whole day was related to fears about rates," said Dale Tills, manager of institutional equity trading at Charles Schwab & Co. in San Francisco.

"We're getting to critical support levels for bonds and if we break through them we're looking at higher rates and that's just not going to be very positive for stocks," he said. "People started to think, 'We made a

good run, let's just take some profits and reevaluate where rates are going to be,"' said Tills.

Treasury bonds were down 1 6/32 in late trading to 96 3/8 to yield 8.84 percent, a new high for the year. The sell-off was sparked by talk in the bond market that Japanese investors were selling substantial amounts of Treasury securities.

Tills added that he does not think the Federal Reserve will look to raise short-term rates soon, saying that would boost the dollar and create problems with the Japanese, who are concerned about their sagging yen in the face of a strong dollar.

"I don't think the Fed will rush in to start jacking rates up," he said, noting that the federal funds rate, which banks use for overnight loans to each other, has been stable at 8 3/8 percent.

On the trading floor, Philip Morris was the most active issue, off 3/8 to 42 5/8 after reporting first-quarter earnings above the range of expectations.

Pacificorp followed, off 3/8 to 21 1/8. Tandem Computer was third, jumping 1 1/8 to 24 1/8 after reporting second-quarter net income was up dramatically from year-earlier levels.

Among the other blue chips, AT&T lost 7/8 to 41 1/8. The company reported first-quarter earnings of $668 million, or 62 cents a share, up 12.5 percent from $594 million, or 55 cents a share, in the same period of 1989. Some analysts were said to have been disappointed with the performance.

IBM fell 1 1/4 to 109 7/8, American Express dropped 1/2 to 28 7/8, and Coca-Cola eased one to 79 1/4 after reporting a 9.1 percent rise in its first-quarter earnings. But Merck bucked the trend, gaining 5/8 to 74 3/8 after reporting a rise in first-quarter earnings.

Elsewhere, Interlake, which makes materials for the auto and aerospace industries and whose stock soared in early April after what was said to be a favorable article in a market newsletter, extended its plunge, down 1 1/2 to 11 1/8.

And Great American Bank slumped 5/8 to four. The stock surged Tuesday as investors took heart in the government's approval of a plan calling for the infusion of about $350 million in capital, but analysts said they had doubts about whether the bank could raise that much money.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 179,786,630 shares,

compared with 157,577,870 shares traded in the previous session.

Prices closed lower in active trading on the American Stock Exchange. The Amex Market Value index lost 1.50 to close at 353.22. The price of an average share fell six cents. Declines led advances 360-207 among the 831 issues traded. Composite volume totaled 21,004,900 shares, compared with 15,697,300 traded Tuesday.

Salomon's call warrants on the Tokyo stock market's Nikkei index led the Amex issues, up 1/4 to four.

The National Association of Securities Dealers composite index closed down 3.89 to 431.53.

#90108u2231 04/18/1990 ~United Press International

WASHINGTON (APRIL 18) UPI - The Army has rejected the recommendation of the Pentagon's Defense Advisory Committee on Women in the Services that it allow women into combat positions for a four-year test period, officials said Wednesday.

''We do not concur with the DACOWITS (Defense Advisory Committee on Women in the Services) recommendation to conduct a four-year test of women in combat positions,'' the Army said in a statement.

The advisory panel, created in 1951 by Defense Secretary George Marshall, issued the recommendation at its most recent semi-annual meeting in November 1989.

The Army studied the proposal and sent its rejection to the panel March 30 Army spokeswoman Maj. Nancy Burt said.

The rejection comes as the committee is to hold its semi-annual conference in nearby Alexandria, Va., from Saturday through Wednesday. The issue of women in combat is certain to be raised at the conference.

The panel is comprised of about 35 civilian community leaders, mostly women, appointed for three-year terms by the military service secretaries and the defense secretary.

''The Army does not feel that a test is warranted,'' the Army said in its statement on the rejection. ''We feel our current policy reflects the intent of Congress by excluding women from the highest risk of direct combat.

''We currently offer full career opportunities and maintain equitable advancement and schools and promotion selection rates for women. Our

policies are in line with the other services,'' the statement concluded.

The issue of allowing women into combat positions drew national attention following the Dec. 20 U.S. invasion of Panama, where some women soldiers were caught in combat and were reported to have performed well.

Rep. Patricia Schroeder, D-Colo., has introduced a bill in the House that would allow Army women to join combat units on an experimental basis, but she has found little support for the legislation in the male-dominated Congress.

U.S. statutes enacted by Congress bar the Navy and Air Force from allowing women into combat units and the Army, while not covered by the same laws, mantains a similar policy.

#90108u2294 04/18/1990 ~United Press International

WASHINGTON (APRIL 18) UPI - Increasing violence by both the U.S. Border Patrol and roving bandits have turned portions of the U.S.-Mexico border into a war zone where immigrants are often the victims, a House panel was told Wednesday.

Immigrants attempting illegal entry to the U.S. have been beaten and even shot by border police and must fear robbery, rape and death from bandits members of Congress and immigration groups told the panel of the Foreign Affairs Committee.

''There has been a dramatic increase in deaths, in violence and in the abuse of human beings,'' said Rep. Jim Bates, D-Calif. ''Underlying it there are elements of racism. ... Those who might be American citizens of Spanish heritage are sometimes mistreated'' by border police.

Bates charged the Border Patrol, administered by the Immigration and Naturalization Service, ''has taken on a kind of military or paramilitary atmosphere ... and I think that leads to the use of force and the abuse of force.''

Roberto Martinez of the American Friends Service Committee, which has been

active in helping immigrants, said the most violent section of the U.S.-Mexico border is along the California-Baja California line. Martinez said the area is ''violent both in terms of law enforcement abuse and bandits preying on innocent migrants.''

Since 1974 in the San Diego sector, Martinez said, 33 people have been killed and another 48 wounded in shooting incidents by the Border Patrol and the Border Crime Prevention Unit, made up of both border patrolmen and San Diego police. During the same period, he said, 12 people were run over and injured or killed by Border Patrol vehicles.

Martinez outlined several cases since 1985 in which, he said, border police shot at illegal immigants, even as they ran back into Mexico. The 1985 case of Humberto Carillo Estrada, he said, was ''the first in a long series of victims who would be shot in the back by border agents.''

VEGA BAJA, PUERTO RICO (APRIL 18) UPI - Somebody, most likely drug dealers, stashed at least $400,000 in barrels on a farm near Vega Baja and local, and federal officials want to know where the money came from and where it went, a U.S. attorney said Wedesday.

Daniel Lopez Romo, the U.S. attorney for Puerto Rico, said authorities believe some citizen found a barrel containing more than $1 million and distributed it among a number of townsfolk.

The investigation began three weeks ago when federal investigators, reportedly acting on a tip about a $50,000 deposit in a local financial institution, found 10 or 11 empty barrels buried on a farm.

''Basically what has happened is that someone stashed some money and someone found it and shared it out,'' Lopez Romo said.

Lopez Romo said that based on what some neighbors apparently found in one of the barrels, the case could involve many millions of dollars. So far authorities have recovered $400,000.

''There is a lot of confusion, a lot of speculation,'' Mayor Luis Melendez Cano told United Press International. ''There is talk of people who supposedly have given money away, of supposed modern-day Robin Hoods who threw money into mailboxes. ... But we have no proof of anything.''

Lopez Romo said authorities - including the Drug Enforcement Administration, the FBI and local and federal narcotics work groups - are trying to establish the origin of the money, which is possibly the earnings from illegal drug trafficking.

Life appeared normal Wednesday in the La Trocha and Rio Abajo neighborhoods, where people are thought to have received some of the money.

''I wish it was true what they said, but what there is here is hunger and a lack of work,'' said an unemployed youth who identified himself only as Javier, who was found sitting on an old car. ''Look how old my car is, and there are loads of people who have worse cars.''

A postman who asked not to be identified said he walks through the neighborhood every day and has not noticed anything new in the way people live, although he admitted he has heard rumors.

''What there'll be here is a massacre when those people (the owners of the money) come to look for it and don't find it,'' said a public transport worker in the town square.

Carlos Soberal, a Vega Baja bank admnistrator, told UPI there have been no unusually large deposits at his bank.

Vega Baja interim police commander Antonio Rivera said FBI agents have been traveling around the town and talking to townspeople thought to know something about the money.

''I understand that most of what has been said could be qualified as speculation or sensationalism,'' Rivera said, adding that he did not know of anyone who had acquired new houses or new cars.

WASHINGTON (APRIL 18) UPI - A bill to toughen current laws against retail price fixing won House approval Wednesday despite warnings the measure faces a likely veto by President Bush.

Supporters of the bill said it was needed to prevent manufacturers from pressuring discount stores to raise prices, while opponents said it would interfere with legitimate business decisions and cause a flood of lawsuits against manufacturers.

The bill passed on a 235-157 vote and was sent to the Senate where a similar bill recently was approved by the Senate Judiciary Committee.

The measure aims at so-called vertical price fixing in which manufacturers or distributors establish a minimum price for certain goods. Stores that buy the goods must agree not to sell the items for less than the minimum price.

Some discount retailers have complained that manufacturers sometimes threaten to stop doing business with them if they do not honor the price floor.

Such price fixing agreements have been illegal under the Sherman Antitrust Act since a Supreme Court ruling in 1911, but sponsors of the bill said the law has been undermined by two recent Supreme Court rulings and by the Justice Department's refusal to prosecute any such cases since 1981.

The bill would clarify standards of evidence to be used in antitrust suits and make clear that price resrtaints are illegal automatically even if a specific minimum price is not set by manufacturers or distributors.

The bill would effectively overturn a Supreme Court ruling that a discounter who brings a price fixing suit must provide direct evidence that a manufacturer took action to maintain certain price levels.

Attorney General Richard Thornburgh opposes the bill and has said he will recommend a veto if it reaches the president's desk.

Rep. Jack Brooks, D-Texas, chairman of the House Judiciary Committee, said the issue ''goes to the very heart of our free enterprise system'' that allows sellers to compete by selling at different prices.

Brooks said the practice of price fixing ''is again proliferating because of lax enforcement of antitrust laws and two recent Supreme Court rulings that blatantly ignore long-standing congressional policy.''

Rep. Henry Hyde, R-Ill., said the bill would ''give a fighting chance in court'' to discounters who bring suit to fight price fixing efforts by manufacturers.

Opponents of the bill said it would prevent manufacturers from terminating retailers for legitimate business reasons, such as poor customer service.

Rep. Sonny Montgomery, D-Miss., termed the bill ''just another harassment of private enterprise.''

#90108u2444 04/18/1990 ~United Press International

NEW YORK (APRIL 18) UPI - Average yields for money market mutual funds held steady in the latest reporting week, while rates at competing savings and loan institutions were mixed, organizations that track the funds and institutions said Wednesday.

The Donoghue Organization, of Holliston, Mass., said that average seven- and 30-day simple yields on money market funds were unchanged at 7.69

percent and 7.68 percent, respectively.

The average maturity of fund portfolios declined to 44 days.

The Bank Rate Monitor, of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions were mixed in the latest week.

The Monitor's index of average rates: money market deposit accounts, 6.06 percent, down from 6.07; Super-Now accounts, 5.0 percent, unchanged; six-month certificates of deposit, 7.71 percent, up from 7.70; one-year CDs, 7.79 percent, unchanged; 2 1/2-year CDs, 7.81 percent, unchanged; and five-year CDs, 7.85 percent, unchanged.

The average rate for a one-year adjustable-rate mortgage was 8.57 percent, down from 8.58.

Average rates on 15- and 30-year fixed-rate mortgages moved up in the latest week, to 9.94 percent and 10.11 percent, respectively. Corresponding rates were 9.91 percent and 10.08 percent a weak earlier.

The average rate for a four-year automobile loan was 12.24 percent, up from 12.23.

#90108u2613 04/18/1990 ~United Press International
NEW YORK (APRIL 18) UPI - Prosecutors in the fraud trial of Imelda Marcos introduced evidence Wednesday that the former Philippine first lady wrote a $200,000 check on a Swiss bank account to pay for jewelry from an exclusive Fifth Avenue store.

A Feb. 29, 1984, letter from Van Cleef & Arpels showed that Mrs. Marcos wrote a $200,000 Paribas bank check to pay off part of an outstanding bill for $651,500 worth of jewelry, including several sapphire necklaces, earrings and a ring.

The government contends the late Philippine President Ferdinand Marcos and his wife stole hundreds of millions of dollars from the Philippines treasury and hid some of the money in Swiss bank accounts, including the one at Paribas.

Prosecutors charge the Marcoses invested most of the stolen money in art and real estate holdings in Manhattan and around the world.

Mrs. Marcos, 60, is being tried in U.S. District Court in Manhattan on racketeering, conspiracy, fraud and obstruction of justice charges along with Saudi arms dealer Adnan Khashoggi, who faces obstruction of justice and fraud charges for allegedly helping the Marcoses in their transactions.

Earlier Wednesday, a government witness testified that he found shredding machines running in the Malacanang Palace hours after Marcos and his wife fled the ''People Power'' revolution in February 1986 that elevated Corazon Aquino to the presidency.

Portenciano Roque, 37, then an Aquino administration official, testified that he also rifled through file cabinets in the palace and found documents ''on Swiss accounts'' that he later turned over to Philippine government officials.

A Philippine shipping magnate testified Tuesday that he deposited $25 million over 10 years to accounts managed by a man described as the ''personal Swiss banker'' for the Marcoses.

The shipper, Jose Reyes, testified that the banker's commissions should have gone to a government-owned Philippine oil company.

#90108u2645 04/18/1990 ~United Press International

BRICK TOWNSHIP, NJ (APRIL 18) UPI - A 15-year-old boy who said he ''doesn't want to go to school anymore,'' carried a shotgun into class Wednesday and took 22 students hostage before being disarmed by a vice principal, police said.

The youth, who was not identified because of his age, held the class at gunpoint for about 20 minutes, said Joseph Tomaselli, 46, the vice principal who wrestled the gun away from the youth.

''I was on top of him before he knew what hit him,'' Tomaselli said. ''It was instinctive, but the plan started to evolve when I noticed that he moved his finger from the trigger.''

The youth was being held at the Ocean County Juvenile Detention Center on charges of kidnapping, aggravated assault, making terroristic threats and two counts of weapons charges, said Sgt. Gary Wood, a Brick Township police officer.

''He was just an average freshman,'' said Tomaselli.

Police said the incident began about 8:45 a.m. when the boy walked in late to his class at Brick Township High School, the world history class taught by Paula Niven.

The youth produced the gun from a gym bag and ordered Niven to leave and threatened to kill a student when she hesitated and tried to reason with the teen, police said.

Niven then summoned Tomaselli, who tried to talk to the boy, police said.

The vice principal opened the classroom door, stood in the well of the door and spoke to the 5-foot-7, 150-pound teen over a television monitor on a stand that was blocking the doorway, he said.

''I was just trying to find out his condition and how serious he was and he was saying he would pull the trigger and shoot me,'' Tomaselli said. ''I said, 'Okay Michael, I hear you. I am not coming in.'''

The teen indicated he wanted to make a statement, but he was not clear about his motives for the hostage-taking, Tomaselli said.

''He just said he was unhappy with school, but he never made a statement '' he said. ''He just said he doesn't want to go to school anymore.''

The youth made himself comfortable at the teacher's desk and lit a cigarette, placing the butt of the loaded gun on the floor, with the barrel pointing to the ceiling, he said.

The youth allowed two female students to leave the class, giving the 5-foot-9, 150-pound vice principal a chance to edge the monitor to one side, and then directed three male students to change their seats, he said. That made him realize the youth had momentarily forgotten about him, he said.

''His left hand was on the stock and his right hand was on the cigarette '' he said. ''It was at that point that I took two steps and lunged at him and I knocked him off the chair and pushed him to the floor.''

The gun was knocked away and another supervisor entered the room and helped the vice principal subdue the teen, he said.

''As soon has he realized what was happening, he went limp,'' he said.

The school psychologist and counselors spoke with the students who were in the class during the incident, he said. A number of them decided to go home, but school was not closed.

''We let them come down easy,'' he said. ''Right now, school is operating normally.''

#90108u2770 04/18/1990 ~United Press International

NEW YORK (APRIL 19) UPI - Shearson Lehman Hutton Holdings Inc. Wednesday

reported a first-quarter loss of $915 million after taking a $630 million restructuring charge, the largest one-time charge in Wall Street history.

The securities firm's loss, which was in line with expectations, compared with a net loss of $15 million in the opening quarter last year. First-quarter revenues dropped 15 percent to $2.6 billion from $3 billion in the year-earlier quarter.

American Express Co., Shearson's parent, announced last month it would buy all the outstanding shares of the nation's second-largest retail brokerage in a deal valued at $370 million.

American Express also made made available to Shearson a capital infusion of $750 million in what was widely viewed as a bid to bolster confidence in the beleaguered firm after the collapse of Drexel Burhman Lambert Inc.

The $630 million charge reflected Shearson's recent cost-cutting efforts, which included laying off some 2,000 employees, withdrawing from some businesses and curtailing certain activities. The firm also took a $157 million charge due to a change in accounting principles.

When Shearson announced March 2 that it would take the $630 million charge analysts attributed the firm's troubles to a drop in individual investor business following the 1987 stock market crash, problems in its real estate unit and the acquisition of E.F. Hutton & Co.

Prior to Shearson's $630 million charge, the largest charge ever taken by a securities firm was $470 million by Merrill Lynch & Co. in January, which stemmed from its own restructuring efforts. Merrill Lynch is the largest U.S. brokerage firm.

Excluding the restructuring and accounting charges, Shearson had an operating loss of $128 million in the first quarter, which also was in line with estimates.

Shearson attributed the operating loss to "a marked slowdown in overall business activity," an addition of $32 million to its loan-loss reserves primarily for the personal loan portfolio of The Boston Co. subsidiary, $34 million in losses related to the high-yield bond market and a $50 million increase in reserves for litigation.

Shearson said commission revenues declined to $413 million for the quarter from $436 million in the year-earlier quarter in response to reduced activity by individual investors.

#90108u2772 04/18/1990 ~United Press International

NUEVO LAREDO, MEXICO (APRIL 18) UPI - Two police officers, a prison guard and one prisoner were slightly injured Wednesday when more than 700 inmates rioted at a Mexican prison across the border from Laredo, Texas, authorities said.

Carlos Cabrera Sentanes, police delegate from Nuevo Laredo, Tamaulipas, Mexico, said local and federal police used tear gas and assault weapons to bring the riot under control within about 30 minutes. The riot apparently was sparked by a foiled breakout attempt two days ago.

One police officer suffered a broken nose in the prison brawl and another officer received minor injuries, he said. A prison guard was shot in the leg and one prisoner received minor injuries.

''It was a touchy situation for a short while and the fighting was fierce '' Cabrera Sentanes said. ''We're grateful that the injuries were not more serious.''

Six inmates identified as leaders of the uprising were taken into custody and transferred to a maximum security state prison in Ciudad Victoria, about 100 miles south of Nuevo Laredo.

The Nuevo Laredo prison is a medium security facility housing federal, state and local prisoners.

Prison officials said 726 inmates participated in the riot, which began at about 8 a.m.. Prison officials called the Nuevo Laredo police and federal judicial police to help restore order.

Cabrera Santanes confirmed earlier reports aired on Laredo, Texas, television station KVTV that prison officials two days ago discovered a tunnel where some inmates were trying to escape and that discovery touched off the riot.

The tunnel was from one of the cells going underground to the street.

#90108u2848 04/18/1990 ~United Press International

WASHINGTON - A Cuban-American who was a fugitive for more than a decade, pleaded innocent Wednesday to murder charges stemming from the 1976 car bombing that killed a former Chilean ambassador and his secretary.

Jose Dionisio Suarez, 51, was ordered held without bond following his U.S. District Court appearance on counts stemming from the September 1976 District of Columbia car bombing that killed Orlando Letelier and Ronni Moffit.

Bespectacled with a graying goatee, Suarez sat quietly during the five-minute arraignment before U.S. Magistrate Deborah Robinson.

Federal authorities arrested Suarez last week at his St. Petersburg, Fla., home, where he had lived for two years with his 30-year-old wife and 15-month-old daugther.

U.S. Attorney Jay Stephens did not disclose where Suarez would be held. Prior to his arraignment, Suarez was held at the Hillsborough County Jail in Florida.

Edward Sussman, Letelier's attorney, would not comment on the case.

A federal grand jury in 1978 indicted Suarez on charges of plotting to assassinate Letelier, who was ambassador to the United States from 1971 to 1973 under then Chilean President Salvador Allende Gossens.

Also indicted was Virgilio Pablo Paz y Romero, 38, who with Suarez allegedly trailed Letelier in another car and set of the radio-controlled bomb planted under the diplomat's vehicle. Paz, a Cuban-American has not been caught.

The indictment also named two Chilean intelligence officials, who are in Chile and have not been arrested; an American who worked for the Chilean secret police and served a prison sentence for his particpation and two Cuban exiles whose convictions were overturned on appeal.

The Cubans were recruited by the Chilean secret police, who wanted Letelier killed because he was critical of the Chilean government run by dictator Augosto Pinochet, said FBI officials.

#90108u2960 04/18/1990 ~United Press International

(APRIL 18) UPI - A group holding three hostages in Lebanon says it may release one... students are killed when a shell hits a school bus in Beirut... Secretary of State Baker warns the Soviets about Lithuania... and numerous earthquakes shake California. Those stories and more, next from U-P-I.

A pro-Iranian group says it will free one American captive within two days.

The Islamic Jihad For the Liberation of Palestine is believed to be holding three Americans hostage.

Today's declaration came in a one-page statement delivered to a Western news agency in the Moslem section of Beirut.

The group says it is responding to what it calls an ''urgent appeal'' from Iran and out of respect for efforts by Syria to get the captives freed.

A Bush administration official in Washington says the White House has seen the reports, but has NO comment.

The pro-Iranian group also is asking Washington to dispatch John Kelly, the State Department undersecretary for Middle East and Asian affairs, to Syria to work out details for the release.

At the State Department, a spokesman says Kelly is traveling overseas but has NO plans to go to the Middle East.

Just which American hostage may be freed was NOT immediately clear.

However, attached to the Jihad's statement was a snapshot of 42-year-old Jesse Turner... a professor at the American-affiliated Beirut University College. He was abducted along with two other American professors more than three years ago.

In the photo, the Idaho-educated Turner looks thin and haggard, with a dark, thick beard.

(APRIL 18) UPI - A shell struck a bus in east Beirut today and killed 15 people, most of them youngsters returning home from school. The bus was hit during bitter fighting between rival Christian Lebanese forces.

Police and witnesses say the shell was fired by Christian militiamen at a street patrolled by troops loyal to General Michel Aoun . Police say the shell directly hit the gas tank of the bus, which was engulfed in flames.

Authorities say 11 of the 15 victims were children. Four others, including three teachers, were injured and taken to a nearby school.

Aoun's radio station accuses rival Samir Geagea's militiamen of hitting the bus. Geagea's forces deny the charge and initially said a car-bomb was responsible.

SOFIA, BULGARIA (APRIL 19) UPI - Authorities have found a mass grave containing the bodies of 40 people believed killed shortly after Bulgaria's communist revolution in 1944, published reports said Wednesday.

The pro-government daily Otechestven Front said the bodies found in the southwestern town of Dobrinishte apparently were those of ''fascist collaborators'' who disappeared in October 1944, a month after the communists took power.

But the opposition newspaper Demokracija said the victims were members of non-communist parties and the local intelligentsia who apparently were eliminated by the communists. It said the victims were killed by ''blows with a blunt object.''

Investigators from the district prosecutor's office were dispatched to Dorbrinishte after the discovery was made Friday, and the gravesite has been placed under guard, the reports said.

#90108u3091 04/18/1990 ~United Press International

(APRIL 18) UPI - Nature marked the 84th anniversary of the Great 1906 San Francisco Earthquake today by rocking the city by the Bay with several quakes. At least 14 tremors were measured on the Richter scale, ranging from one-point-six to five-point-three.

Authorities report NO injuries and NO major structural damage. There were minor mud slides in the Santa Cruz Mountains, and power was knocked out in remote areas. High-rises in San Francisco swayed as the slow-moving quakes rolled through California's central coastal region.

Today's quakes occurred about 90 minutes after survivors of the 1906 quake gathered at a park to be presented with certificates of survival. One person said- ''I thought it was carrying the celebration a bit too far.''

Seismologists say the quakes are expected to continue, with less intensity for some time.

The chief lawyer for the Department of Housing and Urban Development says the owner of the nation's second-largest federally assisted low-income housing got rich while his tenants lived in squalor.

HUD General Counsel Frank Keating told a House, Banking and Finance sub-committee that A. Bruce Rozet is involved in more than 100 ''financially or physically troubled properties.''

Rozet owns Housing Resources Management Incorporated and is involved with 331 housing projects in 40 states and Puerto Rico. In Keating's words, Rozet's profits have been ''substantial and by his own admission, he's a very rich man.''

The president of one apartment run by Rozet told the sub-committee of

deplorable conditions. Elaine Johns cited drug sales in stairwells, lack of heat and hot water in the winter, and roach and rodent infestation.

Rozet has been suspended pending an investigation into his properties. He blames HUD for NOT providing enough money for needed repairs and adequate security.

#90108u3115 04/18/1990 ~United Press International

(APRIL 18) UPI - In London today, British trade officials broke the long silence that followed the seizure last week of steel piping on the way to Iraq.

Now they say they are convinced that Iraq intended to use the piping to build the world's largest gun.

Investigators say Iraq contracted with other arms makers to construct a 131-foot-long cannon, with a 39-inch caliber. The weapon theoretically could fire nuclear or chemical shells hundreds of miles, or even lob satellites into space.

The inquiry shows that the gun was designed and developed by Gerald Bull, a Canadian artillery expert slain in Brussels last month by unidentified gunmen.

Other arms makers say Bull's death made them suspicious and when Iraq placed another order two weeks ago for an aiming device, the dealers blew the whistle.

Last month, Iraq was accused of trying to smuggle U-S-made components that could be used to trigger nuclear devices. But Iraqi officials deny the latest British allegations, saying they're NOT working on any such weapon.

A Pentagon report says the United States and NATO should be able to stop a Soviet attack on Europe without having to rely on short-range nuclear weapons.

The newly released unclassified version of the ''1990 Joint Military Net Assessment'' notes that the Warsaw Pact allies might NOT join the Soviets in attacking Europe. But it also points out that the Warsaw Pact ''forces are intact and politically reliable.''

The report says that once a conventional arms pact is agreed upon by Washington and Moscow, there's a much better chance of such a conflict ending in a positive way for the United States.

The classified version of the annual report was sent to Congress by

Defense Secretary Cheney. The report's assessments were made at the end of 1989, as Eastern Europe was undergoing dramatic changes.

#90108u3632 04/18/1990 ~United Press International
(APRIL 18) UPI - A pro-Iranian group thought to be holding three U-S hostages says it intends to release one of the captives within 48 hours. The Islamic Jihad for the Liberation of Palestine says the decision comes in response to Syrian efforts and an urgent appeal by Iran. A photo of American hostage Jesse Turner accompanied the statement the group released to a Western news agency in Beirut.

An Oklahoma City school superintendent has ordered school flags flown upside down after the state Senate failed to pass a teacher pay and school reform package. The protest gained strength as three of the state's biggest school districts joined the effort and thousands of striking teachers rallied outside the state capitol. The teacher walkout is scheduled through Friday.

Presidential arms control adviser Edward Rowny said today that Moscow has introduced an ''entirely new set of concessions'' during current arms talks. Rowny detailed the differences between Washington and Moscow while speaking to the Reserve Officers Association in Washington. Negotiators are under pressure to reach some kind of accord before the super-power summit in May.

In Chicago, a fire truck racing to a northwest side blaze hit a Chicago Transit Authority bus today, injuring four firefighters. Police say three of the firefighters were hospitalized. Two people were injured in the fire including a three-year-old girl who is in critical condition. The causes of the crash and fire are under investigation.

American Telephone and Telegraph Chairman Robert Allen is defending the decision to rescind A-T-and-T support of a Planned Parenthood program to combat teen pregnancy. The nation's number one long-distance carrier ended its 25-year affiliation with the program after receiving complaints from anti-abortion groups. Allen told shareholders meeting in Los Angeles that Planned Parenthood has tainted A-T-and-T's reputation.

(APRIL 18) UPI - After three years in captivity, American hostage Jesse Turner may be released this week. A Damascus-based correspondent for the Arabic-speaking Monte Carlo radio station is quoting a ranking Syrian diplomatic source as saying that Turner will be free by Friday. Earlier today, the Islamic Jihad confirmed it would release within 48 hours one of the three American hostages it is believed to hold. Gunmen nabbed the math professor from his Beirut University campus in January 1987.

A Lithuanian spokeswoman says the Soviet Union has stopped pumping crude oil to the republic's major refinery. President Gorbachev warned he would

cut off key supplies to the Baltic state if it did NOT reverse its declaration of independence. But earlier today, a Soviet official denied Moscow had ordered any cut-off. The spokeswoman says the refinery was warned by telephone the flow of oil would stop.

House Democrats proposed a one-point-two-TRILLION-dollar fiscal 1991 budget today that puts them on a collision course with President Bush. The budget, called ''visionary'' by House Democratic leader Richard Gephardt, would cut defense spending eight-BILLION dollars more than Bush wants. It's part of a five-year budget plan submitted by Budget Committee Chairman Leon Panetta.

Jury selection began today in Boston in the trial of a Christian Scientist couple accused of manslaughter in the death of their son. Jury selection had been delayed because of a dispute over whether reporters could cover the proceedings. Judge Sandra Hamlin complied with an order from Massachusetts' highest court and allowed reporters inside the courtroom. David and Ginger Twitchell's toddler son, Robyn, died in 1986 after his parents rejected medical care and tried to cure him through prayer.

#90108u4019 04/18/1990 ~United Press International

(APRIL 18) UPI - Colombia's Defense Ministry says it is investigating a cocaine cartel arms deal that put Israeli-made weapons into the hands of private drug armies. The guns were seized in January and February on ranches owned by a slain drug trafficker. Israel has told Colombian officials the weapons were sold to the Caribbean nations of Antigua and Barbuda. The governments of the two island nations deny selling the guns to drug lords and are NOT saying how the weapons ended up in Colombia.

In South Africa, a large quantity of government weapons and ammunition was seized in a weekend raid at the Air Force headquarters in Pretoria. Police suspect right-wing extremists, and are searching for a self-styled radical who's believed to have been involved in the raid. Extremist leaders have threatened to mobilize armed commandoes in the wake of racial reforms instituted by President Frederik de Klerk.

The last seven inmates still holed up in Britain's Strangeways Prison defied authorities for the 18th day today. Firefighters used hoses once again to make living conditions for the inmates even more deplorable. But one inmate taunted officials by taking a shower beneath the spray of water. Officials say there have been NO new negotiations with the rebellious prisoners since Monday.

Romanian tourism officials say they want to put former dictator Nicolae Ceasescu's private luxury train back on the tracks to draw big-spending tourists for trips through Eastern and Western Europe. The acting minister

of tourism says Ceasescu's five presidential yachts also will be available for foreign and Romanian tourists. It's all part of a plan to attract much-needed hard currency.

#90108u4246 04/18/1990 ~United Press International

(APRIL 18) UPI - There's new hope for the release of Western hostages in Lebanon. Arabic radio says the pro-Iranian group Islamic Jihad indicates it will release American hostage Jesse Turner on Friday, in response to Syrian efforts and an urgent appeal from Iran. Turner, a former teacher at Beirut University College, was kidnapped on January 24th, 1987... along with two other U-S professors and a native of India. The White House says the Bush administration was told of the development, but has NO reason to believe it's true.

Moscow is apparently making good on its threat to cut off essential supplies to Lithuania. Officials in the Baltic republic say the Soviet Union stopped pumping crude oil to Lithuania's major refinery tonight. The move came shortly after the Lithuanian parliament refused to go along with Soviet demands to cancel independence laws. The parliament instead offered a two-week moratorium on further legislation, in exchange for talks with the Soviet government.

Nicaragua's eight-year-old civil war may be nearing an end. Contra leaders say a cease-fire draft has been drawn up and approved in principle by the parties involved. A Contra delegation has been negotiating in Managua with members of the out-going Sandanista government and the in-coming government of President-elect Chamorro.

The San Francisco Bay area was hit by dozens of earthquakes today, almost exactly six months after the big October 17th quake that killed 62 people. NO injuries were reported in today's quakes, which were aftershocks from the October 17th shaker. Today's earthquakes... the strongest of which measured five-point-four on the Richter scale... triggered mudslides, knocked out power and shook buildings. They were centered near Watsonville 60 miles south of San Francisco.

#90108u4444 04/18/1990 ~United Press International

(APRIL 18) UPI - Moscow cuts crude oil to Lithuania's major refinery... pro-Iranian group to free an American hostage in Lebanon... House Democrats call for big defense cuts in their budget plan. U-P-I has the latest world and national news, next:

Moscow tonight cut off the flow of crude oil to Lithuania, stepping up pressure on the rebellious republic to end its push for independence.

Lithuanian officials say the Soviets have stopped pumping crude to the republic's major refinery. The move came shortly after the Lithuanian parliament refused to obey the Kremlin's order to recind independence laws.

The parliament instead offered a two-week moratorium on new legislation, in exchange for talks with Soviet officials on Lithuania's attempts to secede.

Lithuania is heavily dependent on the Soviet Union for oil, gas and other raw materials, and has been looking to Scandinavia for help on energy supplies. Today, Prime Minister Prunskiene traveled to Norway on a visit that's to include talks with oil and gas producers.

The White House says Washington is taking a ''wait-and-see'' approach to the situation.

A pro-Iranian group says it will release one of three American hostages it's holding in Lebanon within 48 hours. Sources told Arabic radio in Beirut that the Islamic Jihad For the Liberation of Palestine would free 42-year-old Jesse Turner.

Attached to the group's statement was a photo of Turner looking haggard and bony. Turner, a former math teacher at Beirut University College, was kidnapped along with two other U-S professors and a native of India, on January 24th, 1987.

The Jihad says it's releasing one hostage in response to Syrian efforts and appeals from Iran to- ''close the hostage file.'' The group made the declaration in a one-page statement delivered to a Western news agency in Beirut's Moslem section.

White House spokesman Marlin Fitzwater says the Bush administration knew about the development before the media did but has NO reason to believe it's true. Quoting Fitzwater- ''We will be prepared to respond if it is real.''

#90108u4465 04/18/1990 ~United Press International

(APRIL 18) UPI - House Democrats are positioning themselves squarely against President Bush in proposing a one-point-two-TRILLION-dollar budget for fiscal 1991. The budget calls for a major cut in defense spending... eight-point-three-BILLION dollars more than Bush wants.

House Budget Committee Chairman Democrat Leon Panetta of California today introduced his five-year budget plan at a news conference attended by House Speaker Thomas Foley and other Democratic leaders.

The proposal calls for defense cuts of as much as 50 percent ''if national security conditions warrant.'' House Democratic leader Richard Gephart of Missouri called the party's plan ''visionary'' and added it ''represents a true consensus among the members.''

Panetta's budget calls for increases in child care, education, science, transportation and other domestic programs.

Things are going so well at Cape Canaveral, NASA has moved up the launch date for the shuttle Discovery to next Tuesday.

The decision to move the launch up by one day came after engineers successfully tested a new hydraulic power unit aboard the shuttle last night. The new unit is a replacement for a malfunctioning one that scrubbed an earlier launch attempt on April 10th.

If things go according to plan, the Discovery crew will launch the shuttle's payload- the Hubble Space Telescope- into a 380-mile-high orbit on the second day of the mission.

The one-point-five-BILLION-dollar telescope is the most expensive satellite ever built and will operate above the Earth's atmosphere. It's expected to help astronomers answer fundamental questions about the birth of the universe.

#90108u4496 04/18/1990 ~United Press International

(APRIL 18) UPI - A Supreme Court ruling today in an Ohio case gives a boost to those attempting to outlaw child pornography.

The court ruled 6-3 that the mere possession of child pornography can be made illegal. The high court upheld an Ohio law that had been challenged by Clyde Osborne, who was convicted in 1985 of possessing in his Columbus home pornographic pictures of children.

In its ruling, the high court focused on the protective aspects of the Ohio law, giving broad approval to laws aimed at protecting youthful victims of child pornography.

But Justice Byron White's opinion specifically separated child pornography from other forms of obscenity.

In other action, the court ruled that a federal judge went too far when he ordered an increase in property taxes in Kansas City, Missouri, to pay for a school desegration plan.

But the justices approved of the intended result of the order- to force Kansas City to pay for the plan.

The House passed a bill today that its backers say will toughen laws against retail price fixing.

The bill is aimed at so-called vertical price fixing, in which manufacturers set a minimum price for certain goods. Under the practice, stores that buy the goods must agree NOT to sell them for less than the minimum.

Some discount retailers have complained that manufacturers threaten to stop doing business with them if they doN'T honor the minimum price.

Supporters of the bill say it's needed to combat price fixing which they say is increasing because of lax enforcement of anti-trust laws.

The measure was passed in the House 235-157, and was sent to the Senate.

Opponents say the bill would interfere with legitimate business decisions, and would cause a flood of lawsuits against manufacturers.

Attorney General Thornburgh opposes the bill, and has said he'll recommend a veto if it reaches the president's desk.

#90108u4544 04/18/1990 ~United Press International

(APRIL 18) UPI - Arms control adviser Edward Rowny today explained some of the differences currently dividing Soviet and American negotiators. He said Moscow has laid a whole ''new set of concessions'' on the table.

Speaking to the Reserve Officers Association in Washington, Rowny said the United States has yet to see any move toward a compromise on the part of Soviet negotiators at the ministerial talks. And he questioned President Gorbachev's recent promise to visiting U-S senators in Moscow that he would ask his team to move the talks along.

Rowny said one of the obstacles facing negotiators is the range limits set for air-launched cruise missiles to be considered as weapons under a START treaty. Moscow wants a 600-kilometer limit while Washington favors a 15-hundred kilometer limit.

Negotiators are under a lot of pressure to fashion some kind of arms control accord by the time President Bush and Gorbachev meet for their summit at the end of May.

American Telephone and Telegraph Company shareholders have overwhelmingly

rejected a proposal banning corporate funding for organizations endorsing abortion.

The NON-binding anti-abortion resolution was proposed by Iowa abortion foe Sherley Leschin. It received support from only about five-and-a-half percent of the company's shareholders. The tally was announced at the telecommuncations giants' 105th annual meeting in Los Angeles today.

The abortion issue and A-T-T's recent decision to withdraw 50-thousand dollars in annual funding to Planned Parenthood was the focus of the three-hour meeting. The organization advocates abortion rights and provides teen-agers with family counseling.

Although today's resolution was struck down, Planned Parenthood supporters say A-T-and-T's withdrawal of financial aid amounts to an endorsement of the proposal.

#90108u4678 04/18/1990 ~United Press International

(APRIL 18) UPI - The White House says it is prepared to respond if reports turn out to be true of the pending release of a U-S hostage in Lebanon. Sources told Arabic radio a pro-Iranian group will free one of its three American captives by Friday.

The Damascus-based correspondent of the Arabic-speaking Monte Carlo radio station quoted diplomatic sources in Syria as saying Jesse Turner will be freed. The former teacher at Beirut University College was abducted in 1987.

Soviet Foreign Ministry spokesman Gennedy Gerasimov predicts Moscow's economic sanctions against Lithuania will work. As Gerasimov addressed a luncheon at the University of Hartford in Connecticut today, Lithuanian-American demonstrators marched outside.

Gerasimov's comments came hours before Lithuanian officials announced the Soviet Union had stopped pumping crude oil to the republic's main refinery. They say the Soviets cut the flow of oil shortly after the Lithuanian Parliament refused to rescind independence legislation.

Authorities in Panama City say a Panamanian aircraft rented from a U-S company crashed into the Pacific Ocean today shortly after takeoff. Only two of the 22 people aboard reportedly survived the crash.

Coastal central California was rocked by dozens of earthquakes today... aftershocks to October's deadly quake. Authorities report NO injuries. But the shakers triggered mudslides, cut electrical power and knocked at least three homes off their foundations.

House Democrats put themselves on a collision course with President Bush when they unveiled their fiscal 1991 budget plan today. The one-point-two-BILLION-dollar blueprint would cut defense spending eight-point-three-BILLION dollars more than Bush wants.

-30- 1914

#90108u4698 04/18/1990 ~United Press International

(APRIL 18) UPI - Britain's trade secretary says the government is ''entirely satisfied'' that steel pipes seized last week en route to Iraq were to be used in building the world's largest artillery gun. Iraq has said the pipes were for a petrochemical complex.

Two police officers, a prison guard and one inmate were slightly injured today when more than 700 prisoners rioted at a Mexican prison across the border from Laredo, Texas. The uprising apparently was sparked by a foiled escape attempt two days ago. It was brought under control within 30 minutes.

Navy officials say NO one was injured in a fire that broke out today aboard a nuclear submarine at the Puget Sound Naval Shipyard in Bremerton, Washington. They say the sub had been deactivated and there was NO nuclear fuel aboard.

A small chemical explosion at a North Carolina State University lab in Raleigh forced the evacuation of the building and prompted the shutdown of a small nuclear reactor today. At least seven people were exposed to smoke but NONE were hospitalized.

A reputed gang member who killed another man for stepping on his toe in a Manhattan disco in 1985 was sentenced today by a New York state Supreme Court judge to 25 years to life in prison. The judge called the defendent ''a super violent person.''

School officials in the Chicago suburb of Cicero, Illinois, will use trained dogs to search for drugs in students' lockers and cars at two high schools. School board president George Schvach admits there have been less than five drug-related incidents since last September, but he says one is one too many.

-30- 1780

#90108u4876 04/18/1990 ~United Press International

(APRIL 18) UPI - Freedom may be just around the corner for one American hostage believed to be held by a pro-Iranian group in Lebanon. The Islamic Jihad For The Liberation of Palestine released a statement in Moslem west Beirut today, saying it would release one of three American captives by

Friday. Jihad says the move comes in response to Syrian efforts and an urgent appeal from Iran. Sources told Arabic radio that 42-year-old Jesse Turner would be the hostage freed.

The White House says President Bush is looking for a way to respond to Moscow's latest pressure on Lithuania, but he knows ''direct intervention'' is NOT possible. Lithuanian officials say the Soviet Union stopped pumping crude oil to the republic tonight, after Lithuania's parliament refused to back off on independence. The White House says the Bush administration is waiting to see if the report is true, before deciding on the ''proper course of action.''

U-S Air Force officials in Panama say the search will resume tomorrow for 20 people missing following the crash of a Panamanian airliner rented from a U-S company. The plane, with 22 people aboard, crashed into the Pacific Ocean shortly after take-off on a flight from Contadora Island to Panama City. Panamanian Radio says four of the people aboard were Americans, two were French and 16 were Panamanians.

Greenpeace says two-thirds of the nearly 16-hundred U-S Navy accidents in the 1980's went UNreported by the news media. A Greenpeace report entitled ''Naval Safety 1989: The Year of the Accident'' also finds 40 percent of those accidents occurred aboard nuclear-powered submarines. The anti-nuclear environmental group notes that despite last year's U-S-S Iowa explosion and several other accidents, 1989 was one of the Navy's safest years.

#90109b0014 04/19/1990 ~Business Wire

CLEVELAND (APRIL 19) BUSINESS WIRE - Parker Hannifin Corporation (NYSE:PH) today announced increased sales, net income, earnings per share and backlog from continuing operations for the third quarter of fiscal 1990, ended March 31, compared to the same quarter last year.

Sales from continuing operations for the recent quarter totaled $636.5 million, up 2.8 percent compared to $619.4 million a year ago. Net income from continuing operations was $29.7 million or $.61 per share for the third quarter of fiscal 1990, up 1.4 percent compared to $29.3 million or $.60 per share for the third quarter of 1989.

Nine-month sales from continuing operations totaled $1.80 billion, up 2.5 percent compared to $1.76 billion a year ago. Nine month net income from continuing operations decreased 4.9 percent to $77.1 million or $1.58 per share, compared to $81.0 million or $1.67 per share a year earlier. Income for the nine months, including the impact of discontinued operations and the early redemption of debt premium, was $78.1 million or $1.60 per share compared to $84.0 million or $1.73 per share for the same

period a year ago, before the $.44 per-share addition for the cumulative effect of accounting changes. Backlog at March 31, 1990 was $1.21 billion, compared to $1.13 billion a year ago.

LATHAM, NY (APRIL 19) BUSINESS WIRE - In conjunction with the celebration of EARTH DAY 1990, Bio Scrub Industries of Latham, N.Y., is happy to announce the release of a new product which will be of interest to people who are concerned about chemicals and pesticides on fruits and vegetables.

''Veggy Fruit Scrub'' is a new, direct method of cleaning fruits and vegetables. Significantly better than water, it is designed for in-home use to help remove topical pesticides, herbicides, fungicide residues, soil, dirt and harmful bacteria. It even removes waxes used on produce.

The organic wetting agents in Veggy Fruit Scrub physically bind to the impurities on the surface and inside the skins of fruits and vegetables. After proper application, the impurities are pulled into the rinse water and down the drain.

Why wash fruits and vegetables? Health and nutrition experts recommend washing all produce whether it is commercially grown or certified organic.

Thus, as we continue to discover the health benefits of eating fresh produce, the practice of good produce hygiene becomes more and more important.

Can anyone use Veggy Fruit Scrub? The Scrub Brush Sponge is convenient for the whole family to use. It is non-toxic, has no taste or smell and is specifically designed for cleaning produce.

Veggy Fruit Scrub has been laboratory tested and is completely safe and effective.

At present Veggy Fruit Scrub is being sold only by mail order. A convenient three pack, which sells for $5.95 plus $2.50 shipping and handling, is enough to wash 100 fruits and vegetables.

For additional information, please contact Mark Sterman, president, Bio Scrub Industries, 601 New Loudon Rd., Suite 152 Latham, NY 12110. Phone: 518/235-7910.

#90109b0037 04/19/1990 ~Business Wire

KANSAS CITY, MO (APRIL 19) BUSINESS WIRE - Concern for the environment

has been a long-standing tradition at US Sprint, and Thursday the nation's third-largest long-distance carrier continues that tradition.

On Earth Day (April 22) US Sprint is encouraging its employees across the nation to get actively involved in local environmental concerns. In fact, through US Sprint's arrangement with its customer -- Working Assets Funding Service -- many of the Earth Day sites across the country have signed up for the Working Assets Long-Distance program.

Working Assets, a customer of US Sprint's since April 1988, markets US Sprint's services to its members. It then donates one percent of its members' monthly usage charges to social causes, such as the environment.

US Sprint, which operates the nation's only all-digital, all fiber-optic network, has shown its concern for the environment from the day it came into being, July 1986, as it built its 23,000-mile fiber-optic network across the United States.

As work crews buried the cable 42 to 48 inches below the ground, they encountered floods, swamps, mudslides and a variety of wild creatures, including numerous rattlesnakes. Despite those obstacles, within three years US Sprint had placed fiber-optic cable and spurs into every state in the continental United States.

During that period crews had to navigate the cable around the potential habitats of endangered ferrets in Cheyenne, Wyoming, avoid disturbing rare fringe-toed lizards in southern California, and arrange not to disrupt fish spawning grounds in Ohio and California. At one point, US Sprint's plans to install cable across 1,700 feet of the St. Croix River near Hudson, Wisconsin, were in serious jeopardy. A rare species of clams resided there and digging would have caused irreparable damage. The solution? US Sprint physically moved 707 living clams upriver out of harm's way. In a similar situation in Mississippi, crews were able to tunnel under clams without any disruption.

Today, the company continues to show its environmental concerns by encouraging its 18,000 employees to recycle products on and off the job. In 1989 alone, the company recycled tons of paper, and is in the process of recycling toner cartridges from laser printers. On the drawing board are programs to recycle aluminum cans, use recycled paper, biodegradable products and eliminate styrofoam products.

''We have made significant strides to make the earth a better place to live,'' said Courson, ''but we have a long way to go. Events such as Earth Day help focus attention on the environment, but every day should be Earth Day.''

#90109b0072 04/19/1990 ~Business Wire

MILWAUKEE (APRIL 19) BUSINESS WIRE - Firstar Corp. Thursday announced record first quarter earnings of $23.6 million, or $1.01 per common share, up 17 percent from a year ago.

Firstar directors approved an 18 percent increase in the quarterly dividend, from 28 to 33 cents, resulting in an annual dividend level of $1.32 per common share.

Return on equity reached 17.00 percent compared with 16.34 percent a year ago, and return on assets was 1.15 percent vs. 1.07 percent.

''A 17 percent earnings increase and a 17 percent return on equity is an especially satisfying accomplishment in the current national economic environment,'' said Firstar chairman John Hendee Jr. ''It reflects the continuing stability of our regional economy as well as the combined excellent performance of our subsidiaries.''

During the quarter, total assets averaged $8.3 billion, up 9 percent from a year earlier. Total average loans increased 6 percent to $5.3 billion, and total deposits were up 7 percent, averaging $6.7 billion for the quarter. Stockholders' equity averaged $590 million for the first quarter and represented 7 percent of total average assets.

The reserve for loan losses was strengthened by $12 million from a year ago and stood at $99 million on March 31. This was 1.86 percent of loans up from 1.80 percent at year end 1989.

Nonperforming assets totalled $107 million, and represented 2.00 percent of loans and other real estate. This was up from 1.61 percent at year-end and 1.78 percent a year earlier. Higher levels of real estate related loans accounted for most of the rise in nonperforming assets. ''This will not preclude another strong earnings performance in 1990,'' said Hendee.

Firstar Corp. is the largest bank holding company headquartered in Wisconsin, with $8.4 billion in assets. It owns 39 banks with 126 offices in Wisconsin, Minnesota, Illinois and Arizona. Subsidiaries include companies providing trust, insurance, securities brokerage, and other financial services.

#90109b0075 04/19/1990 ~Business Wire

SEATTLE (APRIL 19) BUSINESS WIRE - University Savings Bank Thursday reported net earnings of $1,815,000 for the third quarter of fiscal 1990, which ended March 31.

This represented a 69 percent increase over earnings of $1,075,000 reported in the third quarter a year ago.

Net earnings increased 19 percent to $4,759,000 for the nine months ended March 31, compared with net earnings of $3,989,000 for the nine months ended March 31, 1989.

The bank's interest rate spread, the difference between the yield on earnings assets and cost of funds, was 2.70 percent for the third quarter this year. This compares with 2.42 percent in the third quarter one year ago and 2.64 percent in the second quarter this year. Net interest income in the third quarter at University Savings Bank was $5.9 million, an increase of $1 million compared with the third quarter one year earlier.

The bank generated $65.7 million in loan volume during the third quarter this year -- $18.6 million more than the amount generated in the third quarter last year. Customer deposits were $756.5 million on March 31, compared with $678.2 million one year earlier.

Non-interest expense for the third quarter was $3.5 million, representing a 10 percent decrease from the $3.9 million in non-interest expense recorded in the third quarter one year ago.

University Savings Bank was acquired by GLENFED Inc. on March 31, 1989. GLENFED Inc. is the parent company of Glendale Federal Bank, the nation's fifth largest savings institution. GLENFED Inc. reported earnings of $26.3 million, or 85 cents per share, for the quarter ended March 31.

University Savings Bank serves the Puget Sound market through a network of 22 offices in King, Pierce and Snohomish counties. The bank ranks fifth among Washington savings institutions in customer deposits and seventh in asset size.

CUPERTINO, CA (APRIL 19) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) announced Thursday that Metrodata Group will be Tandem's exclusive distributor in Indonesia.

A new Metrodata subsidiary, PT Metrodata Demindo, will be responsible for marketing and providing full support for Tandem's complete range of online transaction processing and fault-tolerant computer systems.

Metrodata has been a leading information technology supplier in Indonesia for more than 15 years. It has more than 70 installations in the banking industry alone. Metrodata already represents international vendors including Cray, Hitachi Data Systems, Wang, EDS, Acer, Epson and several others.

Explaining Tandem's move into the Indonesian market, Santha Kumar, area managing director of Tandem Computers International Inc. in Singapore, said: ''Our long term plans are to offer Tandem products and services throughout the region, of which Indonesia is a significant market.

''Indonesia's buoyant economy, coupled with deregulation of the banking sector, will stimulate demand for online transaction processing and fault-tolerant computing -- both area in which Tandem enjoys a leadership position. Together with Metrodata's support, we are confident we can meet much of that demand.

''We are very happy with Tandem's decision to appoint Metrodata as its distributor,'' said Lesan Limanardja, president director of the Metrodata Group.

''We are confident that Tandem, as a leading manufacturer of online transaction processing systems, can offer the best solutions to financial

institutions that will enable them to prepare for the demanding and crucial challenges ahead. Metrodata Demindo and Tandem have the experience and the resources to help the banking industry meet these demands.''

Tandem also announced its first sale in Indonesia to Bank Danamon, one of Indonesia's leading private banks, which will use a Tandem NonStop computer system to support its ATM operations.

Tandem Computers manufactures and markets computer systems and networks for online transaction processing. Corporate headquarters are located in Cupertino. Telephone number is 408/725-6000.

LOS ANGELES (APRIL 19) BUSINESS WIRE - Home Savings of America, the principal subsidiary of H.F. Ahmanson & Company (AHM-NYSE) and Golden Coin Savings and Loan Association jointly announced Thursday the signing of a definitive agreement for Home Savings to acquire two branch offices of Golden Coin.

Home Savings will acquire the deposits and facility of Golden Coin's branch on Clement Street in San Francisco and Golden Coin's license and branch facility at 835 Kearny Street in San Francisco's Chinatown. The Clement Street branch has approximately $40 million in deposits. Both branches will become part of Home Savings of America's nationwide branch network of 359 savings branches.

Pending regulatory approvals, the sale is expected to close in the third quarter of this year.

Golden Coin, a state-chartered savings and loan with headquarters in San Francisco, operates five branches in the San Francisco Bay area and one in Sacramento. At Dec. 31, 1989, it had total assets of $223 million, total deposits of $200 million and GAAP capital of $7 million.

H.F. Ahmanson & Company, with more than $46 billion in assets, is the parent company of Home Savings of America. Home's $33.7 billion deposit base is the largest of any U.S. savings institution. It operates 359 savings branches in nine states and 102 mortgage lending offices in 18 states. In California, it operates 172 savings branches and 53 lending offices.

#90109b0110 04/19/1990 ~Business Wire
SAN ANTONIO, TX (APRIL 19) BUSINESS WIRE - Diamond Shamrock Inc. reported net earnings of $4.3 million for the first quarter, compared to $14.9 million for the same period last year.

Primary earnings per share were 11 cents, down from the first quarter 1989 per share earnings of 56 cents.

Revenues increased 25 percent for the first quarter to $584.6 million, up from $466.5 million for the same period last year.

At the McKee refinery, Diamond Shamrock started-up its new 25,000 barrel per day continuous catalyst regeneration reformer yesterday.

The new unit is an efficient octane generating unit that enables the refinery to increase its high octane gasoline production and contributes to the future expansion of the refinery.

The start-up of a new crude distillation unit at the Three Rivers refinery will be completed by mid-May, increasing the crude throughput from 50,000 to 55,000 barrels per day and laying the foundation to expand to 70,000 barrels per day over the next few years.

The propane/propylene splitter construction project at Mont Belvieu is on schedule and should also come on-stream by mid-May. The splitter will upgrade refinery grade propylene to produce higher valued petrochemical feedstock.

Diamond Shamrock's retail operations performed exceptionally well during the quarter with sales volumes per store up 7 percent over the same period last year, and merchandise sales volumes per store up 10 percent over last year.

Seven new Diamond Shamrock Corner Stores were opened during the first quarter, with 11 additional stores under construction. The company plans to build 40 new retail stores during the year.

Diamond Shamrock, with annual sales of approximately $2.1 billion, is a regional refiner and marketer of petroleum products. The San Antonio-based corporation has two Texas refineries with a throughput capacity of 160,000 barrels per day, markets gasoline through about 2,000 Diamond Shamrock branded outlets, processes natural gas, and stores and markets natural gas liquids.

SEATTLE (APRIL 19) BUSINESS WIRE - Constance W. Rice, Ph.D., who is married to Seattle Mayor Norm Rice and who, until recently, owned her own public relations business, has been elected to the boards of directors of Security Pacific Bancorporation Northwest and Security Pacific Bank Washington Thursday.

Rice, who was the first black woman to receive a Ph.D. from the College of Education, Department of Higher Education and an M.P.A. from the Graduate School of Public Administration at the University of Washington, brings a broad array of educational, business and civic experiences to her new position.

President and principal of CWR Inc., a public relations and management consulting firm from 1984 until late last year, Rice currently is co-chair of the Educational Summit, a city-wide effort to provide support for and recommendations to Seattle Public Schools. She has served as an assistant executive director of the Washington Education Association and was a manager at METRO before that.

Rice also has extensive experience in the public education field serving

as chairperson for the Ethnic Studies Division at Shoreline Community College; Director of the Center for Urban Studies at Western Washington State University, and as a program assistant for the State Board for Community College Education.

Rice serves on numerous boards, including the Fred Hutchinson Foundation Board, Evergreen State College Board of Regents, Pacific Science Center Foundation Board, and is a Trustee of the Seattle Foundation. She is a founding board member of the Columbia Club, the 101 Black Women organization and CityClub.

Security Pacific Bank Washington is the principal subsidiary of Security Pacific Bancorporation Northwest, a Seattle-based, multi-bank holding company with assets of $10.2 billion. Other subsidiaries operate in Oregon and Alaska. The Bancorporation is an affiliate of Security Pacific Corp., the nation's fifth-largest banking company.

#90109b0116 04/19/1990 ~Business Wire

DEERFIELD, IL (APRIL 19) BUSINESS WIRE - As projected earlier in April, Baxter Thursday reported a first-quarter net loss of $383 million, or $1.59 per share.

The first-quarter loss resulted from a pre-tax provision of $566 million to cover the cost of a previously announced restructuring program. The company said first-quarter sales were $1.9 billion, an increase of 7 percent from the first quarter of 1989. Operating income for the quarter, exclusive of restructuring program costs, decreased 9 percent to $159 million.

The company said on Apr. 4 it would sell or close 21 manufacturing facilities worldwide; reduce its work force by 10 percent or approximately 6,400 jobs, including 700 jobs at its corporate headquarters; and divest several marginal businesses. The company said today that the largest business it plans to exit is its manufacturing operations for urological products, which employs some 800 people at facilities in Irwindale, Calif. and Mexicali, Mexico.

Baxter also said on Apr. 4 that it is setting up a separate subsidiary for its $1.4-billion diagnostics business, and will consider a possible public offering of a minority interest.

The restructuring is expected to produce annual pre-tax savings increasing to approximately $275 million by 1993. In addition, the company said it

expects to increase operating income, exclusive of the restructuring program costs, by 15 to 18 percent per year for the next several years, as well as significantly improve cash flow and return on shareholders' equity.

Domestic sales for the first quarter were $1.5 billion, and sales from international markets were $432 million. International sales growth in local currency was approximately 13.5 percent for the quarter.

The decrease in other non-operating income in the first quarter of 1990 was due to a lower level of net gains associated with the disposition of minor business units and investments, and a higher level of foreign exchange losses. Additionally, in the first quarter of 1989 the company sold a 50 percent equity interest in a portion of its clinical nutrition products business that resulted in a gain of $38 million (net of $17 million related income tax expense).

Baxter International Inc. is the leading worldwide manufacturer and marketer of health-care products, systems and services. It offers 120,000 products to health-care providers in 100 countries.

NEWPORT BEACH, CA (APRIL 19) BUSINESS WIRE - Mortgage Investments Plus Inc. (ASE:MIP), a real estate investment trust advised by Koll Realty Advisors, Thursday reported operating results for the three months ended Mar. 31.

Consolidated funds available for distribution of 16 cents per share for the three months ended Mar. 31 was unchanged compared with 1989. Consolidated net income increased to $1,069,700, or 12 cents per share, compared with $952,200, or 11 cents per share, for the first quarter of 1989. Joint venture operations improved in 1990 compared with 1989, although this improvement was offset by non-performing loans.

Mortgage Investments Plus Inc. has a $117 million portfolio of equity investments on industrial, retail, office, research and development properties in California. The company's portfolio includes 14 completed joint venture projects, two joint venture projects under development and approximately $50 million in equity enhanced mortgages.

#90109b0171 04/19/1990 ~Business Wire

SALT LAKE CITY (APRIL 19) BUSINESS WIRE - S.N.L. Financial Corp. (NASDAQ:SNL) Thursday announced financial results for its year ended Dec. 31, 1989.

Revenues for 1989 rose to $25,674,000 as compared to revenues of $22,880,000 for 1988, a 12.2 percent increase in annual revenues. Net income for the year ended Dec. 31, 1989 was $436,000, or 16 cents per share, as compared to net income of $1,760,000, or 58 cents per share, for the year ended Dec. 31, 1988.

The reduction in net income from 1988 to 1989 was due to a provision for losses on investment securities which amounted to $4 million in 1989. The net income for 1989 also reflected a $2 million upward adjustment as a result of the accounting changes which the company adopted in 1989.

The provision for losses on investment securities of $4 million was primarily due to four bonds which are currently in default. These bonds were acquired by S.N.L. at a cost of $6,206,000, and currently have a market value estimated to be $941,000. Three of the issuers of these bonds have filed for protection under Chapter 11 of the Bankruptcy Code.

This loss provision reduces the value of these bonds to projected net realizable value and was established on the basis of information regarding the financial position of the issuers, the progress of related bankruptcy proceedings, and other information relevant to the current value of the bonds.

The provision for income taxes for 1988 and 1987 was reported on the deferred method and has not been restated to reflect the liability method. The adoption of SFAS 96 resulted in an increase of net income of $2 million (71 cents per share) for 1989, which reflects the cumulative effect of the application of the new accounting method for prior years.

Capitalized acquisition costs related to this type of contract are amortized based on a constant percentage of the present value of estimated gross profits from such business. SFAS No. 97 also requires that investment gains and losses be reported as a component of other income before income taxes.

The company implemented SFAS No. 97 in the first quarter of 1989 and has effected the required restatement of certain account balances and other information reported in prior years. The accounting treatment impacts earnings, premiums and other income as well as current future benefits. Therefore, net income from operations have been decreased by approximately $144,000 for 1988 and $95,000 for 1987.

The cumulative effect of the implementation of SFAS 97 decreased retained earnings as of Jan. 1, 1987 by approximately $25,000. Total revenues and increase in future policy benefits have been reduced by approximately $21 million in 1988 and $25 million in 1987.

#90109b0173 04/19/1990 ~Business Wire

CHICAGO (APRIL 19) BUSINESS WIRE - A senior executive of United Airlines said Thursday that the airline is committed to achieving the goals of increased airport productivity at O'Hare International Airport while balancing vital environmental concerns of the community.

''Our challenge is to maintain and expand O'Hare's value to the region and yet do so in a way compatible with the environmental goals of the area,'' said Lawrence M. Nagin, senior vice president-corporate and external affairs for United.

He also said that he is confident that governmental leaders, airport authorities, air carriers, area businesses and local citizens can work cooperatively and productively toward those goals. Nagin said that United welcomes opportunities to meet with community leaders to discuss with them their own visions of O'Hare.

''We must lower the din surrounding these issues and begin constructive analysis. This analysis cannot be deferred. We cannot stand in place while the Dallas/Fort Worth area moves forward with its efforts to displace the Chicago area as the nation's pre-eminent mid-continent transportation center.

We must continue to improve and expand O'Hare consistent with the economic and environmental well-being of our region.

''We do not believe anything can be achieved if we are not prepared to factor into the O'Hare equation the vital environmental and economic interests of all affected parties. We at United want to assure each of you that we are prepared both to listen and to act.''

He pointed out that United has increased its percentage of the quietest Stage 3 aircraft in its fleet to 52 percent and noted that United has $19 billion in orders for the newest, quietest aircraft available, and that United is accepting those new aircraft at an average rate of one a week for the next four years.

Nagin cited a number of issues which must be studied to determine the most productive course of action for the future of O'Hare and addressing environmental concerns.

He called for an analysis of sound attenuation programs; improved land use planning; noise monitoring; an airport noise budget; new quieter approach and take-off procedures; noise reduction that flows from runway realignments, and a new runway at O'Hare.

Commenting on the value of O'Hare to the region, Nagin told the group that O'Hare contributes $9 billion annually to the economy of the region; is the State of Illinois' seventh largest employer with 186,000 airport-related jobs and brings 2.1 million people annually to Chicago for conventions, trade shows and meetings.

He further pointed out that major public works projects on the drawing boards, including an expansion of McCormick Place, a new $70 million convention center in Schaumburg and an expansion of the Rosemont convention center depend on a vibrant, healthy O'Hare Airport.

#90109b0176 04/19/1990 ~Business Wire

CHULA VISTA, CA (APRIL 19) BUSINESS WIRE - Rohr Industries Thursday announced that it had completed negotiations with The Boeing Company to provide jet engine struts for Boeing 757 aircraft.

Struts, also called pylons, are the structures that attach the propulsion system to the aircraft. The new contract, which begins in January 1991, is valued at more than $280 million, including options.

Rohr has delivered struts for more than 300 Boeing 757s since August 1981. Boeing 757s are powered by either Pratt & Whitney PW2037 or Rolls Royce

RB211-535 jet engines. Rohr also manufactures the nacelle system for Rolls Royce-powered 757s.

''The Boeing 757 is an important part of Rohr's business and this contract is very valuable to us,'' said Vince Walsh, Rohr's program general manager Boeing programs. ''It continues our long relationship with Boeing and because of its mutually beneficial aspects, epitomizes Boeing's philosophy of fostering a partnership relationship with its suppliers. We're pleased to be a part of this vital program,'' he said.

Rohr designs, integrates, manufactures and supports aircraft engine nacelle systems and components for commercial, military and business aircraft. The company also manufactures solid rocket motor casings and nozzles for space programs.

With headquarters in Chula Vista, Rohr has 10 facilities in the United States and one in Toulouse, France.

#90109b0178 04/19/1990 ~Business Wire

VAN NUYS, CA (APRIL 19) BUSINESS WIRE - Com Systems Inc. (ASE:CTM) reported a 74 percent increase in revenues to $25,970,000 for the quarter ended Dec. 31, 1989 vs. $14,933,000 for the corresponding period in 1988.

Revenue for the year ended Dec. 31, 1989 was $97,356,000, a 59 percent increase compared with revenue of $61,068,000 in the like period in 1988. For the quarter ended Dec. 31, 1989, the company reported a net loss of ($3,779,000), which, after preferred dividends, was ($4,016,000) or (81 cents) per share, compared with a net loss of ($8,198,000) for the three months ended Dec. 31, 1988, which, after preferred dividends, was ($8,367,000) or ($1.75) per share.

For the year ended Dec. 31, 1989, the company reported a net loss of ($10,260,000), which, after preferred dividends, was ($11,198,000) or ($2.25) per share, compared with a net loss for the year ended Dec. 31, 1988 of ($5,766,000), which was ($6,398,000) after preferred dividends or ($1.34) per share.

The losses for both the quarter and year ended Dec. 31, 1989 are primarily attributable to increased fraudulent calls and one-time promotional expenses associated with the public pay-phone presubscription business.

Fourth-quarter results also include a provision of $2,093,000 for certain contingent matters, including those relating to the anticipated costs of integrating the operations of Com Systems with TMC Communications Inc.

(''TMC''), a regional long-distance company with $35 million in annual revenues.

Com Systems provides long distance telephone and other enhanced services to customers located in the Western United States.

#90109b0179 04/19/1990 ~Business Wire

DUBLIN, CA (APRIL 19) BUSINESS WIRE - Hexcel Corp. (PES,NYSE:HXL) Thursday reported earnings of $1,229,000 for the first quarter of 1990, 20 percent below earnings in the first quarter of 1989 of $1,545,000.

The decrease reflected the continuation of delays and cutbacks in military aerospace programs and profit margin pressures on honeycomb materials. These factors have negatively affected the company's earnings since the first quarter of last year..

Sales in the recent quarter rose five percent to $106,763,000 from the first quarter 1989 level of $101,282,000.

Both primary and fully diluted earnings per share for the first quarter of 1990 were 18 cents, 18 percent below primary and fully diluted earnings per share of 22 percent reported in the comparable period of 1989.

Included in first quarter 1990 results was a benefit of approximately $810,000 pretax due to the extension of the depreciation recovery periods of certain property and equipment to coincide with changes in business conditions.

Also included was a $417,000 pretax gain on the repurchase of convertible subordinated debenutures, face value of $2,000,000. The change in the depreciation estimates and the gain on the debentures contributed ten cents per share to the quarter's earnings.

Hexcel is an international developer and manufacturer of honeycomb, advanced composites, reinforcement fabrics, fine chemicals and resins used in the commercial aerospace, space and defense and other growing markets.

#90109b0197 04/19/1990 ~Business Wire

PHOENIX (APRIL 19) BUSINESS WIRE - Pinnacle West Capital Corp. income from continuing operations for the quarter ended March 31, 1990 was $13.1 million, or 15 cents per share of common stock, compared to $40.9 million, or 47 cents per share, for the same period in 1989, Chairman Richard Snell said Thursday.

During the first quarter of 1989, discontinued operations at MeraBank and Malapai Resources Co. resulted in a loss of approximately $19.9 million, or 23 cents per share.

Snell said the decline in earnings can be attributed to increased operating and maintenance expenses at the Palo Verde Nuclear Generating Station. In addition, as a result of the outages of Units 1 and 2 during the three month period, APS' purchased power and fuel costs also increased.

''The difference between first quarter 1990 and first quarter 1989 is that last year, all three units at Palo Verde operated through most of the quarter,'' Snell said. ''That was not the case this year.''

He said 1990 earnings also were impacted by the loss of revenues from Unit 4 at the Cholla Power Plant as well as a $13 million increase in Pinnacle West's interest expense resulting from the $450 million capital infusion into MeraBank last month.

Under terms of a sales agreement, APS had been selling approximately 350 megawatts of power from Cholla Unit 4 to Southern California Edison. A portion of the sales agreement, for 150 megawatts, expired on June 1, 1989 and the remainder of the agreement expires June 1, 1990.

APS earnings for the quarter were approximately $30.4 million compared to approximately $46.3 million in 1989. SunCor Development Co. earned $550,000 and El Dorado Investment Co. earned approximately $1 million during the first three months of 1990. During the same period in 1989,

SunCor recorded a loss of approximately $602,000 and El Dorado's loss was $67,000.

SunCor's first quarter 1990 earnings do not reflect the April 4 sale of The Wigwam Resort and Country Club to Kabuto Phoenix International Inc. Snell said SunCor will record a profit on the sale over the life of the hotel management contract between SunCor and Kabuto.

For the 12 months ended March 31, 1990, Pinnacle West income from continuing operations was $96.7 million, or $1.12 per share, compared to $147.9 million, or $1.71 per share, during the same period a year ago.

Including the effect of discontinued operations for the 12 month period ended March 31, 1990, Pinnacle West recorded a net loss of approximately $559.3 million, or $6.44 per share. For the 12-month period ended March 31, 1989, including the effect of discontinued operations, Pinnacle West recorded a net loss of approximately $5.2 million, or 6 cents per share.

NEWPORT BEACH, CA (APRIL 19) BUSINESS WIRE - The board of directors of Downey Savings and Loan Association (NYSE/PSE:DSL) Thursday declared a seven-cents-per-share cash dividend payable on May 17 to holders of record on April 30.

In making the dividend announcement, Chief Executive Officer Gerald H. McQuarrie said that the soon-to-be-released results for the first quarter of 1990 will reflect the continued growth in revenues established by the company over the past few years.

McQuarrie noted that Downey ended 1989 in a strong capital position and is dedicated to even further improvement in 1990.

Downey Savings has assets of $4 billion and 49 offices throughout California.

VANCOUVER, BRITISH COLUMBIA (APRIL 19) BUSINESS WIRE - Henry G. Ewanchuk, president and chief executive officer of Bethlehem Resources Corp. (TSE VSE SYMBOL:BTH/NASDAQ:BTHMF), announced that exploration results have been received from Cominco Ltd. for work completed during 1989 on the Estella Property located 28 km east of Kimberley, British Columbia in the Fort Steele Mining Division.

Under a recently concluded agreement between Bethlehem, Bakra Resources Ltd. and Cominco Ltd., mineral claims held by all three companies in the area surrounding the former Estella Mine, have been pooled under an arrangement whereby Cominco will have the right to fund and carry out $2 million of exploration work on the combined properties.

Thereafter, a joint venture will be formed with Bethlehem, Bakra and Cominco holding initial interests of 60 percent, 20 percent and 20 percent respectively.

The Estella deposit was discovered in 1985 and later produced 118,000 tons grading 3.5 percent Pb, 8.2 percent Zn and 1.7 oz/t Ag during the 1950's and 1960's. During 1989, Cominco completed geological mapping, soil geochemistry and deep penetrating electromagnetic (UTEM) surveys on the pooled property.

The property covers Precambrian rocks of the Fort Steele, Aldridge and Creston Formations and includes geological settings which may be similar

to Cominco's Sullivan Mine. Soil sampling by Cominco in 1989 and Bakra in 1987 revealed isolated anomalously high base metal values and one larger anomaly extending 1.5 km and containing values up to 1526 ppm lead and 1230 zinc.

Geophysical surveying in 1989 located a number of conductors on the property, including a strong channel 3 response along trend to the northwest of the Estella deposit.

A stage 1 program of further geophysical surveying, geochemistry and diamond drilling will be initiated by Cominco Ltd. when weather permits to follow up encouraging results obtained during the 1989 program.

SAN FRANCISCO (APRIL 19) BUSINESS WIRE - Ellen Michelfelder, 44, has been elected executive vice president at The Bank of California.

She is director of the internal resources group, which includes human resources, corporate communications and payment services. She also serves on the bank's policy committee.

Michelfelder was featured as one of ''100 Women to Watch in Corporate America'' by Business Month last year. She joined The Bank of California as senior vice president of human resources in 1985. Her career at the bank encompasses management of client services and staff functions. All personnel programs for the bank's 3,700 employees are under her administration.

The Bank of California, the sixth largest in the state, was the first incorporated banking institution in the West. The 125-year-old organization has $7.9 billion in assets and offices in three states: California, Washington and Oregon.

DALLAS (APRIL 19) BUSINESS WIRE - Financial Satellite Network (FSN) announced Thursday that it will co-produce and broadcast both regularly scheduled programs and educational conferences with the Bank Securities Association (BSA) beginning June 1.

The programs will address pertinent issues regarding the marketing of securities and investment services for banks, thrifts and other financial institutions. This unique programming gives bank securities professionals an opportunity never before possible by providing them, via satellite, the most up-to-date information available on bank securities trading.

In addition to regular legal and regulatory updates from BSA's general counsel Robert Kurucza, BSA subscribers will have the opportunity to see highlights of the BSA educational conferences, including the upcoming National Mutual Fund Conference, October 14-16. Kurucza's legal updates will be paired with other features including a CEO panel from the nation's leading mutual funds and a keynote address by William Donoghue, one of the nation's foremost authorities on the mutual fund industry.

In order to make these unique programs available to bank securities professionals throughout North America, Canada's national satellite carrier TeleSat will also air these broadcasts. This programming is a natural expansion of FSN's foundation which includes 60 new shows produced each month.

Non-subscribers will be offered selected programs at various sites throughout the country. This allows bank and brokerage professionals first hand information from the BSA's various educational conferences.

Financial Satellite Network, a wholly owned subsidiary of Drossos Networks Inc., is the first North American subscription-based television network for investment professionals. FSN is taking the lead in an industry that analysts predict will become a $1.6 billion market by the mid-1990s. In addition to the bank securities industry, the network serves as a revolutionary training and information vehicle for stock brokers, financial planners and insurance agents.

LIVERMORE, CA (APRIL 19) BUSINESS WIRE - Lawrence Livermore National Laboratory Director John Nuckolls denied an allegation in a federal report that stated that laboratory activities constituted ''a clear and present danger'' to workers or the public.

He also denied that health and safety items which were brought to the attention of the lab in a federal audit had not been resolved.

The allegations were made by Congressman George Miller based on a Federal

General Accounting Office report on health, safety and environment problems at U.S. Department of Energy facilities. Nuckolls said, ''I believe that Congressman Miller has been given inaccurate or out-of-date information.''

A news release from the congressman said a 1986 audit referred to by the GAO listed 14 ''health and safety violations'' which required ''immediate attention because they posed a clear and present danger to workers or the public'' and that four of these problem areas remained unresolved.

An audit did take place in 1986. None of the findings presented a clear and present danger to workers or the public and all of them have been resolved, Nuckolls said. ''We're contacting Congressman Miller to give him current and accurate information,'' he said.

SAN JOSE, CA (APRIL 19) BUSINESS WIRE - Businessland Inc. Thursday announced changes at its ComputerCraft Inc. retail subsidiary to bring it in line for profitable growth.

Brian Leeland has been named to the post of president of ComputerCraft reporting directly to David A. Norman, chairman, president and chief executive officer. Leeland has served as vice president of Businessland Rents since January 1989 and will continue in that capacity. He was one of the first Businessland employees and has been with the company since 1982 in operations, product management and marketing positions.

Armand Shapiro, president of ComputerCraft, has resigned his position to pursue other interests. Shapiro was affiliated with ComputerCraft for seven years and had been a member of the board of directors when ComputerCraft was acquired by Businessland in July 1988.

In the United Kingdom, the company announced a number of management changes aimed at strengthening the United Kingdom organization and increasing sales of value-added services and advanced systems products. The position of customer services director has been created and filled to assume responsibility for field engineering, customer training, systems consulting and Solution Line. Another new position of advanced systems and product manager has been filled, with responsibility for advanced systems sales.

In light of the third quarter losses, Businessland (UK) reviewed the performance of its employees and laid off 18 people as a result. The

company feels that current staffing levels are appropriate and that refocusing and reorganizing the operation will help it return to profitability.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan markets, five metropolitan areas in Great Britain, two in West Germany and five in Canada. It reported sales of $1.2 billion in fiscal 1989.

#90109b0622 04/19/1990 ~Business Wire

LOS ANGELES (APRIL 19) BUSINESS WIRE - A 784-unit apartment complex, known as Chase Grove at Washingtonian Center in Gaithersburg, Md., has been acquired by an affiliated partnership of R&B Enterprises for its nationwide chain of Oakwood Apartments.

The Maryland complex represents the firm's 77th Oakwood community, its seventh in the Washington, D.C., metropolitan area and its first in the state of Maryland.

The property was purchased from a partnership of Trammell Crow and Mutual Benefit Life Insurance Co. on April 10.

R&B Enterprises pioneered the extended-stay concept 10 years ago with the Oakwood Apartments, establishing the first network of its kind in the nation.

The Oakwood Apartments, positioned as ''The Un-Hotel,'' provide an alternative to hotel living for executives and other corporate travelers needing lodging for 30 days or longer due to relocation, training and special assignments.

According to Herbert Y. Rosenblum, president of R&B's Apartment Management Divison, ''the Chase Grove Acquisition represents a continuing effort on the company's part to expand the Oakwood network, nationally, during the next five years.''

R&B currently operates more than 35,000 apartment units in 77 locations

throughout California, Texas, Metropolitan Washington, D.C., Virginia and in Las Vegas, Chicago, Denver and Raleigh, N.C.

The Maryland property has been renamed Oakwood-Gaithersburg and will provide the services and amenities consistent thoroughout the Oakwood chain. Most Oakwoods provide resort-style recreation including swimming, tennis and fitness centers in addition to fully equipped kitchens, linens, dishes, maid service and VCR rentals.

Located in the planned development community of Washingtonian Center at the intersection of Interstate 270 and 370 at 9806 Mahogony Drive, the Gaithersburg complex offers one-, two- and three-bedroom apartments in 16 garden apartment buildings and an 11-story highrise.

Each unit has its own washer and dryer. The property provides a wide range of recreational amenities including three swimming pools, four tennis courts, two fitness centers, a volleyball court, exercise trail, barbeque and picnic areas and a free-standing Clubhouse. Conference and meeting facilities will be available shortly.

Washingtonian Center also features a 300,000-square-foot office tower, recently purchased by Bechtel, a 230,000-square-foot retail center and plans for a 284-room Marriott Hotel.

When completed, the center will contain 4.5 million square feet of office, retail and residential space. Additionally, the area is regional headquarters to major corporations such as Bechtel, IBM, McDonnell Douglas Control Data, General Electric, Gillette, Eastern Power, COMSAT and world headquarters to Martin Marietta.

In addition to the firm's chain of Oakwood Apartments, R&B also operates more than 12 million square feet of office, industrial and retail buildings in 80 locations throughout the Western United States.

#90109b0632 04/19/1990 ~Business Wire

MATTITUCK, NY and WHITE PLAINS, NY (APRIL 19) BUSINESS WIRE - North Fork Bancorporation (NYSE:NFB) and Eastchester Financial Corporation (NASDAQ:ECFC) announced Thursday that the two companies have entered into a definitive agreement under which Eastchester will merge with a subsidiary of North Fork.

Pursuant to the agreement, North Fork will pay Eastchester common stockholders $20.00 per share in cash, for a total purchase price of

approximately $79.5 million. As part of the agreement, Eastchester has agreed to suspend the payment of its regular quarterly dividend of 10 cents.

The merger is conditioned on, among other things, approval by Eastchester stockholders and the receipt of required regulatory approvals by both companies.

In connection with the execution of the merger agreement, Eastchester has granted to North Fork an option to purchase 780,000 shares of Eastchester common stock, exercisable at $14.00 per share upon the occurrence of certain events.

The transaction provides that Eastchester Savings Bank, a wholly owned subsidiary of Eastchester Financial, will retain its identity and local orientation by operating as a separate division of Southold Savings Bank, a wholly owned subsidiary of North Fork. Malcolm J. Delaney, President and Chief Executive Officer of Eastchester Financial, will serve as Chief Executive Officer of the Eastchester division and a Vice Chairman of Southold Savings.

John Adam Kanas, President and Chief Executive Officer of North Fork Bancorporation, said, ''Eastchester is a quality banking institution with an enviable reputation in its marketplace and an attractive deposit franchise. Our combined institutions will benefit through enhanced earnings opportunities brought about by economies of scale. Additionally geographic diversification resulting from the merger will add stability and value to our entire franchise.

Eastchester's Board of Directors amended its shareholder rights agreement so that the transaction will have no impact on the rights outstanding under the agreement.

North Fork Bancorporation, Inc. is the holding company for North Fork Bank and Trust Company and Southold Savings Bank. North Fork Bank and Trust is a commercial bank with 25 branches in Suffolk and Nassau Counties and Southold Savings is an eight-branch savings bank operating in Suffolk County. North Fork Bancorporation had total assets of $1.8 billion at December 31, 1989.

Eastchester Financial Corporation is the parent of Eastchester Savings Bank, which operates nine branch offices in Westchester and Rockland Counties. The Company had total assets of $524.9 million as of December 31, 1989.

#90109b0660 04/19/1990 ~Business Wire

BARBERTON, OH (APRIL 19) BUSINESS WIRE - Babcock & Wilcox and the Department of Energy have signed a cooperative agreement that clears the way for B&W to demonstrate a new technique that reduces emissions of nitrogen oxides (NOx) in a $10.6 million project at Wisconsin Power and Light's Nelson Dewey Plant in Cassville, Wis.

The technique, called ''coal reburning''will provide a cost-effective way to reduce NOx emissions by more than 50 percent from coal-burning power plants that burn crushed coal in a ''cyclone,'' or cylindrical burning chamber.

When the nitrogen in combustion air or contained in the coal itself fuses with oxygen in the burning process, NOx is formed in power plant emissions. This contributes to the formation of acid rain.

The coal reburning process separates the burning process into three combustion zones. Most of the fuel is fired in a cyclone furnace attached to the boiler with excess oxygen to assure complete combustion, as is typical of current cyclone operating practice. The remaining coal is then injected into a reburning zone in the boiler where the oxygen level has been substantially reduced below the level necessary to assure complete combustion. When the NOx formed in the first combustion zone mixes with the reburn combustion gas as the cyclone combustion gases enter the boiler it is converted into harmless nitrogen. Combustion is completed by adding air in a third zone, where lower temperatures prevent further NOx formation.

B&W, which will provide engineering, research, manufacturing and construction for the project, will install a pulverizer, reburn burners, overfire air ports, a reburn fuel handling system and an overall reburn control system. Engineering and project management for the clean coal project will be performed in B&W's Barberton location, and research will be performed at B&W's Alliance Research Center. Manufacturing will be done at B&W's West Point, Miss., and Paris, Texas, manufacturing facilities.

Other participants in the coal reburning project include Wisconsin Power & Light, the Electric Power Research Institute, the State of Illinois, and ten individual utilities that operate cyclone boilers.

A one-year testing period is scheduled to begin late in 1991.

Babcock & Wilcox is a major operating unit of McDermott International Inc. a leading worldwide energy services company. McDermott and its subsidiaries provide engineering and construction services for industrial and utility facilities onshore, and to the oil and gas industry offshore. They also manufacture steam-generating equipment, defense products and tubular products.

ENGLEWOOD, CO (APRIL 19) BUSINESS WIRE - U S WEST (NYSE:USW) Thursday reported earnings per share of 73 cents on net income of $271.9 million for the quarter ended March 31 -- an increase of 7.4 percent and 8.9 percent, respectively, over last year's first quarter when the company earned 68 cents per share on net income of $249.6 million.

The per share amounts reflect a two-for-one stock split announced by the company on April 6. On a pre-split basis, the company earned $1.45 per share compared to $1.37 per share during the first quarter of 1989.

''We had a good, solid quarter,'' said Chairman and Chief Executive Officer Jack MacAllister. ''We're pleased with the results.''

Sales and other revenues totaled $2.4 billion, a 1.4 percent increase over last year's first quarter revenues. Return on equity was 13.3 percent, compared to 12.7 percent in the first quarter of 1989.

''U S WEST Communications experienced strong access line and volume growth '' MacAllister said. ''However, with reduced rates and lower interstate access charges, telephone revenue growth was essentially flat. We experienced solid revenue growth in our non-telephone operations.''

The number of telephone access lines served by U S WEST Communications increased 360,000, or 3 percent, over the last 12 months. Minutes of long-distance usage increased 5.4 percent over the comparable quarter of 1989.

U S WEST owns U S WEST Communications and other companies involved in communications, data solutions, marketing services and financial services.

BAKERSFIELD, CA (APRIL 19) BUSINESS WIRE - Freymiller Trucking Inc. (NASDAQ:FRML) Thursday announced a 20 percent increase in revenues to a record $19,086,000 for the three months ended March 31, 1990, over the $15,845,000 of the first quarter a year ago.

Net income rose 32 percent to $389,000, or 16 cents per share, compared with net income of $294,000, or 12 cents per share, for the same period of the prior year.

The operating ratio improved more than 2 points to 90.7 percent.

These excellent results were achieved through continued focusing on temperature-controlled freight, working in traffic lanes that yield higher

revenue per mile, on-going cost-control programs and greater efficiencies realized throughout the company.

Barry D. Plost, president and chief operating officer of Freymiller Trucking, commented: ''We are pleased to report our fifth consecutive quarter of record revenues and increased earnings. Our goal is the continuing improvement of revenues and earnings on a quarter-to-quarter basis.''

Freymiller Trucking is one of the largest temperature-controlled truckload carriers in the United States, specializing in the transportation of temperature-controlled shipments and time-sensitive freight to all 48 contiguous states as well as Canada and Mexico.

DALLAS (APRIL 19) BUSINESS WIRE - DDMS (Distribution Data Management Systems Inc.) and Western Union Corp. Thursday announced the availability of Western Union's EDI network services for DDMS' automated systems for office products dealers.

The interface to Western Union's Easylink integrated messaging network, was developed by DDMS' Stephen Le Maire.

Under the agreement, DDMS will offer its user base the opportunity to use Western Union Electronic Data Interchange services for faster, more efficient communications with dealers and manufacturers and other Western Union messaging services.

Electronic Data Interchange, or EDI, is a standard electronic protocol developed as a universal method of communicating business documents from computer to computer between enterprises.

''We are pleased to offer EDI services to DDMS and its customers,'' said John Sinko, EDI Product Manager for Western Union's Business Services. ''The addition of EDI services to its line of turnkey office management systems is sure to have an immediate and positive effect on the office products industry. It will enable dealers to communicate more efficiently lower the margin for error due to re-keying of paper-based documents and help streamline office operations.''

''We believe Western Union EDI services will provide the means of access to strategic technology that our users require,'' explained William Froeba DDMS' Executive Vice President. ''Furthermore, along with the Moore 'MPC

number,' which is the EDI standard Office Products number, it will be even easier to integrate order entry and inventory control information into the system using our new network interface.''

DDMS office management products are used by more than 800 office products dealers in the United States, Canada and the Caribbean Basin. Western Union EDI services were selected because of their high-volume capability, excellent service and attractive cost structure. Network reliability is 99.9 percent because Western Union EDI is based on a platform of Tandem fault-tolerant processors.

Western Union is the only value-added network provider to offer FreeForm Conversion, which allows EDI-capable businesses to send business documents in EDI form for delivery in human readable form as a fax, Priority Letter or e-mail message.

DDMS is the leading supplier of automated systems in the Office Products industry.

Western Union Corp. provides a broad range of messaging, financial and other services, both domestically and internationally, to meet the specific needs of business customers and individual consumers. The company is the leading provider of public electronic mail services, which enable its business customers to reach more than seven million electronic mail, fax and telex users worldwide.

BALTIMORE (APRIL 19) BUSINESS WIRE - Alex. Brown Inc. Thursday reported revenues for the quarter ended March 30, 1990 of $68.5 million, a 14 percent increase from revenues of $60.1 million in the first quarter of 1989.

Net earnings were $2.5 million and earnings per share were 16 cents. By comparsion, in the first quarter of 1989, which included an after-tax charge of $6.9 million related to anticipated expenses in eliminating excess office space, the company reported a net loss of $6.3 million and a loss per share of 39 cents.

Donald B. Hebb Jr., president and chief executive officer commented, ''Alex. Brown delivered a solid performance in the first quarter despite difficult conditions within the industry. Investment banking operations produced particularly strong results, both in underwriting activities and mergers and acquisitions.

''For the first three months of 1990, Alex. Brown was among the top three managers of initial public offerings of common stock and one of the top five managers of all common stock offerings. We also experienced revenue growth in our retail and institutional businesses, OTC trading and correspondent services.

''Our pre-tax profit margin increased significantly compared to the first quarter of 1989, even after eliminating the effects of the excess office space charge recorded last year.''

Alex. Brown's balance sheet remains strong. At the end of the first quarter, capital funds were $201 million and liquidity remains excellent. Book value per share totalled $11.28 at March 30, 1990. During the quarter Alex. Brown repurchased 462,000 shares of its common stock pursuant to an existing stock repurchase program, which has a remaining authorization of about 200,000 shares.

Alex. Brown's board of directors declared a cash dividend for the quarter of $.055 per share, payable on May 11, 1990 to stockholders of record on May 1, 1990.

Alex. Brown Inc. is a holding company whose primary subsidiary is Alex. Brown & Sons Inc., the oldest investment banking firm in the United States. Alex. Brown is traded in the NASDAQ National Market System, symbol ''ABSB.''

RICHARDSON, TX (APRIL 19) BUSINESS WIRE - CONVEX Computer Corp. announced Thursday that the University of Arizona, Tucson, has awarded the company a five-year contract valued at $8 million to provide three CONVEX supercomputers, maintenance support, training, and documentation.

The initial order, a C240 system with one Gigabyte of memory, has been

installed as a central site computer resource for all campus users.

The university will be using the CONVEX system for a variety of research projects such as a study about the effect of asteroid impact on the evolution of a planetary atmosphere. Scientists have found that each time an asteroid strikes the surface of a planet, a fraction of atmosphere is stripped away.

The CONVEX supercomputer will run the numerical calculations to study this phenomenon. Another project involves using the system to simulate supernova explosions so researchers can more fully understand what causes the explosions and what role they play in galaxy formation. These simulation will be used to create images which will then be used to make high quality videos of supernova explosions.

Because of the Open Supercomputing capabilities of the CONVEX C Series combining performance, usability and accessibility, the C240 system was compatible with existing computer resources throughout the university. The CONVEX central computing system easily connects all users via the campus Ethernet to minicomputers and workstations that display graphics applications.

CONVEX offers a family of compact, air-cooled, 64-bit computer systems that deliver performance of up to 200 MFLOPS and 224 MIPS as determined by the 32-bit Whetstone benchmark. The systems in the C Series run an enhanced version of the industry standard UNIX operating system and provide up to two Gigabytes of physical memory complemented by a 200-megabyte-per-second I/O bandwidth.

CONVEX Computer Corp., a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market and service high-performance systems. The company markets its products primarily to scientific, engineering and technical users throughout the world for a wide variety of applications in such areas as geophysical research, computational chemistry, computer-aided engineering, image processing, aerospace simulations and molecular biology.

DALLAS (APRIL 19) BUSINESS WIRE - Halliburton Co. announced Thursday that its Brown & Root International Inc. subsidiary has terminated its letter of intent to sell certain marine construction assets to Offshore Pipelines Inc.

The assets which were to be sold included 23 derrick, pipelay and other marine construction vessels and interests in certain land based support facilities located in the Far East, Middle East and United States. Brown & Root will continue to utilize these assets in its worldwide marine engineering and construction business operations while considering other options for the assets.

Halliburton Co. is one of the world's largest diversified oil field services, engineering and construction companies. Founded in 1919, Halliburton provides oil field services and products, industrial and marine engineering and construction services, and property and casualty insurance services.

GLENDALE, CA (APRIL 19) BUSINESS WIRE - GLENFED Inc. (NYSE:GLN) Thursday reported net earnings of $26,261,000, or 85 cents per share, for the third quarter of fiscal 1990 which ended March 31, 1990.

This compares to net earnings of $20,160,000, or 68 cents per share, for the third quarter of fiscal 1989 which ended March 31, 1989.

On a fully diluted basis, third quarter earnings totalled 82 cents per share vs. 66 cents per share a year earlier.

Net earnings from continuing operations totalled $28,859,000, or 94 cents

per share, for the quarter ending March 31, 1990. This compares to net earnings from continuing operations of $17,268,000, or 58 cents per share for the year ago quarter.

On a fully diluted basis, third quarter earnings from continuing operations totalled 90 cents per share compared to 57 cents per share a year earlier. Discontinued operations include the net income (loss) from three subsidiaries (GLENFED Development Corp., GLENFED Capital Corp. and GLENFED Financial Corp.) that are in the process of being sold.

For the nine months ended March 31, 1990, net earnings were $92,838,000, or $3.03 per share, compared to net earnings of $86,766,000, or $2.95 per share for the nine months ended March 31, 1989.

On a fully diluted basis, earnings for the first nine months of fiscal 1990 totalled $2.90 per share, vs. $2.80 per share a year earlier.

For the nine months ended March 31, 1990, net earnings from continuing operations were $89,033,000, or $2.90 per share, compared to net earnings from continuing operations of $74,671,000, or $2.53 per share, for the nine months ended March 31, 1989.

On a fully diluted basis, net earnings from continuing operations for the first nine months of fiscal 1990 totalled $2.78 per share, compared to $2.42 per share a year earlier.

GLENFED Inc. is a real estate and consumer bank holding company, and is the parent company of Glendale Federal Bank, the nation's fifth largest savings bank, which operates 239 branch offices in California, Florida, and Washington.

FORT WORTH, TX (APRIL 19) BUSINESS WIRE - Pier I Imports Inc. (NYSE:PIR), a specialty retailer of decorative home furnishings and related items, announced Thursday an 18 percent increase in net income for the company's fourth quarter ended March 3, 1990, and record sales and earnings for the fiscal year.

Fourth quarter sales of $136,724,000 were 22.4 percent above last year and the largest quarterly sales in the company's history. Net income available for common shareholders was $5,688,000 up 18 percent from the year earlier period. Earnings per share were 16 cents up from 15 cents a

year ago.

For the year ended March 3, 1990, sales were $516,858,000 up 24.7 percent and net income available for common shareholders totaled $25,253,000, an increase of 17 percent.

Earnings per share were 71 cents, up from 70 cents a year ago. Shares outstanding increased by 16.7 percent.

''Pier I Imports business accelerated in FY90 as the year continued and the company finished the year on a positive note,'' said Clark A. Johnson, the firm's chairman and chief executive officer.

''We successfully opened 85 new stores from a base of 450 units and ended the year with 517 stores in 43 states and Canada.'' ''We are very positive about the vitality of our consumer markets in FY91 and expect to achieve the company's ninth consecutive year of record sales and income.''

CHICAGO (APRIL 19) BUSINESS WIRE - James R. Boris, chairman, president and chief executive officer of Chicago-based Kemper Securities Group Holdings Inc. (KSGH) Thursday unveiled a restructuring plan for Kemper Capital Markets (KCM), the firm's capital markets subsidiary, to

coordinate institutional activity for the Kemper brokerage firms.

Under the new strategic plan, KCM will assume central responsibility and control of all capital committing functions, government and corporate bond trading, mortgage backed securities trading, and selected municipal bond trading of national issues.

''Through the centralization of these operations, we can manage our exposure more effectively and improve our cost effectiveness,'' said Boris. ''More importantly, however, the consolidation of these activities serves to reinforce our commitment to the regional retail brokerage business.''

''The primary objective of KSGH is to improve the supply of quality, innovative products to our retail brokers. And by consolidating these capital markets-oriented activities in KCM, the regional firms can focus their resources and efforts on distribution.''

Kemper Securities Group Holdings Inc. was formed in January of this year to represent Kemper's expanding securities businesses and to coordinate activities of the Kemper Securities Group: Bateman Eichler, Hill Richards, Incorporated, based in Los Angeles; Blunt Ellis & Loewi Incorporated, based in Milwaukee; Boettcher & Company, Inc., headquartered in Denver; Lovett Underwood Neuhaus & Webb, Inc., headquartered in Houston; Prescott, Ball & Turben, Inc., based in Cleveland; Kemper Clearing Corp., headquartered in New York, and Kemper Capital Markets.

KCM has specialists on the floors of the regional stock exchanges in Boston, Chicago, Los Angeles and Philadelphia. In 1989, KCM assumed responsibility for Kemper's Unit Investment Trust business.

KSGH is one of three operating units of Kemper Financial Companies Inc., which is a holding company for the financial services units of the Kemper Corp. The other two units of KFC are Kemper Financial Services Inc., a major investment management and financial products company, and Kemper Investors Life Insurance Co. (KILICO).

#90109b0735 04/19/1990 ~Business Wire

BOSTON (APRIL 19) BUSINESS WIRE - 3i Ventures, the Boston-based venture capital firm, announced Thursday its participation in the recently completed $17 million financing of Biopure Corp.

Located in Boston, Biopure is an applied separations and purifications

company developing technologies to produce, in large scale, biologically active products used in the healthcare industry.

Founded in 1984, Biopure is well-known for its work on turning cow's blood into a viable blood-substitute. Funds from the private placement will be used for continued development and clinical trials of Biopure's initial product, Hemopure.

Hemopure is the result of proprietary ultrafiltration and chromatography process which produces a chemically modified form of bovine hemglobin for human and vererinary applications. Contrary to work on artificial blood, blood substitutes duplicate only the most critical of the normal blood functions -- the oxygen carrying role performed by hemoglobin inside red blood cells.

''While not a replacement for real blood, it is anticipated that blood substitutes can save lives when used in medical emergencies and certain surgical applications,'' asserts Carl Rausch, chief executive officer and co-founder of Biopure.

''The only treatment currently for oxygen deficiency is blood transfusion. Aside from the complications caused by blood type and Rh factor compatibility, there remain concerns about the risks of infection associated with transfusions. The ultra-purification we use for our blood substitute creates a product free of infection and that can be used for any blood type.''

Biopure is currently waiting for approval from the Food and Drug Administration to begin Phase I clinical trials to determine the basic safety of the product for humans. Conducted on healthy, normal individuals, the testing is anticipated to take place at Massachusetts General Hospital in Boston. Eventual applications for Hemopure include use by oxygen-deficient patients until they are able to produce a sufficient number of red blood cells on their own or for patients during surgical procedures.

#90109b0739 04/19/1990 ~Business Wire
STOUGHTON, MA (APRIL 19) BUSINESS WIRE - Reebok International Ltd. (NYSE:RBK) Thursday reported record sales and net income for the three months ended March 31, 1990.

Net income for the quarter ended March 31, 1990 was $52,719,000, or 46 cents per share, compared with $49,409,000, or 43 cents per share for the

first quarter of 1989. Net sales increased by 13.5 percent during the quarter to $554,404,000.

Paul Fireman, chairman and chief executive officer, stated: ''The increases in sales and income during the first quarter were in line with our expectations. Strong sales growth in Reebok's international business accounted for most of the increase in sales. Reebok sales outside of the U.S. were $116 million, compared to about $57 million in first quarter of 1989. Even after adjusting for the acquisition of Reebok's distributor in the U.K, in December, net sales outside the U.S. increased by 45 percent on a comparable basis.''

''Sales of Reebok footwear in the U.S. grew about two percent during the quarter to $304 million,'' said Fireman. ''Much of our efforts at Reebok have been directed toward new product introductions featuring THE PUMP technology, which are scheduled for shipment near mid-year. Increases in sales at our Rockport and Ellesse divisions, along with the inclusion of sales of our Boston Whaler division (acquired in October, 1989), were largely offset by a decrease in sales at AVIA,'' Fireman added.

Reebok International Ltd., headquartered in Stoughton, is the leading designer and marketer of active lifestyle and performance products, including footwear and apparel. The company's operating units include Reebok's footwear and apparel products divisions, and AVIA, Ellesse North America, Rockport, and Boston Whaler Boats.

#90109b0746 04/19/1990 ~Business Wire

VERNON HILLS, IL (APRIL 19) BUSINESS WIRE - Scotsman Industries Inc.

(NYSE:SCT) Thursday reported that the U.S. Consumer Product Safety Commission (CPSC) provisionally accepted a consent order agreement between the CPSC staff and its subsidiary, Scotsman Group Inc. (Scotsman), under the Lead Contamination Control Act of 1988 (the Act).

Under the terms of the consent agreement, Scotsman would conduct a replacement/refund program for Halsey Taylor tank-style water coolers manufactured before April 1, 1979, which have been water tested and shown to contribute more than 20 parts per billion lead to the water.

The consent agreement would resolve all claims that the CPSC might have under the Act for issuance of an order requiring the repair, replacement or recall and refund of the purchase price of water coolers manufactured by Scotsman's Halsey Taylor division.

The terms of the consent agreement have been published Thursday in the Federal Register for public comment. The consent agreement will become final if no comments are received by the CPSC within the 30-day comment period.

If the CPSC receives a request not to accept the consent agreement within the 30-day period, it will consider the request and vote on the acceptability of the consent agreement or the desirability of further action.

The company previously made provisions to cover expenditures that it expected to result from the Act. The actual cost to the company under the consent agreement will depend on, among other things, the number of cooler owners participating in the replacement/refund program.

Although no assurance can be given until the program is completed, the company believes, based on its present expectations, that expenditures incurred in implementing the program required by the consent agreement would not have a material adverse effect on the company's financial condition.

Scotsman markets Halsey Taylor water coolers through its Halsey Taylor division. Scotsman is a market leader in the manufacture of commercial refrigeration products, with a primary market focus on the food service industry. The global manufacturing and marketing of ice machines is the largest component of Scotsman's business.

WESTON, MA (APRIL 19) BUSINESS WIRE - Eastern Enterprises (NYSE:EFU) Thursday reported net income of $31.5 million, or $1.35 per share, for the first quarter of 1990, unchanged from results for the same period in 1989.

Consolidated revenues for the quarter rose 18 percent to $302.7 million from $257.3 million in 1989. About half of this increase reflected inclusion of Eastern's new Water Products Group, with the balance coming from the pass through of higher purchased gas costs and increased revenues from Midland Enterprises.

Eastern Enterprises is the parent company of Minland Enterprises Inc., leading barge operator on the nation's inland waterways, Boston Gas Co., New England's largest distributor of natural gas, and a Water Products Group serving municipal, commercial and industrial markets with water system components and purification systems.

HUNTINGTON BEACH, CA (APRIL 19) BUSINESS WIRE - Dr. James B. Blackmon, senior manager of McDonnell Douglas Space Systems Co.'s Advanced Space Systems Group, has been named a McDonnell Douglas Fellow.

Nationally recognized for his work in terrestrial solar power and multimegawatt chemical and nuclear space power systems, Blackmon's contributions have led to the development of a number of advanced space power and thermal management systems. Blackmon currently is leading work on U.S. Army chemical power systems, solar concentrator evaluation systems and U.S. Air Force development contracts for advanced space radiators.

Blackmon is one of five Fellows named this year. Each will receive a silver medallion and a cash award. The Fellow program is a series of special technical positions reserved for McDonnell Douglas engineers and scientists who have made an extraordinary impact on the advancement of their field of expertise and of the corporation's products.

The five Fellows named this year bring the number of active fellows in the program to 33.

Blackmon, who joined McDonnell Douglas in 1961, holds a bachelor's of science degree in engineering from the California Institute of Technology and a doctorate in engineering and applied science from the University of California, Los Angeles. He has published more than two dozen articles

on solar, chemical and nuclear power and thermal management systems.

In addition, Blackmon is the chairman of the American Society of Testing Materials' subcommittee on solar thermal energy and is a reviewer for various technical journals.

Blackmon and his family are originally from Charlotte, N.C., and now live in Irvine, Calif.

DALLAS (APRIL 19) BUSINESS WIRE - Whitehall Corp. (NYSE:WHT) announced Thursday that its Aero Corp. subsidiary had completed negotiations with Federal Express Corp. to modify Federal's Boeing Model B-727 aircraft from passenger to cargo configuration.

Under the terms of the agreement, Federal acquired slots for these services to be performed on 30 aircraft at Aero Corp.'s Lake City, Fla., facility over the next three years. Input of the first aircraft is anticipated as early as next week.

The major structural modification includes the installation of a cargo door and related handling equipment, as well as avionics modifications and time-phased maintenance checks.

Lee D. Webster, Whitehall Chairman of the Board and President, said,'' The statisfactory completion of these negotiations with the leading air cargo carrier in the industry is another important step in the planned strategic redirection of our Aerospce business and represents a further addition of value to the company and its stockholders.

''Equally important is the stability that Aero Corporation's employees will enjoy as the result of the Federal Express work, which will immediately create 50 new job openings with a potential for up to three times the amount.

''Aero Corporation's performance will, of course, dictate the potential long-term value of the this important relationship with Federal Express. I am confident that we can meet the performance challenge. Over the past three years, management has positioned Aero to take maximum advantage of opportunities such as this through intensive employee training and additions to the facility necessary to obtain Federal Aviation Administration approval and certification to work on B-727s as well as DC-8s, Dc-9s, L-100s and C-130s.''

#90109b0785 04/19/1990 ~Business Wire

WAYNE, NJ (APRIL 19) BUSINESS WIRE - Union Camp Corp. earned 98 cents per share in the first quarter of 1990, a 16 percent decline from $1.16 per share earned in last year's record first quarter.

Net income was $67,407,000, compared with $79,718,000 reported for the first quarter of last year. Quarterly sales were $701,489,000 vs. last year's $706,226,000.

Quarterly results included a gain of approximately 8 cents per share on the sale of land in northeastern Florida, Cartledge said. The land was sold to several Florida government agencies for conservation purposes.

Within the non-paper busineses, the company's Chemical Group posted a decline in earnings compared to last year's first quarter, reflecting price weakness and lower volumes in certain tall-oil-based segments of the business and some price weakness in aroma chemicals.

Cartledge added that the company's $1.1 billion building projects at its mills at Eastover, S.C., and Savannah, Ga., remain on schedule. ''During the second quarter we will start up the new 1,800-ton-per-day pulping facility at our Savannah kraft paper and board mill, a major milestone in the mill modernization,'' he said. Both programs are scheduled for completion by mid-1991.

Turning to the near-term outlook, he concluded, '' Year-to-date earnings comparisions will continue to be unfavorable to last year's peak performance. However, we expect continued healthy demand for our paper and packaging products both here and overseas, and we should benefit from further price improvements in uncoated business papers.''

Union Camp Corp. (NYSE:UCC) is a leading manufacturer of paper, packaging and wood-based chemicals.

CHICAGO (APRIL 19) BUSINESS WIRE - Illinois Tool Works Inc. (NYSE:ITW) Thursday reported increased first quarter operating revenues, operating income and net income.

The results reflect strong performances in the company's core businesses domestically and internationally except for softness in domestic auto and appliance markets in January. The operating revenues increase in the 1990 quarter also reflects the addition of Ransburg Corp., with no impact on net income. Ransburg was acquired in the second quarter of 1989.

First quarter 1990 operating revenues were $567.7 million, an increase of 15 percent over 1989 first quarter operating revenues of $493.8 million. Operating income in the 1990 first quarter was $76.9 million, an increase of 10 percent over the 1989 first quarter.

Net income in the 1990 first quarter was $40.6 million or 76 cents per share, an increase of 10 percent over 1989 first quarter net income of $37.0 million or 70 cents per share.

Operating revenues and net income increased in both domestic and international operations in the quarter.

The company's two segments, Engineered Components and Industrial Systems and Consumables, had increases in operating revenues and operating income in the 1990 first quarter compared to the 1989 first quarter, with particular strength in the Industrial Systems and Consumables area.

#90109b0789 04/19/1990 ~Business Wire

HOUSTON (APRIL 19) BUSINESS WIRE - Shell Oil Co. announced Thursday it is exploring opportunities for selling Triton Biosciences Inc., its wholly-owned health care subsidiary.

Triton was founded in 1983 to develop and commercialize pharmaceuticals and diagnostics for cancer, viral diseases, multiple sclerosis and other serious illnesses.

''Triton is at the stage of its development where significant commercial growth is anticipated,'' said Davis B. Richardson, president of Shell Chemical Co. and chairman of the board of directors of Triton Biosciences Inc.

During 1990, Triton is preparing for the anticipated U.S. approval and

launch of its first cancer therapeutic product, Fludara(TM) I.V. (fludarabine phosphate) for treatment of chronic lymphocytic leukemia, the most prevalent leukemia in the western world.

Advanced clinical studies (Phase III) are also underway with Triton's Betaseron(R) (recombinant human interferon beta), a therapeutic compound for the treatment of multiple sclerosis and AIDS. Four additional pharmaceuticals are in preclinical or human clinical studies and ten diagnostic products are being marketed for use by cancer researchers.

In 1991, TriTech Partners, a 50-50 partnership between Triton and Technicon Instruments Corp., plans to launch its second product, the TECHNICON IMMUNO-1(TM), an automated immunoassay system, for use in clinical laboratories.

Triton employs approximately 300 people at its facilities in Alameda, Calif.

''Shell views Triton as a successful health care operation,'' said Richardson. ''After extensive review, however, Shell has decided that Triton is not sufficiently related to its principal petrochemical business to retain it for the long term.

The investment banking firm of Morgan Stanley of New York has been engaged as Shell's financial advisor for this project.

DALLAS (APRIL 19) BUSINESS WIRE - Joseph F. McKinney, chief executive officer of Tyler Corp. (NYSE:TYL), announced Thursday that due to improved performance at its Tyler Pipe unit, the company posted a modest profit in the first quarter.

Earnings per share from continuing operations for the quarter ended March 31, 1990, were 3 cents compared to a loss of 8 cents in the first quarter of 1989. Sales for the three months advanced 24 percent to $51.3 million, and net income was $265,000.

''We are pleased to report an encouraging operating profit increase at

Tyler Pipe over last year's first quarter,'' McKinney stated. ''Favorable weather conditions contributed to higher volumes, and better pricing was evident in major product lines.

''We remind our fellow shareholders, however, that first-quarter results are not always predictive of performance for the remainder of the year. Future profitability will continue to depend on the primary demand for our construction-related products and the price stability in our markets.''

Tyler Corp., with national headquarters in Dallas, provides goods and services to industrial customers. Its operations include industrial explosives and pipe and fittings.

NEW YORK (APRIL 19) BUSINESS WIRE - Transatlantic Holdings Inc. Thursday filed a registration statement with the Securities and Exchange Commission relating to a proposed initial public offering of 6 million shares of common stock.

All of the shares to be offered are being sold by selling stockholders; the company will not receive any proceeds from the sale. American International Group Inc., which owns approximately 41 percent of the company's outstanding common stock, will not be a selling stockholder.

The offering is planned to be structured in two tranches, with 4.8 million shares to be offered in the United States and 1.2 million shares to be offered outside the United States.

Goldman, Sachs & Co. will manage the United States offering and Goldman Sachs International Limited will manage the international offering.

On April 17, 1990, the company acquired Transatlantic Reinsurance Co. through a share exchange. Through its wholly owned subsidiaries, Transatlantic Reinsurance Co. and Putnam Reinsurance Co., the company provides property and casualty reinsurance on a treaty and facultative basis directly and through brokers to insurance and reinsurance companies, in both the domestic an international markets.

The company's principal lines of reinsurance include general liability (including professional liability), automobile liability, workers' compensation and medical malpractice in the casualty lines, and fire and inland marine coverages in the property lines. Reinsurance is provided for most major lines of insurance on both excess of loss and

pro rata bases.

A registration statement relating to the shares of common stock has been filed with the Securities and Exchange Commission but has not yet become effective.

This information shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of the shares of common stock in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

BALTIMORE (APRIL 19) BUSINESS WIRE - Reflecting difficult conditions in the foreign stock markets where it has major positions, Worldwide Value Fund, Inc. (NYSE: VLU) registered a decline in net asset value at the end of the March 1990 quarter to $17.95 per share from $20.14 per share on December 31, 1989 and off from $20.27 per share on March 31, 1989.

Net investment income for the value-oriented fund in the recent quarter was $55,000, or $.02 per share, compared with a loss of $43,000, or $.01 per share, a year earlier.

Investments in the United States represented 30 percent of VLU's portfolio on March 31, 1990, followed by the UK with 13.6 percent and 11.3 percent for Italy. The balance was invested primarily in European countries. Equity investments comprised 96 percent of the portfolio at the end of the recent quarter and cash and equivalents, 4 percent.

Rising interest rates worldwide, inflationary currency and unstable economic conditions will continue to present a challenging investment climate in the months ahead, Charles J. Swindells, VLU's Chairman said in making today's announcement.

Worldwide Value Fund, Inc., was formed in 1986. It is managed by Lombard Odier International Portfolio Management, Ltd. of London and Legg Mason Fund Adviser, Inc. of Baltimore.

ANDOVER, MA (APRIL 19) BUSINESS WIRE - Sales and profit from operations of The Gillette Company increased from the levels of the first quarter of 1989. Net income per common share declined moderately. The dividend on the common stock was increased 12.5 percent, marking the thirteenth consecutive annual increase in dividends per common share paid to Gillette stockholders, Colman M. Mockler, Jr., chairman and chief executive officer said today at the Annual Meeting of stockholders.

Sales for the three months ended March 31, 1990, were $1.05 billion, an increase of 11 percent from $941.0 million in 1989. Profit from operations was $206.6 million, up 13 percent from $182.6 million a year earlier. Pretax income of $144.3 million compared with $132.3 million in the first quarter of last year, an increase of 9 percent. Net income of $87.0 million increased 12 percent from $77.6 million in 1989. Net income per common share of 75 cents compared with 80 cents the prior year, a decrease of 6 percent.

Sales of Gillette North Atlantic were level with the corresponding quarter of 1989, and operating profits were lower. Gillette International/Diversified Operations sales and operating profits were sharply above the levels of a year earlier.

Net interest expense and net exchange losses were higher in the quarter, compared with the prior year, while the effective tax rate declined.

At its meeting today, the Board of Directors declared a quarterly dividend of 27 cents per common share, payable June 5, 1990, to stockholders of record on May 1, 1990. This represents a 12.5 percent increase from the

24 cents per share paid previously, and a new annual rate of $1.08 compared with the former rate of 96 cents. The Board also declared the regular quarterly dividend of $21.875 per share on the 8 3/4 percent Series B convertible preferred stock, payable June 29, 1990, to stockholders of record on May 29, 1990. The unaudited consolidated income account follows: (Millions of dollars, except per share amounts)

CHICAGO (APRIL 19) BUSINESS WIRE - Wells-Gardner Electronics Corp. Thursday announced results for the first quarter ended March 31.

For the three months, sales from continuing operations declined four percent to $9,493,000 form $9,913,000 in the 1989 first quarter. The gross operating profit fell $395,000 to $1,061,000. Net earnings from continuing operations decreased to $61,000, or 2 cents a share, compared to $273,000, or seven cents a share.

Net earnings after all extraordinary items were $98,000, or 3 cents a share, in the current quarter compared to $183,000, or 5 cents a share, in the prior year's quarter.

There were 3,766,772 weighted average common and common equivalent shares outstanding in the recent quarter and 3,750,539 in the 1989 three months.

''The first quarter was frustrating,'' Frank J. Myers, Wells' president

and chief operating officer stated. ''While we return to marginal profitablity, we were not able to fully benifit from the sales volume represented by our order backlog of more than $23 million. Data display sales were off approximately $1.5 million from last year due to further delays by a major customer. Also, material delivery problems slowed the startup of the TV assembly contract announced in February 1990. Solutions have been worked out for most of these difficulties with remaining adjustments expected to have a positive impact on second quarter sales.

''Demand for the company's large screen VGA color monitors continues to increase thus improving the company's potential for growth in this important segment of the data display market,'' Myers continued.

''Competitive market conditions continue to limit the company's ability to recover cost increases, particularly in the area of picture tubes. We are continuing to expand our offshore sourcing programs in an attempt to restore margins to more acceptable levels.

''Our balance sheet remained strong. At the end of the first quarter, the current ratio stood at 2.86 to 1; working capital increased to $10,594,000; shareholders' equity grew to $3.32 per share, and we have no debt.

''Efforts to dispose of the discontinued power supply and touch panel product lines are progressing well. We hope to announce sale of the power supply business by the end of the current quarter,'' Myers concluded.

Wells-Gardner Electronics Corp. designs and manufactures electronic products which are marketed both domestically and internationally. Its major products are color video monitors and data display monitors. In addition, the company assembles televisions for private label distribution through Majestic Industries.

NEW BEDFORD, MA (APRIL 19) BUSINESS WIRE - Robert McCarter, chairman, chief executive officer, and president of NBB Bancorp Inc. (NYSE:NBB),

parent company of New Bedford Institution for Savings (NBIS), announced Thursday that the board of directors has declared a dividend of 23 cents per share to stockholders of record as of Apr. 30, 1990.

The dividend will be payable on May 11, 1990.

Net income for the quarter ended Mar. 31, 1990 was $2.7 million, or 29 cents per share as compared to $3.8 million, or 40 cents per share for the same quarter in 1989. ''The major factors in the decline resulted from the increase in nonperforming loans and the decrease in gains from the sale of securites. These two factors represented a negative effect of approximately 9 cents per share,'' said McCarter.

Nonperforming loans increased from $8.8 million at Dec. 31, 1989 to $14.3 million as of Mar. 31, 1990. This represented 1.52 percent of net loans. Nonperforming mortgage loans were relatively stable, increasing from $4.3 million at year-end to $4.5 million at Mar. 31, 1990. Nonperforming commerical loans increased from $4.3 million to $9.7 million during the same period.

There were 9,138,895 shares outstanding on Mar. 31, 1990 with a book value of $23.03 per share as compared to $22.48 as of Mar. 31, 1989. Total stockholders' equity totaled $210.4 million on Mar. 31, 1990 which represented 17.3 percent of assets.

WICKLIFFE, OH (APRIL 19) BUSINESS WIRE - The Bailey Group and Montedison S.P.A. announced Thursday an agreement whereby Bailey will be the preferred supplier of controls, instrumentation and automation technology to Montedison operations worldwide.

Montedison is part of Italy's $28 billion Ferruzzi Group -- a global leader in chemicals, food and agriculture. The firm and its sister divisions maintain 140 manufacturing operations and employ 25,000 people worldwide.

Among the operations are Tecnimont, the engineering company serving Ferruzzi/Montedison, plus several leading divisions in the United States, including Himont, Ausimont and Erbamont.

Bailey Controls Co. with headquarters in Wickliffe is a unit of Elsag, part of Finmeccanica, Italy's largest high-technology organization. Finmeccanica is a major unit of IRI Group, the largest corporate structure in Italy and among the 10 largest in the world.

TOLEDO, OH (APRIL 19) BUSINESS WIRE - At its annual meeting of stockholders, Owens-Corning Fiberglas Corp. announced that Max O. Weber, the company's president and chief operating officer, has been named to succeed William W. Boeschenstein as chief executive officer on Oct. 1, 1990.

Boeschenstein will retire at the end of September as chairman and chief executive officer.

Weber, 60, who was named president and chief operating officer in 1988, joined Owens-Corning in 1955. He was named Senior Vice President and President, Construction Products Group, in 1986.

Prior to that, he served as the vice president of a number of operating divisions within the company: the Insulation Operating Division (1984 - 1986); Mechanical Operating Division (1978 - 1984); and the Special Products Operating Division (1975 - 1978). From 1955 - 1975, he held a variety of marketing and management positions in the company's construction products group.

Weber received a bachelor of science degree in marketing in 1951 from the University of Kansas, Lawrence, KS.

Owens-Corning also said that at the annual meeting shareholders had approved the reelection of four directors to the Board to terms expiring in 1993. In addition to Boeschenstein, reelected were: Paul V. Daverio, senior vice president, Owens-Corning; David T. McGovern, partner in the law firm Shearman & Sterling; and Furman C. Moseley, president, Simpson Investment Company, and chairman, Simpson Paper Company.

#90109b0911 04/19/1990 ~Business Wire

MT. KISCO, NY (APRIL 19) BUSINESS WIRE - The USX Shareholders Advisory Committee, in a letter sent Thursday to the shareholders of USX Corp., urged them to vote in favor of its proposed spin-off program which would separate USX into two independent, publicly traded ''Fortune 100'' companies: ''Marathon Oil Company'' and ''U.S. Steel.''

The committee believes that the companies would have an aggregate market value of approximately $48 per share, an increase of more than 40 percent over the current market value of USX.

Citing the fact that over the past eight years USX's stock price has significantly lagged behind the S & P 500 stock index, and noting that even Charles Corry, chairman of USX has stated that he is not happy with USX's current share price, the committee described the highly touted USX ''restructuring'' program as one that ''has failed to deliver value to stockholders.''

Pointing out that USX shares have also failed to match the performance of its publicly held peers in either the oil industry or the steel industry, the committee said that substantial shareholder value -- approximately $3 billion -- could be unlocked through its proposed separation of USX's oil and steel businesses.

Specifically, the committee said that in its view, based in part on a comprehensive analysis by McDep Associates Inc., a nationally recognized oil and gas investment research firm, an independent ''Marathon Oil'' would have a stand alone value of $39 per share.

It also believes that an independent ''U.S. Steel'' would trade at a public market price of $9 per share, resulting in a combined market value of $48 per share.

Based on Fortune 1990 rankings, both companies would be ''Fortune 100'' companies, it said.

Commenting further on the spin-off proposal, which would make each USX holder a holder of two independently valued companies, the committee said it believes the proposed spin-off could be structured on a basis which, for federal income tax purposes, would be essentially tax free to USX and its stockholders and would preserve the company's existing net operating loss carryforwards.

CHARLOTTE, NC (APRIL 19) BUSINESS WIRE - Based on unaudited results, Harris Teeter Inc., announced Thursday that sales for the second quarter (Jan. 3 - April 3) were $285 million, up 12 percent over sales for the same quarter a year ago of $255 million.

Same store sales for the period were up 5.6 percent.

Sales for the March period (March 7 - April 3) were $89.4 million up 14.2 percent over 1989 sales of $78.3 million. At the end of the period, 129 stores were in operation, compared to 126 at the end of the same period in 1989.

Harris Teeter operates a group of 129 supermarkets in North Carolina, South Carolina, Tennessee and Virginia. It is the largest subsidiary of Charlotte-based Ruddick Corp., a diverse group of North Carolina companies including American & Efird Inc., Jordan Graphics Inc. and Ruddick Investment Co.

#90109b0914 04/19/1990 ~Business Wire

CHARLOTTE, NC (APRIL 19) BUSINESS WIRE - Ruddick Corp. (ASE: RDK) announced consolidated sales of $353 million in the second fiscal quarter increased 12 percent over the like period last year.

Net income of $6.1 million was up 36 percent compared to $4.5 million last year. Per share fully diluted earnings this year were 55 cents (60 cents primary) vs. 42 cents (46 cents primary) last year.

For the six months to date, sales of $706 million increased 13 percent over last year. Net income of $11.7 million, or $1.07 per share fully diluted ($1.17 primary) increased 40 percent over $8.4 million, or 79 cents per share (86 cents primary), last year.

American & Efird sales in the second quarter of $52 million increased 15 percent over last year, while operating profit of $5.6 million for the quarter increased 26 percent. A&E posted favorable results in a United States thread market that is generally soft.

Harris Teeter sales in the second quarter of $286 million increased 12 percent and operating profit of $7.6 million improved 27 percent over the like period last year. Sales in identical stores were 5.6 percent greater than last year. In comparing this quarter's sales, it is important to note that the Easter holiday fell in the second quarter last year and will be in the third quarter this year.

Jordan sales of $15 million in the second quarter increased 4 percent over last year, while operating profit of $1.3 million improved 5 percent.

Richard N. Brigden, vice president, finance, stated that ''The company is pleased with the financial results for the first half of fiscal 1990.

However, due to economic conditions, operating profits in our manufacturing companies may come under pressure in the last half of the year.''

Ruddick Corp. is a diversified holding company which, through its subsidiaries, is engaged in four primary businesses: American & Efird Inc. manufactures and distributes industrial sewing thread and sales yarn; Harris Teeter Inc. operates a chain of supermarkets in four southeastern states; Jordan Graphics Inc. produces and distibutes business forms, tags and labels; Ruddick Investment Co. operates an investment management and venture capital business.

WESTBOROUGH, MA (APRIL 19) BUSINESS WIRE - Glasnost, the Soviet concept of openness, was felt in Gardner, Mass. Thursday when 10 Soviet engineers, environmentalists, governement dignitaries tasted their first American hamburger at a Burger King equipped with solar photovoltaic (PV) panels and toured New England's largest solar electricity project with officials of New England Electric System (NEES) and its largest retail subsidiary, Massachusetts Electric Co.

NEES is the region's second largest electric utility and the U.S. leader in the field of energy conservation.

Specifically, the Gardner project involves the direct conversion of sunlight into electricity through the use of PV cells made of silicon and other semiconducting meterials. The cells are joined together by thin electrical wires, grouped on large solar panels, and mounted on the rooftops of participating buildings and homes. As sunlight is absorbed into the cells, a flow of electrons generates electricity.

The Soviet delegation also viewed a presentation on NEES' nationally-recognized energy conservation and load management (C&LM) program. NEES' C&LM program is projected to represent a third of the utility's new energy supply by the year 2007.

The visit is the second half of a bilateral exchange effort between Soviet and American scientific delegations to promote solutions to energy and environmental issues shared by both countries. The Soviet delegation consists of government officials, a leading ballet dancer, an Olympian, engineers and environmentalists.

The U.S. - Soviet exchange program was coordinated by Solar Design

Associates of Still River, Mass., and two Connecticut-based environmental groups, Promoting Enduring Peace and People's Action for Clean Energy.

New England Electric System is a public utility holding company headquartered in Westborough, Mass. Subsidiaries include three retail operating companies - Massachusetts Electric Co., Narragansett Electric Co., and Granite State Electric Co. Other subsidiaries include New England Power Co., New England Energy Inc., New England Electric Transmission Corp., New England Hydro-Transmission Co. Inc., New England Hydro-Transmission Electric Co. Inc., Naragansett Energy Resources Co., NEES Energy Inc. and New England Power Service Co.

#90109b0932 04/19/1990 ~Business Wire

CLEVELAND, OH (APRIL 19) BUSINESS WIRE - Lamson & Sessions had sales of $75,221,000 in the first quarter ended March 31, 1990 and net earnings of $265,000, or two cents a share, it was announced today by John B. Schulze, chairman and chief executive officer.

In the year-ago first quarter, the company had sales of $87,252,000 and net earnings of $3,385,000 or 27 cents a share.

While results for the first quarter were below those of last year, they were in line with the company's expectations based on economic and competitive factors influencing its primary products. Pricing strategies by several domestic and Canadian producers of thermoplastic conduit and pipe had an adverse effect on the company's Industrial/Construction Products segment business, particularly in its traditionally strong Northeast and North Central markets.

The company said it believes it has retained market share in the pipe and conduit business through appropriate price adjustments and it remains the major domestic supplier of these products.

The Transportation Equipment Products segment had lower first quarter sales and earnings primarily due to conditions at the Midland Steel Products Division resulting from a labor dispute. However, this division operated profitably in the quarter following three consecutive quarters of losses.

Lamson & Sessions is the leading domestic producer of thermoplastic electrical conduit and related fittings and accessories for the construction, power and communications industries, and is a producer of thermoplastic sewer pipe. It is also a manufacturer of products for the transportation equipment industry.

#90109b0934 04/19/1990 ~Business Wire

SAN FRANCISCO (APRIL 19) BUSINESS WIRE - Pacific Telesis Group (NYSE:PAC) Thursday reported first quarter 1990 earnings of $262 million, or 65 cents per share, 14.5 percent below the 76 cents reported in first quarter of 1989.

Revenues for the quarter were $2.37 billion, up 1.3 percent compared to the first quarter of 1989. As the corporation previously announced, first quarter results were lowered by the annual $391 million(a) rate reduction associated with California's newly adopted regulatory framework that took effect on Jan. 1, and by increased expenses.

PacTel Cellular's net income for the quarter was $16.9 million, compared to $9.7 million for the first quarter of 1989. Revenues rose 36.3 percent to $134.3 million and operating cash flow rose 41.9 percent over the first quarter of 1989. PacTel Cellular now serves approximately 413,000 customers, up 44.4 percent over March 1989.

Pacific Bell and Nevada Bell added more than 144,000 new customer lines during first quarter. These companies now have approximately 13.8 million lines in service, an increase of 4.2 percent over March 1989.

Toll messages for the local exchange companies grew by 11.3 percent compared to the first quarter of 1989 to 829 million and minutes of access use increased by 8.8 percent to an estimated 9.9 billion.

Expenses for the quarter rose 6.5 percent primarily due to contract-related labor costs, depreciation and increased expenditures associated with improvements in the telephone network and internal operating systems in Pacific Bell and its directory subsidiary.

Pacific Telesis Group is a worldwide diversified telecommunications corporation based in San Francisco.

BOSTON (APRIL 19) BUSINESS WIRE - Affiliated Publications Inc. Thursday announced that revenues for the first quarter of 1990 were $133,668,000 as compared to $131,023,000 for the same period a year ago. Income from continuing operations was $6,502,000, or 9 cents per share in 1990 vs. $8,864,000, or 13 cents per share in 1989.

Income from continuing operations in 1989 excludes charges related to Affiliated's share of losses from its former investment in McCaw Cellular Communications Inc. of Kirkland, Wash. Net income for the first quarter, which included such charges for the first quarter of 1989, was $6,502,000 in 1990 vs. a net loss of $9,909,000 in 1989.

The company's earnings continued to be adversely affected by softness in advertising volume at The Boston Globe.

Affiliated Publications Inc. is the parent company of Globe Newspaper Company (publisher of The Boston Globe) and BPI Communications Inc., a leading publisher of specialty magazines, books and electronic data bases for the entertainment, arts and design markets.

OAK BROOK, IL (APRIL 19) BUSINESS WIRE - McDonald's Corporation Thursday announced record Systemwide sales, total revenues and net income for the first quarter ended Mar. 31, 1990.

This was McDonald's 100th consecutive quarter of record year-to-year increases in operating results. Net income increased 12%, while net income per common share rose 13%. Total revenues increased 11% and Systemwide sales grew 9%.

KEY HIGHLIGHTS

	First Quarter Ended Mar. 31		Increase	
	1990	1989	$	%
(Dollars in millions, except per common share amounts)				
Net income per common share	$ .43	$ .38(a)	.05	13
Net income	$ 158.1	$ 141.7	16.4	12
Total revenues	$ 1,533.1	$ 1,381.8	151.3	11
Systemwide sales	$ 4,284.7	$ 3,934.3	350.4	9

(a) Restated for two-for-one common stock split declared in May, 1989.

OPERATING RESULTS

Systemwide sales represent sales by Company-operated, franchised and affiliated restaurants. The increase was due to new restaurant expansion and higher sales by existing restaurants. U.S. sales were affected by marketing and promotional programs, including Super Bowl Burger Blitz, difficult weather conditions and competition.

Sales outside of the U.S. continued to grow, reflecting increased market penetration and higher sales by existing restaurants. Expansion and marketing programs helped sales in Canada. Sales in Europe were exceptionally strong as a result of promotional programs, milder weather, new products, and stronger foreign currencies in most countries. Sales in the Pacific were relatively flat in U.S. Dollars due to weaker local currencies. In Latin America, sales trends continued to show improvement.

The five largest markets outside of the U.S.--Japan, Canada, West Germany, England and Australia--reported double-digit sales increases in local currency. Many other expanding markets-- including France, Spain, Switzerland, Hong Kong, Brazil, and Mexico--also recorded very strong sales gains. If exchange rates had remained at 1989 levels, Systemwide sales would have been greater than reported by $31 million, resulting in a 10% increase. During the quarter, 43 restaurants were added (64 in 1989), including 24 in markets outside of the U.S. (33 in 1989). An additional

205 restaurants were under construction at quarter-end (192 in 1989), including 96 outside of the U.S. (91 in 1989).

Company-operated restaurant margins were 16.2% in 1990, compared to 16.0% in 1989. Lower food and labor costs as a percent of sales were partially offset by increases in other operating costs. Franchised restaurant margins were 82.2% of applicable revenues for 1990, compared to 82.3% for 1989. For the quarter, markets outside of the U.S. contributed 47% and 23% of consolidated Company-operated and franchised restaurant dollar margins, respectively, compared to 39% and 20% one year ago.

Other revenues--net include gains on sales of restaurant businesses, the Company's share of operating results of affiliates, investment income, and miscellaneous income and expense. Gains on sales of restaurant businesses were $11.1 million in 1990, compared to $8.1 million in 1989.

The increase in general, administrative and selling expenses was due primarily to higher employee and advertising costs resulting from expansion around the world. The increase in interest expense was attributable to higher average debt outstanding as a result of expansion, reinvestment and treasury stock purchases.

The effective income tax rate decreased to 36.7% for 1990, compared to 37.6% one year ago, primarily due to the realization of greater tax benefits related to certain foreign operations.

#90109b0978 04/19/1990 ~Business Wire

LOS ANGELES (APRIL 19) BUSINESS WIRE - Utilitech Inc. (NASDAQ symbols UTLL - Common Shares, UTLLW - Warrants) Thursday announced that it has completed the acquisition of the Decora division of United Merchants & Manufacturers, Inc. (''UM&M'') for $23 million in cash. Decora is best known as the original manufacturer of the pressure-sensitive shelf-lining material, ConTact.

Decora is the sole and exclusive manufacturer of ConTact for Rubbermaid Incorporated, which owns the ConTact trade name. Concurrently with the acquisition of Decora, Utilitech and Decora have entered into an exclusive manufacturing agreement with Rubbermaid which provides for a guaranteed level of profitability to Decora on sales to Rubbermaid, which presently account for approximately 80 percent of Decora's revenues.

The manufacturing agreement, which expires on March 31, 1995, provides an automatic extension of three additional years.

In business since 1945, Decora operates from its own 230,000 square foot facility in Fort Edward, New York. Decora's average earnings over the past five years are approximately $3.8 million before interest and taxes, however in the most recent nine months, Decora's earnings are running at a higher annualized rate. For the year ended June 1989, Decora's $42 million in revenues produced earnings of approximately $4 million before interest and tax.

Beyond its contractual obligations to Rubbermaid, Decora has significantly expanded its product line to include graphics arts products, specialty tapes, pressure-sensitive label materials, and siliconized release papers. Management expects that while its long-standing manufacturing agreement with Rubbermaid will help ensure stable and profitable operations for Decora over the near and longer-term, diversification into the afore-mentioned specialty product lines will provide growth opportunities and the potential for significant earnings gains.

To complete the acquisition, Utilitech provided $3 million of common equity and obtained $7 million of subordinated debt provided by CIGNA Investments, Inc. and $15 million of senior bank credit facilities, in the form of a long term loan and a revolving credit line from Norstar Bank of Upstate, N.Y., a member of the Fleet/Norstar Financial Group.

Nathan Hevrony, Utilitech's Chairman and Chief Executive Officer stated, ''The acquisition of Decora completed a major step in the continued growth of Utilitech and the implementation of our business plan of expansion through internal growth and acquisition. With the consolidation of Decora we expect Utilitech to be profitable in the current fiscal year.''

Utilitech, Inc. furnishes products and services to the pressure-sensitive lighting and telecommunications industries. In addition to Decora, in December 1989, Utilitech acquired Yorkville Industries, based in Amityville, N.Y., a leading nationwide manufacturer and distributor of lighting products, in business for some 70 years. Utilitech also owns Elsco Industries, Inc. based in Stockton, Calif. and UMD based in Tampa, Fla.

#90109b0980 04/19/1990 ~Business Wire

MEMPHIS, TN (APRIL 19) BUSINESS WIRE - Union Planters Corp. (NYSE:UPC) (the corporation) reported net earnings Thursday of $5.7 million, or 30 cents per share for the first quarter of 1990.

Net earnings for the like period in 1989 were $7.4 million, or 39 cents per share.

Noninterest income, excluding broker/dealer profits and commissions, was level with 1989. Noninterest expenses, excluding broker/dealer commissions paid, grew 6.5 percent from $32.2 million in 1989 to $34.3 million for the first quarter of 1990.

This increase consisted primarily of a $589,000 increase in legal fees applicable to a continuing high level of litigation, a $354,000 increase in regulatory assessments, $165,000 for the costs of closing a branch office of the broker/dealer operations and a $712,000 increase in noninterest expenses related to three banks acquired in 1989 which were accounted for as purchases.

Nonperforming assets (including loans 90 days or more past due) were $35.6 million at March 31, 1990, compared to $30.7 million at Dec. 31, 1989. As a percentage of loans and leases plus foreclosed properties, nonperforming assets were 1.73 percent at March 31, 1990, compared to 1.44 percent at Dec. 31, 1989.

The corporation ended the quarter with $3.9 billion in assets and total shareholders' equity of $245 million. Loans and leases at March 31, 1990, were $2 billion and total deposits were $3 billion.

The corporation's regular quarterly dividend of 12 cents per share is expected to be declared at the board of directors meeting on Apr. 26, 1990.

Union Planters Corp. is a multi-bank holding company headquartered in Memphis. Its principal bank subisdiary is Union Planters National Bank (UPNB) in Memphis.

The corporation's Mississippi bank subsidiaries are United Southern Bank headquartered in Clarksdale and First National Bank in New Albany.

The corporation's other Tennessee bank subsidiaries are: Citizens Bank in Cookeville, Bank of Roane County in Harriman, the First National Bank of Crossville, Merchants State Bank in Humboldt, First Citizens Bank of Hohenwald, Bank of Trenton and Trust Co., Pickett County Bank and Trust Co. in Byrdstown, Cumberland City Bank and Citizens Bank & Trust Co. in Wartburg.

The corporation also has one bank, Steiner Bank, in Birmingham, Ala.

Union Planters investment bankers corporation and its subsidiary, Union Planters Investment Bankers Group Inc. comprise the corporation's broker/dealer operations.

WASHINGTON (APRIL 19) COMTEX - The Securities and Exchange Commission approved a rule today which is expected to result in the exemption of billions of dollars of privately placed securities from SEC requirements.

The SEC commissioners voted 4-0 to enact the new rule 144a, which will exempt U.S. and foreign institutions from registering with the SEC and allow them to sell stocks and bonds among themselves. In order to participate, institutional investors must hold at least $100 million in securities. Individual investors will not be allowed to participate. Securities on listed stock exchanges and NASDAQ will not qualify for the exemption.

The rule is designed to permit institutional investors, which typically include pension funds and insurance firms, to freely trade securities among themselves in private placements without having to go through the registration and disclosure process. A private placement is a sale of securities to a limited number of investors. It is used largely to sell corporate debt. Corporations often utilize private placements as a cheap means to raise money by selling stocks or bonds.

The rule is expected to induce foreign firms to invest more heavily in U.S. markets as a means to raise capital. Disclosure and regulatory rules have been a factor in discouraging overseas companies from investing here in the past.

The commission also approved a proposed rule by the National Association of Securities Dealers allowing the NASD to begin operating its "Portal" system. Portal, which stands for Private Offerings, Resales and Tradings through Automated Linkages, will serve as the primary marketplace for securities exempted from SEC registration under Rule 144a.

#90109c0077 04/19/1990 ~Comtex

WASHINGTON (APRIL 19) COMTEX - A senior Treasury official said today that given conditions in Japan's economy, the Japanese yen should be rising against the U.S. dollar. Over the last 16 months, the dollar has climbed 30 percent against the yen, 10 percent since the beginning of the year.

"The fundamentals of Japan suggest the yen should be stronger than it is," David Mulford, the Treasury Department's under secretary for international affairs, told a Senate Banking subcommittee.

Mulford added the depreciation of the yen has occurred in the context of a significant adjustment in Japan's stock market, whose Nikkei index of 225 issues is down 25 percent since it closed 1989 at a record 38915.87, as well as a correction in other Japanese asset values.

The Group of Seven industrial nations earlier this month stated the yen's decline has "undesirable consequences" for world economic adjustment.

Mulford agreed that the dollar must stop rising against the yen to improve the U.S. bilateral trade deficit with Japan, which was $49.7 billion in 1989, but said currency adjustment alone is not enough.

"Depreciating the dollar against the yen is not the only tool available to improve our bilateral trade with Japan," he said. "We must concentrate on structural impediments and efforts to open up their markets."

Mulford's remarks on Japan were part of a presentation before the Senate

panel updating developments on international economic and exchange rate policies. He said the economic policy coordination process of the G-7 nations (U.S., Japan, West Germany, France, United Kingdom, Italy and Canada) has contributed to the favorable performance of the world economy.

"The economic expansion in the industrial countries has been sustained for eight consecutive years," Mulford said. "Economic growth is slowing in several countries, but to more sustainable levels, financial markets have become liberalized and inflation is in check."

Mulford said the restructuring of Eastern European economies towards a market basis and the reunification of the German economies should contribute to improved global growth and a reduction of external imbalances. West Germany's trade surplus climbed last year to $72 billion.

"If German reunification can be managed properly, this will help the global economy," he said.

He noted the large East German population inflow into West Germany is already raising German domestic demand. If additional demand can be met without undue inflationary consequences by diverting West German exports to domestic uses and by increasing imports, this could reduce the huge West German trade surplus and increase trade opportunities for non-German suppliers.

In October 1988, the U.S. cited Taiwan and South Korea for "manipulating" their respective exchange rates to gain an unfair competitive advantage in international trade. The Treasury has concluded that both nations presently are not engaged in exchange rate manipulation but continues to monitor their actions.

A Treasury report said "it can be argued that, despite the lack of evidence of direct exchange rate 'manipulation', Taiwan's remaining exchange and capital controls -- recent liberalization not withstanding -- constitute a mechanisim for indirect 'manipulation' by distorting supply and demand in the market."

The report also cautioned that despite some steps to liberalize controls, South Korea's "system remains characterized by pervasive government intervention in financial intermediation and significant constraints on the ability of U.S. and other foreign financial institutions to compete on an equal footing with Korean institutions."

Sen. Paul Sarbanes (D-Md.) noted that the Treasury report did not mention the Peoples Republic of China. The U.S. trade deficit with China jumped from $3.47 billion in 1988 to $6.18 billion in 1989 and in the same period the Chinese won went from 3.71 to one dollar to 4.71 per dollar.

Mulford said China was not included in the report because it ran an overall trade deficit in 1989. "China had a world trade deficit of $1.9 billion in 1989," he said. "The law enacts us to investigation nations with a current global account surplus."

#90109d1420 04/19/1990 ~French/German News Agency

BONN (APRIL 19) - West Germany confirmed Thursday it had received a lengthy protest from India over a sale of secret submarine blueprints to South Africa, but the foreign office declined to give further details.

New Delhi is reported to be upset that logs of the trials of one of its own West-German-built submarines were passed on to the South Africans, who are said to be trying to build the same type of vessel.

Documents recently revealed here show the logs were handed to a South African embassy courier in May 1986.

The Indians are reported to have protested that this breached secrecy provisions of their own contract with the West German shipyard Hdw and also broke a United-Nations-backed embargo on arms sales to South Africa.

#90109d1620 04/19/1990 ~French/German News Agency

BREMEN, WEST GERMANY (APRIL 19) - A west German eye surgeon has restored the sight of three blind girls from Bahrain - and further operations are planned this year in a scheme being backed by the Amir of the small Gulf state, Sheikh Isa bin Sulman al-Khalifa.

Manahil Ali Abdullah, 11, Alia Ali Ganem, 13, and Khadija Yessef Malala, 21, were operated on 10 days ago by Professor Dr. Ulrich Demeler at the Central Hospital in this northern Germany city.

They were being released Thursday and are due to fly back home on Saturday.

Demeler said the three girls were suffering from different eye diseases rendering them blind. One of the girls had a congenital cataract, another needed to be operated on a distorted cornea while the third was also suffering from a cataract.

There were tears of joy at the hospital when nurses removed the bandages from three patients. For the first time they could recognise light and shade, register shapes and objects and see faces.

''They were so happy they wanted to jump up and down on their beds, but I had to forbid them,'' the doctor said.

''It was fantastic for the doctors too,'' he added.

Now more blind children from Bahrain are to make the journey to Bremen for operations which it is hoped will restore their sight.

Demeler first visited Bahrain some two months ago at the invitation of head of state Sheikh Isa bin Sulman al-Khalifa. About 200 children between eight and 15 from several Arab countries are being taught at a school for the blind in the capital, Manama.

''I have examined all of the children and think that 15 of them have at last the chance to be able to see,'' Demeler said.

The next three children are expected to be flown to Bremen in June. ''At the moment it is Ramadan (the Moslem period of fasting) there and that's why we are not doing anything for the time being,'' Demeler said.

The cost of the treatment, accommodation and flights is being financed by a donation account in Bahrain which has been generously supported by the Amir.

#90109d1630 04/19/1990 ~French/German News Agency

BEIJING (APRIL 19) - Beijing in a sharp warning Thursday said it will not tolerate radio broadcasts from a dissident-hired ship that is expected to arrive off the Chinese coast in the few days.

Chinese foreign ministry spokeswoman Li Jinhua said planned broadcasts by the pirate radio station aboard the ''Godness of Democracy'' would be in violation of international law and the principles of international relations.

''China will thus not tolerate this,'' she added. She said China could not rule out to use of violence and warned foreign countries or organization against supporting the pirate radio ship.

The vessel, run by the Chinese dissident Federation for Democracy in China with the support of international media, embarked on its voyage from the French port of La Rochelle last month.

#90109d1900 04/19/1990 ~French/German News Agency

PARIS (APRIL 19) - The Organization of Petroleum Exporting Countries (OPEC) has called an emergency meeting of the agency's price monitoring committee for May 2 in Geneva to discuss ways of halting the recent

downtrend in oil prices, a source close to the OPEC presidency said on Thursday. He said the decision was made by the current OPEC president, Algerian Oil Minister Sadek Boussena.

The committee consists of the organization's eight main members: Saudi Arabia, Kuwait, Iran, Iraq, Algeria, Venezuela, Indonesia, and Nigeria, but the meeting will be widened to include the other members, the source told Agence France-Presse.

There has been speculation for some time that an emergency meeting of the committee or of OPEC itself would be called.

#90109d2130 04/19/1990 ~French/German News Agency

BEIJING (APRIL 19) - Chinese Premier Li Peng feted his Fijian counterpart Ratu Sir Kamisese Mara here Thursday and threw his support behind a nuclear-free South Pacific.

In a banquet speech, Mr. Li said China would always back efforts by South Pacific nations to safeguard their independence as they develop regional stability, co-operation and economic ties.

"We are also supportive of their reasonable demand for the establishment of a South Pacific nuclear-free zone, and their positive proposal for protecting and rationally exploiting fishery resources," he said.

Mr. Li was quoted by the official New China News Agency (NCNA), which earlier announced that the premier had accepted an invitation from Sir Mara to visit Fiji at a future date.

Sir Mara arrived in Beijing on Wednesday to conclude a six-day tour of China, his fourth since 1978.

Earlier this week he visited the Shenzhen special economic zone, bordering Hong Kong, the Guangzhou spring trade fair, and the southwest city of Chengdu.

#90109d2140 04/19/1990 ~French/German News Agency

BEIJING (APRIL 19) - Chinese Public Health Minister Chen Minzhang will attend the swearing-in of Nicaragua's new president in Managua April 25, a Foreign Affairs Ministry spokesman said Thursday.

Mr. Chen has accepted an invitation to attend the swearing-in of Violeta Chamorro.

Early last month Beijing said it wanted to develop "friendly relations" with the new government, which replaces the Sandinista government of President Daniel Ortega, a close Chinese ally.

The two countries opened diplomatic ties in 1985 when Managua became the first Central American country to recognise Beijing as China's legitimate government, rather than the Nationalist government in Taiwan.

#90109d2190 04/19/1990 ~French/German News Agency

GDANSK, POLAND (APRIL 19) - Lithuanian President Vytautas Landsbergis has asked Polish Premier Tadeusz Mazowiecki to officially recognize the Lithuanian government, sources at a Solidarity congress here said Thursday.

The sources said that Mr. Landsbergis told Mr. Mazowiecki that if the Polish government was unable to meet his request, he would like it to officially recognize Lithuania's declaration of independence from the Soviet Union.

The Lithuanian parliament proclaimed the Baltic republic's independence on March 11 after elections in which the nationalist Sajudis movement defeated the communist party.

Soviet authorities carried out a threat to cut off supplies of oil late Wednesday and sharply reduced natural gas supplies on Thursday, following Lithuania's refusal to repeal laws passed since March 11.

Mr. Landsbergis sent his message with a member of parliament, Czeslaw Okinczyc, who is representing Lithuania at the congress here. Mr. Okinczyc spoke for more than an hour with Mr. Mazowiecki in Warsaw on Wednesday.

Mr. Landsbergis also sent a message to Solidarity leader Lech Walesa, thanking the movement for its "moral help" and "political support" in its struggle with the Soviet authorities.

-30- 1436
#90109d2260 04/19/1990 ~French/German News Agency
ANKARA (APRIL 19) - In a tit-for-tat move Thursday, Turkey expelled eight West German diplomats after Bonn insisted that Ankara recall 15 personnel suspected of intelligence gathering.

West German ambassador Ekkehard Eickhoff was summoned to the foreign ministry here and told that Turkey had agreed to take back the 15 from various Turkish diplomatic and consular missions in West Germany, according to a communique here.

They could ''no longer carry out their duties because of allegations and the fact that their lives have been endangered''.

At the same time ministry undersecretary Tugay Oezceri told him Ankara desired the recall of eight officials in West German missions in Turkey ''found to have been engaged in activities incompatible with their work'', the statement said.

The diplomatic tiff, the worst crisis between the two Nato allies was sparked last month by a West German television program which said West German security services had identified about 30 Turkish secret police (Mit) officials with diplomatic cover spying on Turkish ''guest workers'' in West Germany.

After Bonn requested Ankara to recall 15 of suspect officials, Ankara charged the telephones of its missions in West Germany were being tapped.

A spokeswoman for the West German embassy here said Ankara's move was unjustified.

She said: ''None of us have done anything to justify the charge of activities incompatible with our work.'' The eight diplomats subject to recall were not identified.

LONDON (APRIL 19) - British Foreign Secretary Douglas Hurd will visit Poland from April 29 to May 2, the Foreign Office announced on Thursday.

During his stay he will have talks with several members of the government.

He will also travel to the northern port of Gdansk to see Solidarity leader Lech Walesa on the last day of his trip.

Sir Geoffrey Howe was the last foreign secretary to make an official visit

to Poland in April 1985.

Prime Minister Margaret Thatcher went to Poland in November 1988. The head of Poland's Solidarity-led government Tadeusz Mazowiecki visited London in February.

-30- 796

#90109d2330 04/19/1990 ~French/German News Agency

PRETORIA (APRIL 19) - South African police Thursday shot dead four youths and wounded at least one other during a protest in a black township in Orange Free State province.

Four young men had been "fatally wounded" and a young woman "slightly injured" after police had fired on protestors in Rammulotsi township, police spokesman Captain Ruben Bloomberg said here.

The anti-apartheid African National Congress, which cancelled and then rescheduled first-ever "talks about talks" with the government following police killings of up to 16 demonstrators in March, said Thursday it was formulating a response to the latest incident.

ANC Deputy President Nelson Mandela warned at a rally Friday that talks with Pretoria had "no future whatsoever" if police brutality were allowed to continue, but the movement was awating details of the latest incident, an ANC spokesman told Agence France-Presse.

Police in Rammulotsi had been "compelled to open fire with rubber bullets and shotgun rounds" when a patrol had been stoned in the township, some 200 kilometers (125 miles) south-west of Johannesburg, on Thursday morning, Capt. Bloomberg said.

People had earlier ignored two warnings by police to disperse, Capt. Bloomberg said, and through the course of the day petrol bombs had been thrown and a funeral parlor torched.

Police claimed provocation had resulted in the last shooting incident, on March 26, when they killed from seven to 16 protestors and wounded dozens in Transvaal province's Sebokeng township.

President Frederik de Klerk Tuesday announced the appointment of a judicial commission of inquiry into the action, a move welcomed Thursday by the ANC.

The ANC only rescheduled the April 11 "talks about talks" meeting with the government to May 2, 3 and 4 after reportedly receiving a secret promise from Mr. De Klerk to appoint a judicial probe.

But Mr. De Klerk denied any such promise had been made.

Rammulotsi, near the conservative farming town of Viljoenskroon, has not been a traditionally activist area, but since the release from jail after 26 years of Mr. Mandela on February 2, a wave of violence has been sweeping many of South Africa's townships.

#90109d2370 04/19/1990 ~French/German News Agency

BEIRUT (APRIL 19) - The spiritual leader of Lebanon's fundamentalist Shiites has urged Arabs to prevent the immigration of Soviet Jews to Israel by "making difficulties" for airlines, press reports said Thursday.

"Do not protest but place obstacles in the path of the immigration, make difficulties on the political level and for airlines so that America is forced to intervene to solve the problem," Sheikh Mohammad Hossein Fadlallah said.

"We are accused of being terrorists even though we are not. But the fact is that the world only respects you if you are strong," the press quoted the pro-Iranian Shiite leader as saying in the central town of Baalbeck.

He urged "Palestinians, Arabs and Moslems" to stop the Soviet influx, warning that it would lead to the expulsion of Palestinians from the Israeli-occupied West Bank and Gaza Strip.

Arab countries have expressed concern over the expected arrival of tens of thousands of Soviet Jews in Israel this year and the possibility that many will be settled among Palestinians in the occupied territories.

Several underground groups, including the pro-Iranian Islamic Jihad for the Liberation of Palestine, have threatened in recent weeks to attack airports and airlines used to transport Soviet Jews to Israel.

Sheikh Fadlallah was speaking at the traditional meal breaking the daily fast observed by faithful Moslems during the holy month of Ramadan.

The meal was organized by Iranian revolutionary guards at Baalbeck, a stronghold of the pro-Iranian Hezbollah militia, the press said.

BUDAPEST (APRIL 19) - More than 1,600 Romanians fled to Hungary during the first two weeks of April, bringing to 27,000 the number of refugees now in the country, the government said Thursday.

The influx began with 500 in January, after the bloody uprising which

toppled Nicolae Ceausescu in December, but rose steadily after clashes between members of Romania's minority ethnic Hungarian community and other Romanians on March 19, said Judith Molnar of the Office for Refugees.

Several people died and several were wounded in the violence in the town of Tirgu Mures.

Refugee camps were now full and the government was trying to find temporary housing for them elsewhere, the official news agency MTI reported.

BUDAPEST (APRIL 19) - Pope John Paul II will visit Hungary in August next year, Bishop Szilard Keresztes told a press conference here Thursday.

He said the Hungarian church hoped the visit would strengthen religious life in Hungary and the church's position in all areas.

The pope is scheduled to arrive on August 16 1991 and go immediately to Esztergom, headquarters of the Primate of Hungary, where he will meet prominent members of the Hungarian church and local people.

August 17 he will celebrate mass at Pecs airport in the south of the country. The next day he is will take part in a mass of the Orthodox church and an ecumenical mass at Debrecan, in eastern Hungary, near the Romanian border.

On Monday the pope will visit Szombathely, near the Austrian border, and on Tuesday August 20, he will celebrate a final mass in Budapest on the Feast Day of St. Stephen, the patron saint of Hungary.

SIDON, LEBANON (APRIL 19) - Fighting between rival Shiite factions spread from Beirut to southern Lebanon Thursday as the two militias battled with heavy artillery in strategic hills near this port city.

The clashes between the pro-Syrian Amal and Iranian-backed Hezbollah in the Iqlim al-Touffah region were the worst in two months and followed three days of fighting in Syrian-controlled west Beirut and its southern Shiite suburbs.

Security sources reported shelling on all fronts in Iqlim al-Touffah, apart from an area where Palestinian fighters have deployed a buffer force.

Amal and Hezbollah, vying for control of Lebanon's Shiite community, began

fighting for the strategic hill region in December but clashes had eased recently. The battle has killed more than 140 people and wounded 400.

Earlier Thursday, Syrian troops were forced to intervene in west Beirut to stop rocket and automatic-weapon exchanges between the Shiite rivals that left four people dead and one wounded.

Fifteen people have been killed in and around west Beirut and 57 wounded since Amal-Hezbollah fighting flared up there Tuesday.

VIENNA (APRIL 19) - The problems of the Turkish minority in Bulgaria have to be solved in an international framework, Bulgarian Foreign Minister Bojk Dimitrov said here Thursday.

Any attempt by a single country to represent the interests of a minority in another country inevitably risked looking like interfering in that country's internal affairs, he said.

For this reason, an international framework had to be created for solving the problems of minority Turks in Bulgaria who, Dimitrov admitted, had in the past been subjected to injustices.

A suitable international forum for discussing the Turkish minority would be the series of Helsinki follow-up conferences on security and cooperation in Europe, he suggested.

Dimitrov was in Vienna to talk to the Bulgarian delegation to the East-West disarmament talks.

GENEVA (APRIL 19) - A senior U.S. disarmament expert said Thursday an American-Soviet Strategic Arms Reduction Treaty (Start), expected to be mapped out before the end of this year, should initially be valid for a period of 15 years only.

American chief arms negotiator Richard Burt, addressing the Geneva East-West disarmament conference, described as ''a major mistake'' criticism that the treaty could be overtaken by developments in East-West relations.

Despite the latest events in the East, possible changes in the U.S. seccurity strategy must be considered only ''with a sense of constructive caution'', he said.

He told the 40-nation conference that the mechanism to verify the planned cuts in nuclear arms under Start might one day be judged by historians as the most significant aspect of the pact.

Under the treaty, ''Inspectors will visit almost every important strategic military installation of the other side'', Burt added.

ANKARA (APRIL 19) - More than 300 people a year die violently in eastern Turkey, according to interior ministry figures released here on the eve of the army's annual spring offensive against Kurdish separatist guerrillas.

The statistics, given to parliament, indicate that casualties among the guerrillas and the armed forces have been rising more sharply than civilian deaths since martial law was suspended in the region on July 19, 1987.

Between that date and Thursday of last week, a total of 1,080 people were killed and 594 injured in the 11 provinces of southeast Anatolia now under a state of emergency.

They included 427 "separatist terrorists" and 236 soldiers, gendarmes and special policemen, and 417 civilians whose deaths the ministry blamed chiefly on guerrilla "reprisal attacks" on villages which support the authorities.

In the three years preceding the lifting of martial law, 313 civilians, 272 guerrillas and 159 members of the armed forces were killed, according to figures compiled by AFP on the basis of earlier statements.

That toll dates from August 15, 1984, when the Marxist Kurdistan Workers' Party (KWP) attacked a gendarmerie in the small town of Eruh, killing 18 people.

Eruh lies 170 kilometers (105 miles) east of the regional administrative center, Diyarbakir, and 75 kms (45 miles) north of the point where the frontiers of Turkey, Syria and Iraq meet.

The KWP, which has its headquarters in the Bekaa valley, in a part of central Lebanon under Syrian army control, claims to have between 2,000 and 20,000 men under arms in the mountains of southeast Anatolia.

The KWP is fighting for an independent state for the Kurds, a mountain people of some 25 million, half of whom live within Turkey, more than a third in Iran and the remainder in Iraq or Syria.

At present, as the KWP prepares to resist the army's annual offensive against its mountain strongholds, tensions are running high throughout Turkey because of the murder of nine engineers in a Kurdish ambush on March 22 and the deaths of five people in demonstrations on March 20 in Cizre, near the Syrian border.

The army is especially anxious about the implications of a week-long strike by trades people in Cizre against military "brutality" in breaking up the demonstration.

Meanwhile, members of parliament are demanding that the state of emergency be amended.

They object in particular to a government decree issued on April 10 giving the administration in Diyarbakir the power to censor the press, ban strikes and exile people to other parts of Turkey.

#90109d3070 04/19/1990 ~French/German News Agency

CAPE TOWN (APRIL 19) - South Africa's President Frederik de Klerk pledged Thursday to give the white minority the last word on any decisions on a new constitutional system to end more than four decades of apartheid rule.

He told parliament here that it was the white voters who gave his National Party the mandate to carry out reforms and therefore it was the white electorate which would have the right to decide on the outcome of negotiations over constitutional proposals.

He said separate referendums could also be held by South Africans of Indian and mixed-race descent and there would also be no objection to a poll by the black majority which has no voting rights and is not represented in parliament.

De Klerk is due to meet a delegation of the African National Congress (Anc) under the leadership of vice-president Nelson Mandela in Cape Town on May 2 for preliminary talks leading to power-sharing negotiations.

De Klerk has already ruled out any constitution leading to black majority rule without protection for the white minority. He has called for a system to include a division of power enabling every political group to participate equally in government. The Anc is continuing to demand a charter based on '' one man, one vote''.

The president renewed a pledge to abolish the Separate Amenities Act, the law on racial segregation in public areas such as parks, beaches and buses by the end of the year.

A change in the law on segregation in residential areas, the Group Areas Act, was conceivable early next year, he said

The Population Registration Act, which forms the basis of apartheid laws in South Africa, remained an ''inseparable part of the present constitution'' and could only be abolished with a new constitution, de Klerk said.

De Klerk reiterated that the government intended to repeal all discriminatory legislation. ''We are serious in our intention to do just this,'' he said.

JAKARTA (APRIL 20) - PT Tambang Timah, an Indonesian state enterprise and one of the world's largest tin mining firms, has announced a five-year modernization plan in a bid to become more competitive.

Timah President Director Kuntoro Mangkusubroto said late Thursday that the plan aimed at cutting production costs to 4,500 dollars a ton from the present average of between 5,700 to 6,000 dollars, and bring annual output capacity to a range of 27,000-30,000 tons from 23,800 tons.

Timah had already approached the World Bank for possible financing of the plan which should begin next year, Mr. Kuntoro said.

The company was still calculating the total costs of the plan which would involve rejuvenating its fleet of 31 dredgers and its workshops.

"We have to modernise. There's no other way," he said adding that the plan would put Indonesia on par with Brazil, the main competition which has a production cost of 5,000 dollars a ton or less.

Indonesia is the largest producer in the Association of Tin Producing Countries (ATPC) with exports of 29,900 tons in calendar 1989 -- 23,000 tons from Timah and the rest from PT Koba Tin, an Australian firm.

ATPC groups Australia, Bolivia, Indonesia, Malaysia, Nigeria, Thailand and Zaire. Brazil and China are the largest tin producers outside the group.

#90109d8780 04/19/1990 ~French/German News Agency

TOKYO (APRIL 19) - Japan and the United States will hold talks on amorphous metals, a new source of bilateral trade friction, the Foreign Ministry said Thursday.

"The governments of the U.S. and Japan will initiate immediate talks to seek solutions within 150 days to issues raised regarding amorphous metals " the ministry said in a statement.

Amorphous metal is a high-technology product used primarily to improve efficiency in electric power transmission.

Allied-Signal Inc. of the United States filed a complaint with the U.S. Trade Representative (USTR) last month, accusing Japan of trying to exclude U.S. firms from its amorphous metal market.

Japan's International Trade and Industry Ministry Thursday denied Washington's allegation that Japanese electric power companies were boycotting U.S.-made amorphous metals.

In Washington, U.S. Trade Representative Carla Hills said Wednesday she would delay action on the Allied-Signals petition for retaliation for five months while talks go forth.

If a satisfactory agreement is not reached within 150 days, the U.S. Trade Representative would consider a new petition for relief by the company, she said.

Edward Hennessy, Allied-Signal's chairman and CEO, said his company had agreed to the postponement in hopes that the talks would open Japan's amorphous metals market.

"The recently announced progress in the trade talks between the United States and Japan holds out the promise that trade issues between the two nations can be resolved in a more businesslike and less confrontational manner," he said in a statement.

"We hope that Allied-Signal's case will demonstrate that this process can

work," he said.

Allied-Signal said its amorphous metals invention has been kept out of the Japanese market for a decade while forming domestic amorphous metals companies to produce and market a rival product.

Marketed under the name Metglas, the Allied-Signal product is used in the core of energy transformers to reduce energy loss. The company says the potential world market for amorphous alloys in transformers is 1 billion dollars a year.

SEOUL (APRIL 19) - South Korea will not be hit by U.S. trade retaliations in the area of government purchases, foreign ministry officials said here Thursday.

The officials said Seoul had successfully avoided being named by Washington as a country engaged in unfair trade practices during two-day working-level trade talks that ended here Wednesday.

A U.S. Embassy press release said only that "the information provided to the U.S. delegation will be used by the U.S. government officials to determine whether Korea should be designated under Title VII of the Omnibus Trade Act."

The act, commonly known as Super 301, calls for trade retaliation against partners deemed to be engaging in unfair trade practices.

"The President must make a final determination by April 30, 1990," the release said.

But a ministry official said Seoul had been told it would not be identified as an unfair trade partner in the field of government procurement.

"Even before the final results are announced, the student can sometimes find out how he did," he said.

The U.S. side, headed by Trade Representative Nancy Adams, laid out the condition that Seoul proceed with plans to join a General Agreement on Tariffs and Trade (GATT) code on the government procurement market.

When South Korea joins the code, foreigners will be allowed to take part in bidding to supply the government, the South Korean officials said.

The United States also wanted to be consulted on the makeup of the list, which will include the government agencies and the goods to be opened for

foreign competition in government procurement.

The so-called "offer list" is presented by a country seeking to join the GATT code.

But the South Korean side rejected Washington's demand for prior consultation on the offer list, saying the issue of joining the code was multilateral in nature.

It told the U.S. side that it had announced to the GATT panel on government procurement its plans to join the code this year, and would provide the offer list in June, the officials said.

The Trade and Industry Ministry has set up an ad hoc committee to study the benefits and risks of joining the code, which allows signatories to take part in certain bidding.

South Korea's government procurement market amounted to three trillon won (4.5 billion dollars) in 1989.

The U.S. side said that under Super 301, the list of countries believed to be engaged in unfair trade in government procurements was to be put out the end of April, according to the ministry officials.

They said South Korea also turned down U.S. demands that it allow foreigners to engage in insurance brokerage, and that it abolish quotas for the import of foreign movies.

The two sides agreed to form a working group to review technical regulations, which the U.S. said was affecting the imports of its agricultural products, such as pecans, papayas and strawberries.

#90109d9470 04/19/1990 ~French/German News Agency
TOKYO (APRIL 19) - Britain's Standard Chartered Bank Ltd. has been ordered to pay some 600 million yen (3.8 million dollars) in additional taxes after concealing income from a land sale, Japanese news reports said Thursday.

The reports, quoting tax officials, said the bank violated a Tokyo Metropolitan Government law which sets maximum prices for land sales.

The bank's Tokyo branch sold 6,150 square metres (67,650 square feet) of land in central Tokyo to leading Japanese construction firm Haseko Corp. for 18 billion yen (115 million dollars) in 1987, the reports said.

The sum was within the government's limit but the bank reportedly received

a clandestine payment of an additional 1.3 billion yen (8.3 million dollars) from Haseko, which both companies failed to declare to tax authorities.

Haseko reportedly disguised the secret payment by registering a loss of about two billion yen (12.7 million dollars) on a fictitious land transaction in Hong Kong. It may also be ordered to pay additional taxes, the reports said.

Haseko spokesman Masahiro Hatashita was quoted as saying that the tax authorities had conveyed "instructions" to the construction company. But he added that Haseko held "different views" from the authorities.

A Standard Chartered official said the employee involved in the land transaction had left the country and refused to comment further.

But a Japanese news agency quoted an unidentified official as saying the bank had paid the additional taxes. "We do not think we have committed a criminal act," Jiji Press quoted the official as saying. "It must have been a simple mistake or a technical problem."

Standard Chartered is Britain's fifth-biggest bank and has wide-ranging activities in the Asia-Pacific region with branches and subsidiaries in more than 15 countries, including a particularly strong presence in Hong Kong.

Japanese tax authorities refused to comment on the reports.

#90109d9560 04/19/1990 ~French/German News Agency

TAIPEI (APRIL 19) - Taiwan's trade surplus with its largest trading partner, the United States, is expected to fall to eight billion U.S. dollars this year, under the 10.7-billion-dollar target, a government official said Thursday.

Authorities here launched a five-year export diversification program in 1988 under pressure from Washington following Taiwan's record 16-billion-dollar trade surplus with the United States in 1987, said Chang Lung-sheng, spokesman for the cabinet-level Taiwan-U.S. trade committee.

Under various export incentives and measures to boost U.S. imports, the trade imbalance was narrowed to 13 billion dollars in 1988 and to 12 billion last year.

Economic officials had planned to reduce the trade gap by 10 per cent annually under the program and targeted 10.7 billion dollars as the projected trade gap for this year, Mr. Chang said.

But sluggish exports to the United States and expanded imports from that country would lower the gap to eight billion dollars for 1990, he added.

Taiwan's trade surplus with the United States in the first quarter of 1990 fell 23.3 per cent to 1.87 billion dollars over the same period last year, Mr. Chang said, adding that the drop also showed the island's declining export competitiveness amid mounting production costs.

SUNDAY, APRIL 22

7:00 a.m.
PBS, ''Sesame Street.''

8:00 a.m.
PBS, ''Mister Rogers' Neighborhood.''

8:30 a.m.
PBS, ''Long Ago and Far Away: 'Happy Circus.'''

9 a.m.
CBS, ''Sunday Morning'' - The 20th Anniversary of Earth Day - Includes features about Paul Winter, an environmental jazz musician; Lester Brown, author of ''State of the Earth'' and former Sen. Gaylord Nelson of Wisconsin, who founded Earth Day 20 years ago.
NBC, ''Sunday Today'' - Garrick Utley and Maria Shriver co-anchor.
PBS, ''Sesame Street.''

10:00 a.m.
PBS, ''Wonderworks: 'Caddie Woodlawn''' - Emily Schulman stars as a young Wisconsin girl in this coming-of-age story set in the early pioneer days. Based on Carol Ryrie Brink's Newbury Award-winning story, the program also stars Season Hubley, Parker Stevenson, and James Stephens.

10:30 a.m.
ABC, ''The Health Show.''
NBC, ''Meet the Press.''

11:00 a.m.
ABC, ''Business World.''

PBS, ''Degrassi Junior High: 'Revolution.''' R.

11:30 a.m.
ABC, ''This Week With David Brinkley.''
PBS, ''Degrassi High: 'Stressed Out''' - It's final exam time and Michele takes caffeine pills to stay awake.

Noon
PBS, ''Wild America.''

1:00 p.m.
CBS, ''The NBA on CBS Live'' - Game to be announced from one of the following sites: New York at Cleveland, Boston at Philadelphia, Chicago at Detroit, Utah at Houston or Phoenix at San Antonio.
NBC, ''Sportsworld'' - Taped coverage of the finals of ''The Jeep Superstars'' competition from Bal Harbour and Key Biscayne, Fl.

1:30 p.m.
PBS, ''Inside Washington.''

2:00 p.m.
PBS, ''Arctic Haze'' - An investigation of the mysterious invasion of polluted air into the Arctic. The program examines its effects on the land and the people of northern Alaska and the world.

2:30 p.m.
PBS, ''The Rotten Truth: A 3-2-1 Contact Extra'' - This program uses music videos and animation to explore the country's vital problem of lack of space for proper garbage disposal.

3:00 p.m.
ABC, ''ABC Sports: 'Outside Adventure.'''
NBC, ''Golf'' - Live final round coverage of the Liberty Mutual Legends of Golf from the Barton Creed Country Club in Austin, Texas.

3:30 p.m.
CBS, ''Golf,'' - Final-round coverage of Greater Greensboro Open, live from Forest Oaks Country Club in Greensboro, N.C. Pat Summerall, Ken Venturi, Jim Nantz, Ben Wright, Steve Melnyk and Gary McCord provide commentary.

4:00 p.m.
ABC, ''Toyota Grand Prix of Long Beach.''

6:00 p.m.
ABC, ''ABC's World News Sunday'' - Anchored by Sam Donaldson.
NBC, ''NBC Nightly News.''

7 p.m.
ABC, ''Life Goes On'' - Drew gets a big break when a developer hires him for a luxury home project. But he's torn as Indian activists and Paige protest that the project would defile an ancient burial ground. Meanwhile, Corky insists he has sighted the mythic wolf that legend says guards the land.
CBS, ''60 Minutes.''
NBC, ''The Magical World of Disney: 'Donald the Star Struck Duck.'''
PBS, ''The Frugal Gourmet.''

7:30 p.m.
PBS, ''This Old House.''

8 p.m.
ABC, ''America's Funniest Home Videos.''
CBS, ''Murder She Wrote'' - On a visit to a childhood friend residing in Jamaica, Jessica becomes involved in voodoo and black magic as murder interrupts a family celebration.
NBC, to be announced.
PBS, ''Nature'' - A six part exploration of the forces that have shaped the diverse land ''down under'' in Australia. The first program examines Australia as the kingdom of marsupials, including kangaroos, Tasmanian devils, and oppossums.

8:30 p.m.
ABC, to be announced.
NBC, ''Sister Kate.''

9 p.m.
ABC, ''Time Warner Presents The Earth Day Special'' - This entertainment event uses comedy, drama and music to illustrate how our environment has reached a state of crisis, and will explore how we can all help to conserve our planet's precious resources. Scheduled guests include Kevin Costner, Ted Danson, Quincy Jones, Michael Keaton, Bette Midler, Meryl Streep, Barbara Streisand, Robin Williams and Bruce Willis.
CBS, ''The CBS Sunday Night Movie: 'The Comeback''' - Robert Urich stars as a onetime football star who returns to his family after a 20-year separation and falls in love with his son's girlfriend.
NBC, ''NBC Sunday Night at the Movies.''
PBS, ''Masterpiece Theatre: 'Traffik''' - A five-part dramatic series focusing on the international drug trade. The series traces the drug route with three stories filmed in three different countries. In the first episode, British politician Jack Lithgow finds himself in conflict with the opium farmers of the North West Frontier in Pakistan. Part 1 of 5.

11:00 p.m.

ABC, ''World News Tonight: The Weekend Report.''

11:30 p.m.
NBC, ''George Michael's Sports Machine.''

1:05 a.m.
PBS, ''Latenight America With Dennis Wholey.''

WASHINGTON (APRIL 19) PR NEWSWIRE - At noon today, Robert J. Herrmann, senior deputy comptroller for bank supervision, Office of the Comptroller of the Currency, declared Corinth Deposit National Bank, Corinth, Ky., insolvent and appointed the Federal Deposit Insurance Corporation (FDIC) as receiver.

In 1989, the bank experienced a substantial deterioration in the loan portfolio due to poor lending practices by former management and ineffective supervision by the board of directors.

The OCC obtained a formal commitment from the board of directors to address the bank's problems. Despite the efforts of new management to address problems in the loan portfolio, the deterioration continued. Losses mounted and finally depleted the bank's capital, resulting in insolvency.

Corinth Deposit National Bank was established in 1889 and converted to a national charter in 1987. On Feb. 28, 1990, the bank had total assets of approximately $7 million.

The FDIC is expected to release additional information later today.

TOWSON, MD (APRIL 19) PR NEWSWIRE - The Black & Decker Corp. (NYSE: BDK) announced today that Mark H. Willes, president, chief operating officer and a director of General Mills Inc. (NYSE: GIS), has been elected a director of Black & Decker and appointed to the corporation's Audit Committee.

Prior to joining General Mills in 1980 as executive vice president and chief financial officer, he had served in the Federal Reserve System from 1967 to 1980, rising from economist with the Federal Reserve Bank of Philadelphia to president of the Federal Reserve Bank of Minneapolis.

Willes, 48, holds an A.B. degree from Columbia College and a Ph.D. from the Columbia Graduate School of Business.

Welcoming Willes to the board, Nolan D. Archibald, chairman, president and chief executive officer of Black & Decker, observed: "Mark H. Willes brings excellent academic credentials, a broad background in public and private enterprise, an extensive knowledge of economics and finance, and

the seasoning that comes from operating a major multi-national corporate enterprise. We are delighted that he has joined our Board."

Black & Decker's Board also declared a regular quarterly cash dividend of 10 cents per share, payable on June 29, 1990, to stockholders of record on June 11.

EMMAUS, PA (APRIL 19) PR NEWSWIRE -- Buckeye Management Co., general partner of Buckeye Partners L.P. (NYSE: BPL), today reported that the partnership's 1990 first quarter net income was $6.3 million, or $.52 per unit, compared with 1989 first quarter net income of $9.0 million, or $.74 per unit.

Revenue and operating income for the 1990 first quarter were $38.5 million and $13.7 million, respectively, compared with $38.9 million and $16.5 million, respectively, for the first quarter last year. The partnership's 1990 and 1989 first quarter results include revenues being collected subject to refund depending on the outcome of a pending rate proceeding before the Federal Energy Regulatory Commission.

First quarter net income was $2.7 million less than last year. Approximately $1.0 million of the decrease was attributable to lower revenues due to reduced fuel oil deliveries resulting from significantly warmer than normal weather in the partnership's service area and deferred gasoline shipments in advance of governmentally mandated seasonal vapor pressure changes and to a general increase in operating expenses.

The balance was primarily attributable to a provision for insurance deductibles and other extraordinary costs and expenses resulting from a rupture to one of the partnership's pipelines by a landslide near Pittsburgh on March 30, 1990, and a subsequent product release into the Allegheny River.

The affected pipeline, which is owned by Buckeye Pipe Line Co., L.P., the partnership's major operating subsidiary, has been repaired and is expected to resume service as soon as necessary governmental approvals have been obtained. Although total environmental cleanup and other costs arising from this event cannot be accurately determined at this time, based on information currently available, the general partner believes that after anticipated insurance recoveries, the partnership's loss provision will be adequate.

Overall operations during this service interruption have been largely unaffected as the partnership continues to serve the Pittsburgh area through to other pipelines.

Buckeye Partners L.P., through its subsidiary entities, is one of the nation's largest independent pipeline common carriers of refined petroleum products with nearly 4,000 miles of pipeline operating in 11 states.

MORRIS TOWNSHIP, NJ (APRIL 19) PR NEWSWIRE - Allied-Signal Inc. (NYSE: ALD) said today that it has received a total of 295 U.S. patents in 1989, earned by 314 company scientists and technicians.

Among those honored in yesterday's ceremonies was Roy T. Mitsche, a 35-year veteran of Allied-Signal's research laboratory in Des Plaines, Ill., who was recognized for the fiftieth patent award he is scheduled to receive before his retirement in July. Raymond Swedo, also of Des Plaines, and Ray Baughman of Morris Plains, N.J., were honored for earning 25 patents each.

Of the total 314 inventors, 90 came from Allied-Signal's aerospace business, 90 from automotive, 61 from engineered materials, and 74 from the corporate research and technology laboratories.

Allied-Signal ranks among the top ten of the Fortune 500 in research and development. "The scope of our commitment is reflected in the more than $600 million we spent last year on research and development," said Edward L. Hennessy, Jr., chairman and CEO.

When combined with customer-funded work, the company is directly involved with more than $1.2 billion in research, development and engineering programs annually.

The awards were presented in a ceremony here that featured Dr. Robert White, president of the National Academy of Engineering. White, a meteorologist, has served as administrator of the National Oceanic and Atmospheric Administration and chief of the U.S. Weather Bureau. He is a member of the Department of State's Advisory Committee on Oceans and International Environmental and Scientific Affairs.

Hennessy congratulated the 314 patent winners as a "valuable asset, not just to Allied-Signal, but to our whole country's scientific and research community." Hennessy stressed the need for U.S. companies to strengthen their commitment to research and development.

"If our laboratories are to remain the kinds of technical strongholds where a transistor, or laser, or new form of metal can come to life, then we must continue to invest in both basic and applied research," he said.

Allied-Signal Inc. is an advanced technology company with businesses in aerospace, automotive products and engineered materials.

HOUSTON (APRIL 19) PR NEWSWIRE - National Convenience Stores Inc. (NYSE: NCS) today announced that its board of directors declared a common stock dividend of 8 cent per share relative to the March quarter, payable on May 4, 1990, to shareholders of record on Apr.30, 1990. Shareholders will also be receiving a check for 1 cent per share on Apr.23, 1990, relative to a redemption of the company's series C preferred stock that was done in the process of adopting a new shareholder rights plan. The two payments together equal the company's normal 9 cents per share common stock dividend.

The board also declared a regular quarterly cash dividend of $2.421875 per share on the company's convertible exchangeable preferred stock series E, payable on June 1, 1990, to shareholders of record at the close of business on May 15, 1990. The amount of the dividend was prorated for the number of days remaining in the quarter from the date of issuance of the stock.

National Convenience Stores Inc. operates 1,094 specialty convenience stores in four Sunbelt states under the name Stop N Go.

LOS ANGELES (APRIL 19) PR NEWSWIRE - Mattel Inc. (NYSE: MAT) today reported net income of $8.4 million or $.17 per share for the first quarter ended March 31, 1990, up 95 percent from $4.3 million or $.09 per share for the 1989 first quarter. Net sales for the 1990 quarter were $234.0 million, up 20 percent from $195.3 million for the same year-ago period.

"Our momentum, in terms of both volume and earnings growth, continues in 1990," John W. Amerman, Mattel's chairman and chief executive officer, said. "Mattel's primary objective of consistent, predictable, profitable growth is being achieved. We anticipate the momentum will continue with comparable volume growth in the second quarter," he said.

"Demand for our core Barbie, Hot Wheels, Disney Infant and Preschool, He-Man, large doll and See 'N Say products remains excellent. The success of our strategy to concentrate on these highly profitable and more predictable products is reflected in the company's first quarter results," Amerman said. "Core product sales represented 79 percent of 1990 first quarter volume."

Mattel Inc., which reported annual revenues of $1.2 billion in 1989, is a worldwide leader in the design, manufacture and marketing of children's toys. With headquarters in Hawthorne, Calif., Mattel has offices and facilities in 19 foreign countries and sells its products in more than 100 nations throughout the world.

NEW YORK (APRIL 19) PR NEWSWIRE - Santa Fe Pacific Corporation (NYSE: SFX) (SFP) today reported a net loss of $61.4 million or $.39 per share for the first quarter of 1990, compared with net income of $187.5 million, or $1.18 per share, in the first quarter last year. Net income in the 1990 quarter was significantly affected by out-of- court settlements of two major lawsuits, the ETSI coal slurry pipeline litigation and the Texas Utilities (TU) Chaco royalty litigation. The combined settlement of these lawsuits resulted in a net after-tax charge of approximately $115 million or $.73 per share. Net income in the 1989 quarter included $210.0 million or $1.32 per share, for adoption of new rules for accounting for income taxes. In addition, the 1989 quarter included a special charge of approximately $32 million after tax, or $.20 per share, for a change in the method of estimating personal injury liability at Santa Fe Railway.

Operating income in the first quarter was $164.0 million compared with $28.7 million last year. The increase was attributable primarily to receipt of the scheduled 1990 Chaco royalty of $56.5 million from TU, property tax settlements of $50.9 million in 1990, and the $52.2 million charge associated with estimation of the personal injury liability at Railway in 1989. The net pretax charge of $187.1 million in the first quarter relates to the litigation settlements described above. Interest expense of $95.0 million was down from last year's $103.0 million due to less total debt.

Operating income of Santa Fe Railway was $66.1 million compared with a loss of $18 million in the comparable 1989 quarter. Revenues were even with last year's quarter, with carloadings 1 percent above last year and revenue per carload down 1.1 percent. The 1990 quarter includes operating income from settlement of property taxes of $31.3 million. The 1989 quarter included a special charge for changing the method of estimating personal injury liability of $52.2 million. Operating expenses on a comparable basis without these unusual items were essentially even.

Petroleum production and marketing improved operating income in the 1990 quarter to $23.7 million, compared with $11.0 million in the 1989 quarter. Revenues of $96.1 million were $17.1 million over last year's quarter due primarily to a significant increase in oil prices over the comparable 1989 quarter. Operating expenses were up slightly due to increased production of both oil and gas.

Operating income from hard minerals totaled $59.7 million, up from $11.9 million in the 1989 quarter. $45.4 million of this increase is due to acceleration of the full year's royalty from the TU coal lease. The additional increase of $2.4 million is due primarily to improved earnings from sales of coal and gold.

Real estate operating income of $8.9 million was well below the $19.4 million reported in last year's first quarter as a result of the continuing strategy adopted in 1988 to develop rather than sell properties.

Pipeline activities contributed operating income of $5.6 million for the 1990 quarter compared with $4.4 million in last year's quarter. A full period of expanded capacity and higher tariffs resulted in this increase income from pipeline operations. SFP accounts for its 44 percent ownership interest in the partnership on the equity basis.

WAUKEGAN, IL (APRIL 19) PR NEWSWIRE - Outboard Marine Corp. (OMC) (NYSE:

OM) announced today that due to a continuation of the industry- wide reduction in demand for marine products in the U.S., the company reported a net loss of $3.8 million or 20 cents per share for its second quarter ended March 31, 1990, as compared to net earnings of $9.2 million or 47 cents per share for the same quarter last year. All of OMC's 1989 financial results have been restated to remove the contributions of the company's former Lawn-Boy and Cushman divisions, which were sold in the 1989 calendar year.

OMC's loss for its 1990 second quarter was partially offset by a gain of 9 cents per share from the repurchase of $26 million of long- term debt and a gain of 29 cents per share from adjustments reflecting the settlement of prior years' income tax and related interest liabilities.

Sales for the quarter were $309 million or 23 percent below sales of $403 million for the same quarter last year. Sales in the U.S. were down 31 percent and international sales were up 6 percent.

For the six months ended March 31, 1990, the company reported a net loss of $19.1 million or 99 cents per share as compared to net earnings of $10.4 million or 53 cents per share for the same period last year. Sales for the six months ended March 31, 1990, were $542 million versus $667 million for the same period last year.

Outboard Marine Corp. is a worldwide manufacturer and distributor of marine engines and recreational power boats.

DEARBORN, MI (APRIL 19) PR NEWSWIRE - Dr. John P. McTague, Ford vice president - Technical Affairs, has been appointed by Secretary of Energy James D. Watkins to the newly created Secretary of Energy Advisory Board (SEAB).

According to the Department of Energy, SEAB will report directly to the Secretary of Energy and serve as a principal mechanism for long- range planning and analysis in the department.

SEAB is comprised of 28 distinguished representatives, including three Nobel laureates, from the private sector, nonprofit groups, academia, and state and local government. Dr. Thomas E. Everhart, president of the California Institute of Technology, will chair the board.

"The establishment of the Secretary of Energy Advisory Board is particularly auspicious at this time," said Dr. McTague. "Issues such as

the National Energy Strategy, conservation, the environment, nuclear power nuclear weapons facilities, and the roles of the national laboratories will benefit from broad public sector input.

"It is encouraging that Secretary Watkins has taken the initiative to seek this input."

Dr. McTague is the only representative of the automotive sector to be named to the SEAB.

The board will have its first meeting May 2 in Washington, D.C.

A physical chemist, Dr. McTague was appointed to his present position at Ford in March 1990. He previously had served, since June 1986, as Ford's vice president -- Research, and prior to that had been Acting Science Advisor to the President of the United States. In February 1990, Dr. McTague was appointed by President Bush to his Council of Advisors on Science and Technology.

DEARBORN, MI (APRIL 19) PR NEWSWIRE - The following statement may be attributed to John P. King, Parts and Service Engineering Office manager, Ford Parts and Service Division:

Ford Motor Company (NYSE: F) is notifying owners of a voluntary safety recall of 268 1990 Ford Festivas to fix faulty circuit boards that may cause some seat belt, engine oil pressure and battery charging warning lights not to work properly in cold temperatures.

In some cases at cold temperatures, the seat belt reminder light may not activate when the ignition key is turned to the "on" position, and the oil pressure and electrical charge telltales may not warn the driver of low engine oil pressure or of malfunctions in the electrical charging system. Dealers will replace the circuit boards.

Owners will be notified by mail and asked to return the vehicles to their dealers to have the inspection and work performed at no cost. Of the vehicles affected, all are located in the United States.

PITTSBURGH (APRIL 19) PR NEWSWIRE - PNC Financial Corp (NYSE: PNC) today reported first quarter consolidated net income of $74.5 million or $.77 per fully diluted share.

These results compare with $123.6 million and $1.29, respectively, in the first quarter of 1989. Earnings in 1990 reflect a $108.9 million provision for possible credit losses compared with $36.4 million in the same quarter of 1989. The higher provision was taken in recognition of continuing softness in regional real estate markets and the general economy.

In announcing the first quarter results, Thomas H. O'Brien, chairman, president and chief executive officer, said, "Our first quarter results reflect the strength of our fundamental business which enables us to take appropriate action when necessary to deal with cyclical economic problems. Recognizing the current operating environment, 1990 will continue to be a very challenging year for PNC and the entire banking industry. PNC is well positioned to meet these challenges with a strong capital base and diverse sources of revenue."

At March 31, 1990, total nonperforming assets, which include nonaccrual loans, restructured loans and other real estate owned, totaled $831.6 million, compared with $581.3 million at Dec. 31, 1989. This increase reflects a softening in real estate markets, changing economic conditions and the results of a recent regulatory examination of one affiliate bank and management's application of similar examination criteria throughout the company. The ratio of nonperforming assets to loans and other real estate owned was 2.94 percent at March 31, 1990, compared with 2.06 percent at Dec. 31, 1989.

PNC Financial Corp was formed in 1983 with the consolidation of Pittsburgh National Corp., Pittsburgh, and Provident National Corp., Philadelphia. Its principal banking affiliates include: Bank of Delaware Corp., Wilmington, Del.; The Central Bancorporation Inc., Cincinnati (includes banks in Ohio and Kentucky); Citizens Fidelity Corp., Louisville, Ky.

(includes banks in Kentucky and Indiana); The First Bank and Trust Co., Mechanicsburg, Pa.; The Hershey Bank, Hershey, Pa.; Marine Bank, Erie, Pa.; Pittsburgh National Bank, Pittsburgh; Provident National Bank, Philadelphia; PNC National Bank of Delaware, Wilmington, Del.; and PNC National Bank of New Jersey, Cherry Hill, N.J. PNC currently operates 529 community banking offices in Pennsylvania, Kentucky, Indiana, Ohio, Delaware and New Jersey. It also conducts business through offices in 15 states and seven foreign countries.

#90109p1089 04/19/1990 ~PR Newswire

WASHINGTON (APRIL 19) PR NEWSWIRE - The Air Line Pilots Association issued the following statement today after Bankruptcy Judge Burton Lifland appointed Martin Shugrue last night as trustee for Eastern Airlines:

We are elated by Judge Lifland's decision. It is yet another vindication of what Eastern's workers have been saying all along: Texas Air management is unscrupulous, and it is not competent and not willing to manage Eastern as an ongoing, viable airline. The workers know it, the American public knows it, and now the creditors and the bankruptcy court have finally come to understand what Frank Lorenzo represents. He is the archetype, the epitome of the 1980's breed of greed-heads who know only how to line their pockets at the expense of everyone else concerned, and know nothing about actually running the companies they buy. As Judge Lifland aptly put it, "It is time to change the captain of Eastern's crew."

We now look forward to working with Martin Shugrue. We are prepared to do whatever is necessary to get Eastern back on its feet and restore the hundreds of jobs lost by the formerly striking Eastern pilots.

One item of particular interest to us will be the pursuit of claims against Texas Air that could exceed $400 million, for a dozen or more inequitable transfers of vital assets from Eastern to Texas Air and Continental Airlines prior to the Eastern bankruptcy petition. Payment of these claims would play a pivotal role in restoring Eastern to financial viability.

We cannot let this moment pass without noting that the entire Eastern debacle might have been avoided if the Bush administration had not played such a heavy-handed obstructionist role. President Bush had the opportunity to defuse the machinist strike and subsequent bankruptcy if he would have followed established practice by appointing a Presidential Emergency Board in March 1989 to resolve the machinist strike. Later that year he could have preserved the public's faith in Eastern and toned

down the ongoing labor strife if he had not vetoed a bill passed by Congress to create a blue ribbon commission to examine, and make recommendations to enhance, the company's operational viability. While Frank Lorenzo must carry the majority of the blame for Eastern's condition all this would not have been possible without the active backing of the White House, the FAA, the Department of Transportation, and the Department of Labor.

#90109p1090 04/19/1990 ~PR Newswire

RESTON, VA (APRIL 19) PR NEWSWIRE - Lafarge Corporation (NYSE: LAF), one of North America's largest construction materials and cement companies, today announced a net loss for the quarter ended March 31, 1990 of $40.4 million or $.78 per share on net sales of $239.4 million. This compares with a loss of $19.6 million or $.39 per share on net sales of $207.4 million for the first quarter of last year.

The seasonal nature of the construction industry in North America leads the company to incur a loss on operations in the first quarter of the year. Also, a major portion of cement maintenance projects, which can vary from year to year, is performed during the winter months. Compared to the first quarter of 1989, the larger loss reflects increased seasonality and interest expense due to recent acquisitions, an apparent slowing of construction activity in central Canada, and the absence of gains from divestments and special projects.

In announcing the results, Robert W. Murdoch, Lafarge Corporation's president and chief executive officer, said: "I am confident that, because of our increased geographic and product diversification, we are better able to offset regional cyclicality. In addition, recent acquisitions that reported seasonal first quarter losses will have a positive impact during the rest of the year."

Cement shipments improved by 7 percent as compared to the same period last year, with increases in the West, the U.S. Great Lakes and the South more than offsetting decreases in Ontario and New England. The level of activity in the Construction Materials Group also reflected lower sales in central Canada and more robust activity in the West, particularly British Columbia.

Overall, the company's net sales for the three months ended March 31, 1990 increased by 15 percent compared to the same period last year. The 1990 sales figure includes sales from businesses acquired during the last 12 months, while the sales for the same period in 1989 benefited from a large pipeline project completed in Ontario early in that year.

Lafarge Corporation previously reported record earnings of $100 million for the full year 1989, a 7 percent increase from 1988. Net sales in 1989 rose 14 percent to $1.5 billion.

#90109p1091 04/19/1990 ~PR Newswire

OLD GREENWICH, CT (APRIL 19) PR NEWSWIRE - American Brands, Inc. (NYSE: AMB) today reported record results for the quarter ended March 31, 1990. Net income rose 13 percent to $195 million, or $2.00 per common share, compared with $172 million, or $1.80 per share, for the first quarter last year.

Revenues of $3.2 billion approximated last year's first quarter despite the impact of lower sterling exchange rates and the absence of Southland Life, which was sold on March 31, 1989.

Lower exchange rates for foreign currencies, principally the British pound adversely affected revenues by $116 million and net income by $6 million, or 6 cents per share, in the quarter. The average number of shares outstanding was 2 percent higher.

Chairman and Chief Executive Officer William J. Alley said: "Despite the impact of the stronger dollar, net income showed strong growth in the first quarter.

"Our largest core business, tobacco, had operating income of $281 million, up 8 percent, on record revenues. Worldwide cigarette unit sales rose 1.3 percent, and both the U.S.-based American Tobacco Company and the U.K.-based Gallaher had record operating income.

"Life insurance revenues declined 18 percent, and operating income declined 13 percent. However, excluding the operations of Southland and a pretax charge in 1989 related to the Southland sale, revenues would have been up 5 percent; operating income would have been down 1 percent due to lower realized investment gains this year. Sales of Franklin's new President's Plan continue to be strong.

"Distilled spirits had record operating income of $21 million, up 7 percent, despite slightly lower revenues. Profit margins benefited from higher selling prices and improved plant operating efficiencies. Domestic and worldwide case sales of the flagship Jim Beam bourbon were up for the quarter.

"Although operating income declined 2 percent to $19 million for the

office products group, revenues reached a record $241 million. Excluding the impact of the stronger dollar, operating income would have been up 2 percent for the quarter. The comparison was also adversely affected by unusually high U.S. wholesaler demand in the first two months of 1989 and by the timing of U.K. customer rebate programs. Even though the economic environment has moderated substantially from the early months of 1989, we expect record office products results for the year.

"Looking ahead, we continue to expect another record year in 1990."
American Brands is a global consumer products holding company with four core businesses -- tobacco, distilled spirits, life insurance and office products. Each has brand name leaders in its industry.

#90109p1095 04/19/1990 ~PR Newswire

NEW YORK (APRIL 19) PR NEWSWIRE - AMAX Inc. (NYSE: AMX) today reported first quarter net earnings of $50 million ($0.57 per primary common share) and operating earnings of $91 million. Net earnings in the first quarter of 1989 were $114 million ($1.34 per primary common share) and operating earnings were $167 million.

Sales in the first quarter were $928 million, compared with $980 million in the comparable quarter a year ago.

Allen Born, chairman, chief executive officer and president, commenting on the results, noted that a softening of the economy that began in the third quarter of 1989 reduced demand and prices for aluminum ingot and some aluminum products compared with prices in the first half of 1989. Prices for primary aluminum, for example, during the first quarter of 1990 were approximately 40 percent lower than they were at the beginning of 1989.

"AMAX's energy and gold businesses showed improved operating earnings over those of a year ago," he said. "Amax Coal contributed $29 million, compared to $20 million a year ago while Oil and Gas earnings increased 20 percent to $6 million. Amax Gold's contribution of $14 million in operating earnings was a $1 million improvement over a year ago.

"Our fundamentals are strong and we are in a good position to continue to perform well. As the year progresses we expect the economy to strengthen and AMAX's businesses and earnings to improve above present levels."

AMAX is a major international producer of aluminum and manufactured aluminum products and also has substantial interests in domestic energy and gold production.

#90109p1100 04/19/1990 ~PR Newswire

NEW YORK (APRIL 19) PR NEWSWIRE - Chris-Craft Industries, Inc. (NYSE: CCN) today reported record first quarter net income of $235,269,000, or $9.13 per share.

Approximately $220 million of first quarter net income reflects Chris-Craft's gain, after income taxes and minority interest, on the disposition of its remaining interest in Warner Communications Inc. In 1989, Chris-Craft sold for cash 63 percent of its interest in WCI and in January 1990, exchanged its remaining WCI shares; primarily for Time Warner Inc. convertible preferred stock, pursuant to the merger of those two companies.

Herbert J. Siegel, Chris-Craft chairman and president, stated, "The disposition of our remaining WCI interest pursuant to the Time Warner merger concluded the most profitable chapter in Chris-Craft's history. Operating the nation's ninth largest television station group, Chris-Craft now has stockholders' equity of nearly $1 billion."

First quarter net income excluding the WCI gain was $15,299,000, or $.59 per share, compared to net income in last year's first quarter of $1,255,000, or $.04 per share. Television division operating revenues were relatively strong, rising 11 percent from last year's corresponding period.

However, the division's operating results for the quarter were adversely affected by a 17 percent increase in programming expenses. As a result, the television division recorded a $1,266,000 operating loss for the period, compared to an operating profit of $1,093,000 last year. Seasonal factors generally make broadcasters' first quarter operating results the weakest of the year.

Interest and other income increased, reflecting interest earned on cash balances and dividends recorded on Time Warner preferred stock. Interest expense declined, reflecting the 1989 repayment of most long- term debt.

WHITE PLAINS, NY (APRIL 19) PR NEWSWIRE - NYNEX Corporation (NYSE: NYN) today announced the creation of a Worldwide Information and Cellular Services Group, which will combine the resources of four existing NYNEX business units and focus them on emerging telecommunications and information industry markets.

Ivan G. Seidenberg, currently senior vice president, has been appointed President of the new organization, and an executive vice president of NYNEX Corporation.

The group, whose formation is effective May 1, includes NYNEX Information Solutions Group, NYNEX Business Information Systems Company, NYNEX Mobile Communications Company, and NYNEX International Company.

"This new group unifies our resources in mobile communications, a wide range of data products, software development and systems integration," said William C. Ferguson, NYNEX chairman and chief executive officer.

"The group will strengthen our ability to target the needs of our customers in the Northeast, in key markets nationwide, and abroad," he said. "A single organization can best anticipate and respond to increasing customer demand for integrated information solutions of the highest quality," he added. "This approach will also enable us to bring these related businesses into sharper focus and manage them with greater efficiency."

Seidenberg is currently responsible for NYNEX Business Information Systems Company, NYNEX International Company, and the NYNEX External Affairs organization. Coincident with Seidenberg's assumption of expanded business unit responsibilities, Matthew J. Stover becomes vice president-external affairs. Stover, who comes to NYNEX from the position of senior vice president-communications at American Express Company, will report directly to Ferguson.

Before joining American Express in 1987, Stover had worked at New York Telephone for four years. While there, he filled executive positions in corporate communications and customer services.

In another executive change, also effective May 1, Donald J. Sacco, formerly president of NYNEX Systems Marketing, will become vice president-group planning for the new Worldwide Information and Cellular Services Group, reporting to Seidenberg. In his previous assignment, Sacco had direct responsibility for managing NYNEX's largest and most complex business accounts.

NORTHBROOK, IL (APRIL 19) PR NEWSWIRE - International Minerals & Chemical Corporation ("IMC") (NYSE: IGL) today reported earnings from continuing operations of $18.7 million, or 83 cents per share, for the third quarter ended March 31, 1990.

Operating earnings for IMC's three businesses were $38.6 million for the third quarter, an increase of 92 percent compared with $20.1 million for the same period a year ago. Sales for the third quarter were $371.7 million, up from $258.4 million a year ago.

"The outstanding improvement in third-quarter results for our three businesses reflect new product introductions, improved cost controls, and the consolidation of the Coopers Animal Health acquisition," said IMC Chairman and Chief Executive Officer George D. Kennedy. "Operating earnings were up strongly not only from last year, but also from this year's second quarter."

IMC's businesses are Mallinckrodt Medical, Mallinckrodt Specialty Chemicals, and Pitman-Moore. In addition, IMC owns approximately 38 percent of the common stock of IMC Fertilizer.

MORRIS TOWNSHIP, NJ (APRIL 19) PR NEWSWIRE - Allied-Signal Aerospace Company today delivered the first certified Traffic Alert and Collision Avoidance System (TCAS) for installation in a commercial aircraft. The first production TCAS unit was delivered to USAir and has been certified by the Federal Aviation Administration for operation in a Boeing 737-400 aircraft.

TCAS is a federally mandated collision avoidance system that informs pilots of the location of transponder equipped aircraft in their vicinity, alerts them to potential threats, and issues vertical course collision advisories if the situation warrants. TCAS must be in all aircraft carrying more than 30 passengers and flying in U.S. airspace by 1993.

"Our company has been a leader in collision avoidance research and development for more than 30 years, and we believe our TCAS system represents a successful marriage of the best engineering and production technology in the aerospace industry," said Paul Gralnick, president of Allied-Signal's Bendix/King Air Transport Avionics division in Fort Lauderdale, Fla.

"The Bendix/King TCAS has been selected by more than 20 airlines around the world and that is testimony to our engineering and avionics leadership in the industry," he added.

Airlines that have purchased Bendix/King TCAS equipment include USAir, Southwest, American, Delta, Cathay Pacific, All Nippon Airways, Continental, Continental Express, Eastern, Lufthansa, Iberia, Sabena, Finnair, Horizon, Time, Minerve, Aero-Lloyd and JAT.

Allied-Signal Aerospace Company is a unit of Allied-Signal Inc. (NYSE: ALD), an advanced technology company with businesses in aerospace, automotive products and engineered materials.

#90109p1127 04/19/1990 ~PR Newswire

NEW YORK (APRIL 19) PR NEWSWIRE - Colgate-Palmolive (NYSE: CL) achieved increases in sales and net income for the first quarter of 1990, it was announced today.

Three Months Ended March 31, 1990:

-- Sales were $1.3 billion, up 8 percent.
-- Volume growth was 3 percent.
-- Earnings before interest and taxes (EBIT) was $136.8 million, up 13 percent.
-- Net income was $81.2 million, up 21 percent.
-- Net income per share was $1.16 vs. $.98, up 18 percent.

"Colgate's 1990 has started well, with excellent first quarter results reflecting our growing global strength," said Reuben Mark, chairman, president and chief executive officer. "The profitability of Colgate's worldwide operations continues to increase. We are especially pleased that after-tax return on sales reached 6.2 percent, the highest level in more than 40 years," he said.

"Each of Colgate's major geographic and business units increased its profits over first quarter 1989. Our 21 percent increase in total net income reflects healthy overseas volume growth and concentrated focus on more profitable product mix. The strongest profit increases came from Colgate-Western Hemisphere and Colgate-U.S."

Colgate achieved lower net interest expense than a year ago, primarily due to the proceeds linked to its employee stock ownership program. This benefit was offset by the higher effective tax rate, at 39 percent vs. 36.5 percent in the first quarter of 1989.

Colgate-Palmolive Company is a $5 billion global consumer products company. Its strategy is to focus on the core businesses of oral care, body care, household surface care, fabric care and animal dietary care. Colgate is growing these core businesses through product development, geographic expansion and selective acquisitions.

#90109p1130 04/19/1990 ~PR Newswire

COLUMBIA, MD (APRIL 19) PR NEWSWIRE - The board of directors of RAC Mortgage Investment Corporation (NYSE: RMR) today reported first- quarter earnings for the quarter ended March 31, 1990.

Net earnings were $2.8 million, or $0.20 per share, compared to a loss of

$3.6 million, or ($0.25) per share, for the first quarter of 1989. The company declared a first-quarter dividend of $0.15 per share, compared to $0.22 per share for the same period in 1989. During the first quarter of 1989, income was reduced by a valuation adjustment of $5.6 million relating to certain of the company's mortgage residual interests.

The board of directors also authorized the company to repurchase up to one million shares of its common stock through open-market transactions, negotiated purchases or other means. The timing and amount of stock repurchases will depend upon market prices and other factors.

Net income for the quarter was favorably influenced by a steepening of the yield curve, due to the stability in the level of short-term interest rates and the increase in long-term interest rates since year-end 1989. This steepening of the yield curve improved the overall return on the portfolio of mortgage investments and mortgage loans held in warehouse.

The company charged $1.3 million, or $0.09 per share, against its first quarter earnings in costs related to the hedge position on short- term borrowings, which were entered into during the first half of 1989. Presently, there are no open hedge positions on RAC Mortgage's mortgage investments or short-term borrowings.

RAC Mortgage Investment Corporation is a publicly held real estate investment trust which invests in mortgage loans, mortgage securities, mortgage residual interests and mortgage derivative securities. The company is managed by Ryland Acceptance Corporation, an indirect subsidiary of The Ryland Group, Inc.

CHICAGO (APRIL 19) PR NEWSWIRE - American business can meet the challenge of finding realistic solutions to the nation's energy needs while protecting the environment, Texaco (NYSE: TX) President and Chief Executive Office James W. Kinnear asserted today.

"In our society, where demands for capital must compete one with another, it is important that energy and environmental expenditures are truly cost-beneficial to the consumer and the taxpayer," Kinnear said in a speech to the Executives' Club of Chicago. "There's a lot going on, right now, that will help us as a society resolve some of those conflicting demands for energy and a clean environment."

Highlighting some specific actions, Kinnear pointed to a Texaco- proposed joint automobile/oil industry initiative studying cost- effective ways to

cut vehicle emissions by reformulating fuels and redesigning cars. Terming the response "great," Kinnear said "it's the most comprehensive program of its type ever undertaken."

The first phase of the study, to be completed during the second half of this year, will analyze emissions from five- to seven-year-old vehicles, plus 1989 models, running on a variety of fuels. "All this represents some great opportunities for the companies that have the ideas and the talent for making them work," Kinnear said.

Citing the increasing demand for clean energy, Kinnear said coal gasification holds bright promise as a cleaner and more efficient technology. Texaco has spent more than $350 million to help develop this process, which converts a wide variety of coal, including the high- sulfur variety, into a clean-burning synthesis gas. The clean gas can then be burned to generate electricity. A five-year test in Southern California showed that coal gasification not only works, but it is clean and commercially viable.

Texaco's Chief Executive Officer said he had no doubt that more promising technologies will be forthcoming "as all of us continue to apply this nation's formidable resources to resolving our energy and environmental problems."

Kinnear issued a call for the nation to follow some common sense principles: taking the time and trouble to define a problem carefully; basing courses of action on thorough scientific testing; and using marketplace forces and technology to determine how environmental standards are to be met.

"We all want basically the same things: a clean environment and the benefits of affordable energy, so let's all start pulling on the same end of the rope," Kinnear said.

#90109p1138 04/19/1990 ~PR Newswire

HOUSTON (APRIL 19) PR NEWSWIRE - Partners of the ETSI Pipeline Project announced today that they have executed a settlement agreement with Santa Fe Pacific Corp. (Santa Fe) (NYSE: SFX) which resolves all disputes resulting from the termination of ETSI's coal slurry pipeline project in the early 1980's. Federal court litigation arising from these disputes will be dismissed.

ETSI is a joint venture composed of subsidiaries of Panhandle Eastern Corp. (NYSE: PEL), managing partner; Enron Corp. (NYSE: ENE); Bechtel

Group Inc.; and K-N Energy Inc. (NYSE: KNE).

The settlement agreement contemplates that Santa Fe will, as early as June 1, 1990, make a payment of cash and will deliver a promissory note to ETSI in settlement of the litigation. After the sale of the promissory note by ETSI to an affiliate of a major money center bank, the two largest partners, Enron and Panhandle Eastern, will receive approximately $69 million each from the settlement.

Panhandle Eastern and Enron each hold a 29-1/2 percent interest in the project. K-N Energy, with a 20 percent interest, will receive approximately $47 million from the settlement. The amounts to the partners reflect pre-tax cash proceeds net of contingent legal fees.

#90109p1140 04/19/1990 ~PR Newswire

GOLDEN, CO (APRIL 19) PR NEWSWIRE - Amax Gold Inc. (NYSE: AU; TORONTO: AXG) reported net income of $10 million, 17 cents per share, for the first quarter of 1990 compared with $9.2 million, 15 cents per share, for the first quarter of 1989. Gross operating margin for the first quarter was slightly lower at $15.7 million compared with $16.4 million for the first quarter of 1989. This lower margin was primarily due to increased production from mines with higher cost production, higher depreciation and a lower average realized price per ounce of gold sold.

Amax Gold reported production of 84,794 ounces of gold, for the first quarter of 1990, a 27 percent increase over the like period in 1989. A major contributor to this increase is the Wind Mountain Mine, northeast of Reno, Nev. Wind Mountain produced well beyond expectations in the first quarter with production of 17,546 ounces of gold and cash production costs of $195 per ounce.

Sales for the first quarter were $35.3 million compared with $28.6 million for the first quarter of 1989. Amax Gold's average realized price per ounce of gold sold for the first quarter was $420 or $14 higher than the average COMEX price. The company's total average cash production costs for the quarter were $143 per ounce.

Amax Gold Inc. produces and explores for gold in the United States and New Zealand and owns approxmately 46 percent of the common shares of Canamax Resources Inc., a gold mining company in Canada. Amax Gold is listed on the New York and Toronto stock exchanges and is 87 percent owned by Amax Inc.

WASHINGTON (APRIL 19) PR NEWSWIRE - At 3 p.m. (EDT) today, Robert J. Herrmann, senior deputy comptroller for bank supervision, Office of the Comptroller of the Currency (OCC), declared Acadiana National Bank, Lafayette, La., insolvent.

The Federal Deposit Insurance Corporation (FDIC) was appointed as receiver.

The bank became a matter of concern to the OCC in 1987. Rapid growth during a period of decline in the local economy, coupled with inadequate loan portfolio and board supervision resulted in an excessive amount of problem loans.

The OCC obtained commitments from the board of directors to undertake measures to correct the bank's problems. However, these efforts were unsuccessful and losses finally exhausted the bank's capital funds, resulting in its insolvency.

Acadiana National Bank received a national bank charter on Jan. 6, 1984. On Feb. 28, 1990, it had total assets of approximately $29 million.

The FDIC is expected to release additional information later today.

CONTACT: Jacqueline England of the Comptroller of the Currency, 202-447-1800.

LONG BEACH, CA (APRIL 19) PR NEWSWIRE - Pratt & Whitney (P&W) has named David J. McGonigle to the position of vice president, Long Beach office.

In his new position, McGonigle is responsible for directing commercial and government engine program activities in Southern California, and providing on-site technical assistance and support to customers. He reports to the presidents of P&W's Commercial Engine Business and Government Engine Business units.

A graduate of the University of Connecticut with a B.S. in mechanical engineering, McGonigle joined the company in 1960 as an experimental engineer.

During his 30-year career with P&W, he has held increasingly responsible positions in engineering, customer support and marketing. Most recently he

was manager for all commercial engine program activities in the Southern California area. McGonigle is a native of Melrose, Mass.

NASHVILLE, TN (APRIL 19) PR NEWSWIRE - Volunteer Capital Corporation (NYSE: VCC) today reported sales of $8,597,000 and net income of $349,000, or $.09 per share, for the quarter ended April 1, 1990, according to President Lonnie J. Stout II.

The Company's sales for the first quarter of 1989 were $23,947,000. The decrease in sales from 1989 to 1990 was a result of the divestiture of the Company's Mrs. Winner's Chicken and Biscuits division. Sales for the Company's Wendy's restaurants for the first quarter of 1989 were $7,848,000. In the first quarter of 1989, the Company lost $2,313,000, or $.57 per share.

The Company's Wendy's division posted a 10.1 percent gain in comparable store sales for the first quarter. Operating profit for the division improved by over $300,000 for the quarter, to $540,000 in 1990, from $214,000 in 1989.

"These increases can be attributed to our consistent marketing efforts, the impact of additional SuperBars installed last year, and the continued investments we have made in remodeling the guest service areas of our Wendy's units," said Stout.

Also during the quarter, the Company purchased approximately $1.1 million face amount of its 8-1/4 percent convertible subordinated debentures at a substantial discount, resulting in an extraordinary gain of $504,000, or $.13 per share.

Volunteer Capital Corporation operates 50 Wendy's Old Fashioned Hamburgers restaurants in four states. The Company's common stock is traded on the New York Stock Exchange (NYSE: VCC).

CONTACT: R. Gregory Lewis of Volunteer Capital Corporation, 615-377-4400.

#90109p1158 04/19/1990 ~PR Newswire

CLEVELAND (APRIL 19) PR NEWSWIRE - Directors of Bearings, Inc. (NYSE: BER) today declared a regular quarterly dividend of $.16 per share, payable on June 1, 1990 to shareholders of record at the close of business May 15, 1990.

Sales and earnings figures for the third quarter ended March 31, 1990 have been delayed due to the start up and conversion of the company's new computer system. The comapny anticipates release of this information by the end of the month.

During the quarter, the company acquired 19,500 shares of its common stock pursuant to a September 1988 board authorization. As of March 31, 1990, the company had board authorization to acquire up to 232,000 additional shares of its common stock in open market and negotiated transactions, from time-to-time, depending on market conditions.

Bearings, Inc. is the nation's leading independent distributor of bearings power transmission components with 269 branches in 35 states and Puerto Rico.

#90109p1162 04/19/1990 ~PR Newswire

SAN ANTONIO, TX (APRIL 19) PR NEWSWIRE - Diamond Shamrock Inc. (NYSE: DRM) reported net earnings of $4.3 million for the first quarter, compared to $14.9 million for the like period last year. Primary earnings per share were 11 cents, down from the first quarter 1989 per share earnings of 56 cents.

Revenues increased 25 percent for the first quarter to $584.6 million, up from $466.5 million for the like period last year.

Chairman and CEO Roger Hemminghaus commented, "Our industry typically experiences a weak first quarter, and our earnings were in line with traditional seasonal performances.

"We started the quarter with tight inventories and good margins due to strong demand and industry operating problems caused by the severely cold weather in late December. Then, however, warmer than expected weather persisted and industry operating problems were solved, resulting in an increase in crude oil and refined product inventories, which depressed margins for most of the quarter. In late March, margins returned to a favorable level."

Hemminghaus continued, "Operationally, Diamond Shamrock performed exceptionally well during the first quarter while continuing expansion projects in all major areas of the business."

At the McKee refinery, Diamond Shamrock started-up its new 25,000 barrel

per day continuous catalyst regeneration reformer yesterday.

The new unit is an efficient octane generating unit that enables the refinery to increase its high octane gasoline production and contributes to the future expansion of the refinery.

The start-up of a new crude distillation unit at the Three Rivers refinery will be completed by mid-May, increasing the crude throughput from 50,000 to 55,000 barrels per day and laying the foundation to expand to 70,000 barrels per day over the next few years.

The propane/propylene splitter construction project at Mont Belvieu is on schedule and should also come on-stream by mid-May. The splitter will upgrade refinery grade propylene to produce higher valued petrochemical feedstock.

Diamond Shamrock's retail operations performed exceptionally well during the quarter with sales volumes per store up 7 percent over the like period last year, and merchandise sales volumes per store up 10 percent over last year.

Hemminghaus continued, "Our presence on the street is extremely positive. We offer quality products and outstanding customer service at competitive prices, and demand at our stores is continuing to increase."

Diamond Shamrock, with annual sales of approximately $2.1 billion, is a regional refiner and marketer of petroleum products.

CHICAGO (APRIL 19) PR NEWSWIRE - FMC Gold Co. (NYSE: FGL) today announced that it has signed a definitive agreement with Meridian Minerals Co., a subsidiary of Burlington Resources Inc. (NYSE: BR) to merge Meridian Gold Co. with a subsidiary of FMC Gold. Under the terms of the transaction FMC Gold will issue eight million new shares of its common stock to Meridian Minerals for 100 percent interest in Meridian Gold. The agreement is subject to Hart-Scott-Rodino notification waiting periods and other customary closing conditions. Closing is expected to occur within 45 days.

Meridian Gold controls two principal properties: The Royal Mountain King gold mine in California and the Beartrack property in central Idaho. Proven and probable gold reserves at the two properties total approximately 1.2 million to 1.4 million ounces.

FMC Gold will also be acquiring Meridian Gold's exploration property

portfolio.

According to Robert N. Burt, chairman and chief executive officer of FMC Gold, "The Meridian Gold properties offer us an excellent opportunity to expand our reserves and to capitalize on our proven exploration and development expertise."

FMC Gold Co., formed in 1987 through a combination of FMC Corporation's North American precious metals interests, ranks among the largest gold producers in the United States. FMC Gold reported 1989 production of 329,000 ounces of gold and 5.2 million ounces of silver.

NEW YORK (APRIL 19) PR NEWSWIRE - CS First Boston, Inc. today applauded the Securities and Exchange Commission's passage of Rule 144A liberalizing the issuance of debt and equity securities in the United States.

John M. Hennessy, president and chief executive officer of CS First Boston said, "Passage of Rule 144A is the first step in the true globalization

of the U.S. equity market. People have talked about 'globalization' for years. We have been actively championing Rule 144A to help turn the talk into action. Now the Rule has been passed, and that's good news for our clients and our industry."

Hennessy added that the Rule should provide renewed vitality to the U.S. capital markets. Its most far-reaching implications, however, will be for non-U.S. issuers of equities, who will now have greater access to American markets, and for U.S. investors, who will have enhanced access to investments in non-U.S. securities, Hennessy said.

Under Rule 144A, all U.S. and non-U.S. issuers would be permitted to offer securities without SEC registration into a new private capital markets. Qualified investors in such securities would generally include institutions having more than $100 million of investment securities.

CS First Boston is a worldwide investment banking firm.

BALTIMORE (APRIL 19) PR NEWSWIRE - MNC Financial, Inc. (NYSE: MNC) today reported first quarter 1990 net income of $6.2 million, or $.05 per fully diluted share, compared with $57.4 million, or $.67 per fully diluted share for the first 1989 quarter.

"Included in the first quarter results is a $135 million provision for possible credit losses, which is an $83 million increase over the fourth quarter of 1989. Although the underlying earnings of the company remain strong, these results reflect our response to potential real estate loan problems," said Alan P. Hoblitzell Jr., chairman and chief executive officer.

"Earlier this month a preliminary review of MNC's real estate policies by a group of federal regulators caused us to appraise our critieria for classifying loans according to credit risk, using the more conservative interpretation that is being applied by the Office of the Comptroller of the Currency (OCC). This review has led us to strengthen our reserves now for possible credit losses in the near future," Hoblitzell said. MNC further reported that its scheduled March, 1990 annual examination by the OCC had been postponed and the company said it expected the examination should occur later this year.

The level of MNC's total nonperforming loans at March 31 was $268 million, compared to $273 million at yearend. However, total nonperforming assets increased to $359 million at March 31, or 2.31 percent of total loans, up from $304 million at year end, with substantially all of the increase related to real estate.

"MNC's reserve for possible credit losses is now 2.61 percent of total loans, up from 1.94 percent at yearend, and amounts to a coverage ratio of 1.51x total non-performing loans," Hoblitzell said.

He further noted, "We recognize that the current regulatory and business climate for commercial real estate lending has changed significantly during the recent quarter and poses new challenges in terms of monitoring credit quality." MNC is continuing to focus on credit quality issues as its foremost current priority, he said.

"Approximately 90 percent of our real estate loans originate in our core Baltimore/Washington region, which ranks as one of the most stable, high quality real estate markets in the nation. We continue to believe that the region's underlying economic strengths are encouraging when compared to other markets which are experiencing similar difficulties, but we realize that we are by no means totally insulated from problem real estate loans," said Hoblitzell.

"It is important to understand that MNC's basic businesses are continuing

to perform in an above-average manner. Because of the company's balanced diversification and its strong capability for generating fee income from both regional and national markets, we should continue to have a good earnings stream from our retail, wholesale and specialty business sectors -- which account for about 80 percent of our 1989 earnings. MNC is continuing to move forward with the successful consolidation of Equitable Bancorporation into MNC Financial, a merger which strengthens the company's leading role in the state and provides us with the opportunity to recover $40 million in costs in 1990 and $80 million in 1991," Hoblitzell said.

Hoblitzell said he believes the company's balance sheet is strong and its financial condition remains sound. "Despite the impact that additions to reserves may have on current and future earnings, our capital position remains strong, at levels above 1992 regulatory guidelines with Tier I capital in excess of 6 percent and Tier II above 8 percent," he said.

MNC Financial is a diversified financial services company which delivers a broad range of commercial and consumer banking products in the Baltimore/Washington common market and in the mid-Atlantic states.

HOUSTON (APRIL 19) PR NEWSWIRE - Vista Chemical Co. (NYSE: VC) today announced earnings per share of $1.53 and net income of $16.2 million for the second fiscal quarter of 1990, ended March 31, 1990. Second quarter results were up 15 percent from first quarter fiscal 1990 results. This improvement was due to a significant increase in volumes, partly offset by lower product prices and higher feedstock costs.

Earnings per share for last year's second fiscal quarter were $2.19 and net income was $32.5 million. Sales for the quarter just ended were $183.8 million, compared to $198.5 million reported for the same quarter last year. The decline in earnings and sales from the prior-year quarter reflect a 17 percent decline in product prices, partly offset by a 10 percent increase in sales volumes. Higher interest expense resulting from the financial restructuring completed in July 1989 also contributed to lower net income. On a per share basis, the higher interest expense was offset by the reduction in shares outstanding resulting from stock repurchases in fiscal 1989.

"Second quarter results reflect a continued strong demand for all our products, especially in our surfactant and specialty chemicals product line," said John D. Burns, chairman, president and chief executive officer. "Surfactant and specialty chemicals sales were up 5 percent from the same quarter last year and 12 percent from first quarter results. Income from this product line was also up from the same quarter last year and the previous fiscal quarter. We expect demand to remain strong for all our products. In addition, we are seeing price strengthening in both of our major product lines."

Earnings per share for the first half of fiscal 1990 were $2.86, compared to $4.25 per share reported for the first six months of fiscal 1989. Net income for the six months ended March 31 was $30.4 million, compared to $63.7 million for the same period last year. Sales for the six month period were $353.8 million, compared to $389.7 million reported for the first half of fiscal 1989.

#90109p1195 04/19/1990 ~PR Newswire

LOUISVILLE, KY (APRIL 19) PR NEWSWIRE - During a presentation to insurance industry analysts in New York City, Capital Holding Corporation (NYSE: CPH) officials today outlined business strategies they said are designed to produce percentage earnings per share growth in the mid-teens

range through 1995.

Discussing the company's past and future performance, Capital Holding Executive Vice President and Chief Financial Officer Theodore S. Rosky said, "During the past five years, we've grown earnings an average of 15 percent per year. In 1989, operating earnings grew by 16.5 percent.

"We have set a pretty ambitious course for ourselves to keep our earnings growth in the mid-teens range for the next five years," Rosky said.

"Much of our future earnings power is going to continue to come from our accumulation business, and from banking. That is in line with the trend of the past five years. Our Accumulation and Investment Group has grown from 6.6 percent of earnings in 1984 to more than 25 percent of profits today. Banking has gone from zero to more than 10 percent of profits overall," Rosky said.

Officials also discussed the company's philosophy on common stock dividends. Capital Holding had decreased its dividend payout ratio in recent years and said it is now on the low side as compared to other life companies. For this reason the company said future dividend growth is likely to track more closely with future earnings growth.

Capital Holding has increased its dividend in every year since its founding at rates greater than inflation. The company's 1990 dividend rate increased 8.0 percent over 1989.

"We have an outstanding Vision -- to aim to dominate our chosen markets, to be pre-eminent competitors and to redefine what a financial services company can be," said Capital Holding Chairman, President and Chief Executive Officer Irving W. Bailey II.

"And, our business units now have the operating strategies in place to produce excellent results through 1995," said Bailey.

Capital Holding is one of the nation's five largest stockholder-owned life insurance organizations, with $15.0 billion in assets and $44.8 billion of life insurance coverage in force.

The corporation offers a broad range of financial services and products through agents, direct-marketing media, investment professionals and retail locations. Its common stock is listed on the New York and Pacific Stock Exchanges under the ticker symbol CPH; its preferred stock is listed on the New York Stock Exchange under the syumbol CPHF.

NEW YORK (APRIL 19) PR NEWSWIRE - Apple Bancorp, Inc. (NYSE: APK) today reported net income of $4.6 million, equal to $1.01 per share, for the first quarter ended March 31, 1990. This compares with $6.1 million, or $1.33 per share, for the first quarter of 1989. Income before extraordinary credit equaled $1.01 per share for the quarter ended March 31, 1990, compared to $1.18 per share for the first quarter of 1989.

During the first quarter of 1989, Bancorp's utilization of tax loss carryforwards resulted in the recording of an extraordinary credit of $700,000. No extraordinary credits were utilized in the first quarter of 1990 as Bancorp had no remaining net operating loss carryforwards as of Dec. 31, 1989.

Total assets at March 31, 1990, were $3.91 billion, up $66 million from the Dec. 31, 1989, figure of $3.84 billion, primarily as a result of continued growth of the loan portfolio during the first quarter of 1990. Total loan originations for the quarter ended March 31, 1990, were $261 million.

Deposits totaled $3.40 billion at the end of the current quarter, down $13

million from the comparable Dec. 31, 1989, figure of $3.41 billion. Borrowed funds, which increased $86 million, provided funding for the increase in total assets.

Shareholders' equity of $256.8 million as of March 31, 1990, represents 6.57 percent of total assets and a book value of $55.87 per share. Bancorp's regulatory capital of 6.82 percent of total adjusted assets exceeds the Federal Reserve Board requirement of 6.00 percent. In addition, the bank's regulatory capital of 6.47 percent exceeds the Federal Deposit Insurance Corporation's 6.00 percent requirement. On Jan. 17, 1990, the board of directors authorized the first quarterly dividend of $.35 per share, which was paid on April 4, 1990, to shareholders of record on March 7, 1990.

#90109p1209 04/19/1990 ~PR Newswire

MINNEAPOLIS (APRIL 19) PR NEWSWIRE - Best Buy Co. Inc. (NYSE: BBY), today reported financial results for fiscal 1990, an 11-month period which ended on March 3, 1990, (April 1, 1989, through March 3, 1990). The company has changed its fiscal year to a 52/53-week year, ending on the Saturday closest to the last day in February.

According to Richard Schulze, president and CEO, net income for fiscal 1990 was $5,683,000, or 69 cents per share, compared with $2,060,000, or 25 cents per share, for fiscal 1989. Net income for the fourth quarter (two months) of fiscal 1990 was $89,000, or 1 cent per share, compared with a net loss of $2,358,000, or 28 cents per share, experienced for the fourth quarter of fiscal 1989. As previously reported, fiscal 1990 (11 months) sales were $513 million compared to $507 million for fiscal 1989 (12 months).

Schulze said the significantly improved fiscal 1990 operating results were primarily due to: a reduction in inventory shrinkage; gross profit

margin increases in several merchandise categories; improved inventory management which resulted in higher inventory turn rates and lower interest expense; overall expense control which offset higher new store pre-opening costs; store operating profit contributed by the eight new stores opened in fiscal 1990; and, the fiscal 1989 decision to close video rental departments which had losses that reduced fiscal 1989 net income by approximately $1.7 million.

Comparable store sales were even with last year for the comparable 11-month periods; however, the company reported comparable store sales increases averaging 5 percent for the last six months of fiscal 1990 as compared to decreases averaging 6 percent for the first five months.

The gross profit margin increased from 22.9 percent to 23.5 percent in fiscal 1990 due to lower inventory shrinkage and margin improvements in several product categories. Selling, general and administrative (S,G&A) expenses as a percentage of sales were 20.9 percent, same as fiscal 1989; however, fiscal 1990 included a $625,000 loss recorded in connection with the disposal of fixtures in stores scheduled for remodeling and new store pre-opening costs of $1 million, as compared to $138,000 in fiscal 1989 when only one store was opened.

The $2.4 million improvement in earnings for the two-month period ended March 3, 1990, as compared to the three-month fourth quarter last year, was primarily due to: comparable-store sales increases of 5 percent; favorable physical inventory results; a lower S,G&A percentage resulting from reduced advertising expenditures and increased labor productivity; a reduction in interest expense due to lower inventory levels and higher vendor financing; and, video rental losses which reduced earnings in the fiscal 1989 fourth quarter by approximately $1.1 million.

The company's fiscal 1991 expansion plans include the opening of nine stores, consisting of six stores in the Dallas/Ft. Worth market and three in non-metro markets. The new stores will be built using Best Buy's new store format introduced during the past year.

Best Buy is the fourth largest publicly held consumer electronics and major appliance retailer in the U.S.

CALABASAS, CA (APRIL 19) PR NEWSWIRE - Daniel M. Tellep, Lockheed chairman and chief executive officer, today issued the following statement in response to the recently filed lawsuit of Harold Simmons-controlled NL Industries against Lockheed Corp. (NYSE: LK)

"The lawsuit filed by NL Industries yesterday challenging the recent election is without merit. The results of the election were clear and decisive. We are confident that these results, certified by independent inspectors of election, will be sustained in court. We view this action by Simmons as nothing more than pure harassment that will continue to divert management attention and corporate resources from the important task of building shareholder value. Simmons's action confirms our view that he is interested only in advancing his own agenda at the expense of other Lockheed shareholders.

"We are extremely disappointed that Simmons has chosen to ignore the independently certified results despite losing the election by over a 20-percent margin. In fact, the results show that he received less than 7,500,000 votes (or 12 percent of the outstanding shares) in support of his slate from other unaffiliated shareholders.

"The allegations in the complaint related to so-called unfair pressure tactics by Lockheed management are totally unfounded. In addition, we are extremely disappointed that Simmons is attempting to disenfranchise the employee shareholder vote.

"We followed up quickly on our commitment to engage in a constructive dialogue with all of our shareholders. By responding to our initiative with a lawsuit, Simmons is hardly acting in a constructive manner."

#90109p1241 04/19/1990 ~PR Newswire

TROY, MI (APRIL 19) PR NEWSWIRE - Today, Standard Federal Bank (NYSE: SFB) reported net income of $9.7 million, or $0.32 per share, for the three months ended March 31, 1990, compared to $12.9 million, or $0.42 per share, for the same period in 1989.

The reduction in earnings, as compared to the first quarter of 1989, was caused by lower net interest income and higher costs due to the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). The bank's net interest margin was 1.75 percent for the current quarter compared to 1.82 percent in 1989. However, average earning assets, which totaled $9.6 billion for the 1989 quarter, were reduced to $8.9 billion for the three months ended March 31, 1990.

Consequently, net interest income totaled $39.5 million for the recent quarter, compared to $43.8 million for the first quarter of 1989. Net interest income is expected to rise gradually throughout 1990.

Costs associated with FIRREA, which include lower dividends on Federal Home Loan Bank stock, relatively higher examination and supervisory fees and higher deposit insurance premiums reduced the bank's after-tax earnings by $1.2 million, or $0.04 per share, during the current quarter.

Single-family home loan originations were at record levels for the second consecutive quarter. Originations for the three months ended March 31, 1990, totaled $260.1 million compared to $148.0 million for the same period in 1989, an increase of over 75 percent.

During the quarter, deposits decreased $308 million, from $6.2 billion at Dec. 31, 1989, to $5.9 billion at March 31, 1990. This reduction represents the repayment of almost all of the bank's relatively high-cost brokered deposits.

Nonperforming assets continued at low levels, representing only 0.28 percent of assets at March 31, 1990, compared to 0.38 percent of assets at Dec. 31, 1989, an improvement of over 26 percent.

Separately today, the bank's board of directors declared a regular $0.10 per share quarterly dividend to stockholders of record on May 18, 1990, payable June 1, 1990.

Standard Federal Bank, with assets of $9.7 billion, and 113 branch offices in Michigan and Indiana, is listed on the New York Stock Exchange under the symbol SFB.

#90109p1261 04/19/1990 ~PR Newswire
NEW YORK (APRIL 19) PR NEWSWIRE - Seamen's Corporation, parent company of the Seamen's Bank for Savings, FSB, was informed yesterday that the Office of Thrift Supervision (OTS) had placed the bank in receivership and appointed the Federal Deposit Insurance Corporation (FDIC) as receiver, and that the FDIC had approved the assumption of the bank's deposit liabilities by the Chase Manhattan Bank (National Association) (NYSE: CMB) New York. These transactions were completed on April 18. The company said it does not expect to realize any value from its investment in the bank's common stock and the company also expects that the subordinated debt holders of the bank will not realize any value from their investment following yesterday's actions. The company owns no material assets other than the bank's common stock.

As previously disclosed, the bank operated since March 15, 1989, under the terms of a memorandum of understanding with the FDIC and the Federal Home Loan Bank Board (certain functions of which have been assumed by the OTS). After execution of the memorandum, the bank's board of directors and officers cooperated with the FDIC and the OTS pursuant to the terms of the memorandum and generally undertook no significant transactions without consultation with, and review by, the FDIC, the OTS and a major Wall Street investment firm, which the bank retained as its advisor.

In an effort to preserve value for its security holders and pursuant to the memorandum of understanding, the bank, with the help of its advisor, began in the second quarter of 1989 to contact numerous potential investors in an effort to recapitalize the bank without federal assistance. These efforts were ultimately successful primarily because of the substantial excess of the fair-market value of the bank's liabilities over the fair-market value of its assets and also because of a change in the tax laws that eliminated the value to a potential acquirer of certain built-in tax losses of the bank.

The company's operations for the year ended Dec. 31, 1989, resulted in a consolidated net loss to the company of $212.7 million, or $13.11 per share.

#90109p1264 04/19/1990 ~PR Newswire

LINCOLONSHIRE, IL (APRIL 19) PR NEWSWIRE - Morgan Products Ltd. (NYSE: MGN) today announced net income of $230,000 or $.03 per share on net sale of $99.8 million for the three months ended March 31, 1990. These results compare to net income of $226,000 or $.03 per share on sales of $105.5 million for the first quarter of 1989. The company had experienced a loss of $5,725,000 -- including a one-time restructuring charge of $3,000,000 -- on net sales of $98.2 million in the fourth quarter of 1989.

The company's financial condition continues strong with the results of previously implemented asset control programs reflected in the year to year comparison. Accounts Receivable and Inventories at March 31, 1990, of $111 million were almost $15 million below the April 1, 1989, balances. Long-term debt of $37 million at March 31, 1990, was $12 million below the same period last year. Long-term debt as a percentage of total capitalization improved from 36 percent at this time last year to 31 percent at March 31, 1990.

Although gross profit dollars were slightly below last year, gross profit percentages remain the same at 13.4 percent. Significantly, gross margins had declined in the third and fourth quarter of 1989 to 12.3 percent and 6.7 percent, respectively, reflecting higher manufacturing costs in the fir door plants, a restructuring charge and a continued increase in the ratio of distributed products shipped direct to customers versus distributed products sold through warehouses. The margin improvement in the first quarter of 1990 to 13.4 percent reflects improved production efficiencies at the Lexington and Springfield fir door producing plants and an improvement in warehouse sales as a percentage of total sales at Morgan Distribution.

Morgan Products LTD. is a leading manufacturer and distributor of specialty building products through its three business units: Morgan Manufacturing, a national manufacturer which makes and sells premium exterior and interior doors and entrance systems under the brand names Morgan and Nicolai; Morgan Distribution, a regional wholesale distributor of specialty building products, primarily millwork, including windows and doors; and Morgan Technologies, a developer of software systems for use by specialty building products dealers.

DALLAS (APRIL 19) PR NEWSWIRE - Motel 6, L.P. (NYSE: SIX) today reported revenues for the first quarter of $97.2 million, a 15 percent increase over 1989.

Income before depreciation and interest was $38.2 million, a 14 percent increase over 1989. First quarter net loss was $6.9 million compared to a year-earlier loss of $7.6 million.

Depreciation expense increased to $14.7 million for the quarter after being reduced by the $1.3 million effect of the September 1989 change in the depreciable lives of motel buildings and improvements. Interest expense increased to $30.5 million as a result of additional debt financing associated with the acquisition and development of motels. Motel 6 acquired 45 motels in February 1989 and their operations were included for seven of the 13 weeks in that quarter.

Motel 6 is the nation's largest chain of exclusively owner-operated economy motels with 534 locations and over 61,000 rooms in 42 states.

STAMFORD, CT (APRIL 19) PR NEWSWIRE - Rayonier Forest Resources Company (RFR), the managing general partner of Rayonier Timberlands, L.P. (NYSE: LOG), announced preliminary first quarter 1990 partnership results today.

Despite overall higher prices, sales for the period were $26.7 million compared with sales of $28.3 million for the first quarter of 1989. Lower harvest volume in the Northwest, primarily because of weather-related harvest delays, was the main contributor to the decline. Partnership

income of $19.5 million declined $1.8 million compared with $21.3 million earned in last year's first quarter. Income per publicly traded Class A unit was $1.06 compared with $1.10 for the prior year. Cash available from operations for publicly traded Class A unit holders was $1.15 per Class A unit compared to $1.16 for 1989 first-quarter results.

Northwest stumpage prices averaged over 30 percent higher than last year and Southern pine prices were about 12 percent improved. However, Northwest stumpage harvest volumes, compared to last year's first quarter, decreased 45 percent. Southeast pine tonnage rose approximately 30 percent over a year ago. The combined harvest level is approximately 26 percent of the year's projected harvest. The harvest volume in the first quarter of 1989 was 31 percent of the actual full year's harvest.

Timber demand remains strong despite an unsettled log export market and softer production levels in the pulp and paper industry. Southeast bid prices on contracts awarded during the first quarter, representing about 50 percent of this year's harvest plan volume, exceeded last year's first-quarter bid levels by 12 percent. Contracts for approximately 40 percent of this year's Northwest harvest were awarded during the first quarter at bid prices about 43 percent above last year's level -- although some of this improvement was due to a higher quality mix. As of the end of the quarter, contracts in both regions have been awarded representing approximately 75 percent of the projected 1990 harvest volume.

ITT Rayonier Inc., the forest products subsidiary of ITT Corporation (NYSE: ITT), owns 74.7 percent of the 20 million outstanding Class A units of Rayonier Timberlands, L.P. The balance is publicly traded on the NYSE.

#90109p1299 04/19/1990 ~PR Newswire

VANCOUVER (APRIL 19) PR NEWSWIRE - Fletcher Challenge Canada Limited announced today first quarter earnings of $15.7 million, or $.26 per common share, on sales of $282.2 million.

The results compare with earnings of $36.1 million, or $.60 per common share, and sales of $335.6 million reported for the same period a year ago.

The company posted earnings of $19.9 million, or $.34 per common share, and sales of $341.7 million during the fourth quarter of 1989. Ian Donald, company president and chief executive officer, said reduced production, arising from the company's major mill modernization and expansion program, led to the decline in sales and earnings during the first quarter.

Donald said lower volumes of pulp, newsprint and coated paper as a result

of the Crofton mill modernization program; the environmental upgrade of the Mackenzie pulp mill and the expansion project at Blandin Paper Company in Minnesota, had a negative impact on the company's first quarter performance.

''The implementation of these complex changes to our pulp and paper facilities, which are being undertaken as the mills continue to operate, is a very significant challenge,'' Donald told shareholders attending the company's annual general meeting in Vancouver today.

''Naturally, we are disappointed with the quarterly result, but we are looking forward to the positive impact these changes will have when they are fully completed,'' he said.

Poor prices for newsprint and most wood products continued throughout the first three months of the year. However, a newsprint price increase to U.S. $630 per ton, scheduled for June 1, 1990 is expected to hold, Donald told shareholders.

#90109p1301 04/19/1990 ~PR Newswire

BINGHAMTON, NY (APRIL 19) PR NEWSWIRE - Resource Recycling Technologies, Inc. (AMEX: RRT) announced today that it executed contracts with the Solid Waste Authority of Palm Beach County, Fla., on April 18, 1990, for the design, construction and operation of a 300-ton per day $6.25 million materials recycling facility (MRF), to service Palm Beach County, Fla. Commenting on the event, Lawrence J. Schorr, president of RRT, said: "This is a significant achievement for RRT since it not only represents our fourth contract for the construction of a municipally owned recycling facility, but it is with an authority which is one of the most sophisticated solid waste authorities in the United States."

Although the contract provides for a one year construction deadline and a five year operating agreement, Schorr said that he is hopeful that the facility will be constructed in a shorter time frame. He stated: "Using our experienced team members, RRT Design & Construction Corp., the J.S. Alberici Construction Co. of St. Louis and RRT Empire Returns Corp., we believe that our facility turnaround time will be more efficient with each new facility we construct."

RRT has recently opened the first vendor designed, built and operated MRF in the United States in Cape May, N.J., and is constructing a 300-ton per day MRF in Ocean County, N.J. RRT also operates facilities in Syracuse,

N.Y.; Bucks County, Pa., and Hempstead, Long Island, N.Y.

In related news, RRT also announced that it has received a $25,000,000 bonding commitment from the Reliance Surety Company, a division of Reliance Holding Group for use in performance and payment bonding in the design and construction of MRFs for municipalities. Schorr stated: "We believe the confidence Reliance has placed in us and our team is indicative of our growing capacities in this area of our business."

Resource Recycling Technologies, Inc. is a vertically integrated organization dedicated to the advancement of recycling programs and technologies, and the development of new markets for secondary materials.

KERRVILLE, TX (APRIL 19) PR NEWSWIRE - NCNB Texas today confirmed it has entered into a purchase and assumption agreement with the Federal Deposit Insurance Corp. (FDIC) to assume approximately $202.2 million in deposits and acquire approximately $9.6 million in small loans of the former Charles Schreiner Bank, headquartered here.

In addition, NCNB Texas will acquire the bank's trust business, which has approximately $125 million in assets under management.

The bank was declared insolvent earlier today and turned over to the FDIC as receiver. Under terms of the agreement, NCNB Texas will pay the FDIC a premium of $3.01 million for entering into the transaction.

"Kerrville is an untapped area for NCNB, and we are excited by the opportunity to extend our services in this growing market," said David Horner, central Texas district manager for NCNB. "We have great respect

for the tradition of this bank and what it has meant to Hill country citizens for decades. We want to assure the former Charles Schreiner Bank customers that they are important to NCNB, and we want them to continue with us."

The deposits transferred represented approximately 17,000 accounts. Horner said the former Schreiner Bank facilities will reopen on their regular schedules Friday, April 20, as NCNB branches. The main office is located at 741 Water St. Motor banks are located at 601 Main St. and 1015 Sidney Baker St.

NCNB Texas reported $33.7 billion in total assets at Dec. 31, 1989. It serves customers through a network of more than 200 banking centers in 67 Texas communities.

PITTSBURGH (APRIL 19) PR NEWSWIRE - Mellon Bank Corp. (NYSE: MEL) announced today that it has extended its offer to exchange shares of its common stock for any and all of its 3 million outstanding warrants for the purchase of common stock (the "warrants") to 5 p.m. Eastern Daylight Time on Monday, April 23, 1990.

The exchange offer will not be further extended. Terms of the offer, which originally was to have expired on April 18, 1990, are unchanged.

Holders who tender warrants on or prior to the expiration of this final extension will be treated as holders of record for purposes of receiving the second quarter 1990 dividend of $.35 per share of common stock, payable on May 15, 1990. Subject to the terms and conditions of the offer the corporation will exchange 0.23 shares of Mellon Bank Corp. common stock for each warrant validly tendered and accepted in the exchange. The shares of common stock to be issued pursuant to the exchange offer will be delivered promptly following the expiration date.

As of April 18, 1990, 380,050 warrants have been tendered into the exchange offer.

Smith Barney, Harris Upham & Co. Inc. is acting as dealer manager in

connection with the exchange offer. Copies of the prospectus supplement, the related prospectus and letter of transmittal for the exchange offer may be obtained through the dealer manager at 415-955-1698 (collect calls will be accepted) or the corporation at 800-245-1094 (outside Pa.) or 800-872-3019 (inside Pa.).

With assets of $30.8 billion at March 31, 1990, Mellon Bank Corp. is one of the nation's 25 largest bank holding companies. Through its subsidiaries, it provides wholesale, middle market and retail banking, as well as numerous service products including trust and investment, data processing and cash management.

#90109p4634 04/19/1990 ~PR Newswire

SUNRISE, FL (APRIL 19) PR NEWSWIRE - Jan Bell Marketing, Inc. (AMEX: JBM) today reported essentially flat sales and earnings for the first quarter, ended March 31, 1990.

Net sales were $25,109,000 as compared to $25,033,000 in the 1989 first quarter.

Net income amounted to $1,983,000 versus $2,085,000 a year ago. On a per share basis, net income equaled 9 cents versus 11 cents last year.

The 1990 earnings per share are based on a 22 percent increase in weighted shares outstanding as a result of a public stock offering last October. The 1989 per share profits have been adjusted for a 50 percent stock dividend issued last July.

Rosemary B. Trudeau, vice president-finance and chief financial officer, said, "The essentially flat results were due primarily to a substantial reduction in sales volume to the Price Club in this first quarter versus the year-ago period." As previously announced, the Price Club is re-evaluating its general jewelry marketing and sourcing business, and Jan Bell's ongoing relationship with this customer has not yet been determined.

"In an effort started last year, and being intensified this year, Jan Bell is selectively expanding its channels of distribution with value-oriented retailers that meet two key requirements: high-traffic locations and long-term contractual commitments," said Ms. Trudeau.

At the end of March, Jan Bell commenced a test-marketing program initially with four Smith's Food & Drug centers in Arizona. Jan Bell also plans to

test its "jewelry-store-within-a-store" power formats in other supermarket-superstores, starting in this second quarter. "Although the new generation of supermarket-superstores, which features high customer traffic and a wide variety of non-food merchandise, appears appropriate for the Jan Bell concept of selling jewelry, it's of course too premature to know how successful our test programs will be," Jan Bell's chief financial officer said.

Jan Bell is a leading provider of fine jewelry to the value- conscious consumer through power-format, turnkey-marketing programs to distribution channels that emphasize quality, credibility and consistent value.

CONTACT: Amerisa Kornblum of Jan Bell, 305-846-2793; or Jay Green, 212-661-8030, or Kathy Waller, 312-266-7800, both of the Financial Relations Board, for Jan Bell.

#90109p4635 04/19/1990 ~PR Newswire

MEMPHIS (APRIL 19) PR NEWSWIRE - The Promus Companies Incorporated (NYSE: PRI) today reported 1990 first quarter net income of $17.6 million, or 68 cents per share.

Operating income for the quarter was $51.2 million, an increase of more than 36 percent over the operating income for the same period last year, on a 6.9 percent increase in total revenues to $233.8 million. Increases in operating income included overall year-to-year increases in both the gaming and hotel businesses, as well as property transaction gains of $7.9 million.

Led by record results in Las Vegas and Laughlin, first quarter gaming operating income rose 6.8 percent to $36.0 million on a 4.8 percent gain in revenues compared to last year.

Both southern Nevada properties--The Holiday Casino/Holiday Inn in Las Vegas and Harrah's Del Rio in Laughlin--benefitted from hotel room additions which opened in late 1989 leading to a combined increase in operating income of approximately 40 percent. Construction continues on a casino expansion and facade improvement in Las Vegas, which restricted pedestrian access at times during the quarter. The project is scheduled for a summer 1990 completion.

In northern Nevada, winter storms hampered access to Harrah's Reno and Lake Tahoe during the quarter, especially on two important holiday weekends, causing operating income at both properties to decline approximately 20 percent compared to last year. In addition, construction on a casino consolidation and facade improvement project in Reno restricted access by walk-in customers. That construction is expected to

be completed in the second quarter 1990.

In Atlantic City, Harrah's Marina's operating income for the 1990 first quarter declined approximately 4.0 percent primarily due to higher promotional costs.

Hotel operating income nearly doubled to $7.8 million compared to $3.9 million during the first quarter last year. Embassy Suites and Hampton Inn both recorded gains driven off higher franchise royalties and management fees.

Promus continued to expand its hotel operations. Eleven hotels opened during the quarter--including four company-owned properties--bringing the total number of hotels open to 322. An additional 54 hotels were under construction at the end of the quarter.

Property transaction gains in the quarter principally related to the sale of a portion of the company's interest in an Embassy Suites hotel.

"Our strong operating results demonstrate our ability to grow earnings even during these times of intense competition in the casino and hotel industries. The record operating income reflects our commitment to produce extraordinary results, not just extraordinary efforts," said Michael D. Rose, chairman, president and chief executive officer of Promus.

"We are particularly pleased with the results given the concentration of activity during the quarter directed toward the completion of the reorganization of Holiday Corporation which resulted in the founding of The Promus Companies," Rose added.

As a result of the reorganization, Promus was spun-off to stockholders of Holiday Corporation effective February 7, 1990, and Promus declared a $30 per share special cash dividend which was paid on February 22, 1990.

"Our ability to arrange financing for the special dividend during a time of upheaval in the credit markets is strong evidence of the quality of our operations and reliable cash flows," Rose stated.

Promus arranged long-term debt totaling up to $1.01 billion of which approximately $800 million was drawn on February 21, 1990, to pay the special dividend and other expenses of the company.

Interest expense, which amounted to $16.5 million for the quarter, resulted primarily from that borrowing. The interest expense in the prior year does not reflect any of Promus' current corporate-level borrowings. The 1989 figures also do not include a provision for income taxes since Holiday Corporation had no formal intercompany tax sharing policy or agreement. Therefore, there is no reported comparison of net income or

earnings per share.

"This first quarter for our new company gets us off to an excellent start. We were able to complete the reorganization of Holiday Corporation and pay the special dividend on schedule, achieve record operating income and continue to build and expand our businesses for future growth," Rose said. "I believe we are ideally positioned to strengthen our industry leadership in the current competitive environment and continue to build value for our stockholders."

Promus is the public parent company of these leading hospitality brands: Harrah's casino/hotels, and Embassy Suites, Hampton Inn and Homewood Suites hotels.

#90109p4636 04/19/1990 ~PR Newswire

DARIEN, CT (APRIL 19) PR NEWSWIRE - Bowater Incorporated (NYSE: BOW) reported lower sales and net income for the first quarter of 1990 as compared to the record first quarter of 1989. Net income of $22.2 million ($0.59 per share) compared to $38.9 million ($1.04 per share) in the 1989 first quarter on sales of $338.3 million and $358.7 million respectively.

"Operating income was off 41.6 percent compared to the same quarter a year ago," said R.D. McDonough, senior vice president and chief financial officer of the company. The newsprint, coated publication paper and market pulp segments were effected by increased price discounting and by higher operating costs associated with continued startup expenses at the new Calhoun, Tenn., and Liverpool, Nova Scotia, pulp mills, and with a temporary shutdown of one newsprint machine for rebuild at the Nova Scotia mill.

"While our coated publication paper and communication paper segments remain relatively stable, earnings for the rest of 1990 will depend largely upon how newsprint and market pulp are effected by the U.S. and world economies, the relative strength of the U.S. dollar, and the successful implementation of the June 1 price increase for newsprint," McDonough said.

Bowater Incorporated is a major manufacturer of newsprint, coated publication papers, bleached kraft market pulp and a converter of communications papers for business.

#90109p4646 04/19/1990 ~PR Newswire

BLUE BELL, PA (APRIL 19) PR NEWSWIRE - Unisys Corp. (NYSE: UIS) today reported a net loss of $3.2 million for the first quarter ended March 31, 1990.

After allowing for preferred dividends, the loss per common share was 19 cents. In the first quarter a year ago, the company reported a net loss of $78.7 million or 66 cents per share after allowing for preferred dividends. Revenue increased 5 percent from $2.20 billion a year ago to $2.31 billion.

Unisys President and Chief Executive Officer James A. Unruh said, "Our priority in 1990 is to make our business operations profitable and to bring down the company's debt level. We made progress in both of these areas in the first quarter despite a mixed business environment. Our business operations posted operating income of $86 million compared to an operating loss of $37 million in the first quarter of 1989. Gross profit margins exceeded the depressed levels of each of the past four quarters. And debt decreased in a quarter when debt typically increases. These are positive signs that our restructuring actions are working."

Commenting on the business environment, Unruh said, "Unisys international business was strong, particularly in the Americas and Pacific/Asia group. However, our U.S. computer business, which has been sluggish for the past two years, remains weak and we are cautious about the business environment in general. We continue to expect full benefit from last year's restructuring actions to come in the second half of this year. Overall, we believe we are on track to reach our 1990 goal of reducing debt, restoring sound profitability and improving cash flow," Unruh said.

Unisys said worldwide orders posted a good gain over a year ago. Strong international commercial computer demand and strong defense systems orders more than offset declines in U.S. commercial computer orders. Commercial computer products experiencing the strongest gains in the quarter, versus one year earlier, included UNIX systems, communications network products, software and services.

Unisys said since the year began it announced new networking, imaging and low-end mainframe products and will have major UNIX and PC announcements in the near future. The company said its product program to gain a leadership position in combining proprietary and open systems into open cooperative computing networks is on schedule.

MIAMI (APRIL 19) PR NEWSWIRE - Southeast Bank today announced the introduction of the first personal money market deposit account of its type offered by a major Florida bank.

InvestSmart, which will be available April 30, offers Southeast Bank customers the opportunity to earn high-yield money market rates regardless of their account balance.

"There are a number of important benefits to the customer who opens an InvestSmart account," said Jack Bloomer, Southeast senior vice president for marketing. "The account earns a high interest rate which keeps up with the money market," he said. "That rate is not set by the bank but is tied to a national money fund average. InvestSmart also provides immediate access to funds. And it is FDIC insured up to $100,000 per account."

InvestSmart accounts also inlcude a Southeast personal checking account, which may also be interest bearing.

Unlike tiered rate money market accounts, InvestSmart pays the same interest rate regardless of the average collected balance.

The rate is equal to the Donoghue Money Fund Average (TM) 7-day simple yield. It is adjusted weekly as fluctuations in money market fund averages occur. It is updated every Friday morning to ensure that

customers benefit from weekly changes in the money market.

Interest is paid and compounded monthly on the average collected balance.

There is a $25 service charge if the balance is less than $10,000 or the related personal checking account is closed.

Southeast Banking Corporation (NYSE: STB) is the parent company of Southeast Bank, N.A. Southeast Banking Corporation had total assets of $17.1 billion and total deposits of $13.2 billion at March 31, 1990. Southeast provides financial services at more than 225 locations throughout Florida.

CHICAGO (APRIL 19) PR NEWSWIRE - BATUS, Inc., announced today that it has entered into a definitive agreement with Dayton Hudson Corporation (NYSE: DH) for the sale of BATUS's Marshall Field's subsidiary for $1.04 billion in cash, subject to certain additional consideration which can bring the total price to approximately $1.1 billion.

The transaction is expected to be completed in approximately six weeks. Marshall Field's is Chicago's premier retailer and a 130-year-old American shopping tradition, with 24 stores in the greater Chicago area, Wisconsin, Texas and Ohio. Its State Street store, a Chicago landmark, is now undergoing a $110 million renovation. Marshall Field's was acquired by B.A.T. Industries, BATUS's U.K.-based parent company, in 1982.

Dayton Hudson Corporation is a growth company focusing exclusively on retailing. As one of America's largest retailers, its strategy is to provide consumers with exceptional value through multiple, large-scale retail formats. At year end, Dayton Hudson operated 657 stores in 33 states under the names Hudson's, Dayton's, Target, and Mervyn's.

#90109p4657 04/19/1990 ~PR Newswire

HUNTINGTON, WV (APRIL 19) PR NEWSWIRE - Ashland Coal Inc. (NYSE:ACI) reported today that it had net income of $6.8 million, or $.42 a share on a primary basis, for the first quarter ended March 31, 1990.

This compares to net income of $6.3 million, or $.38 a share, for the same

quarter last year. Revenues for the first quarter were $90.2 million, as compared to $76.6 million in the first quarter of 1989.

"The increased revenues are attributable to both the initial contribution of Mingo Logan Coal Company, which we acquired on January 24, 1990, and the generally higher level of prices," said William C. Payne, president and chief executive officer. "Although our revenues were up significantly, operating income was up only $.6 million due to increased levels of costs in all areas of operations," Payne added. "The cost increases were primarily due to less favorable mining conditions in West Virginia and to increases in the cost of purchased coal. Earnings before income taxes were down due to increased interest expense associated with funding the Mingo Logan acquisition, although a considerable portion of the interest incurred has been capitalized in connection with Mingo Logan's development of its longwall mine."

"A significant reduction in our effective income tax rate has resulted in higher net income," Payne said. The decrease in the company's tax rate was due to tax law changes in the Revenue Reconciliation Act of 1989.

"Activities at our newly acquired Mingo Logan subsidiary are proceeding as planned," Payne noted. "Mining from the surface mines has been expanded and planning for the preparation plant which will serve both the longwall mine and several smaller deep mines is progressing satisfactorily," Payne added. A combination of factors, most notable of which is reduced interest expense, will result in the dilution in 1990 from the Mingo Logan acquisition being somewhat less than originally estimated.

"Looking to the rest of this year, I am now optimistic that 1990's results will be higher than 1989's," Payne concluded.

Ashland Coal Inc. is engaged in the mining, processing and sale of low-sulfur steam coal principally to electric utilities in the eastern United States and into the export markets.

Mingo Logan Coal Co. is an independent operating subsidiary of Ashland Coal Inc. CONTACT: David Todd of Ashland Coal Inc., 304-526-3333.

JANESVILLE, WI (APRIL 19) PR NEWSWIRE - Parker Pen's turnaround continues according to Jacques G. Margry, chief executive officer of the British-based company. Since incurring an operating loss of $22 million in 1985, the privately held company has since had only profitable years.

According to a preliminary report issued today, Margry said Parker's figures for the fiscal year ended Feb. 28, 1990, will show an operating

profit of more than $53 million on estimated sales of $262 million. This compares with $42.8 million in fiscal 1989 on sales of $234 million, or worldwide sales growth of 12 percent. Operating profits have increased 20 percent per year.

"We see such growth continuing," Margry said. Parker, formerly traded on the New York Stock Exchange, went private in January 1986 when a group of British investors and Parker managers acquired the writing instrument part of the business from its American parent, forming Parker Pen Company Ltd. based in Newhaven, England. The company does business in 150 countries and has 19 subsidiaries worldwide.

Owner of one of the world's best-known brand names, Parker makes and sells fountain pens, ball pens, liquid roller pens, fiber tip pens and mechanical pencils. It is the global sales leader in the refillable writing instrument market.

CLEARWATER, FL (APRIL 19) PR NEWSWIRE - Fortune Savings Bank will become the first Florida-based institution to offer buyer protection on its checking accounts when it provides the "Buyers Advantage" program on April 23. Some 25,000 Fortune customers will automatically get the new purchase insurance program free with their Fifty Plus and Check Club accounts.

Buyers Advantage insures most retail items paid for at the time of purchase with these Fortune checks for 90 days against loss, damage, theft and fire. In addition, the new insurance doubles the original manufacturer's U.S. warranty for up to an additional year. For example, a six-month manufacturer's warranty would be extended to one year, while warranties up to five years would be extended for an additional year.

"Our research shows that consumers see this type of insurance as an added value, a worthwhile addition to the many benefits Fortune already offers through its Fifty Plus and Check Club products," said Nancy Weaver, the bank's senior vice president of marketing and human resources.

"We have grown from zero to 25,000 of these accounts in the past year and a half simply because they offer so many customer benefits, such as unlimited check-writing, interest on checking balances, common carrier insurance, credit card protection, travel discounts and loan discounts, just to name a few," Weaver said.

The bank executive said Fortune customers whose purchases are lost, stolen

or destroyed will be able to recover their losses if they make a claim within 90 days of a purchase, showing their receipt and a copy of the check or bank statement.

"This innovative service will be extended automaticaly to the 20,500 Fifty Plus accounts we've opened since we introduced the product some 18 months ago," Weaver said. "And, of course, all new members will get the coverage as well.

"Buyers Advantage also applies to our Check Club accounts, which were introduced just last fall," she said. "We already have more than 4,500 of these accounts."

To qualify for Buyers Advantage coverage, the member must pay the full price of the item by a single check at the time of purchase and retain the store receipt. To expedite the refund or replacement process, customers will get an 800 toll-free phone number to call.

Fortune, with more than $3 billion in assets, operates 47 branches in Florida. It is one of the largest Florida thrift institutions that meets all of the government's capital requirements.

CAMBRIDGE, MA (APRIL 19) PR NEWSWIRE - Biogen, Inc. (NASDAQ: BGEN) announced today that it has granted Abbott Laboratories (NYSE: ABT) a worldwide non-exclusive royalty-bearing license under Biogen's hepatitis B patents covering recombinant surface antigen.

The license covers the manufacture, use and sale of diagnostic kits utilizing recombinant hepatitis B surface antigen. These kits are used primarily for the measurement of antibody levels to detect prior infection or response to hepatitis B vaccination. Terms of the agreement were not disclosed.

Abbott currently sells kits for the detection of hepatitis B antibody which are based on the native surface antigen isolated from blood.

This agreement is the third to link Biogen's strong hepatitis B patent position with Abbott's strong market presence. Abbott also has non-exclusive licenses to Biogen's hepatitis B core and "e" antigens for use in diagnostic kits. Biogen's hepatitis B patents are the result of pioneering work done by Biogen scientists in the late 1970's.

"The agreement with Abbott to use recombinant surface antigen for the

detection of antibody to hepatitis B surface antigen broadens the scope of our hepatitis licensing program. This is our first license for the use of recombinant hepatitis B surface antigen in a diagnostic application," remarked Jim Vincent, Biogen chairman and chief executive officer. He continued, "the conversion of diagnostic kits to the use of recombinant surface antigen will significantly enhance the revenue stream from our hepatitis licensing program. The program, now consisting of 24 contracts covering recombinant hepatitis B vaccine and diagnostic kits, is expected to generate well over $20 million in 1990."

Biogen is a leading biotechnology firm with a strategic focus on the development of human therapeutics. Founded in 1978, the first group of products based on its research is being sold by licensees throughout the world. The next generation of Biogen developed products is targeted for use in the AIDS, inflammation, and selected cancer markets.

Abbott Laboratories is a worldwide manufacturer of health care products employing 41,000 people. In 1989, the company's sales and net earnings were $5.4 billion and $860 million, respectively, with earnings per share of $3.85.

BRIDGEWATER, NJ (APRIL 19) PR NEWSWIRE - National Starch and Chemical has acquired the business, goodwill and equipment of Beta Chemicals Pty. Ltd. in Australia and the business, goodwill, land and buildings of Beta Chemicals (NZ) Ltd. in New Zealand. These companies were subsidiaries of Pacific Dunlop Limited. Terms were not disclosed.

Both acquired companies have good strong positions in the automotive and footwear industries and manufacture a range of products including neoprene contact cements and solvent adhesives with 1989 sales in excess of US$9 million.

The addition of Beta Chemicals, with its excellent position in these

industries, is an integral part of National's strategy to develop these markets on a worldwide basis. In addition, the acquired companies are highly complementary to National's existing operations in Australia and New Zealand.

National Starch and Chemical Company, a Unilever company headquartered in Bridgewater, N.J., is a worldwide manufacturer of adhesives, resins, specialty chemicals and specialty starches, with 1989 sales in excess of $1.5 billion.

SPRING VALLEY, NY (APRIL 19) PR NEWSWIRE - Par Pharmaceutical Inc. (NYSE: PRX) announced today two major actions intended to assure confidence in Par's management and its products.

First, Par announced that it has executed a Voluntary Declaration solicited by the Federal Food and Drug Administration. Implementing the declaration will ensure that Par's operations comply with both its approved product applications and current Good Manufacturing Practices ("GMP") requirements.

The declaration provides for comprehensive and continuous reviews to be conducted by Par in a number of areas including: batch reviews for compliance with approved applications; audit of manufacturing, quality, laboratory, research and development and regulatory affairs functions; standard operating procedures and documentation control; training; organizational structure; and process/product validation. In addition to the specific commitments contained in the declaration, Par's President, Kenneth I. Sawyer, is required to certify to the FDA that the firm is in substantial compliance with the declaration. FDA may conduct inspections necessary to ascertain conformance to the Voluntary Declaration. The declaration is expected to allow Par to more effectively reintroduce that part of Par's product line that still remains under the distribution moratorium voluntarily imposed by Par in August 1989.

Par also announced the appointment of Elie G. Shami, Ph.D., as senior vice president for Scientific Affairs and Quality. Shami, who also was appointed to Par's board of directors, has extensive experience in pharmaceutical science and technology and is widely respected in the pharmaceutical industry. Shami has served in a variety of senior positions for several pharmaceutical companies, including DuPont Pharmaceutical, Smith Kline Beecham and, most recently, Orlove Research and Development Group. Shami, who received his Ph.D. in Physical Pharmacy from the University of Wisconsin has been an active member of the

Parenteral Drug Association Foundation ("PDAF"), Parenteral Drug Association ("PDA") and PMA Development Section, and has served on the board of directors of the PDAF and PDA. In his position at Par, Shami will also provide oversight in these areas at Par's subsidiary, Quad Pharmaceuticals Inc.

NEW YORK (APRIL 19) PR NEWSWIRE - Schlumberger Limited (NYSE: SLB) reported that "across-the-board" improvements in their oilfield services businesses worldwide helped boost first quarter earnings 56 percent. Net income in the first quarter was $129 million compared to $82 million earned in the same period of the previous year.

Earnings per share were $0.54 versus $0.35. Operating revenue in the first quarter was $1.22 billion, led by a 16 percent increase in oilfield services; on a comparable basis, adjusted for measurement & systems businesses acquired and sold, consolidated revenue was up 13 percent.

Euan Baird, chairman, stated that, "The much improved results posted by all of our oilfield operations, including those in North America, strengthen our conviction that we are at the start of an upcycle in the oil industry.

We believe that increased global demand coupled with OPEC's commitment to price stability in the long term should assure continued oil exploration and development worldwide."

Baird noted that, "Our utility metering businesses, Schlumberger Industries, had another solid and strong first quarter."

#90109p4685 04/19/1990 ~PR Newswire

MARTINSVILLE, VA (APRIL 19) PR NEWSWIRE - Tultex Corp. (NYSE: TTX), a leading producer of fleeced knit activewear, today reported a 23 percent increase in first-quarter sales.

Net sales for the three months ended March 31 were $57,353,000 compared with $46,480,000 for the first quarter of 1989. The net loss for the quarter was $2,295,000, or 8 cents per share, compared with $1,539,000, or 6 cents per share, for the quarter ended April 1, 1989.

Dick Hunnicutt, chairman and chief executive officer, stated that the increase in first-quarter sales is a strong indication that 1990 will be a healthier year than 1989. The first-quarter trend reflects improved shipping volume and higher average selling prices for fleeced apparel.

"Our booked-order position is very strong for this time of the year. Increased raw material costs experienced over the previous 12 months were largely responsible for this year's first-quarter loss," Hunnicutt said. "Given the seasonal nature of our business, in which we ship the majority of our product in the second half, and the results of our continuing cost reduction efforts which will become more apparent later in the year, we are confident that sales and earnings for 1990 will be much improved over last year."

In addition, Hunnicutt attributed the upbeat projection to the efforts of the employees of Tultex who, by working toegether, are making the difficult decisions necessary to restore the company to acceptable levels of profitability.

Tultex, a vertically integrated producer of fleeced knit activewear and leisure time apparel, operates yarn and apparel manufacturing plans in Virginia and North Carolina.

WEST DES MOINES, IA (APRIL 19) PR NEWSWIRE - Commtron Corporation (AMEX: CMR) today announced plans to centralize its executive, administrative, merchandising and telemarketing operations into one facility in the Windsor Heights area of Des Moines. The relocation scheduled for Fall 1990 will give the company more flexible office space at a lower per-square-foot cost to accommodate future growth.

Commtron said it has signed a long-term lease agreement for a single story 85,000 square foot former retail store. The company's operations are now spread among three offices within two separate facilities for a total of

51,310 square feet.

The consolidation reflects the company's continued program of improving efficiency and lowering expenses as a percent of sales. Chief Financial Officer Steve Lacy noted that "the building's open floor plan will enable Commtron to further streamline management and marketing systems to increase customer service. Meanwhile, the lease terms make it a very attractive choice for Commtron."

Commtron Corporation is the nation's largest distributor of prerecorded videocassettes and a national distributor of consumer electronics.

#90109p4699 04/19/1990 ~PR Newswire

ST. PAUL, MN (APRIL 19) PR NEWSWIRE - Led by continued strong growth in international markets, 3M (NYSE: MMM) posted new highs in quarterly sales and earnings.

Net income for the first quarter increased 5.3 percent to $335 million, or $1.51 a share. That was up from $318 million, or $1.43 a share, in the same period last year. Sales totaled $3.164 billion, up 4.9 percent from $3.017 billion in the year-earlier quarter.

Allen F. Jacobson, chairman and chief executive officer, said 3M "continued to benefit from efforts to increase our penetration of international markets."

3M's international unit volume rose 12 percent from the same quarter last year. This marked the company's ninth consecutive quarter of double-digit volume gains abroad. International markets accounted for 49

percent of 3M sales during the quarter.

Domestically, 3M's unit volume increased about 1 percent, reflecting the slowing of the U.S. economy. "This economic slowdown was most evident in our Industrial and Electronic Sector," Jacobson said.

This sector serves automotive, housing, general industrial and other markets experiencing soft demand at this time.

Several of 3M's U.S. businesses registered solid volume growth during the quarter, Jacobson said. These included telecom systems, memory technologies, medical products, and imaging systems. The company's U.S. results also benefited from continued productivity gains, Jacobson said.

The stronger U.S. dollar and a lower effective tax rate had slight, nearly offsetting effects on first-quarter earnings. Currency effects reduced earnings by about 5 cents a share, while a lower tax rate added about 4 cents a share.

#90109p4700 04/19/1990 ~PR Newswire

RICHMOND, VA (APRIL 19) PR NEWSWIRE - Tredegar Industries, Inc. (NYSE: TG) reported today its sales, net income and earnings per share for the first quarter ending March 31, 1990.

Tredegar became an independent company following a spin-off from Ethyl Corporation after the second quarter of 1989. While first quarter results reflect actual performance, comparative figures for 1989 were reported on a pro forma basis in order to illustrate how Tredegar might have performed as an independent company during that period.

The pro forma figures assume that Tredegar would have incurred expenses of approximately $3 million per quarter on an after-tax basis, primarily for interest on the company's debt and incremental administrative expenses.

Tredegar's net sales for the first quarter were $147,660,000, down seven percent from $158,586,000 in 1989.

Tredegar's first quarter net income for 1990 was $722,000, or six cents per share, down 68 percent from pro forma net income of $2,242,000, or 19 cents per share, a year earlier.

John D. Gottwald, Tredegar's president and chief executive officer, said: "Aluminum results continue to be depressed. Plastics earnings also were lower, primarily due to disappointing results in the automotive segment of

our Molded Products division. Energy continued its strong performance."

Tredegar Industries is a Fortune 500 manufacturer of plastics and aluminium products and has interests in coal, oil and gas.

#90109p4701 04/19/1990 ~PR Newswire

RICHMOND, VA. (APRIL 19) PR NEWSWIRE - Owens & Minor, Inc. (NYSE: OMI) announced today its 1990 first quarter results. Sales for the first quarter ended March 31, 1990 were a record $292.6 million, an increase of 49.4 percent from the $195.8 million level for the same period in 1989. Earnings for the three-month period were $1.5 million as compared to $.9 million for 1989, an increase of 70.6 percent. Net income per share for the first quarter was $.18 compared to $.11 for the same period in 1989, an increase of 63.3 percent. The first quarter results for 1989 included a $1.1 million pre-tax loss from the devaluation of foreign gloves.

According to G. Gilmer Minor, III, President and CEO: "I am very pleased with our first quarter results especially when compared to the last three quarters of 1989. The initiatives we have taken to restore the company to an acceptable profitability level seem to be working. Sales growth net of acquisitions, expense control and asset management are much improved over the past three quarters. Our Wholesale Drug Division had a strong first quarter, and we are hopeful this trend will continue throughout the year. Gross margin improvement is our number one priority for the year. Net of the $1.1 million glove devaluation in the first quarter last year and any favorable impact from our second quarter acquisition in 1989, gross margin dollars improved modestly in the first quarter of 1990."

Owens & Minor, Inc., is a wholesale distributor of medical/surgical supplies, pharmaceutical and other related products. Through its Vangard Labs and Harbor Medical subsidiaries, the Company also packages generic and brand name pharmaceuticals and assembles sterile procedure trays, respectively. Owens & Minor, Inc. is traded on the New York Stock Exchange under the symbol OMI.

#90109p4704 04/19/1990 ~PR Newswire

PROVIDENCE, RI (APRIL 19) PR NEWSWIRE - Textron Inc. (NYSE: TXT) reported higher first quarter net income of $66.2 million (73 cents per share),

compared with $63.3 million (73 cents per share) in 1989, B.F. Dolan, chairman and chief executive officer, announced today. He added that revenues rose to $1.9 billion in the first quarter 1990 from $1.8 billion in 1989. Earnings per share for 1990 reflect an increased average number of shares outstanding over the prior year.

Dolan said, "we are pleased that first quarter operating income increased over last year. Continued strength in the finance and insurance businesses more than offset the current slowdown in our automotive divisions."

In the Aerospace Technology sector, Bell Helicopter's income declined, principally due to the benefits in 1989 of a higher level of international business. Results of the Systems segment improved substantially due to higher shipments and better performance on certain contracts.

Dolan further commented, "Textron's balanced diversity has enabled us to achieve a good start on the year, despite softness in several of our markets."

As a result of the previously reported Federal Trade Commission preliminary injunction relative to Textron's acquisition of Avdel in early 1989, Textron is precluded from consolidating Avdel's earnings with Textron's results of operations. Operating income of the Commercial Products sector for the first quarter of 1990 included dividends of $6.1 million received from Avdel. Interest expense on the borrowings related to the purchase of Avdel was $5.3 million in the first quarter of 1990, compared with $3.9 million in 1989. As previously reported, Avdel's sales and earnings before income taxes for the full year 1989 were approximately $149 million and $23 million, respectively.

Textron Inc. is a multi-industry company with operations focused in three business sectors -- Aerospace Technology, Commercial Products and Financial Services.

#90109p4707 04/19/1990 ~PR Newswire

OAK BROOK, IL (APRIL 19) PR NEWSWIRE - Waste Management, Inc. (NYSE: WMX) today reported record net income and revenue for the first quarter.

Net income for the three months ended March 31 increased 25 percent to $144,027,000, or $.31 per share, from $115,539,000, or $.25 per share, in the same period in 1989.

First quarter revenue rose 27 percent to $1,220,638,000, compared with $958,866,000 in the period a year earlier.

Per share results for 1989 have been restated to reflect a two-for- one stock split in the form of a stock dividend distributed in December 1989.

"Our strong earnings growth, as illustrated with these record results, is continuing as we anticipated, and we expect to achieve another excellent year in 1990," said Dean L. Buntrock, chairman and chief executive officer.

"Waste Management is in position to respond to the more stringent regulations we see coming in the 1990s, and we believe our operating units both here in North America and abroad can meet the widening need for the comprehensive environmental services we provide."

The company's three principal business units, Waste Management of North America, Inc.; Chemical Waste Management, Inc., a 78 percent- owned subsidiary; and Waste Management International, Inc., all reported improved results, Buntrock said.

Waste Management of North America's Recycle America Shortly after the end of the quarter, the company announced that it had reached an agreement with Wheelabrator Technologies Inc. through which Waste Management will increase its equity ownership of that company from 22 percent to 55 percent. The agreement, approved by the boards of directors of both companies, is subject to the approval of Wheelabrator Technologies stockholders and to the provisions of the federal Hart-Scott-Rodino Act.

Wheelabrator Technologies is a leading developer of facilities and services for the trash-to-energy, environmental and general industrial markets. The company operates 16 trash-to-energy and cogeneration facilities; Envirotech Operating Services, Inc., a provider of municipal water and wastewater treatment services; and Rust International Corp., which designs, constructs, operates and maintains large-scale industrial process plant facilities.

Waste Management, Inc. is the world's largest provider of comprehensive waste services. Based in Oak Brook, Ill., the company operates through more than 450 subsidiaries and divisions in the United States, Canada, Mexico and a dozen countries overseas.

SAN ANTONIO, TX (APRIL 19) PR NEWSWIRE - James H. McLaughlin, chairman of the Implementation Committee of National Bancshares Corporation of Texas,

announced Tuesday that the board of directors of NBC Bank - San Antonio has elected Mark M. Johnson president of NBC Bank - San Antonio effective with the consummation of the recapitalization.

Johnson, currently president of National Bancshares Corporation of Texas, succeeds Robert H. Seal, who is retiring as chairman, president and director of NBC Bank - San Antonio. Seal will continue to serve the bank as an advisory director and consultant to NBC Banks.

Johnson, 43, joined National Bancshares Corporation in 1975 as executive vice president and currently serves as president of the company.

He is a graduate of Texas Tech University and the American Institute of Banking. He has served on the board of directors of the Greater San Antonio Chamber of Commerce, the Alamo Area Council - Boy Scouts of America, and the downtown Rotary Club of San Antonio. In addition, he serves as a member of the San Antonio Association of Reserve City Bankers.

Seal, 66, joined NBC Bank - San Antonio in 1973 and has enjoyed a long, distinguished career with the San Antonio-based financial institution. Seal is a former board member/case chairman for the Southwest Graduate School of Banking at S.M.U., a former instructor for the American Institute of Banking, past president of the San Antonio Clearing House, and the only honorary member of the NBC Bank Quarter Century Club.

"We are most fortunate to have Bob Seal continue at NBC as an advisory director and consultant," stated McLaughlin. "In his new role, Seal will continue to advise the bank and will assist and enhance NBC's relationship and involvement in the community."

Active in San Antonio civic affairs, Seal has committed countless hours to community and civic organizations that are dedicated to the betterment of San Antonio and its people, a bank spokesman said. He has held many offices in the South Texas Higher Education Authority, Cancer Therapy and Research Foundation, National Conference of Christians and Jews and many other community organizations. He is a past board member for many local organizations including the San Antonio Museum Association, Salvation Army United Negro College Fund and Methodist Hospital Foundation. He has also served on the boards of Schrainer College in Kerrville and Rhodes College in Memphis, Tenn.

Seal's awards of recognition include the Humanitarian Award from the National Jewish Hospital, Golden Deeds Award from the Exchange Club, Brotherhood Award from the National Council of Christians and Jews, and the Philanthropy Award from the San Antonio Association of Fund-Raising Executives. Seal is a member of the First Presbyterian Church and currently serves as an elder.

National Bancshares Corporation is a multi-bank holding company based in San Antonio, Texas, with member banks located in San Antonio, Houston, Corpus Christi, Austin, the Rio Grande Valley, and several other communities in central and south Texas.

JAMESTOWN, NY (APRIL 19) PR NEWSWIRE - Electronic Technology Group, Inc. (NASDAQ: ETEK, BSE: ETE) today announced it had reached an agreement with Moog Music Inc. for an exclusive worldwide license of Moog Music's name, patents and products. Moog Music Inc. designed and produced the original music synthesizer and has been a formidable name in the music industry in the past. No details of the financial aspects of the license arrangement were released.

Electronic Technology Group, Inc. is a manufacturer of electronic products for original equipment manufacturers in the medical electronics, industrial controls and transportation industry. As part of its production effort, Electronic Technology Group also produces audio amplification and other musical equipment.

Edmond L. Lonergan, president of Electronic Technology Group, Inc. commented that this new agreement will afford Electronic Technology customers the opportunity to avail themselves of the Moog Music technology name and label, and should assist in increasing sales both domestically as well as in foreign markets.

Frank T. Costanzo, chief executive officer of Electronic Technology Group, Inc. stated that its present Jamestown, facilities would be utilized to accommodate the anticipated operational needs of a new subsidiary, Moog Music Manufacturing, which would be formed to commercially develop the Moog Music license, and to provide the service center for all Moog Music products.

CHICAGO (APRIL 19) PR NEWSWIRE - Fruit of the Loom, Inc. (AMEX: FTL) today reported record first quarter sales and operating earnings. Sales were $323.7 million for the first quarter of 1990, an increase of 14.8 percent from 1989 first quarter sales of $282 million.

Operating earnings increased $21.7 percent to $57.2 million for the first quarter of 1990 from $47 million for the first quarter of 1989. Net earnings for the first quarter of 1990 were $12.8 million or $.20 per share (a 66.7 increase), compared to $7.7 million, or $.12 per share, for the first quarter of 1989.

In announcing the results, William Farley, chairman and chief executive officer of Fruit of the Loom, said: "The first quarter of 1990 benefited from our continued effort to broaden our consumer marketing efforts and the results of our expanded manufacturing capacity. We look forward to continuing this exceptional momentum and establishing another record-setting year for Fruit of the Loom."

Fruit of the Loom is the nation's leading producer and marketer of men's and boys' underwear, activewear for the imprinted market and branded women's and girls' underwear. Principal brand names include Fruit of the Loom(R), BVD(R) and Screen Stars(R). The company is also a leading manufacturer of family socks, using the Fruit of the Loom and Russell National(R) brand names.

BETHLEHEM, PA (APRIL 19) PR NEWSWIRE - Union Pacific Corp. (NYSE: UNP) announced that first quarter earnings per share were $1.27, compared with $1.22 in the first quarter of 1989.

The increase in earnings per share reflects the shareholder benefits of the corporation's stock repurchase program and Dutch Auction completed in May 1989.

First quarter net income of $128 million was down 7 percent from the same period last year, largely reflecting higher interest expense for the share buyback.

Union Pacific Railroad increased earnings 2 percent to $127 million, despite a sluggish economy and higher fuel costs. The quarter started off extremely weak, with January carloadings down 1 percent compared with last year, but finished strong, with March carloadings 3 percent better than last year. Quarterly carloadings were up 2 percent, with the greatest strength in chemicals, up 5 percent; energy traffic, up 5 percent; and merchandise shipments, 3 percent. These gains were partially offset by declines in autos, off 15 percent; forest products, off 5 percent; and food products, off 2 percent. Despite this difficult economic environment the company raised its average revenue per car by 1 percent.

Union Pacific Resources increased its first quarter net income 31 percent to $63 million. Hydrocarbon volumes were up 8 percent, with gas particularly strong, registering a 15 percent increase over last year. Average price realizations were up significantly, with crude oil up 20 percent, plant liquids up 42 percent and natural gas up 6 percent. Gas production increases resulted primarily from infill drilling programs in East Texas and the U.P. Land Grant, along with substantial production gains from the successful Gulf of Mexico program. Mineral operations were also strong, with a 29 percent increase in coal volumes and a 21 percent gain in Trona royalties.

Overnite Transportation had first quarter earnings of $8 million before goodwill, compared with nearly $12 million last year. Revenues increased 12 percent, supported by a 6 percent rise in volume and a 6 percent price increase. These gains were more than offset by higher costs in fuel, salaries, and workmen's compensation benefits. To offset these rising costs, Overnite implemented labor productivity actions, which resulted in a 6 percent increase in tonnage per truck during the quarter.

USPCI's financial results were equal to last year's, with a loss of $700,000 before goodwill. The loss reflected weather problems at both disposal sites early in the quarter and the delay into the second quarter of the start up of several major disposal contracts.

Union Pacific Realty earned $3.8 million, compared with $5.1 million in the first quarter of 1989. In early March, the company terminated a sales agreement to sell substantially all of its assets to a real estate developer. This agreement hampered Realty's sales efforts during the quarter. Sales should increase substantially in the next several quarters as Realty markets its properties individually.

"We are encouraged by our results in the quarter, particularly in March, because they were achieved in the face of a slower economy," said Drew Lewis, chief executive officer. "If traffic remains as strong as the March level and hydrocarbon prices remain firm, Union Pacific should have a solid earnings gain in 1990."

Lewis also announced today that the corporation has decided not to undertake at the present time an initial public offering of its wholly owned subsidiary, Union Pacific Resources.

"We decided that an initial public offering would not substantially enhance shareholder value until our underlying asset values are more clearly understood," he said.

An income statement for the first quarter is attached.

SEATTLE (APRIL 19) PR NEWSWIRE - Alaska Air Group Inc. (NYSE, PSE: ALK) today reported a consolidated net loss of $2.1 million, or 21 cents per share, for the quarter ended March 31. This compares with last year's first quarter income of $6.4 million, or 40 cents per share. The loss per share calculation for the first quarter of 1990 includes $990,000 for dividends on the new issue of preferred stock.

On a 19 percent increase in passenger traffic, operating revenues for the first quarter of 1990 rose 17 percent to $230.8 million, up from $197.7

million last year. A 20 percent increase in capacity coupled with higher fuel prices caused operating expenses to climb 25 percent to $233.5 million, from $186.7 million last year. The operating loss for the current quarter was $2.7 million compared to an operating profit of $10.9 million for the 1989 period.

"Last year's first quarter was uncharacteristically strong and also enjoyed the benefit of a $1.5 million lawsuit award. Nonetheless, the current quarter losses are disappointing," said Bruce R. Kennedy, chairman and chief executive officer. "The decline from last year's record first quarter can be traced to several factors. Passenger traffic did not keep pace with the 20 percent increase in capacity; the average passenger yield was slightly lower due to Alaska Airlines' expansion into the lower yield Mexican market; and, the price of fuel increased 13 cents a gallon. This higher fuel price accounted for about $5.7 million of the total $12.3 million increase in fuel expense for the quarter," explained Kennedy.

"During the past quarter, the company completed a major corporate restructuring designed to enhance the long-term value of shareholder investments and strengthen Air Group's financial position. This included the sale of a new $62.5 million convertible redeemable preferred stock and the repurchase of three million shares of common stock for $69.3 million. The company also sold 832,466 treasury shares to its airline subsidiaries' Employee Stock Ownership Plans. As a result of these transactions, the number of common shares outstanding declined to 13,379,000 at March 31, 1990 as compared to 15,483,000 on Dec. 31, 1989," closed Kennedy.

Alaska Air Group Inc. is the holding company for Alaska Airlines Inc. and Horizon Air Industries Inc.

BETHESDA, MD (APRIL 19) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) has been awarded a $6.1 million Air Force contract to develop an automatic radar target recognition system for tactical aircraft.

Under the 36 month program, Martin Marietta will evaluate various model-based vision systems used to process target data from advanced synthetic aperture radar. The software processing system selected would apply artificial intelligence techniques for automatic identification of potential ground targets. This would be done by comparing the advanced radar's high-resolution return images with geometric models stored in the system's electronic memory.

A critical part of the program will be the mapping of the target recognition system on a network of advanced parallel processing computers. Unlike serial computers, which solve one part of a problem at a time, parallel processors work on many parts of the problem simultaneously. The advanced parallel processors will allow the system to analyze radar data quickly enough to provide real-time target identification.

The Wright Research and Development Center at Wright-Patterson Air Force Base, Ohio, awarded Martin Marietta Information & Communications Systems of Denver the contract to develop the system, called the Automatic Radar Air-to-Ground Target Acquisition Program.

LINCOLN, RI (APRIL 19) PR NEWSWIRE - A.T. Cross Company (AMEX: ATXA), manufacturer of fine writing instruments, will report declines of about 8 percent in sales and approximately 40 percent in earnings for the first quarter ended March 31, 1990, Bradford R. Boss, chairman of the board, said today. Cross reported $53.1 million in sales and $6 million, or 36 cents per share, in net income in last year's first quarter.

The decreased sales and earnings were due to reduced domestic demand for writing instruments and lower orders for leather goods from U.S. department stores, the company announced. "Our results," said Boss, "are being adversely affected by the continuing sluggishness in consumer spending, compounded by severe financial stress among a number of retailing organizations which have been large Cross customers. On the positive side, our growth abroad remains strong, and sales of our Mark Cross retail stores are increasing as well.

"Historically, the first quarter of each year has been the smallest in terms of sales and earnings, with the fourth quarter normally amounting to a third or more of the total year. We still expect sales and earnings for the full year 1990 to be ahead of 1989."

A.T. Cross will report actual sales and earnings for the first quarter of 1990 next Thursday, April 26, at the time of its annual meeting in Lincoln.

#90109p4760 04/19/1990 ~PR Newswire

MONROVIA, CA (APRIL 19) PR NEWSWIRE - U.S. Link, home of ACCESS LA!, Southern California's fastest growing computer entertainment system has announced the signing of an agreement with BT/Tymnet, a global telecommunications system (that is the largest public data system in the world) developed by McDonnell Douglas and now owned by British Telecom.

This allows personal computer users across the nation with modems to utilize the unique U.S. LINK and ACCESS LA! services using local phone numbers in over 750 cities.

"With this agreement, U.S. LINK is able to present our unique combination of business and 'after hours' services cheaply to cities throughout the U.S.," states Jim Hughes, spokesperson for the Monrovia company. "Your computer allows you to easily enter a world full of people, personalities, business contacts and fun -- something that we feel other national services like Compuserve, Prodigy, and Genie have missed."

The ACCESS LA! "nightclub" on U.S. LINK offers 'after hours' fun, 24 hours per day -- with multiline, live chat with others throughout the nation, on-line-dating boards accessible from your home or office, and interactive multiplayer games pitting players against each other live, online...in real time! ACCESS LA! features over 8,000 downloadable shareware and public domain software files for IBM, Macintosh, Commodore, Atari and Amiga users, along with technical, exotic adult, and "just-for-fun" subsystems.

Technically, the ACCESS LA! BBS system is a hybrid utilizing several technological breakthroughs with software from Galacticomm, Novell, Phar Lap, and Metaware. "The end result guarantees superior file transfer and communications response, along with allowing extreme ease of movement on the system for neophyte computer users," explains Hughes.

A multiline system since December 1988, ACCESS LA! has now become the largest adult (18 and over) BBS on the West Coast seeing a growth rate of several hundred percent a year, with most subscribers falling in the 25-40 age bracket. "The growth that we've sustained in the Southern California area is truly phenomenal," adds Hughes, "and we are seeing subscribers that are not traditional computer users. From students through professionals, people are realizing that this is a very convenient way to network and have fun."

ACCESS LA! rates start from $7.00 per month after an initial $19.95 signup fee. By utilizing BT/Tymnet, typical evening access fees for a New York to Los Angeles link are less than $3.00 an hour (30-60 percent less than existing voice rates). For signup by credit card, call (800) HOTTFUN by modem at 300, 1200, 2400 baud (8/N/1), or the voice line at Computer Productions Inc. 818-358-0936.

U.S. LINK is a multiservice telecommunications company offering discounted data and voice communications packages for business and personal use.

#90109p4762 04/19/1990 ~PR Newswire

NEW YORK (APRIL 19) PR NEWSWIRE - Morgan Guaranty Trust Co.'s 'AAA' senior debt rating is affirmed by Fitch. The rating affects $43 million in outstanding floating rate capital notes.

The rating reflects Morgan's continued strong capitalization, credit culture, and wholesale lending relationships.

Despite large provisions to fully cover medium-term LDC credits in 1989 and net interest margin contraction from rising short- term rates, the

bank's financial strength has not been compromised. Morgan's continuing success is a result of management's effective response to deregulation and overcapacity in wholesale banking markets. The bank's prominence in highly profitable niche markets has enhanced its position.

By providing complete reserve coverage for its medium-term LDC loans, the bank has eliminated its only major problem asset concentration. This action gives Morgan greater flexibility than most other U.S. money center banks in dealing with future federally mandated requirements to realize LDC loan losses.

The bank also has one of the lower exposures to highly leveraged transactions (HLTs), the real estate sector, and other higher risk markets as a proportion of primary capital. Fitch does not expect any material deterioration in either the real estate or HLT portfolio. Although Morgan is one of the world's leading market makers in foreign exchange, aggregate position limits are well in line with supervisory guidelines.

In a trend which Fitch expects to continue, weaker net interest margins in 1989 were offset by superior profitability from advisory and trust services as well as trading activities. The bank's net interest margins, based on call report data, weakened from 2.85 percent in 1988 to 1.86 percent in 1989.

The bank continues to depend on purchased funds and other market sensitive liabilities to fund its balance sheet. However, short- term funding risk is quite limited as nearly all of the bank's purchased money is directly sourced. Funding risk is further mitigated by the company's solid reputation among both regulatory authorities and other financial intermediaries. At March 31, 1990, Morgan Guaranty accounted for about three-quarters of J.P. Morgan & Co.'s consolidated assets of $91 billion.

CONTACT: Ricardo Kleinbaum, 212-908-0525 or Joseph Labriola, 212-908-0532 both of Fitch.

HOUSTON (APRIL 19) PR NEWSWIRE - CRSS Inc. (NYSE: CRX) today reported that its engineering subsidiary has been awarded a design engineering contract by the Southern Division of Bowater Incorporated (NYSE: BOW) for a $75 million newsprint deinking plant to be built adjacent to Bowater's newsprint mill in Calhoun, Tenn.

The plant will supply the mill, which has a capacity of 790,000 metric tons a year, with 300 tons-per-day of fiber recycled from old newspapers and magazines. Construction will begin July 1, 1990. Completion is expected by late 1991.

Bowater is long-time client of CRS Sirrine Engineers' Pulp and Paper Division, an international provider of industrial facility design services headquartered in Greenville, S.C.

CRSS Inc., through its wholly owned subsidiaries, is a diversified design and construction services company. CRSS also has interests in the independent power/cogeneration industry and the acid rain/pollution control market.

#90109p4770 04/19/1990 ~PR Newswire

READING, PA (APRIL 19) PR NEWSWIRE - Carpenter Technology Corp. (NYSE: CRS) reported net income for its third fiscal quarter ending March 31, 1990, of $14.2 million, compared with $.6 million for the same period a year ago.

Earnings per share were $1.61, compared to $.06 last year. Last year's results included a previously reported special charge of $13.8 million after taxes ($22.5 million before taxes) or $1.50 per share for the shutdown costs associated with the closing of its Bridgeport, Conn., plant.

Excluding this special charge, third quarter earnings per share of $1.61 were 3 percent higher than the prior year's adjusted $1.56 per share.

Third quarter sales were $157 million, a 7-percent decrease from the $169.6 million of the prior year's period.

For the nine months of the current fiscal year, net income was $32.9 million vs. $15.4 million for the same period a year ago. Earnings per share were $3.68 vs. $1.68 for the same period a year ago. Excluding the effect of last year's special charge, net income of $32.9 million was 13 percent higher than last year's adjusted $29.2 million. Earnings per share were $3.68, or 16 percent higher, compared to $3.18, excluding last year's special charge.

Sales mix improvements, increased efficiencies at the Reading plant, lower raw material costs and a lower effective income tax rate contributed to the strong net income results for the third quarter and nine months ending March 31, 1990. In addition, reduced shares outstanding as a result of the continuing share repurchase program helped to increase the current year's earnings per share.

Unit volume shipments were 10 percent lower in the current third quarter and 14 percent lower in the nine months vs. year-earlier periods, due

chiefly to programs to upgrade Carpenter's product mix and softness in demand in certain consumer durable market sectors.

Paul R. Roedel, chairman of the board and chief executive officer, said, "We are pleased to report our tenth consecutive increase in earnings per share compared with year-earlier quarters, despite a softening in the united states economy. Our strong third quarter earnings were a direct result of our strategy to upgrade our product mix and reduce our costs."

Roedel further stated that the company is experiencing continued weakness in its automotive and housing markets, but that certain capital-intensive markets, such as aerospace and energy, remain strong.

#90109p4772 04/19/1990 ~PR Newswire

PITTSBURGH (APRIL 19) PR NEWSWIRE - General Public Utilities Corporation (NYSE: GPU) and DQE (NYSE: DQE) are combining forces to generate and move needed electricity from energy-rich western Pennsylvania to energy-short eastern Pennsylvania and New Jersey.

The announcement was made by the chief executive officers of the two companies, Standley H. Hoch, chairman, president and chief executive officer of GPU, and Wesley W. von Schack, chairman, president and chief executive officer of DQE.

The agreement includes the sale of 500 megawatts of power to GPU by DQE. This transaction will lead to the creation of more than 2,000 new jobs for Pennsylvanians. New jobs will result from the refurbishing and 1994 start-up of two now-closed facilities -- the Phillips Power Station and the Brunot Island combined cycle facility. Both are near Pittsburgh. Jobs also will open up in the coal fields supplying fuel to the Phillips Station and with the construction project associated with transmission lines to be built as part of the venture.

GPU will purchase from DQE a 50-percent undivided interest in the now-mothballed Phillips Power Station for approximately $150 million, estimated book value of the interest after refurbishment. DQE will continue to operate the 300-megawatt station located 10 miles north of Pittsburgh and will continue to own and operate the Brunot Island facility. Three years ago, both plants were removed from the rate base of DQE's principal subsidiary, Duquesne Light Company, as a result of the restructuring of the steel industry in the company's service territory. The purchase provides GPU with 150 megawatts of power. DQE also will supply an additional 350 megawatts of power to GPU from other sources over

a 20-year period.

As part of the agreement, the two companies will build a new transmission line that can carry approximately 1,500 megawatts of power. GPU will own two-thirds and DQE, one-third of the line. DQE will also have the option to obtain from GPU entitlements to use an additional 250 megawatts of the line's capacity. Upon the exercise of that option, DQE would have an entitlement to use 50 percent of the transmission line.

This additional transmission capability will enable DQE to transport increased amounts of electric power from southwestern Pennsylvania to East Coast markets.

The addition of approximately 200 miles of transmission capacity creates a valuable link in the multi-state network that energy planners consider vital to the secure movement of electricity across Pennsylvania and New Jersey.

Officials at both companies regard the new transmission line as an important addition to the nation's power infrastructure at a time when the utility industry is seeking innovative solutions to the country's growing power requirements.

The cost for building the 1,500-megawatt transmission line, expected to be in service in 1996, is estimated to be $480 million.

ACRE, ISRAEL (APRIL 19) PR NEWSWIRE - Electrochemical Industries (Frutarom) Ltd. (AMEX: EIF) will distribute a 30 percent stock dividend on May 11, 1990 to shareholders of record on May 7, 1990. The dividend will increase the number of outstanding ordinary shares, nominal value NIS 1 each, from 15 million to 19 million.

The stock dividend was approved at the company's extraordinary general meeting, which was held on April 5, 1990 in Tel Aviv. Also approved at that meeting were certain amendments to the company's articles of association. In the company's annual general meeting, which was held on the same day, the company's financial statements for 1989 were approved, and directors were appointed to the company's board.

Electrochemical Industries (Frutarom) Ltd. manufactures and markets chemicals, raw materials, flavors and essences for a wide variety of industrial applications. One of Israel's leading firms, it is the

country's sole producer of PVC, which it markets both domestically and overseas.

#90109p4776 04/19/1990 ~PR Newswire

HARRINGTON PARK, NJ (APRIL 19) PR NEWSWIRE - United Water Resources (NYSE: UWR) today reported earnings of $2 million for the first three months of 1990, an increase of 21 percent over the comparable period in 1989. Earnings for the 12 months ended March 31, 1990, were $14.6 million, down by 11 percent from the same period a year ago.

Net income per common share for the first quarter was 12 cents, up 2 cents from first-quarter 1989. Net income per common share for the 12 months ended March 31 was 88 cents, compared to 98 cents for the same period a year earlier.

Robert A. Gerber, United Water's chairman and chief executive officer, attributed higher quarterly earnings to a contract allowing its principal subsidiary, Hackensack Water Company, to convey rights that permit a 32-acre tract of its property to be used as a golf course. The contract made possible the preservation of a 132-acre country club in Bergen County N.J., Gerber noted.

Operating revenues for the first three months of 1990 were $30.7 million, an increase of 9 percent compared to $28.3 million in 1989. Gerber said the revenue increase was the result of a rate adjustment for New Jersey utility operations and higher sales by the company's non- utility businesses. Customer water usage for the quarter held steady with the prior year, Gerber said. He noted that both Hackensack and Spring Valley water companies are in an excellent position to meet the increased water demand typically experienced during the warm weather.

Discussions continue toward concluding an acquisition that presents an important growth opportunity for the company's water utility business. A preliminary agreement had been reached last December with NUI Corporation and Pennsylvania Enterprises, Inc., in which United Water will acquire the water operations and related assets of Pennsylvania Enterprises.

United Water Resources is a holding company engaged in water-related businesses and real estate.

United Water has paid continuous cash dividends on its common stock since 1886.

SAN ANTONIO, TX (APRIL 19) PR NEWSWIRE - The board of directors of Valero Energy Corporation (NYSE: VLO) today increased the regular quarterly cash dividend on the company's common stock, declaring a $.07 per share dividend, payable June 8, 1990, to holders of record April 30. The company has paid a $.05 per share regular quarterly cash dividend since reinstating the dividend a year ago.

"Since reinstating the dividend in 1989, our earnings have continued to be strong, and we are undertaking and studying a number of expansion projects at our refinery which will further enhance our profitability," said Bill Greehey, chairman of the board and chief executive officer of Valero. "Our strategy is to take advantage of changes which are occurring in the refining industry, such as new environmental regulations and an increasing domestic refining capacity shortage, to upgrade our product mix and increase our production of premium products."

The board also declared a regular quarterly cash dividend of $.86 per share for the company's depositary preferred shares, 1983 Series. Each

depositary preferred share represents one-twentieth share of the company's $68.80 Series B cumulative preferred stock. The dividend is payable June 1, 1990, to holders of record at the close of business May 11.

Valero Energy is involved primarily in specialized refining of high-sulfur atmospheric residual oil into premium products, such as unleaded gasoline, through its specialized refinery in Corpus Christi, Texas, and in the marketing of those products. In addition, through subsidiaries, Valero is general partner of and has an approximate 49 percent interest in Valero Natural Gas Partners, L.P., which owns a 7,100-mile network of natural gas transmission and gathering lines throughout Texas, purchases and sells natural gas to markets throughout Texas and the United States, provides third party gas transportation services, owns 11 natural gas processing facilities and markets natural gas liquids.

LAKEWOOD, CO (APRIL 19) PR NEWSWIRE - Higher volumes and increased prices combined to generate a strong start toward the accomplishment of 1990 goals for Plains Petroleum Co. (NYSE: PLP).

The company announced today first quarter earnings of $5.6 million, or 58 cents per share, up 21 percent from last year's results of $4.6 million (48 cents per share). Natural gas production rose to 6.6 billion cubic feet (Bcf) for the period, which was 4 percent greater than 1989's first quarter. Oil volumes were up 14 percent over last year to 85,500 barrels which reflects new production from 1989 discoveries and development activities. Plains' revenues increased 13 percent to $13.7 million and cash flow from operations grew by 26 percent to $7.9 million for the quarter.

Increased gas sales to new markets served by Plains' major purchaser combined with a 1990 contract price of 10 cents per million Btu (MMBtu) higher than the $1.74 price for 1989 contrbuted to the good beginning for 1990. Natural gas currently accounts for approximately 88 percent of Plains' revenue and, of that amount, about 90 percent of Plains' gas production is sold to its major purchaser under long-term contracts with provisions for price redetermination annually.

Plains produces, develops and explores for oil and gas in the midcontinent Permian Basin, Gulf Coast and Rocky Mountain regions of the United States. The company's reserve base is over 90 percent natural gas and the balance oil. Plains is Colorado-based with additional offices in Lakin, Kan., and Midland, Texas.

PITTSBURGH (APRIL 19) PR NEWSWIRE - PPG Industries (NYSE: PPG) today reported first quarter net earnings of $125.3 million, or $1.16 a share, on sales of $1.478 billion, compared with $129.8 million, or $1.15 a share on sales of $1.459 billion a year ago.

Also, PPG's directors raised the quarterly dividend to 42 cents a share from 38 cents, payable June 12 to shareholders of record May 10, for the 19th consecutive year of increases. PPG has paid dividends continuously since 1899.

Average shares outstanding for the quarter were 108.3 million, compared with 113.2 million a year ago.

"Greater operating efficiencies were achieved in all businesses," said Vincent A. Sarni, board chairman and chief executive officer. "Our performance also reflected stronger than expected glass and chemicals results, particularly in the latter part of the quarter, despite continued weak economic conditions that included a 19 percent reduction in North American vehicle production and softening chemical prices.

PPG's total glass sales increased slightly from the year-ago quarter. Significantly higher auto original glass volumes in Europe and higher global volumes for auto replacement glass were largely offset by lower North American flat glass volumes.

The company's coatings and resins business posted an overall sales gain, primarily with greater sales for European auto original coatings and global auto refinishes, in addition to trade paints which benefitted from market share gains as well as the acquisitions.

Although chemical sales declined, mainly because of weak prices and volumes for chlorine and derivative products such as vinyl chloride monomer and solvents, earnings continued to show strength.

EXETER, NH (APRIL 19) PR NEWSWIRE - Tyco Laboratories, Inc. (NYSE: TYC) announced today that its subsidiary, Grinnell Corporation, has acquired

the business of Chubb Firekil, a designer and installer of automatic sprinkler systems, from Racal Electronics, PLC.

Located near London, the Firekil unit, with sales of approximately $15 million, installs and services fire protection systems throughout Great Britain. Firekil will be Grinnell's first venture in the installation of its automatic sprinkler systems outside North America and part of a program positioning Grinnell to participate in the benefits resulting from the lowering of trade barriers throughout the European Common Market in 1992. As part of this plan, Grinnell also recently acquired N & O Technische B.V., a distributor of fire protection and flow control products located in Enschede, the Netherlands. N & O distributes fire protection and flow control equipment manufactured by Grinnell and its Mueller Water Works and Allied Tube units throughout Europe and the Middle East.

Tyco is a nationwide manufacturer of fire protection/flow control systems, electrical and electronic components and packaging materials.

NEW YORK (APRIL 19) PR NEWSWIRE - American Airlines announced today that it has awarded advertising responsibility for its operations in 15 Latin American countries to DDB Needham Worldwide. The countries include Argentina, Belize, Bolivia, Brazil, Chile, Colombia, Costa Rica, Honduras, Ecuador, El Salvador, Guatemala, Panama, Paraguay, Peru and Venezuela.

According to John Bernbach, president of DDB Needham Worldwide, "The acquisition of this important and substantial account brings our total American Airlines international assignment to 26 countries and is especially gratifying because it represents growth with one of our finest longstanding clients. It also reflects our commitment to our expansion in Latin America. In the past year we added Martell in Brazil, Mexico and Venezuela, McDonald's in Mexico and Mobil in Argentina, Peru and Colombia."

The assignment is effective immediately.

PHILADELPHIA (APRIL 19) PR NEWSWIRE - The Board of Directors of Consolidated Rail Corp. (NYSE: CRR) has elected Dr. John M. Samuels to the newly created position of vice president-Continuous Quality Improvement.

Samuels reports to James A. Hagen, Conrail's chairman, president and chief executive officer.

"Dr. Samuels," said Hagen, "will lead Conrail in a new long-term continuous quality improvement process in every function of its operations with the ultimate aim of meeting or exceeding expectations in all dealings with our customers on an ever-improving basis. The process, over time, will involve all levels of Conrail's organization and all of its people."

Hagen, in noting the success of participatory management in Conrail's new safety program (begun formally at the start of last year) and in its quality purchasing program (which has been in place with suppliers to Conrail over several years), stated that the new long-term quality process for the entire organization is aimed at producing "major changes in Conrail's corporate culture in an evolutionary fashion, so that we can provide the kind of customer service which will enhance our ability to be more competitive in the 1990s and into the next century."

Samuels, who earlier this year was named assistant vice president-Engineering/Design, had served as assistant vice president-Industrial Engineering since February 1980. He began his railroad career with Conrail in 1978 and has also served as assistant director-Shop Industrial Engineering and director-Industrial Engineering.

Prior to joining Conrail, Samuels served in a teaching and research capacity with Pennsylvania State University and held manufacturing and process engineering positions with General Motors Corp.

Samuels was graduated from the General Motors Institute with a bachelor's degree in industrial engineering and holds master of science and doctoral degrees in engineering from Penn State.

Samuels served as chairman of the National Council of Industrial Engineering for 1988-89.

Conrail operates a rail freight network in 14 Northeast and Midwest states the District of Columbia, and the Province of Quebec.

#90109p4810 04/19/1990 ~PR Newswire

MADISON, NJ (APRIL 19) PR NEWSWIRE - Schering-Plough Corporation (NYSE: SGP) today reported that 1990 first quarter net income increased 20 percent to $150.4 million, or $1.33 per share, versus $125.7 million, or $1.12 per share, in the prior year. First quarter 1990 sales of $865.1 million were 4 percent higher than last year's $831.8 million.

Sales growth for the first quarter was reduced by 1989 divestitures and fluctuating foreign currency exchange rates. Excluding the impact of these factors, the company's consolidated sales would have increased 8 percent for the 1990 first quarter versus the prior year. Divested in the 1989 third quarter were the company's European cosmetics business and a majority interest in its Brazilian affiliate.

Robert P. Luciano, chairman and chief executive officer, credited the first quarter's higher sales and earnings to the company's worldwide pharmaceutical businesses, whose sales rose 14 percent when the impact of the Brazil divestiture and currency exchange is excluded. Strong results by U.S. prescription products and the international pharmaceutical business were partially offset by lower sales of the Wesley-Jessen vision care business.

U.S. sales of prescription pharmaceuticals rose 19 percent in the 1990 first quarter, with solid performances by the respiratory, dermatological, and anti-infectives and anticancer product groups. Significant contributors included the "Proventil" and "Vancenase" lines of asthma products; "Lotrisone", an antifungal agent; and "Eulexin", a therapy for advanced prostate cancer.

Excluding the effects of the Brazil divestiture and currency exchange, first quarter international sales for Schering-Plough Pharmaceuticals would have risen 15 percent. Products recording higher sales included "Claritin", a new non-sedating antihistamine marketed in 25 countries; "Intron A", the company's alpha-2 interferon; and "Eulexin".

Schering-Plough HealthCare Products reported a 5 percent sales decline for the quarter, reflecting trade inventory adjustments for foot care and sun care products, and a weak cold season that affected sales of cough/cold products.

The company announced on April 3, 1990, that it had reached an agreement to sell its Maybelline cosmetics business to MBP Acquisition Corporation, a newly formed group affiliated with the Playtex Family Products Corporation and Thomas H. Lee Company of Boston, Mass. The sale is expected to be completed in the 1990 second quarter. Maybelline's first quarter sales were essentially flat versus the same period last year.

Schering-Plough is a research-based company engaged primarily in the

research, development, manufacturing and marketing of pharmaceutical and health care products worldwide.

#90109p4813 04/19/1990 ~PR Newswire

PITTSBURGH (APRIL 19) PR NEWSWIRE - Allegheny International, Inc. (AI) (NYSE: AG) today announced that final results show that a majority of creditors in all classes and the majority of its shareholders in all classes have voted in favor of its stock plan of reorganization for emergence from chapter 11 protection.

The final results also show that the company gained support from more than a two-thirds majority of its $2.19 cumulative preference stock class; preliminary results had indicated that the company had received less than a two-thirds majority from that class. The final results show that two of the company's three classes of equity now support the company plan of reorganization.

AI received the necessary two-thirds majority in all creditor classes, including Chemetron, except the senior secured bank class and the senior unsecured class. AI did not receive the required two-thirds majority in

those two classes as a result of negative votes cast by Japonica Partners and its affiliates. Japonica, a New York City-based investment group that seeks to acquire AI, in recent weeks has been purchasing AI senior secured and unsecured claims.

In light of Japonica's action, AI filed suit on April 2, 1990 in the U.S. Bankruptcy Court, Western District of Pennsylvania to disallow the votes of Japonica and its affiliates. AI said its plan would have received the necessary two-thirds majority in all creditor classes were it not for the votes of Japonica and its affiliates. AI noted that more than 90 percent of the non-Japonica creditor votes were cast for the company's plan. AI said it questions the motives of Japonica and its affiliates for voting against the plan. At least four other parties have filed responses in support of AI's suit to disallow the Japonica vote; they include the Official Committee of Unsecured Creditors of Allegheny International, Inc. and the trustee for AI's subordinated debt. The bankruptcy court may rule on AI's suit later today.

The final results show that more than two-thirds of common equity and $2.19 cumulative preference stock classes holders approve the plan. AI received 58 percent of the vote of its $11.25 convertible preferred stock class. AI reported that it received almost 70 percent of its shareholders' votes taken as a whole.

To be approved by a class, AI's plan needs, with respcet to creditor claims, two-thirds of the dollar amount voted and 50 percent of the number of votes cast in each class. With respect to shareholders, the plan needs a two-thirds majority of the shares voted in each class.

AI Chairman, Chief Executive Office, and President Oliver S. Travers said that "AI is encouraged by the final results and continues to press forward to have its plan of reorganization confirmed. The company's plan is a prudent and equitable one and it should enable Allegheny to achieve a successful reorganization." Confirmation hearings on the AI plan are scheduled to begin in U.S. bankruptcy court here today.

The AI plan is valued, for distribution purposes, at $687 million.

ATLANTA (APRIL 19) PR NEWSWIRE - The Board of Directors of The Coca-Cola Company (NYSE: KO) today appointed Joseph R. Gladden, Jr. general counsel and elected Michael W. Walters and David L. Kennedy vice presidents.

In addition, the Board declared a regular quarterly dividend of 20 cents

per common share, payable July 1 to shareholders of record June 15. The dividend reflects the two-for-one stock split, effective May 1, approved by shareholders April 18.

As general counsel, Mr. Gladden succeeds Robert A. Keller, senior vice president, who will assume the new position of corporate counsel.

Mr. Gladden joined the company in 1985 as senior staff counsel and was elected vice president that same year. In 1987 he was appointed deputy general counsel. Before joining The Coca-Cola Company, Mr. Gladden was a partner with the Atlanta law firm of King & Spalding. He received his undergraduate degree from Emory Univeristy and his law degree from the University of Virginia.

Mr. Walters assumed responsibility earlier this year for the Human Resources operations of The Coca-Cola Company. He joined the Company in 1972 as a senior financial analyst. He has held a number of positions in the Company's Human Resources Division, and served most recently as director of compensation and benefits. Before joining the Company, Mr. Walters was a partner with the management consulting firm of Langston Associates. He received his undergraduate degree from the University of Virginia and an M.B.A. from Georgia State University.

Mr. Kennedy has managed the Company's Corporate Business Development Department since 1988. He joined the Company in 1980 in the financial area and then moved to the Company's entertainment business were he held various executive finance and administration positions with Columbia Pictures. He received his undergraduate degree in accounting from the University of North Alabama and a Masters degree in Business Administration from UCLA.

BETHLEHEM, PA. (APRIL 19) PR NEWSWIRE - Bethlehem Steel Corporation (NYSE: BS) said today it will offer for sale two of its four Great Lakes ore vessels, the Lewis Wilson Foy and the Sparrows Point. Bethlehem will retain the Stewart J. Cort and the Burns Harbor to transport iron ore pellets from Minnesota to its Burns Harbor, Ind., steel plant on Lake Michigan.

The Foy, built in 1978, is 1,000 feet long and can carry more than 61,000 tons of iron ore pellets. It is a self-unloading vessel, powered by four diesel engines developing a total of 14,000 horsepower. The Sparrows Point built in 1952, is 698 feet long with an iron ore pellet capacity of almost 22,000 tons. It is powered by two steam turbines developing a

total of 7,000 horsepower and was converted to a self unloader in 1980.

In recent years, Bethlehem has operated a four-vessel fleet on the Great Lakes, transporting bulk commodities for its own needs and for other industrial customers. Bethlehem's decision to sell the two vessels is part of its overall strategy of disposing of assets not required to support its core steel business.

HOUSTON (APRIL 19) PR NEWSWIRE - Enex Resources Corporation (NASDAQ: ENEX) and Energy Development Partners, Ltd. (AMEX: EDP) jointly announced today that at the special meeting of Enex's shareholders held on April 17, 1990, the plan of repurchase described in Enex's proxy statement dated March 26, 1990 was approved by the holders of 99.4 percent of the shares that voted on the plan and that the parties had consummated the plan by transferring assets of Enex to a subsidiary of EDP in exchange for the surrender to Enex of EDP's 3,350,432 shares of Enex common stock. As a result of these transactions, Enex is once again an independent, publicly held corporation.

Gerald B. Eckley, president of Enex said, "Although Enex has become smaller, we believe that the transaction will facilitate the company's growth and permit it to expend and concentrate more effectively on its principal business of oil and gas income fund sponsorship without the uncertainty created by the existence of a controlling shareholder. The transaction should also enhance Enex's ability to benefit its per share financial results."

As a result of the transfer of the assets to EDP, EDP acquired direct interests in 69 oil wells and 62 gas wells located in eight states, and the general partner interest in seven limited partnerships. On April 10, 1990 the unitholders of EDP approved a proposal to merge into Hallwood Energy Partners, L.P. (AMEX: HEP); the merger is expected to close by the end of April.

#90109p4829 04/19/1990 ~PR Newswire

PHILADELPHIA (APRIL 19) PR NEWSWIRE - Bell Atlantic Corp. (NYSE: BEL) today reported first quarter earnings of $.90 per share, a 7.1 percent increase over the $.84 per share for the first quarter of 1989 (as

restated), when adjusted for a 2-for-1 stock split effective April 10.

Net income for the quarter was $355.3 million, a 7.4 percent increase over the $330.8 million for the first quarter of 1989.

Total operating revenues for the quarter were up 9.0 percent to $3.02 billion, from $2.77 billion a year ago. Revenues reflect strong volumes in the network services business; the acquisition of Control Data Corp.'s third-party maintenance business, completed on Jan. 3; and continued growth in the non-telephone businesses.

Total operating expenses for the first quarter were $2.36 billion, compared with $2.18 billion for the same quarter in 1989, an increase of 8.2 percent. Expense levels reflect expanded business activity and the Control Data acquisition noted above.

In addition, first quarter results include accounting for a proposed settlement with the Pennsylvania Office of Consumer Advocate and Attorney General's office relating to an inquiry into Bell of Pennsylvania's past sales and marketing activities.

Bell Atlantic Mobile Systems experienced 40 percent annualized growth, gaining 18,200 customers, for a total of 207,200 at the end of the first quarter. This growth would have been higher except for above normal disconnections, primarily associated with customers activated by one former sales agent. Financial results include provisions for costs associated with these additional disconnections.

Philadelphia-based Bell Atlantic is the parent company of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone (Delaware), and the Chesapeake and Potomac Telephone Companies serving Maryland, Virginia, West Virginia and Washington, D.C.

The corporation also is the parent company of businesses that provide mobile communications in the mid-Atlantic region as well as computer maintenance and financial services in national and international markets.

DETROIT (APRIL 19) PR NEWSWIRE - U.S. automakers will assemble an estimated 112,409 cars this week, up 7.5 percent from last week's actual count of 104,532, Ward's said.

Car output for same-week 1989 was 161,498 units.

Ward's reported that total estimated U.S. car output for calendar 1990 through the end of this week is 1,771,815 units, trailing year- ago's build of 2,379,018 by 25.5 percent.

All Ford, Chrysler and General Motors plants were closed until Tuesday, April 17, allowing for an extended Easter holiday. All other domestic makers resumed production Monday, April 16.

General Motors Corp.'s car plants in Willow Run, Mich., Tarrytown, N.Y., and Lansing, Mich. (Calais/Skylark) scheduled Saturday overtime this week.

Ford Motor Co.'s Dearborn, Mich. (Mustang), plant reopened April 17 after a two-week shutdown for stock reduction. Daily overtime was reported at car plants in Wixom, Mich., Kansas City, Mo., and Wayne, Mich. Wixom is also scheduled to work this weekend.

Chrysler's St. Louis car plant continues to operate at only one shift. Ward's said U.S. truck production will be an estimated 72,546 units compared to last week's count of 68,555. This compares with year-ago's count of 90,858.

U.S. truck production for calendar year 1990 through the end of this week is estimated at 1,148,546 vs. year-ago's 1,414,257, said Ward's.

Ford's Twin Cities, Minn.; Louisville, Ky.; Lorain, Ohio; Kansas City, Mo.; and St. Louis plants slated daily overtime. The Twin Cities plant also has scheduled Saturday work.

Chrysler's Dodge City plant in Warren, Mich., began operating two nine-hour daily shifts this week.

Of this week's estimated U.S. car output, GM accounts for 41.7 percent; Ford, 26.9 percent; Chrysler, 9.6 percent; Honda of America Mfg. Inc., 7.9 percent; Mazda Motor Mfg. (USA) Corp., 2.8 percent; Nissan of America Mfg. Corp., 1.3 percent; New United Motor Mfg. Inc., 2.9 percent; Toyota Motor Mfg. USA Inc., 3.9 percent; Diamond-Star Motors Corp., 2.6 percent, and Subaru-Isuzu Automotive Inc.,
0.4 percent.

POULSBO, WA (APRIL 19) PR NEWSWIRE - Pope Resources, a Delaware Limited Partnership, reported net income of $1,425,000, or $1.21 per ownership unit, on revenues of $6,117,000 for the first quarter ended March 31. This compares to net income of $4,866,000, or $4.14 per ownership unit for the same period in 1989 on revenues of $8,530,000.

George Folquet, president and chief executive officer, explained, "First-quarter 1989 results reflect a $5.6 million gain on the completion of a single large land and timber transaction that was not repeated this year. Lacking such a sizeable gain, we are nonetheless pleased with the first-quarter 1990 results that reflect continuing strong timber prices and a positive early response to our Port Ludlow development program."

Pope Resources is a master limited partnership and owns 72,000 acres of timberland and development property in the Puget Sound area of Washington state.

#90109p4841 04/19/1990 ~PR Newswire

ARLINGTON, VA (APRIL 19) PR NEWSWIRE - USAir has announced it is the first major U.S. airline to receive a Federal Aviation Administration aircraft certification for TCAS -- Traffic Alert and Collision Avoidance System, a high-technology device designed to insure proper separation between aircraft in flight.

At a national press conference in Washington this morning, the airline demonstrated the system with a new USAir Boeing 737-400, the first U.S. commercial airplane to be equipped and certified by FAA with the TCAS unit. USAir is purchasing the TCAS system developed by Allied- Signal Aerospace's Bendix/King Air Transport Avionics Division.

USAir will install TCAS units in the cockpits of about 100 of its jets this year, at a cost of about $125,000 per aircraft. The carrier's entire fleet of 440 jets will be equipped with TCAS by Dec. 30, 1993, putting it in full compliance with the congressionally mandated TCAS program.

"USAir is proud to be an industry leader in the TCAS program," said

Patricia A. Goldman, USAir senior vice president -- corporate communications. "This new technology will add to the aviation industry's already superior level of safety by complementing the national Air Traffic Control system and our own pilot visual standards for maintaining proper separation."

TCAS allows pilots to track nearby aircraft on a radar display in the cockpit. When another aircraft comes within a "protected zone" around the TCAS-equipped airplane, the intruder's symbol on the display changes color and shape and a computerized voice warns the crew of nearby traffic. If necessary, TCAS will announce the required maneuver such as "climb, climb, climb."

"From the pilot's perspective, the new TCAS technology provides an added margin of safety," said Captain Norman Bush, USAir's senior manager of flight technical training. From a consumer's perspective, TCAS "should assure that the latest technology is being used to insure a routine flight " he noted.

USAir plans to install the TCAS units in its jets at maintenance facilities in Pittsburgh, and Winston-Salem, N.C. The first scheduled USAir commercial flight using the unit will occur in mid-summer of this year.

LAS VEGAS, NV (APRIL 19) PR NEWSWIRE - Nevada Power (NYSE: NVP) President James C. Holcombe announced today major organizational changes effective May 1, 1990.

John C. McCarthy, formerly vice president-administrative services, has been named senior vice president of customer services and will oversee all functions of that department, as well as the builder services and energy services departments.

Gordon Smith has been named vice president of administrative services, replacing McCarthy. Smith will add to his responsibilities the operations of environmental affairs. Smith formerly served as vice president of transmission and distribution engineering.

Vice President of Resources Development Frank Loudon will assume the additional responsibilities of transmission and distribution engineering.

Vice President of Power Supply Dave Barneby will add to his duties

transmission, distribution construction and maintenance activities.

Cindy Gilliam, vice president of human resources, will add to her responsibilities those of the company's safety department.

Holcombe said the changes were part of the company's goal to increase individual responsibilities and consolidate certain operations.

#90109p4845 04/19/1990 ~PR Newswire

NORTHBROOK, IL (APRIL 19) PR NEWSWIRE - A $42 million program to double production capacity for Mallinckrodt Medical's nonionic x-ray contrast medium, Optiray(R), has been approved by International Minerals & Chemical Corporation's (IMC) (NYSE: IGL) board of directors.

The program, to be completed by December 1991, will expand facilities and add a new manufacturing facility in St. Louis for production of the Optiray raw material ioversol.

"This action will enable Mallinckrodt Medical to meet increasing demand for Optiray in the U.S. and abroad, as the agent is introduced in Europe and Japan," said C.R. Holman, president of IMC's Mallinckrodt Medical unit in St. Louis.

"Sales of Optiray continue to be substantially ahead of our initial projections," said Holman. "Physician acceptance, aggressive sales and marketing programs, accelerating market conversion to nonionic imaging agents, and early approvals in foreign countries have clearly demonstrated a need for additional capacity to manufacture Optiray."

Holman said Optiray has been approved in seven European countries with additional clearances in major markets expected during the next 12 to 18 months. "It's apparent Optiray will be a major product in the world contrast media market."

Introduced in the United States in June 1989, Optiray is the first nonionic contrast medium to be developed, patented and marketed by a U.S. pharmaceutical company. It provides excellent imaging quality for radiology and cardiology x-ray procedures and greater patient tolerance and safety compared with conventional products.

The current U.S. market for x-ray contrast media is more than $600 million and should exceed $1 billion by 1993. The worldwide market is about $1.5 billion and projected to substantially exceed $2 billion by 1994.

Mallinckrodt Medical also developed and markets Conray(R), the number one selling conventional, ionic agent. Hexabrix(A), introduced by Mallinckrodt in 1985, is the only low osmolality, ionic contrast medium.

"We expect our sales of contrast media to increase at a compound rate of more than 20 percent during the next five years, with Optiray a major force in that growth," Holman said.

Mallinckrodt Medical is a major supplier of products for radiology, cardiology, nuclear medicine, anesthesiology and critical care. Its products are sold in more than 100 countries and are used by more than 7,000 health care facilities in the United States.

#90109p4847 04/19/1990 ~PR Newswire

GREENWICH, CT (APRIL 19) PR NEWSWIRE - UST today announced that first quarter 1990 primary earnings per share increased 21 percent to 46 cents per share, compared with 38 cents per share for the corresponding period in 1989.

Net earnings for the first three months of 1990 were $52.6 million, a 20 percent increase over $44 million for the similar period in 1989.

Net sales for the three-month period ended March 31, 1990 increased by 11 percent to $175.3 million, compared with $157.6 million for the similar period in 1989.

The Tobacco and Wine segments posted sales gains while revenues for the other segment remained stable. Moist smokeless tobacco sales were responsible for the increase in the Tobacco segment.

Domestic unit volume for moist smokeless tobacco for the first quarter, which includes the effect of one less shipping day, increased 6.6 percent to 128.3 million cans, compared with the first quarter of 1989. On an equivalent shipping day basis unit volume would have increased by 9.7 percent. The first quarter volume comparisons were positively affected by relatively low sales volume during the first quarter of 1989.

Earnings for the first quarter of 1990 include a pretax gain of $3 million amounting to 2 cents per share, resulting from the early termination of a licensing agreement for the distribution of certain imported pipe tobaccos. These pipe tobaccos represented less than one percent of the company's annual consolidated net sales.

This year UST ranked number one in profits as a percent of sales and number four in profits as a percent of assets in Fortune magazine's 1990 listing of the 500 largest industrial corporations, based on 1989 performance. The company also climbed to number 433 in sales, moving up seven positions from 1989.

UST, through its subsidiaries, is a leading producer and marketer of moist smokeless tobacco products including Copenhagen, Skoal, Skoal Long Cut and Skoal Bandits. Other consumer products manufactured and marketed by its subsidiaries include premium wines sold nationally under the Chateau Ste. Michelle, Columbia Crest, Conn Creek and Villa Mt. Eden labels. UST subsidiaries also manufacture or market quality pipes and imported pipes tobacco, imported cigars, and other tobacco-related products.

#90109p4859 04/19/1990 ~PR Newswire

LATROBE, PA (APRIL 19) PR NEWSWIRE - Kennametal Inc. (NYSE: KMT) reported today that quarterly sales and earnings for its third quarter ended March 31, 1990, reached the highest levels in the company's history.

Kennametal reported sales of $161.5 million, up 30 percent from $124.6 million in the same quarter a year ago. Net income was $10.7 million, or $1.02 per share, up 12 percent from $9.6 million, or $0.92 per share a year ago. The new EPS record surpasses the old record by 10 cents per share.

The increase in sales during the March 1990 quarter resulted primarily from the acquisition of two industrial distribution companies within the past 10 months. Kennametal acquired Garrett Industrial Supply Co. in June 1989 and J&L America Inc. in January 1990. Excluding these acquisitions, sales rose 6 percent.

For the nine months ended March 31, 1990, sales were $433 million, up 24 percent from $348 million in the same period a year ago. Excluding the distribution businesses, sales rose 6 percent. For the nine-month period, Kennametal earned $23.2 million, or $2.22 per share, up 9 percent from $21.3 million, or $2.06 per share, in the prior year.

Quentin C. McKenna, chairman of the board and chief executive officer, reported that sales growth occurred in most of the company's worldwide markets, particularly in the European metalworking market, and in the company's Coal and Construction Division. McKenna stated that domestic metalworking sales increased 4 percent in a generally weaker U.S. industrial economy as compared with a year ago.

J&L America performed according to expectations during its first quarter under Kennametal. The acquisition had a negligible effect on consolidated earnings per share for the March 1990 quarter.

In looking to the end of the current fiscal year, McKenna stated that he expects Kennametal's traditional, U.S. metalworking sales to be relatively flat during the June 1990 quarter compared with a year ago. In addition, he expects the financial performance of GIS will continue to be adversely affected by costs associated with the implementation of its business strategy. Given this, he stated earnings for fiscal year 1990 should slightly exceed fiscal year 1989 earnings.

MIAMI (APRIL 19) PR NEWSWIRE - Eastern Airlines and its parent, Texas Air Corporation, announced today that there will be no appeal of yesterday's appointment of an operating trustee to manage Eastern Airlines.

The companies said that while they did not feel a trustee was warranted, they were gratified that Judge Burton Lifland had made it clear that Eastern will be reorganized and not broken up into pieces, and especially that he had granted Eastern's parallel motion to release $80 million dollars from Eastern's escrow account.

Those funds will provide financial certainty and permit Eastern to continue to operate through the second quarter of 1990.

Texas Air and Eastern's management will cooperate fully with Trustee Martin Shugrue, a spokesman said, assuring that there will be an unbroken continuity of operations.

Texas Air presently intends to continue to work with and support Eastern in all reasonable ways, including through its computerized reservations system and such marketing initiatives as the OnePass Frequent Flyer program. As a result, customers and travel agents will continue to derive all the benefits associated with these programs, with the added assurance that Eastern will continue operating and serving its customers.

MIAMI (APRIL 19) PR NEWSWIRE - Knight-Ridder, Inc. (NYSE: KRI), today announced first quarter net income from continuing operations of

$25,849,000, a gain of 25.0 percent over the first quarter of 1989. Earnings per share rose 28.2 percent to $.50 per share vs. $.39 a share a year ago.

Operating income was $57,618,000 vs. $58,503,000 in the first quarter of 1989. Excluding the Pasadena Star-News, which was sold in June 1989, operating income was up slightly. Total operating revenue rose 2.6 percent to $554,915,000 from $540,744,000 a year earlier.

Newspaper Division: Knight-Ridder's Newspaper Division earned $63,707,000 vs. $64,619,000 in the first quarter of 1989. Newspaper operating revenue for the quarter was up 1.1 percent to $475,565,000 from $470,332,000. Excluding Pasadena, operating revenue increased 2.1 percent and operating profit increased $39,000.

Business Information Services Division: The Business Information Services Division had an operating profit of $4,530,000, a 31.3 percent gain over the $3,449,000 earned in the first quarter of 1989. BIS revenue grew 12.9 percent to $77,792,000 from $68,926,000 a year ago.

Knight-Ridder is an international information and communications company engaged in newspaper publishing, business news and information services, electronic retrieval services, news, graphics and photo services, cable television and newsprint manufacturing. The company publishes 29 daily newspapers. Around the world, news, advertising and information from Knight-Ridder reach more than 100 million people in 129 countries.

ROCHESTER, NY (APRIL 19) PR NEWSWIRE - Bausch & Lomb (NYSE: BOL) announced today that revenues for the first quarter ended March 31, 1990 increased 14 percent to $314.6 million compared to $276.3 million a year ago. Net earnings for the quarter rose 17 percent to $22.4 million compared to $19.2 million, while earnings per share advanced 16 percent to 74 cents from the prior year's 64 cents.

Revenues for the company's healthcare segment in total amounted to $196.7 million, a gain of 10 percent over the year-ago figure of $179.3 million.

-- In the personal health sector, the company's lines of contact lens care products experienced good worldwide demand, achieving revenue growth of almost 15 percent, while sales of oral care products increased moderately over the very high level of the 1989 quarter. Oral care revenues in the year-earlier period benefited from rapid growth in distribution for the

Interplak(R) line of plaque removal instruments.

-- In the companies medical sector, worldwide sales of ophthalmic pharmaceuticals were substantially higher for the 1990 period. Higher sales were also attained by the company's contact lens business outside the U.S., while domestic lens revenues declined from a year ago.

-- Revenues in the biomedical sector rose more than 10 percent on the basis of increased sales of research animals, and higher demand for contract bioprocessing services.

Bausch & Lomb's optics segment achieved a 22 percent increase in sales for the first quarter, as revenues rose to $117.9 million from $97.0 million in 1989. Excellent worldwide demand was experienced in the company's sunglass business, where revenues rose 30 percent over the prior year.

The 13 percent improvement in consolidated operating earnings for the first quarter was due to increased sales and profitability for contact lens care products and over-the-counter medications as well as the strong growth in sunglass revenues.

#90109p4890 04/19/1990 ~PR Newswire

HOLLAND, MI (APRIL 19) PR NEWSIWRE - Donnelly Corporation (AMEX: DON) today announced financial results for the third quarter of the 1990 fiscal year.

Net sales for the third quarter were $55,084,000 which represents an increase of 1.6 percent over $54,220,000 for the same period last year. Net income for the third quarter was $1,055,000 compared to $1,761,000 for the third quarter of fiscal 1989. This represents earnings per share for the third quarter of this fiscal year of $.19. Sales for the first nine months of the 1990 fiscal year were $150,766,000, up 4.8 percent compared to $143,846,000 for the first nine months of fiscal 1989.

Both sales and earnings improved during the third quarter of the fiscal year compared to the second quarter of the year. This was due to (1) continued strong sales for automotive modular window systems, (2) improved performance in the company's complete exterior mirror operations (as a result of higher sales volumes), and (3) reduced administrative spending, resulting from layoffs, staff reductions and cost-containment programs.

The Modular Window Systems area of the company continued to experience strong growth throughout the third quarter due to a number of new window programs going into production. The use of modular windows in a variety of vehicles continues to spread, resulting in stronger market growth for this product than is the case for the automotive industry in general.

Donnelly is pleased to report that its Grand Haven, Mich., operation, which produces exterior automotive mirror assemblies, is completing a three-year start-up plan and is beginning to contribute to profitability.

Earnings were also enhanced by the stringent cost-containment programs which were put in place during the fall and winter months. Spending for a wide variety of administrative programs was severely restricted, limited layoffs were experienced in January and February, and total administrative staff was reduced by 59 positions.

Total automotive industry production for the third quarter of this fiscal year was comparable to that of the second quarter. However, automotive production increased in the last part of the third quarter over the extremely low production levels of December, January and early February. Auto manufacturers have been gradually increasing production schedules, and projections for the fourth quarter appear favorable.

The downturn in the market for consumer products using display coated glass (which was reported earlier) continued throughout the third quarter of this fiscal year and had a significant negative impact on earnings. Affected products tend to be lower-priced electronic products which use liquid crystal displays (such as watches, games and calculators). Donnelly is a major manufacturer of glass coatings for the conductively coated glass used in these displays. This market is primarily based in the Pacific Rim and represents a significant export business for the company.

Chairman of the Board J. Dwane Baumgardner stated: "We are pleased that there appears to be improvement in our largest and most important market ... the automotive industry. A number of industry experts believe that the worst may be over in this market and that we can look forward to a period of moderate growth ahead. We would certainly welcome that.

"Donnelly took stringent actions to control costs and focus programs more tightly during the past several months. Those efforts have now positioned the company to operate more effectively in an environment of lower economic growth and contributed to improved corporate performance during our third quarter.

"The company is still facing difficult challenges in the months to come. The downturn is our Display Coatings business persists and a major program is currently under way to improve operational efficiencies further in this area over the long term."

Donnelly Corporation is an international company dedicated to serving customers around the world with high quality fabricated, molded and coated glass products for the transportation and electronics markets. The company has been based in Holland since 1905 and today operates from 12 separate facilities in western Michigan.

In addition, Donnelly has a major manufacturing facility in Naas, Ireland, a marketing liaison office in Tokyo, Japan, an Advanced Technology Center in Tucson, Ariz., and a manufacturing facility in Mount Pleasant, Tenn. Donnelly is also recognized as a leader in the application of participative management practices.

#90109p4894 04/19/1990 ~PR Newswire

WESTBOROUGH, MA (APRIL 19) PR NEWSWIRE - GTE Government Systems today announced receipt of a $7.6 million supplemental agreement from the U.S. Air Force to modernize command, control and communication (C3) systems at intercontinental ballistic missile (ICBM) launch-control centers. This

agreement, combined with the initial award of $34 million received in April 1989, brings the total value of GTE's contract to $41.6 million.

The award, made by the Electronic Systems Division (ESD), U.S. Air Force Systems Command, Hanscom Air Force Base, Mass., to GTE's Strategic Systems division, calls for GTE to analyze performance and provide technical evaluations of REACT weapon systems operational and targeting software.

Under the contract, GTE is upgrading communication systems at ICBM launch control-center facilities to improve missile combat-crew effectiveness. The company is designing, producing and delivering hardware and software for the program, named Rapid Execution and Combat Targeting (REACT). This involves integrating higher-authority communications and providing rapid-message processing.

GTE also will acquire and fabricate equipment, modify existing equipment, package and install electronic equipment in racks and consoles, deliver equipment for integration by the Weapons System Control contractor, operate and maintain equipment during the development phase, conduct an in-plant development test and evaluation program, and support a combined field effort.

GTE's subsidiaries operate in 46 states and 41 countries, with combined revenues and sales of $17.4 billion and net income of $1.4 billion in 1989. GTE is a leader in its three core businesses -- telecommunications, lighting and precision materials -- providing products and services worldwide.

#90109p4901 04/19/1990 ~PR Newswire

TACOMA, WA (APRIL 19) PR NEWSWIRE - Weyerhaeuser Co. (NYSE: WY) today reported first-quarter net earnings of 61 cents per common share, compared to 70 cents in the comparable period last year.

Sales totaled $2.3 billion, down 2 percent, and net earnings were $130 million, down 12 percent.

Chairman and Chief Executive Officer George H. Weyerhaeuser, announcing the results at the company's 90th annual meeting today, said lower prices and margins in most pulp and paper products were only partially offset by improved results in forest products and other areas.

In paper, he said, heavy discounting in uncoated free sheet grades encountered in recent months has reversed, and margins are improving. In newsprint, the weakened yen and higher raw material prices were negative factors. Market pulp sales volumes were affected by customer inventory drawdowns and margins were affected by higher costs. In containerboard packaging, volumes were strong but higher costs and containerboard price erosion had negative impact on the quarter's results. Within the pulp and paper sector, bleached paperboard and secondary (recyclable) fiber were the only businesses to show year-to-year profit increases.

In timberlands and forest products, year-to-year improvement in the prices of logs, lumber and plywood, and significantly improved operating performance in engineered fiber panels and building materials distribution were major favorable factors.

Weyerhaeuser Co. had North American exports of $2 billion in 1989, more than 70 percent in manufactured-product form. Exports to Japan were $1.1 billion, slightly more than half of the total.

Financial statistics follow:

WEYERHAEUSER CO. AND SUBSIDIARIES
INTERIM REPORT
STATEMENT OF CONSOLIDATED EARNINGS

	First Quarter		
	13 weeks ended Apr. 1, 1990	13 weeks ended Mar. 26, 1989	Percent Increase or Decrease

Net earnings per common share(A)	$ 0.61	$ 0.70	(13)
Net sales	2,282,503,000	2,321,292,000	(2)
Earnings before income taxes	200,158,000	233,187,000	(14)
Income taxes	70,100,000	85,100,000	(18)
Net earnings	130,058,000	148,087,000	(12)
Average common and common equivalent shares outstanding	204,756,000	207,827,000	

(A) Net earnings per common share are computed by dividing net earnings less preferred and preferences share dividends in 1990 and 1989, respectively, of $5,274,000 and $3,010,000 by the average number of common and common equivalent shares outstanding during the respective periods. The company's convertible preference share issues are common share equivalents. The conversion of these shares was not dilutive in 1990 and thus was not assumed.

#90109p4918 04/19/1990 ~PR Newswire

NEW YORK (APRIL 19) PR NEWSWIRE - Bankers Trust New York Corporation (NYSE: BT) earned $198 million for the quarter ended March 31, 1990, an increase of 21 percent over the $164 million earned in last year's first quarter. Earnings per share increased 17 percent, from $2.02 to $2.36. The corporation's return on average common equity in the first quarter was 35 percent, and the return on average total assets was 1.30 percent.

Total trading revenue amounted to $272 million for the quarter, an increase of $117 million from last year, and was primarily responsible for the favorable results. This amount included revenue from market- related

financial intermediary transactions for clients and, to a lesser extent, principal trading.

At the same time, however, the lull in restructuring and loan syndication activities resulted in lower fees from these businesses. Management continues to believe that the current conditions represent only a cyclical downturn in these businesses. While corporate finance fees declined from the prior year, they remained at the fourth quarter 1989 level of approximately $70 million.

Fully taxable net interest revenue of $227 million decreased $11 million from the prior year. The current period included an $8 million reduction to reflect the impact of the Mexican restructuring agreement. The comparison to the prior year was also adversely affected because interest recognized on the nonaccrual Brazilian portfolio was minimal this year, compared to $11 million last year. Partially offsetting these factors was the recognition of $14 million of interest related to an income tax settlement in the first quarter of 1990.

Total noninterest expenses of $511 million increased 17 percent over the first quarter of 1989. Within that total, employee-related expenses (compensation and benefits) increased by $45 million, or 15 percent. This increase was due in part to higher incentive compensation resulting from higher earnings, as well as a one-time charge of $15 million related to the conversion of a defined benefit pension plan to a defined contribution plan.

#90109p4922 04/19/1990 ~PR Newswire

DEARBORN, MI (APRIL 19) PR NEWSWIRE - Dr. John P. McTague, Ford vice president - Technical Affairs, has been appointed by Secretary of Energy James D. Watkins to the newly created Secretary of Energy Advisory Board (SEAB).

According to the Department of Energy, SEAB will report directly to the Secretary of Energy and serve as a principal mechanism for long- range planning and analysis in the department.

SEAB is comprised of 28 distinguished representatives, including three Nobel laureates, from the private sector, nonprofit groups, academia, and state and local government. Dr. Thomas E. Everhart, president of the California Institute of Technology, will chair the board.

"The establishment of the Secretary of Energy Advisory Board is

particularly auspicious at this time," said Dr. McTague. "Issues such as the National Energy Strategy, conservation, the environment, nuclear power nuclear weapons facilities, and the roles of the national laboratories will benefit from broad public sector input.

"It is encouraging that Secretary Watkins has taken the initiative to seek this input."

Dr. McTague is the only representative of the automotive sector to be named to the SEAB.

The board will have its first meeting May 2 in Washington, D.C. A physical chemist, Dr. McTague was appointed to his present position at Ford in March 1990. He previously had served, since June 1986, as Ford's vice president -- Research, and prior to that had been Acting Science Advisor to the President of the United States. In February 1990, Dr. McTague was appointed by President Bush to his Council of Advisors on Science and Technology.

Dr. McTague earned a doctorate from Brown University in 1965. He was a member of the North American Rockwell Science Center in Los Angeles from 1964 to 1970. He then joined the faculty of the University of California at Los Angeles, where he also was a member of the Institute of Geophysics and Planetary Physics.

During 1982-83 he was chairman of the National Synchrotron Light Source Department at the Brookhaven National Laboratory in New York and an adjunct professor of chemistry at Columbia University.

#90109p4924 04/19/1990 ~PR Newswire

PHILADELPHIA (APRIL 19) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) today received approval from the Pennsylvania Public Utility Commission (PUC) to increase electric rates by $242 million, or 7.7 percent, to be phased in over 2-1/2 years.

The approval resulted from a request made by the company on July 21, 1989 for a $549 million rate increase necessary to recover the costs of owning and operating Limerick Unit 2, which went into commercial operation on Jan. 8, 1990.

The first step will be effective April 20, 1990, with the bill for the typical residential customer using 500 kilowatt-hours (kwh) a month increasing from its current level of $67.81 to $69.62.

The second step will be effective April 20, 1991, increasing the typical bill to $73.18. On June 27, 1992, the bill will decrease to $70.68 when the Limerick Unit 1 increase is phased out. Then, on Oct. 20, 1992, the bill will decrease further to $69.28, reflecting the completion of the phase-in plan for Limerick Unit 2.

Joseph F. Paquette Jr., PE chairman and chief executive officer, said, "The net change on the average residential customer's bill over the 2-1/2 year period will be $1.47, or less than one percent annually, not a high cost for energy security and the multi-billion dollar Limerick investment made on the customers' behalf by PE investors.

"The PUC ruling is less than 50 percent of the company's request. Disallowing $300 million of the company's investment in Limerick Unit 2 will force significant reductions in the company's earnings, spending plans and common stock dividend," Paquette added.

"Naturally," he said, "we are extremely disappointed with a regulatory process that in 1985 determined completion of Limerick Unit 2, under a strict cost cap, was in the public interest, and then disallows a substantial portion of the cost of owning and operating the unit. This is a negative message to send to investors in Pennsylvania utilities and is a serious blow to the Commonwealth's overall economic development interests."

Income taxes	2,160,000	1,973,000	9
Net earnings	3,345,000	2,969,000	13
Earnings per common share	.34	.31	10
Dividends per share	.12	.10	20
Average shares outstanding	9,801,275	9,587,451	2

R.S. Boreham Jr., chairman and CEO stated: "We are pleased to report record first quarter results. For the quarter earnings rose 13 percent to

$3,345,000 on sales of $69,712,000, up 4 percent over year ago levels."

Boreham added: "This quarter was particularly challenging, as we absorbed substantial start-up costs at our new Clarksville, Ark. motor plant. These start-up costs are now largely behind us. This plant, which utilizes our Flexible Flow manufacturing process and produces the Baldor/Boehm subfractional motor line, is expected to become one of our most efficient and productive."

BETHESDA, MD (APRIL 19) PR NEWSWIRE - The Civil Aviation Authority's $22 million computer re-host project at the London Air Traffic Control Centre has been brought into operational use ahead of schedule and was successfully used to handle Easter traffic.

The Authority planned to bring the new computer system into use at the end of April but progress on the re-host had gone so well that it was decided to bring it into service ahead of schedule on April 7. The project is also on cost.

The dual IBM 4381 installation is in a special air traffic control configuration. It replaces the 20-year-old IBM 9020D system which comprised three IBM 360 computers.

The new system gives greater hardware reliability, a significant increase in processing power and greater flexibility. It also introduces advanced information technology support to air traffic control operations.

Of immediate benefit is the extension of the service to 24 hours with only one short shut-down period for maintenance each week. The 9020D system was shut down for maintenance every night.

The new system uses existing software which has taken more than 2,000 man-years to develop and test. Re-hosting it on new but commercially proven hardware was undertaken to give results in the shortest time and to ease the transition from the old to the new system.

The CAA took delivery of the new computer system from IBM (NYSE: IBM) last December. Since then it has been in a run-up phase to give operators and maintenance staff training and experience in its use.

Following a period of rigorous review, the computer re-host was introduced into operational service at 00.43 hours on Saturday, April 7.

The computer helps air traffic controllers by storing flight plan data provided by airlines, by improving the display of radar information, and by printing out up-dated information for each aircraft on the "flight strips" used by the controllers.

The new computer system will be officially inaugurated by HRH The Princess Royal at the London Air Traffic Control Centre on Monday, June 18.

WEST CALDWELL, NJ (APRIL 19) PR NEWSWIRE - The board of directors of Merrimac Industries, Inc. (AMEX: MRM), announced today the election of four new members to the board.

Eugene W. Niemiec, president and chief operating officer of Merrimac Industries, was elected to Merrimac's board of directors. Niemiec joined Merrimac in 1973 after an 18-year career at ITT. From 1981 to 1990 he served as executive vice president and technical director of the company. Effective January 1990, Niemiec assumed the position of president and chief operating officer.

Also elected was Harold Seidel, an original founder of Merrimac. After a 35-year career at Bell Laboratories, Seidel rejoined Merrimac last month as a product development consultant to assist in the development of more advanced IF and RF components and systems.

Elected to the board as well were Neil S. Bernstein and Michael J. Kroll, president, and vice president and treasurer, respectively, of MATEC Corporation (AMEX: MXC). Bernstein has been with MATEC for 14 years and in 1982 was appointed to president. In 1977, Kroll joined the company and was named vice president and treasurer in 1982. MATEC Corporation, which holds a 16 percent stake in Merrimac, is located in Hopkinton, Mass., and is a diversified manufacturer of technical based components and instruments for industrial research and military operations.

Merrimac Industries, Inc., designs, manufactures and markets components and subsystems used in signal processing systems for defense electronics and commercial telecommunications.

ATLANTA (APRIL 19) PR NEWSWIRE - The U.S. Environmental Protection Agency announced today that an administrative order has been issued to Caldwell County and Caldwell Systems Inc. (CSI), owner and operator respectively of CSI.

The order, issued on April 17 in accordance with Section 3008(h) of the Resource Conservation and Recovery Act (RCRA), as amended, addresses the release of hazardous wastes and hazardous constituents that have contaminated the soil and groundwater on and offsite. The order directs the owner and operator to fully characterize and determine the nature and extent of the release and contamination at the facility.

Although the full nature of the extent of contamination has not yet been determined, EPA has determined that contamination at the facility may present a substantial hazard to human health and/or the environment. Therefore, under the terms of the order, the owner and operator must conduct the following tasks:

-- perform interim corrective measures to relieve threats to human health or the environment

-- perform a RCRA facility investigation to determine fully the nature and

extent of the release of hazardous waste and constituents

-- perform a corrective measures study to identify and evaluate alternatives for the corrective action necessary to mitigate any migration of hazardous waste at or from the facility

-- perform a corrective measures implementation to implement the corrective measure(s) selected by EPA.

All work initiated in accordance with the order must be consistent with RCRA and its regulations; therefore, EPA approval must be obtained prior to implementation. Public review and participation will be an integral part of this entire process to ensure that the public is fully aware of what is proposed and conducted at the facility.

CSI, located approximately five miles southeast of Lenoir, N.C., operated a hazardous waste treatment, storage and disposal facility. It stopped operating in accordance with an order issued by the Caldwell County Superior Court on Sept. 28, 1989. CSI was ordered to remove all wastes from the site by Dec. 1, 1989.

AUSTIN, TX (APRIL 19) PR NEWSWIRE - The Continuum Co. Inc. (AMEX: CNU) and Computations Holdings Ltd. announced that they have entered discussions about a possible business combination. The discussions are exploratory, and no agreement has been reached concerning price or terms. The combination, if consummated, is not expected to involve any purchase or exchange of presently outstanding Continuum stock.

The Continuum Co. is an international consulting and computer services firm based in Austin, providing computer software and services to the financial services industry, primarily life insurance companies. Computations is an international consulting and computer services firm based in Sydney, Australia, also providing computer software and services to the financial services industry, primarily life and property and casualty insurance companies. Although strict financial comparisons are made difficult because of different accounting practices in Australia and the United States, Computations is approximately half the size of Continuum as measured by number of employees and revenues.

#90109p4942 04/19/1990 ~PR Newswire

TACOMA, WA (APRIL 19) PR NEWSWIRE - Weyerhaeuser Co. (NYSE: WY) shareholders today elected one new member of the board of directors and re-elected three others to terms expiring in 1993.

They also defeated a shareholder's resolution asking that the board of directors rescind the company's Shareholder Rights Plan, adopted in 1986.

Arizona rancher John I. Kieckhefer was newly elected to the board of directors, replacing his father, Robert H. Kieckhefer, who retired from the board today after 33 years of service.

Re-elected were Don C. Frisbee, chairman of PacifiCorp; George H. Weyerhaeuser, chairman and chief executive officer the Weyerhaeuser Co., and T.A. Wilson, chairman emeritus of The Boeing Co.

Mr. Weyerhaeuser told the shareholders at the company's 90th annual meeting that Weyerhaeuser Co.'s decision 54 years ago to grow timber as a crop has proved fortunate during the present concern over Northwest timber supply. That early decision, he said, "has led us to a high degree of timber self-sufficiency, with our future expansion potential not dependent on a shrinking public timber supply."

Noting that "some politicians and organizations" have attempted to link log exports to the spotted owl/timber supply issue, hoping that restricting the flow of logs now moving offshore could offset the potential shortfall in federal timber.

He also indicated that Weyerhaeuser's waste-paper recycling business will be expanded from the current 1.2 million annual tons to 1.65 million in 1991. Construction also has begun on a 175,000 tons-per-year newsprint reprocessing facility in connection with the expansion of the company's newsprint mill at Longview, Wash., "which will have the capacity to blend into our prime product the total volume of post-consumer newsprint wastes in the state of Washington and in neighboring states as well.

The individual business improvement plan goals, when aggregated, would result in operating earnings more than $700 million greater than in "steady-state 1988," the base year for the refocusing process.

Although the business improvement planning element is the major key to the refocusing effort, he said, further asset sales will occur later this year.

PHILADELPHIA (APRIL 19) PR NEWSWIRE - VU/TEXT, the world's largest provider of electronic newspaper library services, today announced the completion of a new release of its SAVE retrieval software (release 3.0).

SAVE is a complete library service, providing full text retrieval software and state-of-the-art hardware. With the release of the 3.0 version of the system, VU/TEXT's electronic library offers improved editing capabilities and a number of new retrieval features.

Improvements in the editing system include select, locate and modify features that allow librarians to quickly pinpoint and highlight articles that they wish to amend. Editing commands have been condensed to a single keystroke enabling librarians to make corrections with minimal effort. In addition, there is now a view option which allows the librarian to check the final format of the edited material.

The new retrieval features include database dictionary listings for checking the spelling and number of occurrences of a word or word stem in the database, scrolling options, search history commands, improved printing procedures and a new options menu which gives the searcher the ability to choose the format and order of the search results overriding existing system settings.

VU/TEXT in-house electronic library systems replace traditional newspaper morgues in which clippings risk being damaged or lost. The SAVE system allows newspapers to preserve archives in an efficient manner, eliminating the marking, clipping, filing and manual searches which preceded this technology.

The new 3.0 software will be installed at all new SAVE sites. Plans are in place to update existing systems as well. For additional information about VU/TEXT's electronic library systems, contact Joe DiMarino, vice president 800-323-2940, or 215-574-4404.

ORLANDO, FL (APRIL 19) PR NEWSWIRE - Major Realty Corporation (NASDAQ: MAJR) announced today that it has reached an agreement in principle with Prudential Insurance Company of America to purchase their interest in the Major Realty/Prudential joint venture.

The interest of Alan Squitieri, Incorporated, in the planned Galleria mall covering 90 acres of the Major/Pru property, will be purchased as well, as part of the overall transaction. The collective purchase price for these interests totals $31 million. The joint venture will also return the $60

million recently advanced by Prudential. Financing of the transaction has been tentatively arranged. The completion of these transactions is subject to certain conditions, including receipt of necessary corporate approvals and negotiations of definitive documents.

The joint venture's real estate holdings include a 274-acre site situated next to MCA's Florida Universal Studios Theme Park in Orlando, which is scheduled to open in May of 1990, and a 10-acre waterfront parcel in downtown Tampa, Fla., across from Harbor Island, an upscale mixed use development.

The transaction is expected to close at the end of April. Bloomfield Hills Mich.-based Stoneridge Resources, Inc. (NYSE: SRE) owns 33 percent of Major Realty.

CHICAGO (APRIL 19) PR NEWSWIRE - GATX Corporation (NYSE: GMT) today announced that it earned $19.9 million for the quarter ended Mar. 31, 1990 compared to net income of $17.4 million for the first quarter of 1989.

For this same period, GATX reported earnings per share for the first quarter of 1990 of $1.71 compared to earnings per share of $1.84 for the first quarter of 1989. The decrease in earnings per share is primarily the result of the dividend related to GATX's $3.875 convertible preferred stock issued during the third quarter of 1989 which is deducted from income for the earnings per common share calculation.

GATX provides asset-based services to industry by providing railcar leasing, maintenance and management; capital goods leasing, real estate financing and financial services; bulk liquid storage terminals and pipelines; Great Lakes shipping; and warehousing and distribution services.

CHICAGO (APRIL 19) PR NEWSWIRE - Santa Fe Pacific Corporation (SFP) (NYSE: SFX) has reached agreement for an out-of-court settlement with all plaintiffs in a lawsuit involving a proposed coal slurry pipeline, the company announced today.

In that case, judgment was entered against SFP in favor of Energy Transportation Systems, Inc. (ETSI) on May 5, 1989, in the amount of $750.1 million. That verdict was appealed by SFP, and the current settlement represents final resolution of the case. The agreement calls for a payment to ETSI of $150 million as early as June 1, 1990, with additional payments of $25 million in 1991 and 1992 and $30 million in each of the five succeeding years. "We will make the 1990 payment from cash and temporary investments, and will provide a letter of credit which guarantees future payments," said Robert D. Krebs, SFP chairman, president and chief executive officer.

Krebs said that SFP is recording a net after-tax charge of approximately $115 million in the first quarter of 1990 as a result of this settlement and resolution of other major litigation. "This removes the major litigation uncertainties which faced us, and will allow us to move forward with our restructuring," Krebs stated. "We continue to believe that we are innocent of the charges in the ETSI case. In view of the previous court action and the uncertainty and cost of the appeal and retrial process, however, we concluded that settling the case was the prudent course to follow," he concluded.

CALABASAS, CA (APRIL 19) PR NEWSWIRE - Lockheed Corp. (NYSE: LK) today reported first-quarter 1990 net earnings of $69 million, or $1.09 per share, on sales of $2.3 billion. For the same 1989 period, net earnings were $62 million, or $1.04 per share, on sales of $2.1 billion. Earnings per share from continuing operations in 1990 was $1.09, compared with $1.10 in 1989.

Daniel M. Tellep, Lockheed chairman and chief executive officer, said

first-quarter financial results were in line with company expectations. He indicated that the 8-percent increase in sales was based broadly throughout the corporation. Overall first-quarter program profits remained even with those in the same 1989 period, with the aeronautical and technology services segments showing improvement. Tellep added that earnings for the period were favorably impacted by a lower income tax provision, due to a lower effective tax rate than last year, and certain other income and gains that offset proxy contest costs and higher interest expense.

Of total sales in the first quarter of 1990, 89 percent were to the U.S. government -- 76 percent in defense programs and 13 percent in nondefense. Sales to foreign governments accounted for three percent of revenues and sales to commercial customers, eight percent.

#90109p4980 04/19/1990 ~PR Newswire

DALLAS (APRIL 19) PR NEWSWIRE - American Airlines flight attendants and cabin service personnel have begun recycling paper and aluminum, which were collected from flights, in cities across the United States.

According to Michael W. Gunn, senior vice president-marketing, the program patterned after local programs in San Diego and Austin, Texas, was initiated in San Francisco and San Jose, Calif., in late 1989 and was expanded to include Los Angeles and Orange County, Calif., earlier this year.

It will kick off in Burbank, Calif., Phoenix, Nashville, Tenn., and Washington, D.C., on Earth Day, April 22, and will expand to include Newark, N.J., New York, Miami, Dallas/Fort Worth and Chicago in the next few months. The program is expected to be systemwide by the end of 1990.

We are thrilled that our employees are involved in such a program and are fully supportive of their efforts," Gunn said. "We believe that we are the first airline to have a voluntary recycling program implemented by employees."

Flight attendants and cabin service personnel collect aluminum cans and paper, including newspapers and magazines, after each flight and deposit them in designated containers at each terminal. To date, more than 12,750 pounds of aluminum and 172,500 pounds of paper have been collected.

Proceeds generated from recycling are donated to non-profit organizations in each city. The organizations are selected by the locally based flight attendants and cabin service personnel. Thus far, donations have been

made to The Boy Scouts of America, Make-A-Wish Foundation and victims of the San Francisco earthquake.

According to Kathy Blair, base manager of flight services in the San Francisco Bay area, the program was started by American Airlines flight attendants Heather Bell and Patricia Howitt, who are based in San Francisco.

"American Airlines passengers consume millions of beverages in cans in a year," said Blair. "We realize the impact of having 17,000 flight attendants and 5,000 cabin service personnel involved in a recycling program.

"Because of the volume of cans and paper products, the flight attendants saw the opportunity to initiate a program that would have an impact on the environment."

PITTSBURGH (APRIL 19) PR NEWSWIRE - The board of directors of Pitt-Des Moines Inc. (AMEX: PDM) announced today the company's decision to establish an employee stock ownership plan (ESOP) as an additional employee benefit.

The company also indicated its intention that, initially, PDM will acquire at fair market value and contribute to the ESOP approximately 57,000 shares of PDM common stock from certain Jackson family charitable trusts.

The board of directors also announced that PDM has entered into agreements with certain senior members of the Jackson family providing for the future purchase from their estates of approximately 255,000 PDM shares of common stock (representing a portion of their current share ownership). At the company's option, the 255,000 shares could be purchased by the ESOP. In either case, the purchase price will be equal to the closing sale price of PDM shares on the American Stock Exchange on the date of death of the Jackson from whose estate shares are being purchased. The purchases are conditioned upon PDM's obtaining any required consent from any of its lenders at the time and meeting certain solvency tests under the Pennsylvania corporate law.

W.W. McKee, president and chief executive officer, stated: "The directors felt that the company should take steps to address what will happen to shares owned by the senior Jacksons upon their death. There have been concerns about the uncertainty of the situation. The purchase arrangement

should help ensure the continued support of the Jackson family for PDM, while at the same time providing for an orderly reduction in the total stock ownership of the family as its day to day involvement in the company's operations decreases."

William R. Jackson, chairman emeritus, said: "The Jackson family is very pleased with the idea of employees owning more shares of PDM. Employee ownership has been a tradition at PDM dating back to before the company went public in 1966. Through the Jackson family's continuing stock ownership and participation on PDM's board of directors, we hope to continue our family tradition of supporting and helping guide the business of PDM."

#90109p4990 04/19/1990 ~PR Newswire

BOSTON (APRIL 19) PR NEWSWIRE - Innovation International, Inc. announced today that a subsidiary has received the first U.S. dollar prepayment from the USSR's Scientific and Industrial Organization, Energia, for periodic shipments under Innovation's $6.5 million contract to supply microcomputer systems to the Soviet Space Station.

The company said that this development supports its earlier estimate of 1990 earnings between 10 cents and 15 cents per share.

All components are supplied by wholly owned Innovation Computer Corp.,

Cleveland, Wisconsin, which has shipped the first hardware release for use on a July shuttle flight. The balance of the $6.5 million contract will be shipped from the U.S.A. periodically throughout 1990.

Frank G. Wright, the company's CEO, said, "Energia is one of several Soviet contracts in which the same hard currency prepayments are included. Dollar payment before shipment eliminates any speculation concerning currency values and profitability in our newly organized Soviet American Joint Ventures. There is good reason for us now to predict an increase in corporate earnings per share for 1990. The Energia business will contribute about 5 cents per share. Other Soviet transactions will at least double that amount. Our domestic operations, which resulted in a 1989 loss of 1 cent per share should contribute 4 cents per share to our 1990 earnings."

Wright explained, "The Energia contract and several others presently totaling in excess of $10 million are written by and with our Soviet American joint venture, 'I Cubed C'. We own 50 percent of that company and therefore 50 percent of its profitability. The hardware portion of each sale is supplied by our wholly owned U.S. computer manufacturing subsidiary; therefore 100 percent of the profit at that rung in the ladder."

On Oct. 27, 1989, Innovation and the Soviet Institute for Automated Systems jointly announced the formation of the "I Cubed C" Joint Venture at a formal cermony in Moscow. The Soviet partner in this first Joint Venture with an American computer firm is an arm of the Soviet State Committee for Computer Systems and Informatics and the USSR Academy of Sciences.

A contract for the "I Cubed C" subsidiary to sell $6.5 million of Innovation's computers to the Soviet MIR Space Station was announced Nov. 15, 1989.

At the beginning of 1990, Innovation announced an "historic, first ever" license by the U.S. Department of Commerce, in connection with a $1 billion project, for the company to export personal computer components for final assembly in the USSR by an Innovation/ Soviet joint ownership company. Prior to this approval, only completed units requiring no Soviet assembly were licensable for export.

Innovation International, Inc. is a public company dedicated to Computer and communications acquisitions and joint ventures in world markets. Wholly owned Innovation Computer Corp., designs and manufactures complete microcomputer systems and peripheral equipment in Cleveland, Wis. Jointly owned "I Cubed C" based in Moscow sells computer solutions consisting of American hardware and Soviet software.

#90109p4991 04/19/1990 ~PR Newswire

DALLAS (APRIL 19) PR NEWSWIRE - At its annual stockholders meeting held here today, Texas Instruments Incorporated (NYSE: TXN) reported its first-quarter 1990 results.

Net income for the first quarter was $13 million. Earnings per common share were $0.05, compared with $0.90 in last year's first quarter.

Despite the current market softness, TI has maintained a high level of investment for future growth. Major investment costs associated with developing new products and bringing on production capacity for next-generation logic and memory were a factor in lower operating results for 1989. These programs include 4- megabit DRAM production, continued development of the 16-megabit DRAM, and new families of submicron ASICs, microcontrollers and advanced linear circuits. These programs are continuing in 1990.

TI estimates that the total effect of these approaches could be to reduce its cash requirements by more than $1 billion over the next few years. This provides a significant offset to the cost-of-capital advantage of some of TI's international competitors.

TI's strategy is to size the business to the market during this period of transition, and then -- when the market stabilizes -- drive for increased market share, based on technology leadership, system understanding and effective marketing.

TI technologies are well suited to the long-term needs of defense customers. For example, TI is building on its technology base in gallium arsenide and focal-plane arrays to increase market share in anti-armor weapons and airborne fire-control radars -- both of which are new markets for TI.

Defense electronics is expected to be a stable contributor to TI for this year, based on the quality of its avionics and weapon systems backlog. In view of the declining market outlook, TI will continue to make cost adjustments to keep operations aligned with market demand.

#90109p4998 04/19/1990 ~PR Newswire

SAN FRANCISCO (APRIL 19) PR NEWSWIRE - Pan Pacific Petroleum Inc. (Vancouver: PPP.) today announced that its subsidiary, Enim Oil Co., has made a second onshore oil discovery at Tupai in the Lematang Block, South Sumatra, Indonesia.

The company said that an exploration well drilled to a total depth of 7,325 feet produced 32 API gravity oil at a rate of 592 barrels a day. The test well at Tupai adjoins the Harimu well, which tested 29.3 API gravity oil at the rate of 2,200 barrels a day in January, 1990.

Pan Pacific, through its subsidiary Enim Oil Co. Ltd., has a 30-year contract with PERTIMINA, the Indonesian government enterprise, covering 280,000 acres in south Sumatra that has never been drilled for oil. Through Enim, Pan Pacific holds a 50 percent interest in the venture, which is being explored in partnership with Bonham (Lematang) Ltd.

Lawrence Barker Jr., president and chief executive of Pan Pacific, said that on the basis of seismic studies it appears that at least 40 drilling locations will be required for full development of Harimu and Tupai blocks. Mr. Barker said that the company expects initial oil sales from the first discoveries to begin in October, 1990.

Pan Pacific common stock is traded on the Vancouver (British Columbia) stock exchange under the symbol PPP.

#90109p4999 04/19/1990 ~PR Newswire

ROSEMEAD, CA (APRIL 19) PR NEWSWIRE - SCEcorp, (NYSE: SCE) parent company of Southern California Edion Company, today reported first quarter 1990 earnings of 79 cents per share, 25 cents per share more than for the first quarter of 1989. For the 12 months ended March 31, earnings were $3.81 per share, an increase of 32 cents per share over the same period last year. It is important to understand, however, that these reported earnings increases are principally the result of a January 1990 California Public Utilities Commission (CPUC) decision which has altered Edison's quarterly earnings pattern.

This recent CPUC decision shifts some of the company's earnings to the first, second and fourth quarters from the third quarter, with no impact on annual earnings. On a basis comparable with prior periods, the earnings increase is 1 cent per share for the first quarter of this year and 8 cents per share for the 12 months ended March 1990.

Nonutility earnings for the first quarter of this year were 2 cents per share, compared with 5 cents for the same period last year. The earnings decline is the result of a reserve established on a nearly completed Mission Power Engineering construction project involving a dispute with a client regarding the recovery of project costs. If Mission Power Engineering's claims are upheld, the project costs would be recovered, which would benefit future earnings.

For the 12 months ended Mar. 31, nonutility earnings rose to 42 cents per share, a 17 percent increase over a year ago. Mission Energy, Mission First Financial and Mission Land continue their strong performances, with Mission Energy the largest contributor to nonutility earnings.

SCEcorp net income for the first quarter of 1990 was $172 million, compared with $118 million for the first quarter of 1989. Total revenues were $6.96 billion for the 12 months ended Mar. 31, compared with $6.45 billion for the same period a year ago.

NEW YORK (APRIL 19) PR NEWSWIRE - General Instrument Corporation (NYSE: GRL) announced today that its Dalmo Victor Division has been awarded funding authorization for two contracts from the U.S. Air Force totaling $79.5 million. The first is a $66.5 million funding increment on the contract from the Air Force's Warner Robins Air Logistics Center for the ALR-62V Update Radar Warning System used on the FB-111 and F-111 aircraft. This contract, with a total value of $233.2 million, has been previously announced.

The second is a new $13 million contract for the manfacture of a signal processor and amplifier detectors used in the AN/ALR-69 Radar Warning System for F-16 aircraft. These systems are also supplied to several foreign military sales customers.

In addition to defense electronics, General Instrument is the industry leader in cable TV electronics, coaxial cable and satellite encryption systems. The company's primary strategies are directed toward communications systems. The common stock of the company is listed on the New York, Midwest, Pacific and London stock exchanges.

GRAND RAPIDS, MI (APRIL 19) PR NEWSWIRE - Fred Meijer, 70, chairman of the Executive Committee of Meijer, Inc., the Grand Rapids- based retailer, today announced the election of Doug Meijer, 36, and Hank Meijer, 38, to the positions of co-chairmen of Meijer, Inc. The election took place at the company's April 19 board meeting.

The executive committee is comprised of Meijer family members, company President and Chief Operating Officer Earl Holton, 56, and former company Vice Chairman Harvey Lemmen, now retired.

As co-chairmen, Doug and Hank Meijer, along with Mark Meijer, 32, Fred Meijer and Holton will continue to function together as the "Office of the Chairman."

Doug Meijer is a graduate of Creston High School and the University of Michigan. He first began working with the company in 1966 as a marking room clerk. Past positions with Meijer include store department manager, assistant store manager, operations specialist, corporate vice president and since 1985, vice chairman. Currently, he serves on the board of trustees of the Grand Rapids Art Museum, a board director of Grand Bank and the Campaign Cabinet of the Michigan Trails Girl Scout Council.

Hank Meijer is a graduate of Creston High School and the University of Michigan. He first began working with the company in 1964 as a bottle return clerk. After working for newspapers in the Detroit area, he returned to the company first as an assistant advertising director, then as director of marketing, corporate vice president and since 1985, vice chairman. In 1984 he published "Thrifty Years," a biography of his grandfather and company founder Hendrik Meijer. Currently, Hank Meijer serves as president of the Family Services Association of Kent County and as a director of Old Kent Bank & Trust Co., and the Grand Rapids Area Council for the Humanities. He is also a member of the Grand Rapids Area Chamber of Commerce Metropolitan Issues Committee.

Headquartered in Grand Rapids, Meijer, Inc. is one of the largest privately owned retail companies in the Midwest. The number of people it employs is rapidly approaching 45,000.

NASHVILLE, TN (APRIL 19) PR NEWSWIRE - The Tennessee Commissioner of Commerce and Insurance will speed up her consideration of whether Torchmark Corporation's (NYSE: TMK) conduct, including its solicitation of proxies for director nominees at American General Corporation's (NYSE:

AGC) May 2 annual meeting, violates Tennessee insurance laws.

Tennessee law provides that a company must first get approval from the Tennessee Department of Commerce and Insurance before any attempt to effectuate an acquisition of control. Torchmark has not sought such approval nor has it been given.

In an April 16th letter to Torchmark's attorneys, Sharon K. Roberson, the Tennessee Department's Chief Counsel for Insurance, warned that "the actions of your client appear to be clearly in violation" of the Insurance Holding Company Act, "which could subject your client to sanctions as a Class E felony."

American General said the expedited hearing, which was moved to April 26 from May 7, will allow state authorities to intervene, if they so determine, to prevent Torchmark from casting illegally solicited votes at the annual meeting. American General, headquartered in Houston, is an insurance and financial services organization with assets of $32 billion and total equity of $4.4 billion. The company has subsidiaries that operate in 50 states and Canada. The company groups its operating subsidiaries into three business segments: Insurance - Home Service; Insurance - Special Markets; and Finance/Real Estate. American General's largest business segment -- home service life insurance -- is headquartered in Nashville.

WASHINGTON (APRIL 19) PR NEWSWIRE - A Customs Service spokeswoman said Thursday that the agency erred in charging that there had been "misrepresentations" in a Los Angeles Times article about the agency that appeared on Apr. 9, the newspaper said. The article described an incident involving a Customs Service radar plane in an anti-drug operation over Mexico. "There were no misrepresentations in the Los Angeles Times article," said Cathy Hamer, a Customs Service spokeswoman.

She told the Times that the allegation, contained in a news release issued earlier today, had been "blatantly false." The agency's public affairs office will ask Customs Service commissioner Carol Hallett for permission to issue an official retraction, she said.

#90109p5054 04/19/1990 ~PR Newswire
GREENWICH, CT (APRIL 19) PR NEWSWIRE - Beginning on April 26, the first bottles of Perrier will be arriving in American supermarkets and restaurants. The national roll-out begins in New York, followed shortly by Miami and Los Angeles. Perrier will be back in 90 percent of all U.S. markets by the end of May 1990. The product is bottled solely at its single source in Vergeze, France, and from there it is shipped worldwide.

Consumers will be asked to look for the brand's new label featuring the words "Nouvelle Production" or "New Production." The Food and Drug Administration (FDA) has inspected the Perrier source and bottling

facility in France and found it to be satisfactory.

Perrier has agreed to make certain changes in labeling information at the request of the FDA. These changes include the description of the natural source of Perrier's carbonation in place of the words "naturally sparkling." The new labeling will appear on product bottled after July 30 1990.

The label will read "Natural Mineral Water" and the side panel, "Since 1863, bottled only at Source Perrier, Vergeze, France. The carbonation used in Perrier is taken from a naturally occurring source found deep within the earth."

Perrier points out that the FDA does not have any definition of natural carbonation or natural mineral water and that Perrier has always conformed to European Economic Community (EEC) standards for describing its product, which are the only standards that exist. None of the changes requested by the FDA reflect any alteration in Perrier water or the way it is produced.

Perrier says its current labeling refers to its continuing practice of blending natural carbonation produced in the earth with Perrier's natural mineral water captured at the source. To facilitate bottling, Perrier traps the gas and the water separately, and the gas is recombined in the water, after filtering to remove any extraneous elements. Generally, carbon dioxide gas, whether produced commercially or in nature, carries trace elements that must be filtered. This bottling process has been carefully designed to preserve the natural product, not alter it.

"We believe the FDA is trying to act in the interest of clarity and consumer information. While we do not agree with the need for these changes and feel that our label has always adequately and accurately described our product, we have made these changes to comply with the FDA request and to act responsibly in quickly returning Perrier to our customers," says Ronald V. Davis, president of The Perrier Group of America.

"Most importantly, we can go back to doing what we've done best for 127 years -- getting Perrier into the hands of millions of people who tell us it's just irreplaceable."

#90109u0204 04/19/1990 ~United Press International

(APRIL 19) UPI - The Bush administration is reacting cautiously to reports that a pro-Iranian group believed to be holding three U-S hostages says it plans to free one of the captives by Friday. The Islamic Jihad for the Liberation of Palastine made the declaration Wednesday in a statement delivered to a Western news agency in Moslem west Beirut. Sources told Arabic radio the group will release former Beirut University College professor Jesse Turner... who was kidnapped in 1987.

The White House warns U-S-Soviet relations could sour as the result of Moscow's turning off the flow of crude oil to independence-minded Lithuania. Spokesman Marlin Fitzwater says once administration officials confirm the cut-off, President Bush will decide ''the proper course of action.'' But he stresses next month's super-power summit is NOT in danger.

A federal bankruptcy court judge in New York late Wednesday ordered a trustee to take control of bankrupt Eastern Airlines. The ruling by Judge Burton Lifland follows four days of testimony. He declared Eastern's management and its parent company, Texas Air, ''NOT competent to reorganize'' the troubled carrier. The decision strips Texas Air Chairman Frank Lorenzo of control of Eastern and could mean an end to a 13-month machinists' strike against the airline.

Nicaraguan President Ortega says next week's transition of power to President-elect Chamorro is NOT linked to a cease-fire agreement with the Contra rebels. A Contra delegation in Managua held a second day of talks Wednesday with officials from Nicaragua's outgoing and incoming government. A rebel leader says they've almost reached agreement on a cease-fire and rebel disarming.

(APRIL 19) UPI - A Cuban-American man pleaded innocent Wednesday in federal court in Washington, D-C, to murder charges stemming from the 1976 car bombing that killed a former Chilean ambassador and his secretary. 51-year-old Jose Dionisio Suarez had been a fugitive for more than a decade. But last week, federal authorities arrested him at his home in St. Petersburg, Florida.

An annual ceremony commemorating the heros of the Great San Francisco

earthquake of 1906 was interrupted Wednesday morning- by an earthquake. Dozens more followed... triggering mudslides, knocking out power, shaking buildings and frazzling nerves in central California. NO injuries were reported. Scientists say the shakes were aftershocks from October's big quake.

CAIRO, EGYPT (APRIL 19) UPI - Iraqi President Saddam Hussein, escalating his war of words, warned he had the capability of launching chemical weapons at Israel from several sites in Iraq.

Also Wednesday, Egypt unveiled a plan to eliminate all weapons of mass destruction from the Middle East, but asserted Iraq has a right to retaliate with chemical weapons against any Israeli attack.

Saddam, in a fiery speech to Baghdad workers broadcast on state-run Iraqi television, said any war with Israel would not end until all Israeli-held territory was restored to Arab hands.

The leader also advised Israel to give up any hope of destroying Iraq's missile bases, saying Iraq had the capability of launching chemical

weapons from several locations.

Saddam threatened weeks ago he would retaliate against Israel if the Jewish state tried to attack Iraqi nuclear facilities, as it did in 1981 when it destroyed an atomic reactor outside Baghdad.

Earlier, British customs agents in London had seized Iraq-bound components they said could be used to trigger a nuclear device.

The escalating tension apparently prompted Egyptian Foreign Minister Esmat Abdel-Meguid to send a letter to U.N. Secretary-General Javier Perez de Cuellar saying that all nuclear, chemical and biological weapons should be banned from the volatile Middle East.

At the same time, Abdel-Meguid defended Iraq's right to defend itself from an Israeli attack. ''Do you expect them to sit tight, like a sitting duck?'' he said.

Abdel-Meguid urged all states in the region, including Israel and Iraq, to comply with the unilateral ban and called on the United Nations to help establish verification measures to ensure full compliance.

Iraq, which possesses chemical weapons, and Israel, which is widely believed to have nuclear and chemical weapons, did not immediately react to the Egyptian proposal.

Earlier Wednesday, Saddam told senior military officers that Iraq would retaliate against any attack on its territory, and would also come to the aid of any Arab country that faced foreign aggression.

His speeches appeared to reflect his desire to become the new champion of the Arab world against Israel and the West, and one Cairo-based diplomat said Saddam was hoping to step into Moscow's shoes as the big stick with which Arab states could threaten their traditional enemies.

''After the war with Iran, Iraq's armies are now the best trained and equipped in the Arab world,'' said a Western European diplomat who requested anonymity. ''Saddam knows he has nothing to lose and everything to gain. And with Moscow almost out of the picture, he can step in and champion Arab rights in a frenzy of Ba'athist national socialism.

''If the Israelis are even contemplating attacking one of Iraq's missile bases, they should reconsider. ... Iraq has mobile missile bases directed toward Israel,'' Saddam said. ''If one is destroyed, Iraq can build a new one.''

Saddam warned that any new Arab-Israeli war would continue indefinitely.

''If they think that a war would last for only a few days, they are mistaken,'' he said to the prolonged applause of his audience. ''I swear to God that if they start a war, we will prolong it.''

#90109u0313 04/19/1990 ~United Press International

CHICAGO (APRIL 19) UPI - Vince Riendeau, making his first start of the playoffs due to an injury to St. Louis Blues' No. 1 goaltender Curtis Joseph, frustrated the Chicago Blackhawks to the final second Wednesday night.

Riendeau, in his second year, turned aside 29 shots, 16 of those in the last period, to help the Blues survive a furious Chicago comeback in posting a 4-3 victory in the opening game of the Norris Division final.

Joseph started all five games in the Blues' first-round victory over Toronto but injured his left shoulder in Game 5. Riendeau, who struggled late in the season and lost his starting job to the rookie Joseph, admitted he was nervous at the start. But he looked like a Vezina Trophy winner by the third period.

''The nervousness stayed for a long time because it took a long time to get some shots,'' Riendeau said. ''You're never too sure when you don't have any shots against you, and I was kind of anxious to get some.''

And get some he did after the Blues cruised out to a 4-1 lead on a pair of goals by rookie Rod Brind'Amour and one each by Rick Meagher and Brett Hull.

Hull's sixth goal of the playoffs midway through the second period prompted Chicago Coach Mike Keenan to replace goaltender Greg Millen with Ed Belfour for the fourth time in eight playoff games. Millen slammed his stick on the boards and screamed at his teammates after leaving the ice.

The Blackhawks, outshot at that point 13-6, finally began to pressure Riendeau. Trent Yawney made it 4-2 with a power-play goal at 13:43 of the second, and Adam Creighton closed the deficit to 4-3 at 18:24 on a delayed power play, stuffing in his own rebound.

The Blackhawks, who managed just four shots in the opening period, rebounded to outshoot their opponents 10-1 in the last nine minutes of the second period and 26-13 the last 29 minutes of the game. But Riendeau stopped them from every angle.

He might have saved his best for last, stopping Chicago's Wayne Presley on a point-blank bullet with one second left.

''I really thought the game was over,'' Riendeau said. ''He came into the slot, and I really couldn't see the guy. I thought he was one of ours. And then I realized he wasn't shooting at the other end, he was shooting at me. I wasn't too ready for that one.''

Presley thought it was overtime.

''I thought it was in,'' he said. ''All I could do was let the shot go. I knew where the net was, and I was all alone. I didn't figure I had that much time. I just wanted to get rid of it, and I think it hit his stick. He made a great save on me - a clutch save.

After Brind'Amour and Chicago's Doug Wilson exchanged goals early in the first period, the Blues took the lead for good on a controversial goal by Meagher with 5:02 remaining in the period.

Meagher took a pass from Dave Lowry, moved in alone on Millen and beat him to the glove side. But the clearing pass from Rich Sutter to Lowry appeared to be two lines, and the Blackhawks unsuccessfully argued the call.

Keenan still was fuming over the call afterward.

''It wasn't a potential offside. It was offside by a large, large margin '' Keenan said. ''I don't know what the hell the officials were doing. They pointed offside and then they let it go.''

Brind'Amour made it 3-1 at 6:05 of the second period, just 16 seconds after Chicago killed off a power play. Brind'Amour took a behind-the-net pass from Sergio Momesso and was all alone in front to easily register his second of the game and fourth goal of the playoffs.

Hull connected less than five minutes later to give the Blues a commanding three-goal lead, and they needed every one of them.

''We didn't work. We didn't come prepared to play the game,'' Keenan said. ''We wanted the night off.''

Game 2 is scheduled for Friday night at Chicago Stadium, and the best-of-seven series then shifts to St. Louis Arena for Games 3 and 4.

OILERS 7, KINGS 0

Edmonton goaltender Bill Ranford even relaxed Wednesday night in posting his playoff shutout over the Los Angeles Kings.

''In the last 10 minutes of the game I didn't have to push myself and was relaxed,'' said Ranford after the Oilers buried the Kings 7-0. ''I just

tried to stay sharp, play my angles and let the puck hit me. They didn't get a whole lot of chances.''

Game 2 of the best-of-seven Smythe Division final is Friday in Edmonton.

The triumph was Ranford's fourth straight going back to the three wins the Oilers collected to capture their opening series with the Winnipeg Jets.

Los Angles sharpshooter Wayne Gretzky, who didn't get a shot on goal in the one-sided affair, said the shutout can only aid Ranford.

''A couple of shots got through his legs late in the game but the puck went out the side,'' Gretzky said. ''The problem for us is that he is getting more confidence back there.''

The Oilers who checked the Kings effectively all night, received two goals in the third period from Esa Tikkanen, who also had the assignment to shadow Gretzky. However, he didn't hesitate to go on the offensive with the Oilers holding a 4-0 lead in the final period.

''Sometimes when Gretzky goes behind the net and we get the puck there are lots of opportunities for three-on-twos,'' said Tikkanen. ''When that happens I think I have to jump into the play.''

Los Angeles goalie Kelly Hrudey didn't have a banner night, letting Glenn Anderson score on a break-in from the side and giving Tikkanen an open net after he came out to the faceoff circle to block a shot. Tikkanen fooled Hrudey by holding on to the puck and moving into the clear.

''I'm at a loss for words right now,'' said Hrudey. ''We were beaten pretty good tonight but it's not that we can't recover. We'll just have to get back at it Friday night.''

Hrudey said the Oilers were opportunists during the game.

''I don't know if they had a ton of chances but they scored on the ones they had,'' Hrudey said.

Joe Murphy completed the Oiler scoring at 10:26 of the third period.

Edmonton cruised to a comfortable 4-0 lead after two periods with veterans pulling the trigger on three of the goals. Kurri moved into second place on the all-time playoff goal list with his fourth of the playoffs at 9:38 of the first period. The milestone goal came when he deflected a slapshot from the point past Hrudey.

The goal was Kurri's 86th and moved him past Mike Bossy of the New York Islanders. Gretzky holds the record with 88 goals.

Glenn Anderson opened the scoring at 4:41 of the first period with one of his patented dashes around the outside. Mark Messier made it 3-0 at 14:31 of the second period during a power play. Rookie Martin Gelinas scored his first playoff goal from the slot after a nice set up pass from behind the net by Adam Graves.

(APRIL 19) UPI - The wife of U-S hostage Jesse Turner says she had heard NOTHING about a possible release of her husband before Wednesday's declaration. In a one-page statement to a Western news agency in west Beirut, the Islamic Jihad For the Liberation of Palestine said it planned to free one of its captives by Friday. The pro-Iranian group is thought to be holding three Americans. Sources told Arabic radio that Turner will be released.

Authorities in Lubbock, Texas, have charged the son of a former Panamanian president with threatening to kill President Bush in retaliation for the U-S invasion of Panama in December. Secret Service agents say 21-year-old Otto Demetrio Lakas... a student at Lubbock Christian University... tried to buy a handgun two weeks ago, saying he wanted to shoot the president. Lakas' father was president of Panama from 1972 to '78.

Darkness forced the U-S Air Force to suspend its search until Thursday for 20 people missing following the crash of a Panamanian airliner en route from Contadora Island to Panama City. Two passengers survived and the rest are feared dead. Authorities say the plane ran into a flock of birds and crashed into the Pacific Ocean minutes after take-off.

Lawyers for Eastern Airlines say they haveN'T decided whether they'll appeal a New York federal bankruptcy court judge's decision to place a trustee in control of the troubled airline. Wednesday's ruling strips Texas Air Chairman Frank Lorenzo of control and holds out the possibility that a crippling machinists' strike against Eastern may end after 13 months.

(APRIL 19) UPI - Some 25-hundred people gathered at the state Capitol in

Sacramento, California, Wednesday to celebrate the upcoming 20th anniversary of Earth Day. Speaker after speaker told the crowd to take responsibility for their actions and make changes in their lives to save planet Earth. A caravan of several hundred bicycle riders pedaled from university campuses in Sacramento and Davis to attend the rally.

A Royal Oak, Michigan, man was glad when he lost 580 pounds in 18 months. But the diet left him looking like ''a shar-pei, that wrinkly Chinese dog.'' So Larry Coker donated his excess skin... four pounds of it... to the University of Michigan Medical Center. The hospital used it as temporary skin for a man who suffered third-degree burns over 40 percent of his body. Coker's donation is thought to be the first by a living skin donor in Michigan.

#90109u0399 04/19/1990 ~United Press International

(APRIL 19) UPI - The Philadelphia 76ers want nothing to do with the Boston Celtics come Sunday. By then, they want the Atlantic Division title sealed and delivered.

''We're definitely going in there to win and hope we clinch it,'' guard Hersey Hawkins said. ''Hopefully, the game Sunday will mean nothing. That's what we want.''

Hawkins scored a season-high 31 points Wednesday night, sending the 76ers to a 124-113 home victory over the Indiana Pacers.

One more victory by the 76ers, or one loss by Boston, would give Philadelphia its first division title since 1983.

Philadelphia plays at Detroit Thursday night and is home against the Celtics in the regular-season finale Sunday. The Celtics beat Orlando Wednesday night and are at home Friday night against Chicago.

If Boston wins Sunday, leaving the teams with identical records, the Celtics win the division on the basis of a 3-2 record against Philadelphia.

Hawkins hit 11 of 14 shots and held Reggie Miller to 18 points, 6 below his average. Miller scored 2 points in the second half.

''You want to be your best against the top guards in the league,'' Hawkins said. ''You want to show them you won't back down. And I want to send a message to everybody else that I can play and hopefully, I'll start getting some of the respect I deserve.''

Johnny Dawkins scored 19 points and Charles Barkley and Ron Anderson added 17 apiece for Philadelphia.

Indiana, which fell one game behind Milwaukee in the race for the sixth playoff spot in the Eastern Conference, is 0-4 against the 76ers.

The Pacers received 14 points from Rickey Green and 13 each from Vern Fleming, George McCloud and Rik Smits. Foul-plagued Chuck Person scored 3 points, nearly 14 below his average.

''The only thing I learned from this game was it was a magnification of the other games we've played against them,'' Indiana Coach Dick Versace said. ''They're difficult for us to play. We match up a lot better against Chicago than Philadelphia.''

-- AROUND THE NBA --

In other games, Boston beat Orlando 133-112, Cleveland stopped New Jersey 100-93, Charlotte topped Miami 98-91, San Antonio stopped Utah 102-93, Portland nipped Phoenix 128-120 in overtime and Golden State grounded the LA Clippers 133-120.

Celtics 133, Magic 112

At Boston, Kevin McHale scored 14 of his 33 points in the third quarter to lead the Celtics. Boston played without forward Larry Bird, who had an abscess on his buttocks lanced earlier in the day, and Dennis Johnson, who had a bruised shin.

Cavaliers 100, Nets 93

At East Rutherford, N.J., Craig Ehlo scored 19 points and the Cavaliers moved within one victory of clinching an Eastern Conference playoff berth. New Jersey's Chris Dudley pulled down a career-high 19 rebounds and snapped an 0 for 19 free-throw streak with a conversion in the second quarter.

Hornets 98, Heat 91

At Miami, Kelly Tripucka scored 26 points to help Charlotte defeat Miami. The victory evened the teams' two-year series at 2-2, and represented the Hornet's 10th win in March and April. During the first four months of the season, Charlotte won nine games.

Spurs 102, Jazz 93

At San Antonio, David Robinson scored 30 points and grabbed 16 rebounds for the resurgent Jazz. San Antonio, 21-59 after 80 games last season, improved to 54-26. San Antonio and Utah are tied for the Midwest Division lead with two games remaining.

Blazers 128, Suns 120 (OT)

At Phoenix, Clyde Drexler scored 32 points, including a 3-pointer that sent the game into overtime to pace Portland. With the win, Portland clinched the No. 3 seed in the Western Conference playoffs, behind the Los Angeles Lakers and the Midwest Division champion, either San Antonio or Utah.

Warriors 133, Clippers 120

At Oakland, Calif., rookie Tim Hardaway collected 22 points and 16 assists to lead six Warriors in double figures. Terry Teagle scored 30 points while Mitch Richmond had 18 for Golden State, which snapped a three-game home losing streak. Michael Young had a career-high 27 points for the Clippers.

(APRIL 19) UPI - Something was very wrong with his Baltimore Orioles and Frank Robinson knew it.

After watching his team get blown out Tuesday night - their third straight loss - Robinson promised, ''there will be a different team out there tomorrow.'' He was right.

Robinson held a closed-door meeting prior to Wednesday's game and the talk apparently worked, as the Orioles pounded out 14 hits en route to an 8-5 victory over Toronto.

The Orioles, who surprised everyone last season with a second-place finish have struggled in the early going this year and Robinson decided to do something before things got worse.

''There were just some things we had to discuss,'' Robinson said of the pre-game meeting. ''We talked about a little bit of everything. We just weren't doing the things we were capable of and that's why we weren't

winning.''

Baltimore has played it first eight games on the road and with their home-opener scheduled for Thursday, Robinson felt this was an important game for his club.

''This win is a big confidence booster for us and a good way to end the trip,'' Robinson said. ''We can build on this one, it was an important game for us.''

Craig Worthington, who had three hits, including a home run and four RBI for the Orioles felt the meeting made a difference.

''We were more focused tonight, we just got back to basics,'' Worthington said. ''I felt really good tonight (after the meeting) and I think the guys did to.

''We were just trying to do too much at times and that's when we get into trouble. Everyone was trying to be the superstar on this team and that wasn't working.''

Worthington snapped a 3-3 tie in the sixth inning with a run-scoring single and added a two-run single in the seventh. The Orioles also received a three-run home run from Randy Milligan in the fourth inning to take a 3-2 lead.

Pete Harnisch, 1-0, scattered six hits over six innings to pick up the victory. He struck out four and walked one. Gregg Olson gave up one hit over the final 1 2-3 innings to earn his third save of the year.

Toronto starter Jimmy Key lasted five innings, allowing three earned runs and six hits, striking out two and walking one. Frank Wills, 0-1, lasted just one-third of an inning, allowing both of the fifth inning runs and hits, to take the loss.

Elsewhere in the American League: Detroit topped New York 8-4, Kansas City blanked Cleveland 7-0, Milwaukee outscored Texas 11-6, Boston edged Chicago 7-5, Minnesota nipped Seattle 4-3 and Oakland downed California 3-1.

In the National League it was: Los Angeles 6, San Francisco 2; Chicago 8, New York 5; Philadelphia 4, Montreal 3; St. Louis 3, Pittsburgh 0; Cincinnati 11, San Diego 7; and Houston 10, Atlanta 5.

-- AROUND THE AL --

Tigers 8, Yankees 4

At Detroit, Cecil Fielder drew a bases-loaded walk in a five-run third inning and later added his second home run of the season to power the Tigers. Jack Morris won consecutive April starts for the first time since 1988 by allowing eight hits over five innings. Mike Henneman closed for his second save. Dave LaPoint, 0-1, took the loss.

Royals 7, Indians 0

At Kansas City, Mo., Bob Boone squeezed home one run and blooped a double for two more RBI and Storm Davis picked up his first win since joining the Royals. Davis, 1-1, has beaten Cleveland six straight times. John Farrell, 1-1, took the loss.

Brewers 11, Rangers 6

At Arlington, Texas, Robin Yount's two-run single keyed a seven-run sixth inning and the Brewers cruised. Milwaukee sent 13 men to the plate against four Texas pitchers in the sixth, receiving the benefit of four walks, one hit batsman and a dropped fly ball. Jamie Moyer, 0-2, was the loser. The win went to Tony Fossas, 1-2.

Red Sox 7, White Sox 5

At Chicago, Wade Boggs and Tony Pena had two-run singles during a six-run third inning and the Red Sox downed the White Sox. Roger Clemens, 3-0, pitched 6 1-3 innings for the victory. Jack McDowell, 0-1, went 2 1-3 innings in suffering the loss. Lee Smith earned his fourth save. The Red Sox sent 11 batters to the plate in the third.

Twins 4, Mariners 3

At Seattle, Gene Larkin and Dan Gladden drove in two runs apiece to lead the Twins. Reliever Terry Leach, 1-0, picked up the victory with 2 1-3 perfect innings. Rick Aguilera, entered in the eighth with two on and none out and retired all six batters he faced for his fourth save and second in as many nights. Matt Young, 0-2, suffered the loss.

Athletics 3, Angels 1

At Anaheim, Calif., Jose Canseco lined a two-out, two-run homer off California reliever Mike Witt in the seventh inning to cap a 3 for 3 performance and help the World Champions improve to 7-1. Scott Sanderson, 2-0, making his second American League start, gave up one run and six hits over the first six innings. Gene Nelson picked up his first save. Witt fell to 0-2.

RIO DE JANEIRO, Brazil (APRIL 19) UPI - Torrential rain accompanied by high winds knocked out electricity, caused mudslides and postponed a Paul McCartney concert scheduled for Thursday, Civil Defense authorities said.

At least five deaths and 10 injuries were reported in Rio de Janeiro, Brazil's second-largest city with 7 million residents.

The rain Wednesday - accompanied by strong winds and bolts of lightning - flooded streets, felled trees and sent mud and rock sliding down hillsides authorities said. Electricity was reported out in many parts of the city.

The heavy rain flooded Maracana Stadium and forced the postponement of former Beatle McCartney's rock concert Thursday, said organizers of the event. There was no immediate word on when the concert would be rescheduled.

A huge rock fell on a housing development, killing at least two people and injuring two others, said Capt. Jose Paulo Miranda de Queiroz, Civil Defense chief.

The storm toppled cables from the electricity distribution system in Niteroi, a locality across from Rio, killing two people, de Queiroz said.

Mud and rock slides in one of the largest of Rio de Janeiro's slums, Rocilha, killed at least one person and injured three others, said de Queiroz.

#90109u0544 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - A Supreme Court decision permits federal judges to order cities and towns to raise taxes to remedy constitutional violations - such as school segregation - even if the measure breaks state laws against new levies.

Wednesday's 5-4 court ruling struck down a federal judge's personal order of new property taxes on Kansas City, Mo., as a way to pay for a school desegregation plan in 1987.

Although the high court rejected the direct imposition of taxes by the judge in this case, it preserved the broad intent of his decree - that city officials themselves raise taxes to pay for the plan.

The Supreme Court approved a plan requiring the school district to levy taxes to pay for the desegregation program. The plan allows the district to ignore state law banning certain tax increases.

Justice Byron White, writing for the court, called the district judge's order an ''extraordinary event'' that not only ''intruded on local authority but circumvented it altogether.''

But he concluded that ''a court order directing a local government body to levy its own taxes is plainly a judicial act within the power of a federal court.''

While all members of the court agreed with the result of the case, Justice Anthony Kennedy, joined by Chief Justice William Rehnquist and Justices Sandra Day O'Connor and Antonin Scalia, issued a warning about the path the court took.

''This assertion of judicial power in one of the most sensitive of policy areas, that involving taxation, begins a process that over time could threaten fundamental alteration of the form of government our Constitution embodies,'' Kennedy said.

The court's action comes in the longstanding school desegregation suit from Kansas City, first filed in 1977 by the Kansas City Missouri School District and a group of children, charging the state had maintained segregated schools in the district and failed to eradicate them.

The case took various twists and turns before federal courts found the school system was a segregated dual system and ordered a remedial plan to desegregate. The wide-ranging plan called for such things as upgrading schools themselves, hiring new teachers and creating magnet schools to attract more white students.

The cost of the programs was estimated to be about $260 million.

Part of the cost was to be paid by the state with the rest to be paid by the school district. The federal judge eventually ordered an increase in the district's property tax and authorized the sale of $150 million in capital improvement bonds to pay for the plan.

Seeking high court review, the state said the case ''presents fundamental questions about the permissible goals of a desegregation remedy.''

''These orders are simply an abuse of federal remedial power,'' the state maintained.

''Thanks to the orders below, (the school district) has now become a judicial enclave, where the court selects the programs to meet its chosen goals, directs state and local officials to execute these programs, and then sets tax rates to supply additional funding.''

The school district and the children who originated the suit argued

against review.

88-1150 State of Missouri, et al., vs. Kalima Jenkins, et al.

#90109u0546 04/19/1990 ~United Press International

NEW DELHI, INDIA (APRIL 19) UPI - India and Pakistan, apparently bowing to international pressure, have agreed to hold talks on a dispute over Kashmir that some fear could escalate into a fourth war, officials said.

The neighboring countries, which have fought three wars since 1948, have been at increasing odds over the predominately Moslem Kashmir region, most of which is under Hindu India's control.

Moslem militants have been fighting in recent months for either complete independence or the chance to merge with Moslem Pakistan.

An Indian Foreign Ministry spokesman said Wednesday the talks will be held this weekend in New York between the Indian and Pakistani foreign ministers, who will be in the city to attend a special U.N. General Assembly session on economic issues.

During his stay in New York, Indian Foreign Minister Inder Kumar Gujral will take ''the opportunity of having an exchange of views'' with his Pakistani counterpart, Shahabzada Yaqub Khan, the spokesman said.

He said the two ministers would discuss ''Indo-Pak relations in the context of recent developments.''

The spokesman said the two also will consider reviving several sets of bilateral talks that were scrubbed in the wake of the popular uprising in Kashmir against Indian rule, which started in mid-January. He declined to elaborate further.

The Press Trust of India news agency quoted official sources as saying Pakistan initiated the talks.

Indo-Pakistan relations have plunged to their lowest since a 1971 conflict because of the recent insurrection in Kashmir, which has left more than 250 people dead.

The two countries have battled over the region in all three of their wars.

Hindu-dominated India, which controls two-thirds of Kashmir, contends Pakistan is arming and training Moslem separatists on its side of the frontier as part of a plan to claim the entire region.

Indian Prime Minister V.P. Singh had repeatedly rejected any dialogue with Pakistan until the alleged intervention ceases.

The vehemence of India's charges and warnings that it was prepared to use military might to end Pakistan's alleged interference have grown with the government's inability to prevent Moslem extremist attacks.

Pakistan has responded with similar bellicose pronouncements, and though it has rejected the charges that it is arming and training the separatists Islamabad has openly been soliciting money and international support for the cause of Kashmiri self-determination.

Diplomats believe the rivals are reluctant to back up their threats and have been using the dispute to divert attention from domestic problems that have defied solutions, but demand answers.

Diplomats caution, however, that given the charged atmosphere, the slightest provocative incident or misunderstanding on the always tense border could ignite a conflict.

The United States, Pakistan's main foreign patron, and the Soviet Union, India's largest arms supplier, have been pressuring both countries to practice restraint.

The superpowers have been joined by other countries - including Britain, China and Japan - in urging Pakistan and India to abide by the Simla Agreement, an accord that settled the 1971 war and bound the two to resolving their disputes through bilateral negotiations.

#90109u0578 04/19/1990 ~United Press International

BEIRUT, LEBANON (APRIL 19) UPI - Lebanon's Christians closed businesses Thursday to mourn 15 people who died when a shell hit and burned a school bus in east Beirut.

Life came to a near-standstill throughout the war-ravaged Christian enclave but rival Christian forces sporadically traded rockets and machine-gun fire, keeping tension high, witnesses said.

Braving recurring blasts, a few civilians ventured out to bakeries that were allowed to open along with pharmacies and hospitals, the witnesses said.

One Christian militiaman died in the intermittent violence against troops of Christian dissident leader Gen. Michel Aoun, police said.

In the Moslem sector of the city, rival pro-Syrian Shiite Amal militiaman

and Iranian-backed Hezbollah militants battled on the streets for a third successive day, police said. Three people were killed.

In the three days of inter-Shiite violence, 15 people were killed and 40 were wounded, police said. At least 1,000 people have died in two years of a warfare between Amal and Hezbollah for control of Lebanon's 1.5 million Shiites.

The mourning Thursday was observed in response to a call by key Christian figures loyal to Aoun.

Wednesday, during sporadic fighting between Samir Geagea's militiamen and Aoun's troops, a shell hit a school bus in east Beirut, killing 15 passengers, witnesses and police said.

The shell apparently was fired by Christian militiamen at a street patrolled by Aoun's troops. The shell hit the bus's gasoline tank, engulfing the 20-seat vehicle in flames, police said.

At least 11 of the 15 passengers who burned to death were young students, the oldest in their teens, police and witnesses said.

''That was horrible. Rescuers pulled bones and black pieces of flesh from the bus that turned into a black metal skeleton,'' a cameraman told United Press International.

''It was one of the most ugliest things I have ever seen since the start of the (Lebanese) civil war,'' said the veteran cameraman, who asked not be named.

''I survived by a miracle,'' a 30-year-old wounded teacher identified only as Teresa told reporters at a hospital. ''A roaring fire suddenly erupted and quickly spread aboard the bus. I slipped through a windownear my seat.''

Aoun's radio station accused Geagea's militia gunners of hitting the bus ''and committing the massacre,'' but the militia denied the charge.

Aoun, who commands 15,000 regular troops, had vowed to crush the 10,000-member militia to establish himself as the sole leader in the Christian enclave.

The general has rebuffed the Taif peace accord and refused to recognize Elias Hrawi who was chosen president in a parliamentary vote as a result of the agreement last fall.

(APRIL 19) UPI - Around the world... around the clock... the latest news from U-P-I.

President Bush plans a quick trip to Florida today. He will meet with French President Mitterand on Key Largo to discuss the future of NATO. France pulled out of the military command of the North Atlantic alliance four years ago. Bush and Mitterand also are expected to discuss the situation in the Baltics and South Africa.

Congress accuses the Bush administration of failing to fix long-time safety flaws at the nuclear weapons facilities. A report by the General Accounting office says only 34 percent of the 17-hundred-31 identified safety problems have been corrected. Energy Secretary Watkins has asked Congress for more money.

Four Americans are among the 20 people missing and feared dead after a Panamanian airliner crash. The plane crashed into the Pacific Ocean yesterday after running into a flock of birds as it left Panama City. The U-S Air Force will resume its search after daybreak. The plane was a D-H-C-6 Twin Otter.

Officials at the St. Louis airport say tires have failed on three T-W-A passenger jets at Lambert in six days. A new tire blew on takeoff of an L11 with 196 people aboard yesterday. The plane returned to the ground safely. The two previous tire failures involved retreads.

A federal judge says the time has come to replace the operators of Eastern Airlines. Bankruptcy Judge Burton Lifland in New York last night ordered a trustee to take control of Eastern. He said Eastern management and its parent company, Texas Air, are NOT competent to reorganize the carrier.

BY UNITED PRESS INTERNATIONAL

(APRIL 19) UPI - The pro-Iranian group that has promised to release an American hostage by Friday is believed to be holding three professors from Beirut University College who were kidnapped on Jan. 24, 1987.

Here are short biographical sketches of the three hostages whose capture was claimed by the Islamic Jihad for the Liberation of Palestine:

Jesse Jonathon Turner, 42, was the only one of the three whose photograph was released by his captors, leading to reports he would be the one freed. It showed him bony and haggard, with a thick, dark beard and wearing a white T-shirt.

Turner, who comes from Idaho, was an associate professor of mathematics and computer science at the college when he was abducted with his colleagues by gunmen disguised as police.

He first started teaching at the school with his former wife, Ina Clare Turner, in 1983, but the couple divorced in 1986. They had no children. She returned to Moscow, Idaho, but he signed another three-year contract until 1989. Turner and the other Americans thought they had a mission to accomplish in teaching Lebanese students, the former Mrs. Turner said.

''There was a spirit of cooperation, even admiration for what we were trying to accomplish at a rather ordinary university,'' she said.

Turner married a second time to Badr Elkhazen Turner, who is living in Dubai, United Arab Emirates.

He received a bachelor's degree in psychology from Boise State University and his master's degree in philosophy. He also earned a doctorate from the University of Idaho.

After Turner was captured, Idahoans prepared a Valentine's Day greeting for him with thousands of signatures on a 1,100-foot roll of butcher's paper.

Alann Steen, 50, an ex-Marine and a professor of communictions at Beirut University College, has been reported in poor health during his captivity.

The Islamic Jihad issued a statement two months after he was kidnapped that Steen could die within 10 days if Israel did not agree to free 100 Palestinian prisoners in exchange for his release. The deal was never made.

In July 1986, Steen married Virginia Rose, an art history instructor at the Beirut school who remained there after her husband's capture.

He has two grown daughters by a former marriage.

Born in 1939, and a 1956 graduate of Hingham High School in Hingham, Mass., Steen earned bachelor's and master's degrees from Humboldt State University in Arcata, Calif. He briefly edited a weekly newspaper in nearby Arcata, The Union.

He lectured in journalism at the school for about 10 years before moving on to Chico State University in 1983, when he took the position in Beirut, officials said.

A friend of the journalism professor said Steen slept with a pistol by his bed and a rifle in the closet.

In a four-minute videotape released May 14, 1987, Steen accused U.S. officials of ignoring the fate of the captives. Appearing fit despite reports he was on the verge of death, Steen said: ''I know the (U.S. officials), they wish us a longer absence or even death ... so they can use us in their democratic games so that they can reach their goals while we all suffer,'' Steen said.

U.S. officials said they believed the statement was coerced.

Robert Polhill, 55, arrived in Beirut in 1982 and was in his fourth year of teaching accounting at Beirut University College when he was abducted.

His second wife, Ferial, is a resident of Beirut.

Polhill's mother, Ruth Polhill of Fishkill, N.Y., said her son was diabetic and required a daily dose of insulin.

About 1,000 Beirut University College students marched through west Beirut Jan. 26 to protest the abductions two days earlier of the professors.

Robert Stoddard, Beirut University College director of development for North America, said Americans used to make up the majority of professors in the school of 2,035 students, which was founded in 1924 by Presbyterian missionaries as a liberal arts college for women and later expanded to include men.

But enrollment had steadily decreased, he said, in part because of a Lebanese quota that limits American professors at the school to 15 percent.

Beirut University College, which has three campuses, exists beside the much larger American University in Beirut. A third American-run Beirut school, International College, is a high school affiliated with American University.

#90109u0780 04/19/1990 ~United Press International

(APRIL 19) UPI - A flock of birds caused the crash of a plane and the probable deaths of 20 people in the Pacific Ocean off Panama yesterday.

Officials of the Panamanian airline company say birds were sucked into an engine of the D-H-C-6 Twin Otter. One of two surviving passengers saw smoke coming out of an engine just before the plane went down in the ocean.

20 people aboard the craft are missing and feared dead. Four of them are Americans.

The plane had just left Contadora Island, a popular tourist resort, and was headed to Panama City 75 miles away when it crashed.

The U-S Air Force joined Panamanians in the search... which was suspended because of darkness. The search will resume after daybreak.

The Bush administration has grudgingly accepted European assertions that immediate action- NOT just research- is needed on global warming.

In a stormy final session, U-S officials backed down from their efforts to focus the White House climate change conference on research.

The conference ended yesterday with U-S officials... from President Bush on down... denying the administration is interested only in more research.

Bush told the delegates in his speech closing the conference that he's never considered research a substitute for action. Bush said he's committed to domestic and international policies that are environmentally

aggressive, effective and efficient.

European officials say Bush's speech reflects a welcome change in U-S rhetoric. But the Europeans question whether that will translate into more active U-S support of emission reduction.

#90109u0786 04/19/1990 ~United Press International

(APRIL 19) UPI - The Kremlin apparently is ignoring an offer by Lithuania's parliament for a two-week moratorium on new rebellious acts if the Soviet government agrees to talks on Lithuanian independence.

But Lithuania's parliament stood firm in its resolve NOT to withdraw its independence laws in the face of a Soviet oil embargo.

In response to the embargo, Lithuania's prime minister- Kazimeiera Prunskiene- traveled to Oslo for talks with Norway's oil and gas producers.

The Norwegian government has made it clear it will NOT make any official arrangement between Lithuania and Norway... but it's unclear whether private companies would be permitted to deliver supplies.

In Connecticut, Soviet Foreign Ministry spokesman Gennady Gerasimov predicted the economic sanctions would stall Lithuania's attempts to break away.

Gerasimov says the Soviet Union provides 97 percent of Lithuania's energy supplies... and added that the the republic's separatist movement only makes Soviet President Gorbachev more determined to keep it from leaving.

Nicaraguan President Ortega says a near-agreement on a cease-fire and disarming of the Contra rebels will have NO affect on next week's transition of power to President-elect Chamorro.

Ortega also announced yesterday that all visa restrictions for U-S citizens entering Nicaragua will be lifted immediately. Ortega made his visa announcement at the request of Chamorro after an hour-long talk.

Ortega is scheduled to hand over power to Chamorro next Wednesday.

The visa requirement stems from a July 1988 incident in which Ortega expelled U-S Ambassador Richard Melton and seven other American diplomats from Managua. Ortegan then announced that all Americans would need visas to enter Nicaragua.

Two days later, the United States expelled the Nicaraguan ambassador and

seven Nicaraguan diplomats from Washington.

A Contra commander requesting anonymity told U-P-I that the Contras and the Sandinistas are close to agreement for a cease-fire and rebel disarming.

#90109u0860 04/19/1990 ~United Press International

NORFOLK, VA (APRIL 19) UPI - The families of the 47 sailors who died in a gun turret explosion aboard the USS Iowa decided to put their differences aside for Thursday's ceremony to mark the first anniversary of the tragedy.

The private ceremony was to be held on the deck of the World War II-era vessel docked at Pier 5 of Norfolk Naval Station and the Iowa's bell, in a solemn salute, was to toll at 10 a.m. The service was to include the dedication of a plaque with the names of the 47 sailors.

The differences among the families center on the efforts of Kathy Kubicina of Cleveland to clear the name of her brother, Clayton Hartwig, who the Navy says probably caused the explosion.

During a meeting Wednesday night, the families agreed to set aside their differences and focus on honoring the men they lost.

But earlier Wednesday some of the survivors issued statements earlier backing the Navy's conclusion that Hartwig likely set off the explosion.

''Until something more conclusive or solid comes along, we are in agreement with the Navy report,'' said John Hague, whose stepson, Philip Buch, died in the turret.

In its official inquiry into the April 19, 1989, tragedy, the Navy concluded Hartwig, a gunner's mate, ''most probably'' caused the explosion in the battleship's No. 2 turret. The Navy said the petty officer likely set off some type of detonating device as the Iowa's 16-inch guns were being loaded.

Kubicina does not speak for all the families when she attacks the Navy's findings, Hague and others said.

While noting Kubicina had every right to defend her brother's honor, Hague said she should speak for herself. He noted continued news reports about the Navy's investigation have made it more difficult for him and his wife, Emily Buch-Hague, of La Mesa, N.M., to put the tragedy behind them.

Kubicina, who is in Norfolk along with the other families to attend Thursday's shipboard ceremony, denied she was trying to put words in the

mouths of all the Iowa families.

''I've never spoken for the 47 families as a group,'' Kubicina said. ''I never have, and I never would.''

Thursday night, the families met at the Navy Lodge, next to Norfolk Naval Base, to support each other.

Nancy Lewis, whose son Richard was one of those who died in the tragedy, urged the families to come together, rather than place blame. Afterwards, family members said they agreed with her sentiments and would avoid conflict.

On April 19, 1989, sailors in the Iowa's No. 2 gun turret were preparing to fire its powerful 16-inch guns during gunnery exercises about 330 miles northeast of Puerto Rico.

As men deep in the six-story turret were loading powder bags, a series of blasts went off, leaving the sailors with no chance of escape. Only 12 sailors in the bottom of the turret, known as the powder flats, survived.

The Navy conducted a $4 million investigation and carried out some 20,000 tests to determine the cause of the explosion.

The Navy's inquiry described Hartwig, 24, as a troubled, suicidal man.

Kubicina's efforts to clear her brother's name led the House and Senate Armed Services committees to review the Navy's investigation. A House panel found the Navy's investigation flawed in several areas, particularly in the psychological analysis of Hartwig.

The Iowa, commissioned 47 years ago, is to be mothballed this fall along with the battleship USS New Jersey, due to defense budget constraints. Some Iowa families have proposed preserving the battleship as a museum or in some other capacity.

#90109u0873 04/19/1990 ~United Press International

OKLAHOMA CITY (APRIL 19) UPI - School officials in Oklahoma City, anxious to avoid detracting from the purpose of a statewide teachers' walkout for more money for education, reversed a decision to fly the U.S. and Oklahoma flags upside down in city schools.

Schools Superintendent Arthur Steller had ordered the upside-down display of flags - an international signal of distress - until an education reform and funding bill becomes law. Federal and state flags were flown upside down at several schools Tuesday and earlier Wednesday as up to 18,000

teachers picketed the state Capitol, pressing for more education funding.

Schools spokesman Michael Carrier said the decision was reversed late Wednesday because of questions about the legality and propriety of such action.

''We don't want to detract any attention from the real issue,'' Carrier said.

The walkout that has closed many school districts in the state began after the state Senate last week refused to grant emergency status to a House-passed $230 million school funding proposal that would raise teacher salaries - among the lowest in the nation - consolidate some school districts and seek parity in educational standards across the state.

Public and school officials in Oklahoma City, Tulsa, Putnam City and Lawton - four of the state's largest school districts - support the demands. Gov. Henry Bellmon appeared to go out of his way to accommodate the teachers when he refused to characterize the walkout as a strike, which could be illegal under state law.

Several school districts canceled classes this week to allow their teachers to join the job action, organized by the Oklahoma Education Association.

Senate Republicans offered a compromise Wednesday but Senate President Pro Tem Bob Cullison, D-Skiatook, said it was unacceptable to Democrats.

Sen. Charles Ford, R-Tulsa, said the compromise would have eliminated an increase in sales taxes in favor of $170 million in higher personal income taxes and a graduated corporate tax.

A steady rain beginning around noon Wednesday forced all but about 1,000 of the picketing teachers to seek cover, then abandon the Capital grounds. Inside the Capitol, small groups settled on blankets to eat bag lunches, turning the hallways and some stairwells into impromptu picnic grounds.

Bellmon said he was ''impressed by the degree of involvement of educators in this process. The way this is happening is in many cases boards of education have granted teachers the privilege of taking time off provided it is made up at the end of the term.

''That's hardly a strike,'' the governor said.

The walkout, which began Monday, was gaining support outside the ranks of teachers.

Hundreds of education supporters from northeastern Oklahoma rallied in

downtown Tulsa Tuesday night. The crowd sang ''Oklahoma!'' and shined flashlights into the night school to symbolically ''light up the future for Oklahoma.''

''I'm proud all of Tulsa is united behind this effort and is taking a stand for quality education,'' Mayor Rodger Randall said. ''A majority of the Oklahoma Legislature has been part of this movement. There is just a small group of people holding Oklahoma back at a time of historic prospects.''

The Putnam City School District, fourth-largest in the state, joined the protest Tuesday. In Lawton, the state's third-largest school district, the Professional Educators Association voted Tuesday night to join the walkout Thursday.

The school board in Oklahoma City voted to use a leftover snow day to close schools Thursday and allow teachers to join the walkout.

#90109u0892 04/19/1990 ~United Press International

(APRIL 19) UPI - The Japanese yen's strong rally against the dollar Thursday sent stock prices on the Tokyo Stock Exchange sharply higher in active trading.

The blue-chip Nikkei average of 225 selected issues, which climbed 787.46 points Wednesday, added another 696.35 points to 29,945.41.

The broader-based Tokyo Stock Exchange Index of all listed major stocks rose 45.53 points to 2,213.49.

An estimated 1 billion shares changed hands, up from 489 million shares Wednesday.

Winners outpaced losers 855 to 141, while 103 issues were unchanged.

Analysts said the market rallied in response to the rise in the Japanese yen. But some traders warned that the rally is likely to be temporary in light of continued high interest rates.

On the Tokyo Foreign Exchange, the dollar fell 2.12 yen to close at 157.75 yen.

Large-scale capital stocks, shipbuildings and electrical power issues ended sharply higher.

Nonferrous metals, construction and textiles also climbed.

Some light electricals fell to profit taking.

Elsewhere in Asia, prices on the Singapore Stock Exchange closed lower in the slowest trading sessions of the year.

The key Straits Times Industrial Index, which gained 7.48 points Wednesday eased 3.25 points to 1,530.86. The narrower All Singapore Index fell 0.90 points to 419.68.

Turnover was a light 14.13 million shares, compared with 32.23 million shares Wednesday.

Analysts said prices eased following the 32.89 point loss in New York on Wednesday.

Market watchers said they feared the closely watched Straits Times Index would continue to drift lower the rest of the month on light trading volumes as buying interest continues to wane.

''People have turned very cautious,'' one dealer said. ''A downward trend is evident so far, but I would not want to hazard where the ultimate bottom is.''

On the trading floor, Singapore Airlines (foreign shares) paced the declining issues, followed by Hong Kong Shanghai, Singapore Press (foreign shares), Overseas United Bank and Development Bank of Singapore.

Isetan Co. paced the advancing issues followed by Hong Fok, Metro Holdings Overseas Chinese Banking Corp. and Hotel Properties.

Prices on the Hong Kong Stock Exchange closed higher in moderate trading.

The closely-watched Hang Seng Index, which climbed 31.91 points Wednesday, added another 15.32 points to 3,067.67.

Turnover was heavy as an estimated 1.60 billion shares changed hands, compared with 1.55 billion shares Wednesday.

Analysts said stocks continued their winning streak as strong overseas interests in Swire Pacific Ltd. and other selected issues pushed the key index higher for the fifth consecutive day.

In Australia, stocks closed lower in moderate trading on the Sydney Sharemarket in response to Wednesday's slide on Wall Street.

The All Ordinaries Index, which gained 2.0 points Wednesday, lost 6.3 points to 1,495.1. The All Industrials Index managed to add 0.5 points to 2,330.0 but the All Resources Index fell 10.5 points to 857.9.

The closely watched Gold Index slipped 7.6 points to 1,547.7.

Turnover amounted to 75.2 million shares, compared with 66.3 million shares Wednesday.

Declines overpowered advances 205 to 91, while 248 issues were unchanged.

Analysts said Wall Street's 32.89 point slump Wednesday set the mood for investors.

Continued worries over the financial health of corporate Australia also contrinuted to the sell-off, analysts said.

Many of Australia's top resource stocks fell.

BHP Mining lost 6 cents to $9.02, WMC Mining lost 4 cents to $4.78, Renison Mining fell 6 cents to $8.90 and MIM Mining eased 2 cents to $2.20.

Elsewhere, News Corp. lost 5 cents to $10.95, Brambles lost 15 cents to $12.50, Coles-Myer eased 4 cents to $7.70 and James Hardy slipped 2 cents to $2.34.

#90109u0898 04/19/1990 ~United Press International

WAGONTIRE, OR (APRIL 19) UPI - A pair of elderly census takers whose truck ran out of gas were stranded for four days in the remote desert of southeast Oregon before a pilot spotted them.

Harney County sheriff's officers said Howard Kahn, 67, and wife Georgia, 66, of Hines, were found Wednesday afternoon about 9 miles south of the tiny town of Wagontire.

Georgia Kahn, a retired teacher, said from her home Wednesday night that their truck ran out of gas Sunday afternoon.

''It was our own fault,'' she said. ''I thought we had more gas in the back end.''

The couple hiked 3 miles to a group of unoccupied trailers used as a cow camp by an area rancher who grazes cattle on the desert, she said. There they found a spring with water to drink and the trailers were stocked with pancake mix, canned fruit, soup and crackers.

''We didn't have much, but we had enough to keep going,'' she said. ''It was 30 miles in any direction to get out to any house, anywhere. We figured it would be better to sit tight.''

Kahn said the pilots of two search planes landed on a nearby road Wednesday and gave them food and enough fuel from their planes' tanks for them to drive the 36 miles to Wagontire. The pilots also flew ahead of them, guiding them out of of the desert, she said.

The couple apparently was last seen Friday in Wagontire, about 55 miles southeast of Burns, by William Warner, who with wife Olgie are the only permanent residents of the town along U.S. Highway 395.

Warner criticized the U.S. Census Bureau for not mounting a search earlier. He said a census official told him Georgia Kahn failed to attend a meeting of census takers Monday, but the agency didn't report them missing until Wednesday morning.

''I don't know why they waited so long,'' he said.

Dave Rasmussen, the Census Bureau's district office manager in Bend, said he was concerned but thought the Kahns were accustomed to conditions on the desert and knew how to take necessary precautions.

It was the Kahns' second losing brush with the desert in their zeal to take the census.

Last week, the Kahn's truck, believed equipped with 4-wheel drive, a canopy and winch, got stuck in a desert mudhole and Howard Kahn hiked 16 miles for help.

A Harney County sheriff's deputy who refused to give her name expressed amazement the couple was trying to conduct a census in the remote area.

''There's nothing out there but sagebrush and junipers and it is dry, dry, dry,'' she said.

Georgia Kahn said she and her husband saw mostly antelope, wild horses - and only 30 people - in her census unit, which encompasses 2,000 square miles of desert.

Airborne searchers scoured the desert soon after learning the couple was missing. Five planes, one of them a State Police craft, were used in the search.

#90109u0900 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - Initial claims for state unemployment insurance benefits increased by 33,000 to 371,000 for the week ending April 7, the Labor Department reported Thursday.

The revised figure for the previous week was 338,000 initial claims, the department's Employment and Training Administration announced. The government also reported that during the week of March 31 the seasonally adjusted rate of insured unemployment increased to 2.3 percent from 2.2 percent, with 2,375,000 workers claiming state benefits.

#90109u0908 04/19/1990 ~United Press International

MAYNARD, MA (APRIL 19) UPI - Digital Equipment Corp. has offered a severance package to 1,840 employees at two plants in Puerto Rico, where they hope to cut 350 people by June 30. The company, which has a tradition of no layoffs, has been under pressure to reduce its work force in the face of a flagging computer market in the U.S.

The voluntary package, similar to those it has offered recently elsewhere, is being made available to employees at plants in Aguadilla and San German Nikki Richardson, a Digital spokeswoman, said Wednesday. All employees are eligible except engineers and technicians.

"We are downsizing the plants for long-term competitiveness," Richardson said. The plants make VAX 6000 power supplies, disc modules and printed wiring boards and servers.

The package includes a minimum of 40 weeks pay for those with less than two years with the company up to a maximum of 104 weeks pay for those with 20 years seniority or more. Also, each employee gets one year of continued medical, dental, and life insurance.

Digital also offered a less-restrictive early retirement package for employees in the two plants. They lowered the age eligibility by five years, to 50, and required only five years of experience with the company. Those eligible for the early retirement plan would also be given the benefits of the severance package.

When similar offers were made to employees across the U.S. in 1986, 700 of the 2,000 eligible took the offer, Richardson said. Richardson said the company has no plans for layoffs, although the company has been careful not to rule out such cuts. Digital, headquartered in Maynard, Mass., employs 125,000 people worldwide, 75,000 in the United States.

EAST BERLIN (APRIL 19) UPI - Prime Minister Lothar de Maiziere said in his first official speech Thursday that East Germany will insist on a 1-to-1 exchange rate when its currency is merged with West Germany's in the

reunification process.

The stand was seen as the East German leader's first major disagreement with the conservative-led West German government and came as he addressed Parliament in his first policy statement since his government took over April 12.

De Maiziere, 50, also promised to tear down the rest of the Berlin Wall, which he called a ''monument of shame,'' in the next few months.

In addition, the prime minister, who called for swift reunification, economic liberalization and a drastic reduction of German troops, said Soviet troops would remain on East German territory for an interim period.

''We shall show our loyalty toward the Warsaw Pact organization, among other ways, by always respecting the security interests of the Soviet Union and other Warsaw Pact states during negotiations,'' he said.

The six conservative, social-democratic and liberal parties in the government coalition have agreed a reunified Germany would be part of NATO, the Western military alliance, until a European security system is created.

The parties announced the decision last week in an agreement that led to the formation of East Germany's first freely elected administration, which took over after 40 years of Communist domination.

De Maiziere said his government will seek to create an economic system with ''as much market as possible and as much state as necessary.'' He called for the transformation of economic policies into ''an ecologically-oriented social market economy.''

De Maiziere said his administration will insist on a 1-to-1 exchange rate when the West German mark replaces the East German currency under the economic and monetary union to be implemented this summer.

The Bundesbank, the powerful West German central bank recently suggested a 2-to-1 rate. Under the Bundesbank's plan, widely seen as an outline for a West German government blueprint, East Germans would only be allowed to change savings up to 2,000 marks at a 1-to-1 rate.

De Maiziere said it was essential the East and West German governments agree on conditions guaranteeing East German ''citizens don't get the feeling they are becoming second-class citizens.''

''Unity must come as soon as possible but the framework must be as good, as reasonable and as durable as necessary,'' de Maiziere said.

He said his government intended to make use of a clause in the West German

constitution that allows for the absorption of East Germany into the West German federal republic.

He said elections for the creation of five states will be held in late fall, as a step toward accession to the republic.

He stressed unification would take place within a European framework. ''Germany is in the center of Europe but it may never again rise to become the center of might in Europe,'' he said.

De Maiziere also suggested the post-war rights of the four World War II victors - Britain, France, the Soviet Union and the United States - could be the subject of negotiations.

''With the creation of peace and security in Europe, conditions could be established for the ending of the World War II allies' rights over Berlin and Germany as a whole,'' he said.

He said the issue could be taken up during talks between the allies and the two Germanys.

De Maiziere said the changes that have swept East Germany since the ouster of the hard-line Communist leadership last fall, were largely encouraged by reform in the Soviet Union and in other Eastern European countries.

Deputies gave de Maiziere a roaring ovation when he mentioned the Hungarian people who had ''torn down their own Iron Curtain, and in doing so had caused a part of the Berlin Wall to fall with it.''

''The Berlin Wall, this people-unworthy monument of shame will be pulled down in the next few months,'' he said.

Large chunks of the wall have been removed to be sold to collectors and museums since the Nov. 9 opening of the wall, but most of it still remains.

De Maiziere painted a grim picture of German and East German history, which he said had marked ''our people with guilt.''

''We are thinking of the victims of concentration camps and of the war. We are also thinking of the victims of Stalinism ... and the victims of the wall.''

HARRISBURG, PA (APRIL 19) UPI - The chairman of a Pennsylvania mutual fund company says a competitor has dropped its opposition to a controversial anti-takeover bill at the same time it won a lucrative contract from the

bill's chief business supporter.

While the feud between two multibillion-dollar mutual fund managers entered its second day Wednesday, the sponsor of the bill said it should have no impact on the expacted passage of the legislation next week.

John Bogle, chairman of The Vanguard Group of Valley Forge, Pa., repeated in a Wednesday letter that Fidelity Investments of Boston had been appointed the manager of Armstrong World Industries' $180 million employee pension fund. On the same day, Bogle said he learned Fidelity had dropped its opposition to the takeover bill being supported by Armstrong.

An early opponent of the legislation, Fidelity announced its change of mind Monday, saying it had obtained an amendment in the bill ensuring that proxy contests would not be prohibited, provided they are not over control of a corporation.

Both Fidelity and Armstrong admitted a contract to manage the pension fund was under consideration but said no commitment had been made, and that a deal relating to the takeover bill was "preposterous."

Bogle countered that two members of Armstrong's management group - one of whom is an officer of the corporation - informed him April 12 that Vanguard had been dropped from competition and that "a commitment was made to award the business to Fidelity."

He repeated his call to Gov. Robert P. Casey to investigate the situation. Fidelity has $110 billion in assets under management, while Vanguard claims about $50 billion.

Armstrong, a flooring material manufacturer based in Lancaster, is the target of a takeover attempt by the Belzberg family of Vancouver. The anti-takeover bill was introduced in October by Sen. Noah Wenger, R-Lancaster, in response the hostile takeover effort. The amendment sought by Fidelity was approved Tuesday and the bill is slated for a floor vote Monday.

"Who is administering someone else's pension fund doesn't have anything to do with the merits of the bill, and that is to provide protection to Pennsylvania corporations," Wenger said.

The bill creates the nation's first "disgorgement provision" requiring that profits made by corporate raiders within 18 months of acquiring a takeover target's shares must be returned to the company.

The bill also strips a raider of voting rights after putting a company in play - or forcing up the price of a company's stocks by threatening to take control of the company - without the support of the rest of the

stockholders.

(APRIL 19) UPI - Eastern Airlines' unions are hailing a U-S bankruptcy court judge's order that a trustee run the embattled airline... ousting Texas Air Chairman Frank Lorenzo. A leader of the striking machinists says the union is happy Lorenzo is out of the picture and that it's cautiously optimistic about the airline starting to make money. The machinists have been on strike for more than one year because of a contract dispute. The union has said it would NOT return to work as long as Lorenzo controlled Eastern.

Lebanon's Christians closed their businesses today. They are mourning 15 people who died when an artillery shell hit and burned a school bus in east Beirut. The shell apparently was fired by Christian militiamen. Rival Christian forces sporadically traded rockets and machine-gun fire. In west Beirut, rival pro-Syrian Shiite Amal militiaman and Iranian-backed Hezbollah militants battled on the streets for a third day in a row.

The U-S Army says it won't allow women in combat positions. The Army rejected a recommendation by the Pentagon's Defense Advisory Committee on Women in the Services. The panel recommended allowing women in combat positions for a four-year test period. Most of the advisory panel's members are civilian women. The Army issued a statement saying its current policy reflects the intent of Congress by excluding women from the highest risk of direct combat.

U-S scientists say that each year people delay reducing their emission of ozone-destroying chemicals may set the atmosphere's recovery back three-and-a-half years. Researchers from the National Aeronautics and Space Administration studied the future impact of chlorofluorocarbons, or C-F-C's, and halons on Earth's protective ozone layer. A report on their study is in the journal Science.

#90109u1010 04/19/1990 ~United Press International
(APRIL 19) UPI - A legal test of Georgia's ''mask law'' starts today. The law was enacted largely to keep Ku Klux Klan members from hiding their identities behind masks. Klansman Shade Miller is scheduled to start trial today in Lawrenceville, Georgia, for wearing a mask in the town square February 28th. He says the law is unconstitutional.

Civilians in Portland, Oregon, are going to get a chance to be vigilantes. Portland officials will lend people radar guns to nab speeders. The volunteers won't make arrests. But they will send the license numbers of offending cars to the city. The city will mail offenders notices, describing the program and explaining the time and place of their infractions.

Torrential rain and high winds hit Rio de Janeiro yesterday. The storm caused at least five deaths and 10 injuries in the second largest city in Brazil. Streets were flooded, trees knocked down and mud and rocks slid down hills. The rain also flooded a stadium and postponed a Paul McCartney concert scheduled for today.

Actor Ben Vereen has agreed to pay his ex-girlfriend 75-hundred dollars and to stay away from her. Vereen was arrested last month after Christine Rich called police to complain Vereen had stormed into her home, thrown her to the ground and shouted threats at her. The settlement was reached in court in Los Angeles yesterday.

#90109u1039 04/19/1990 ~United Press International
ROCHESTER, NY (APRIL 19) UPI - Eastman Kodak Co. confirmed Thursday it dumped low-level radioactive wastes in a former Rochester landfill in the

late 1940s and 1950s, prompting renewed interest in the safety of the site.

The state Department of Environmental Conservation issued a report on the old Emerson Street dump that says thorium-232, a low-level radioactive material, had been found there but not in critical amounts.

Records from the city, which closed the dump in 1971, show 3-M Co. was given permission to dump thorium-tainted waste, and the University of Rochester said it "probably" dumped radioactive wastes there before the dump was closed.

A former trucker has said he took wastes labeled "radioactive" from a Kodak manufacturing plant to the dump. The report was not taken seriously until this week, when Kodak spokesman James Blamphin confirmed the photography giant had taken an unknown amount of low-level radioactive wastes there.

DEC officials said they had not been moving aggressively and were considering taking the dump off a list of suspected hazardous waste sites because they did not have enough evidence of hazardous waste in sufficient quantities.

But Michael Khalil of the DEC's regional office in Avon said officials familiar with the dump are recommending that the "delisting" be deferred until a search for further documentation of possible dumping is concluded.

Rochester operated the dump, intended to handle household garbage, between 1930 and 1971. The site was turned into an industrial park after it was sealed off. Edison Technical High School and buildings owned by Kodak and some other companies are currently located on the site.

Blamphin said it seems some of the thorium-tainted materials are on a parcel of land now owned by Kodak. He said if state officials decide the waste should be cleaned up, "we would do it."

DEC officials said they aren't sure what they will do with the radioactive materials found in the dump. Thorium-232 is material that would be taken to a low-level dump like the one the state is proposing for Cortland and Allegany counties in the face of stiff local opposition.

#90109u1060 04/19/1990 ~United Press International

BEIRUT, LEBANON (APRIL 19) UPI - Israeli fighter jets raided a Palestinian base south of Beirut twice Thursday, wounding six people, sources said.

Security sources said that at 10:40 a.m. Israeli warplanes raided a base for the Popular Front for the Liberation of Palestine-General Command headed by Ahmed Jibril in the Druze-controlled hilltop area of Naameh, 10 miles south of Beirut.

A Palestinian source said three people, including a Palestinian fighter and a woman, were wounded.

The Israeli jetfighters carried out a second raid on the same position at 12:30 p.m. and three other people were reported hurt.

In Jerusalem, an army spokesman confirmed Israeli air force aircraft attacked ''terrorist targets this afternoon north of Damour,'' near the town of Naameh.

The Palestinian source said the jetfighters missed the targeted base in the morning raid. Witnesses said a cloud of black smoke billowed into the sky over the targeted area as guerrillas using anti-aircraft guns opened fire on the warplanes.

But the army spokesman in Jerusalem said ''all targets were hit'' and all of the Israeli aircraft returned to their bases safely.

He added that the targets were used by the Ahmed Jibril organization to organize and stage attacks.

This was the second air raid against PFLP-CG positions and the 10th into Lebanon this year. Israeli warplanes bombed a base for the Palestine Communist Party in the refugee camp of Rashidiyeh, south of Tyre, 46 miles south of Beirut, early this month.

In December 1988, 100 Israeli commandos parachuted from helicopters near the town of Naameh and fought with PFLP-GC fighters.

Eight Palestinians, including a Palestinian guerrilla commander, were killed in the fighting and 15 people were wounded. Also one Israeli officer was killed and three soldiers were wounded.

#90109u1066 04/19/1990 ~United Press International

AMRITSAR, INDIA (APRIL 19) UPI - A powerful bomb believed planted by Sikh militants blew up a crowded bus Thursday in Northern Punjab state and set the vehicle aflame, killing at least 15 passengers and injuring at least 40, police said.

The attack brought to at least 60 the number of people killed in a spate of bombings in different parts of India this month.

Although an unknown Kashmiri Moslem separatist group claimed responsibility for most of the blasts, the government of Prime Minister V. P. Singh has blamed the random attacks on Sikh extremists fighting for independece of Punjab.

Police said the latest explosion occurred aboard a state-owned Punjab Roadways bus around 3 p.m. near Pathankot, a major military garrison town, 75 miles north of the Sikh holy city of Amritsar.

The vehicle was en route from Amritsar to Jammu, the winter capital of the neighboring strife-torn state of Jammu and Kashmir.

The explosion blew the roof off the crowded vehicle and ignited a fire in the fuel tank that engulfed the entire bus, police said.

Thirteen passengers were killed outright and 42 injured, police said. Many of the dead were burned beyond recognition.

The casualties were rushed to a civilian and a military hospital in Pathankot, where at least two more passengers died, police said.

An Indian Army major and a police head constable were among the injured, 15 of whom were reported to be in serious condition.

''It was a horrible sight,'' said police Inspector General Mahal Singh Bhuller, quoting from an official report. ''People with burn injuries were crying for help.''

Police said authorities were certain the bomb was planted by Sikh extremists fighting to create in predominately Sikh Punjab the independent theocratic nation of Khalistan.

More than 7,000 lives have been lost in Sikh violence since 1983. The militants contend that India's 16 million Sikhs require their own nation to escape alleged discrimination by the Hindu-dominated central government.

#90109u1071 04/19/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (APRIL 19) UPI - Czechoslovakia and the Vatican restored full diplomatic relations Thursday at the ambassadorial level, just two days before a visit by Pope John Paul II, reports said.

Relations were broken off - but not officially severed - in 1950 by the

Communist government.

The Communist leadership that ruled Czechoslovkia for more than four decades, until the peaceful ''Velvet Revolution'' of November 1989, was one of the most repressive in the East Bloc against religion.

Scores of priests were jailed, religious orders were banned and the government recognized only the pro-communist ''Pacem in Terris'' - or peace on Earth - clerical group, which the Vatican refused to accept.

In October 1987, the pope said the church situation in Czechoslovakia was ''without parallel in countries with a Christian tradition.''

But since Vaclav Havel became president, full religious freedom has been restored for Czechoslovakia's 10 million Catholics - 68 percent of the population.

Full diplomatic relations between the Eastern European nation and the Vatican were re-established Thursday, said a Vatican statement and a report by the Czechoslovakian news agency CTK.

The Vatican statement said the restoration of relations was decided ''in the imminence of the forthcoming visit of His Holiness John Paul II to Prague, Velehrad and Bratislava.''

''The Holy See and the Federal Republic of Czechoslovakia, desirous of promoting mutual friendly relations, have decided by common agreement to re-establish diplomatic relations, at the level of Apostolic Nunciature for the Holy See, and embassy on the part of the Czechoslovak Federal Republic,'' the Vatican announcement said.

The pope is due to arrive in Czechoslovakia Saturday. The visit to the three cities will last only 33 1/2 hours, but it is of particular important to John Paul because it represents another step forward in his decadelong campaign to re-establish full religious freedom in Eastern Europe.

It will be the first visit by a pope to Czechoslovakia and John Paul's first to a Warsaw Pact country other than his native Poland, which he has visited three times as pontiff.

The Polish pope was the spiritual force behind the success of the Solidarity trade union in Poland, and effort that climaxed with the re-establishment of full diplomatic relations between the Vatican and Poland July 17, 1985.

Relations were then established with Hungary, on Feb. 9. On March 15, the Vatican agreed to establish permanent diplomatic contacts with the Soviet

Union which includes an exchange of ''ambassador at a personal level'' - just short of full diplomatic relations.

In Czechoslovakia between 1973 and 1988, the Vatican was unable to name any new bishops because the government insisted on prior approval, and 10 of the 13 dioceses were without bishops. The first episcopal appointments - a resident bishop and two auxiliary bishops - were announced May 18, 1988, followed by the naming of three more bishops and an archbishop July 26.

After last autumn's revolution, the rest of the dioceses were filled.

On Jan. 23, the new government abolished 1949 laws governing the church and religious affairs in general, which among other things required that priests be licensed by the state and governed the operations of convents, seminaries and monasteries, which were mostly dissolved. The previous month, Pacem in Terris was disbanded.

Czechoslovakia and the Vatican originally established relations in 1919 after the Holy See recognized the Czechoslovak Republic, which was founded the previous year.

The ties were severed after March 15, 1939, when the country was occupied by Nazi Germany, and resumed in September 1945. The Czechoslovak Embassy in the Vatican began functioning Jan. 31, 1946.

In 1949, the Communist government expelled Monsignor Gennario Verolino, etary of the apostolic nunciature, or embassy, in Prague. And the Foreign Ministry ordered Vatican Charge d'Affaires Ottavio De Liva on March 16, 1950, to leave Czechoslovakia within three days.

In April 28, 1950, the embassy was closed and diplomatic ties - while not officially severed - were suspended.

''Now, after the painful interval of the last 40 years, diplomatic relations between the Holy See and Czechoslovakia are being resumed at the highest level,'' the Vatican statement said.

#90109u1098 04/19/1990 ~United Press International

NEW YORK (APRIL 19) UPI - American Express Co. reported Thursday a record $620 million loss in the first quarter, compared with net income of $252 million, or 59 cents a share, in the year-ago period.

"The loss reflects Shearson Lehman Hutton's previously announced net loss, including its restructuring charges, accounting charge, and losses from operations," the company said.

The securities firm Shearson Lehman Hutton Holdings Inc., American Express' financially-troubled subsidiary, Wednesday reported a first-quarter loss of $915 million after taking a $630 million restructuring charge. Shearson's loss compared with a $15 million loss in the year-ago quarter.

Revenues for the quarter rose 18.8 percent to $2.24 billion from $1.88 billion in the opening quarter of 1989. American Express Bank reported a decline in earnings to $30 million from $35 million in the comparable period of 1989.

American Express' other business divisions performed well. Net income at the Travel Related Services rose 16 percent to $215 million; IDS Financial Services earnings rose 21 percent to $44 million; American Express Information Services Co. posted a net income of $22 million, up 27 percent.

"The impact of the Shearson charges is in line with previous estimates," said James Robinson, chairman and chief executive officer. "We have come through a tough quarter and we are looking forward to building on our considerable strength well into the future."

#90109u1118 04/19/1990 ~United Press International

BOISE, ID (APRIL 19) UPI - Estelle Ronneburg went to bed Thursday morning, exhausted from the shock and excitement triggered by new hopes her only child may be freed from captivity in Lebanon after nearly 39 months as a hostage.

Ronneburg, 69, patiently fielded questions from the media throughout the nation Wednesday and early Thursday about the possible release of Jesse Jonathon Turner.

Turner, 42, a former mathematics teacher at Beirut University College, was kidnapped from the campus with two other U.S. professors and an Indian national on Jan. 24, 1987.

The rush of excitement for Ronneburg followed a declaration Wednesday by Islamic Jihad for the Liberation of Palestine that it would release one hostage within 48 hours in response to Syrian efforts and an urgent appeal by Iran.

Along with the dispatch released to a Western news agency in the Moslem sector of the Lebanese capital was a photograph of Turner - fueling Ronneburg's hopes her son would be freed.

Ronneburg said she stayed up until midnight Wednesday answering questions from the media, then arose at 3 a.m. for two interviews with network

television stations. The Boise bank where she works gave her Thursday off.

"I'm going back to bed," Ronneburg said. "I was kind of living on my nervous energy yesterday. This morning it started sinking but my hopes are still high."

Ronneburg said she greeted the news of the possible release Wednesday in "a state of shock." She said a representative from the State Department she spoke with Thursday "seemed a little more hopeful because they had a time frame on it." However, she said the State Department has not confirmed the release.

Turner and Robert Polhill, 55, Alann Steen, 50, and Indian-born Mithileshwar Singh, chairman of business studies at the school, were abducted by armed agents disguised as policemen.

Turner has had three birthdays and missed the birth of his daughter JoAnne, who will be 3 in June. Turner's wife, Badr, a Lebanese native, now lives in the United Arab Emirates. His former wife, Ina Clare Turner, lives in Idaho. His father, John E. Turner, last lived in Chicago but Ronneburg said he has disappeared. "I have no idea where he is, I don't even know if he's alive," she said.

Turner received a bachelor's degree in psychology from Boise State University in 1970, a master's degree in philosophy from the University of Idaho in 1975 and a doctorate in mathematics in 1981 from the UI. He taught at the University of Hawaii, Honolulu, and at California State University, San Bernadino, before taking the job at Beirut University in 1983.

Jim Calvert, chairman of the UI's Mathematics and Applied Statistics Department and Turner's mathematics teacher, said Turner was aware of the dangers in Beirut but opted to stay anyway.

"He didn't think anything would happen to him because he had a lot of friends in the Islamic community and he's not a political person," Calvert said. "He just felt safe.

#90109u1119 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - Rebellious Democrats forced House leaders Thursday to cut defense budget authority in the party's fiscal 1991 budget proposal by an additional $3 billion after rejecting a leadership proposal calling for Pentagon spending authority of $285.9 billion.

The uprising among Budget Committee Democrats surfaced as the panel began marking up Chairman Leon Panetta's budget blueprint for the fiscal year

that starts Oct. 1. Panetta, D-Calif., and members of the House Democratic leadership, including House Speaker Thomas Foley, D-Wash., unveiled the party's spending plan at a news conference Wednesday.

That plan called for a relatively small cut in defense outlays next year - the amount the Pentagon can actually spend in fiscal 1991 - but called for a larger reduction in Pentagon budget authority. Budget authority is the amount the Pentagon can obligate in a fiscal year with actual outlays occurring over several years.

But committee liberals balked at the $285.9 billion Pentagon figure and forced Panetta to revise his defense proposal downward by nearly $3 billion, to $285 billion.

''That's about as high as many of us could support,'' said Rep. Charles Schumer, D-N.Y., one of the Budget Committee liberals who forced Panetta's hand.

He said committee liberals hoping for lower defense spending next year had agreed to a relatively small cut in Pentagon outlays in exchange for a larger cut in budget authority.

But Schumer and others said the $285.9 billion figure initially proposed was still too high. After Democrats on the budget panel caucused late Wednesday, Panetta apparently determined he did not have the votes to pass the higher defense number and revised the figure.

''Leon finally felt he could not get his (budget) out of committee,'' said Rep. Dale Kildee, D-Mich., another committee liberal seeking lower defense spending.

The Democratic leadership proposed Pentagon spending of $295.5 billion next year and $285.9 billion in defense budget authority, which is the amount that can be obligated next year but spent in 1991 and in later years.

That is $8.3 billion less than the $303.7 billion in defense outlays proposed by President Bush and $21 billion less in defense budget authority he suggested.

As the budget panel began its debate, Republicans indicated they could not support the defense budget proposal and viewed it, in the words of Rep. Bill Frenzel, R-Minn., as ''a Democratic exercise'' that is the first step on the path toward a budget summit between Congress and the White House.

''The Republicans obviously are not going to embrace your budget,'' Frenzel told Panetta during opening statements. ''Where we are going to write the (budget) is in some sort of negotiation with the White House

later on. ... We look on this as a Democratic exercise. The sooner we get this exercise over, the sooner we can get to the semifinals and the finals.''

House Democratic leader Richard Gephardt of Missouri praised Panetta's budget for the money he said it would spend to rebuild America after the Cold War.

''The president's budget was and is out of step with the times and what we need,'' Gephardt said.

The panel hoped to complete action on the budget plan later Thursday, and Panetta said it was expected to come up for debate on the House floor next week.

The budget resolution, as the non-binding spending, savings and revenue blueprint is known, is a congressional guideline and does not go to Bush for his signature or veto.

In addition to the defense cuts, the Democratic budget plan would:

-Remove, for the first time, use of the huge Social Security trust fund surplus to mask the size of the deficit.

-Include funds for NASA to build its space station.

-Sharply reduce, from $13.9 billion to $4.2 billion, the cuts Bush proposed in entitlement programs, such as Medicare and federal retirement programs. The Democratic plan would chop Bush's proposed $5.5 billion cut in Medicare to $2.1 billion.

-Provide a 4.1 percent pay raise to federal workers and the military.

The Senate Budget Committee is expected to begin public hearings on its own budget plan next week.

#90109u1128 04/19/1990 ~United Press International

GDANSK, POLAND (APRIL 19) UPI - Solidarity leader Lech Walesa Thursday convened the union's second congress since its rise in 1980, opening a meeting that marked the end of the movement's underground history even as it looses influence among Poles.

As Walesa gaveled the congress to order, some 1,500 bus and tram workers held an occupation strike in the Baltic seaport, forcing its 400,000 residents - including some delegates to the congress - to seek other transportation.

Walesa said it was unfair to stage the strike during the congress and speculated the workers might have been manipulated by their communist union.

''Such things should not be done in a civilized world,'' he said. ''We have the congress of Solidarity and this (the strike) is a dirty trick.''

Walesa also faced problems from dissident Solidarity activists. In the huge Olivia sports complex, where the last congress also was held, dissident activists threw leaflets in the air recalling the union's underground days.

The leaflets charged Solidarity under Walesa wants to form a political ''dictatorship'' to distract public opinion from social and economic problems.

More than 450 delegates from 37 regions were attending the six-day Solidarity congress. The only previous congress of the independent trade union took place in 1981, three months before martial law was declared to quash the movement whose rise in 1980 shook the communist world.

''With this congress, we end the underground and provisional activity'' of Solidarity which was banned for eight years, Walesa said. ''This congress, first of all, will produce a program of action.''

Solidarity Prime Minister Tadeusz Mazowiecki, formerly one of Walesa's top advisers, gave the keynote address at the congress and said Solidarity now closes a long chapter in its history of struggle and ''justified rebellion'' against communist rule.

He acknowledged his government's economic stabilization program, which took effect Jan. 1, had caused hardship. But he said it had virtually stopped triple-digit inflation and that there was an abundance of goods in shops.

''I think despite those hardships, we should see in the determined implementation of this difficult program our chance,'' he said. ''We need to have faith in ourselves.''

Mazowiecki, whose program has become a target of criticism for Walesa, took pains to laud the electrician who jumped over the fence at the Gdansk shipyard to lead the workers' strike that led to the creation of Solidarity in 1980.

''The name of Solidarity will remain, forever in Polish history, linked with the name of Lech Walesa, and I pay tribute to him,'' Mazowiecki said, pausing for applause from the delegates.

Mazowiecki said Solidarity activists have three tasks: to help implement

his difficult economic program, to develop an adequate social policy and to strengthen democracy by electing qualified candidates to local office May 27.

On the international front, he said, the priority was ''permanence of our borders'' - both with Germany and the Soviet Union, where neighboring Lithuania has declared its independence.

''All of us who have grown freom one trunk can say we have won the struggle against totalitarianism, and we will win the struggle for democracy,'' he concluded, to extended applause from the delegates.

After his speech, he went to Walesa and the two most popular men in Poland embraced each other heartily.

But decade after its remarkable birth, Solidarity is in trouble.

Its membership has slumped from 10 million in its heyday to no more than 2 million now, and many Poles say they don't really know what Solidarity represents any more - a mass movement, a union, or a political party.

Many political analysts believe Solidarity has spread itself among too many political priorities as Poland emerges from the last vestiges of totalitarianism and begins taking the hard steps toward democracy.

The major issue facing the congress will be the same one that has dogged Solidarity since its birth - whether it should concentrate on being a trade union or a national political movement.

A growing chorus of voices say Solidarity should step aside and allow new political parties more say in the running of the country.

The congress was preceded by a mass in the 13th Century cathedral in Oliwa in which Cardinal Henryk Gulbinoweicz called the Solidarity movement ''a protest against the irresponsible decision of Yalta,'' the 1945 conference in which the Allied powers agreed to put Eastern Europe into the Soviet sphere after the war ended.

#90109u1129 04/19/1990 ~United Press International

(APRIL 19) UPI - President Bush will hold his second island summit in as many weeks when he meets French President Mitterrand in the Florida Keys today. Last week, Bush met British Prime Minister Thatcher on Bermuda.

Officials in Paris say Mitterrand has left Charles de Gaulle Airport for Florida. The Soviet threats against Lithuania and other European security issues are expected to be on the agenda for discussion.

Today in Moscow, official Soviet television confirmed the the Kremlin has cut off the flow of crude oil to Lithuania as punishment for its refusal to rescind its declaration of independence.

Soviet Foreign Ministry spokesman Gennady Gerasimov was in West Hartford, Connecticut, yesterday. Gerasimov said Soviet President Gorbachev is willing to allow Lithuania to secede as long as it follows constitutional procedure.

The White House and State Department are reacting cautiously to word from Lebanon that an American hostage held for more than three years soon will be released. Reports and sources say the release will come by tomorrow.

The House Budget Committee opens debate this morning on a new five-year spending plan introduced yesterday by top Democrats. The plan is directly at odds with President Bush over the size of defense spending cuts.

Things are looking up for the space shuttle Discovery and the launch of the Hubble Space Telescope. A successful ''hot firing'' of a new hydraulic power unit prompted NASA to move up the launch from next Wednesday to Tuesday.

#90109u1141 04/19/1990 ~United Press International
WASHINGTON (APRIL 19) UPI - The Senate Agriculture Committee tentatively approved a vast increase in farm research spending Thursday, including ten-fold boost in work to find ways to reduce reliance on chemicals.

During a session devoted to writing part of the new farm policy law, the panel also approved language to encourage farmers and the grain industry to offer higher quality grain for sale. The language is less restrictive than the original proposal, which would have barred the blending of good grain with low-quality grain.

"We have moved back from some of the more advanced proposals," said Sen. Kit Bond, R-Mo., an advocate of higher quality grain. "We don't want to make this a penalty bill."

The agricultural research section of the committee's farm bill includes creation of a nonprofit corporation in the Agriculture Department aimed at finding new profit-making crops and encouraging development of industrial uses for them. One well-known example is kenaf, a bamboo-like plant that can be used to make newsprint and other paper products.

Under the committee plan, $40 million a year would be authorized for research into so-called sustainable agriculture practices. Interest in lower-input farming has blossomed due to concern about groundwater contamination by chemical pesticides and fertilizers and interest in finding ways for farmers to save money. The government plans to spend $4.5 million on low-input sustainable agriculture this year.

Alternative agriculture techniques can range from crop rotations and use of natural predators to combat crop pests to less use of farm chemicals or total reliance on organic methods. A recent congressional report said many farmers already use some of the so-called alternative methods.

In addition to greatly increasing the money available for research and education about sustainable agriculture, $10 million would be used to train Extension Service workers on the topic.

The panel also voted to authorize $500 million over the next five years for research to protect groundwater purity, $1.6 billion over five years

for research grants that would be awarded on a competitive basis and $13 million a year on how agricultural practices could prevent global warming. The increase in money for competitive grants would be in line with recommendations from the National Academy of Sciences.

Sen. Tom Daschle, D-S.D., and Bond have devoted energy to improving grain quality standards on the argument the United States could lose customers to competitors who offer cleaner grain. They originally wanted to ban the blending of different grades of grain and to require that high-qaulity U.S. export grain match the standards of competitors.

The final version says U.S. grain should meet cleanliness standards that enhance its competitiveness. The government would have authority to prohibit contamination of clean grain with nongrain substances or unmerchantable grain. The Federal Grain Inspection Service would be encouraged to develop tests for mycotoxins and pesticide residues in grain.

#90109u1144 04/19/1990 ~United Press International

(APRIL 19) UPI - Officials fear as many as 20 people were killed in yesterday's crash of a Panamanian airliner after it ran into a flock of birds and crashed into the Pacific Ocean. A Swiss woman and a French boy survived and were hospitalized.

Attorney General Thornburgh says he'll urge President Bush veto a bill to toughen laws against retail price fixing. The measure won House approval yesterday. Opponents say it will interfere with legitimate business decisions.

Officials discussing German unification in the capital of West Germany say both East and West Germany will eliminate controls along their common border by summer. Officials say it's another step toward eventual unification.

The White House climate change conference concluded with a stormy final session yesterday. U-S officials grudgingly accepted European assertions that immediate action... NOT just more research... is needed to stem global warming.

Witnesses told a panel of the House Foreign Affairs Committee yesterday that illegal immigrants face increasing threats from both the U-S Border Patrol and roving gangs of bandits. Immigrants allegedly face robbery, rape and death at the hands of bandits.

Solidarity opens its annual congress today in a free Poland... a country vastly changed from 1980 when the union first meeting. Three months after the first congress, martial law was imposed and the union officially was

banned.

A vice principal Brick Township, New Jersey, disarmed a shotgun-wielding 15-year-old who took 22 history classmates hostage yesterday. Officials say the boy apparently didn't ''want to go to school anymore.''

#90109u1153 04/19/1990 ~United Press International

BRUSSELS, BELGIUM (APRIL 19) UPI - NATO's top official said Thursday the western military alliance is still needed to guarantee security in post-Cold War Europe because the Soviets retain the ''power to intimidate.''

NATO Secretary General Manfred Woerner said in a speech that the Soviets have a ''preponderance'' of armed forces that will not vanish along with the Berlin Wall that symbolically divided East and West Europe.

''Conflict cannot be prevented by arms control or diplomacy alone,'' he warned. ''The Soviet Union will remain a superpower. It is modernizing its nuclear arsenal both inside and outside its national territory.''

Woerner, a former West German defense minister, said political organizations such as the European Community are needed but cannot replace the military alliance of Western Europe, Canada and the United States.

''The power to intimidate of the Soviet armed forces will remain, even with all Soviet forces back within their national borders,'' Woerner said in his address to the Italian Senate in Rome, copies of which were released at NATO headquarters in Brussels.

''Only the Atlantic collective security system can balance and hedge the preponderance of Soviet power in Europe,'' he said.

NATO has been striving in recent months to portray itself as a stabilizing political - as well as military - force in Europe and Woerner mentioned the organization's role in scientific research and arms control talks.

He stressed, however, that the need for a trans-Atlantic military alliance to balance ''Russia's predominant military might and geography'' remained despite democratic reform sweeping the former East bloc.

''War at the close of the 20th century is so potentially catastrophic that we cannot take its prevention less seriously just because it is now less probable,'' he said.

Arms control agreements, he said, ''can reduce but never disinvent the nuclear weapon.''

NATO is engaged, subtly but unmistakably, in a competition with the European Community and the Conference on Security and Cooperation in Europe for the starring role in the establishment of European security of the 1990s.

Although Woerner spoke of a future for ''all our existing bodies and successes,'' he said the other organizations cannot ''substitute for the trans-Atlantic Alliance in carrying the burdens of stability.''

The 12-nation EC, he said, plays an important political role but ''has no security dimension, nor will it acquire one for the foreseeable future.''

The NATO chief said the 35-nation CSCE, which approved the Helsinki Accords in 1975, cannot guarantee security because it lacks a permanent structure and enforcement capability.

''Only the Alliance can keep the United States and Canada tied to Europe ... and firmly anchor a united Germany in the West in conditions of maximum security for both itself and its neighbors,'' he said.

Some politicians in East Germany, which is preparing to unite with West Germany, suggested the reunited country retain memberships in both NATO and the competing Warsaw Pact, but the idea was shot down by the United Staes and other NATO members.

(APRIL 19) UPI - VIDEO REVIEWS

MOVIES

''Sea Of Love'' - Al Pacino plays a battle-weary, workaholic detective on the trail of a serial killer in this clever, sexy crime thriller. Pacino is Frank Keller, a New York City cop who lives a lonely life, drinks too much, bitter from a broken marriage, drooping in spirit and body. When three murders are linked to a lonelyhearts personal column, Frank and his partner (John Goodman) plant their own message and interview the women who answer in hopes of finding the culprit. Along comes the beautiful Helen (Ellen Barkin), who Frank falls for despite solid evidence linking her to the crimes, making their time together a suspenseful affair - is she cuddler or killer? The who and the why should be obvious, but aren't. It's an entertaining, well-made film and Pacino and Barkin make quite a steamy couple. 1989. 113 minutes. MCA Home Video. Rated R. No suggested retail price.

''sex, lies and videotape'' - An insightful little study of people and their hangups, told with witty optimism by Director Steven Soderbergh in his first feature film, winner of the top prize at last year's Cannes Film Festival. Graham Dalton (James Sprader) is a drifter who gets his kicks by videotaping various women discussing their sexual habits. Graham returns to Baton Rouge to see his old pal John (Peter Gallagher), now a fast-lane attorney, and John's pretty but prudish wife Ann (Andie MacDowell), a far cry from her feisty sister Cynthia (Laura San Giacomo), whom she assumes correctly is having an affair with her husband. Graham talks both women into camcorder sessions that change all their lives. The film's almost all talk, very little action, but nonetheless is an absorbing interlude. 1989. 100 minutes. RCA/Columbia Pictures Home Video. Rated R. $89.95.

''Next Of Kin'' - When the head hitman of a Chicago crime ''family'' rubs out the younger brother of Police Lt. Truman Gates (Patrick Swayze), he buys a big dose of familial trouble. Gates tries to convince his kin back in the Kentucky mountains that the law will catch the killer (a sneering Adam Baldwin), but big brother Briar (Liam Neeson) decides to handle the problem personally and when things go amiss, here comes the whole clan. And, when this ''mountain mafia'' comes calling, it's time for the real hoods to head for the hills. Or at least, the graveyard for a final confrontation. A tad far-fetched, but a well-done action piece with some

nice, unexpected touches. 1989. 95 minutes. Warner Home Video. Rated R. $89.95.

''True Love'' - Well, no one said the course of true love had to run smoothly. It sure doesn't in this pleasing slice-of-life comedy-drama of two young lovers, Donna (Annabella Sciorra) and Michael (Ron Eldrad), who are about to be married. Their Bronx neighborhood's abuzz with plans for a big wedding and elaborate preparations are going ahead full tilt (someone even suggests dying the mashed potatoes ''sky blue'' to match the bridesmaids' gowns). But, Donna and Michael are beginning to wonder if this is such a good idea. Rookie director Nancy Savoca, using a cast of unknowns, has brought forth a pip of a picture. 1989. 100 minutes. MGM/UA Home Video. Rated R. $89.95.

VINTAGE VIDEO

Some of Greta Garbo's finest work is available on home video - including, coincidentally, the release this week of possibly her best film, ''Queen Christina'' - affording generations of movie fans a chance to see what they may have missed, or see again a screen legend who became a myth. When Garbo died a few days ago at 84, nearly 50 years after her final screen appearance, she was still very much the elusive, enigmatic film beauty, called by some the most alluring film figure of all time, whose determined remoteness fed a mystique that grew deeper as time went by. It was in the Oscar-winning ''Grand Hotel'' (1932, MGM/UA) in which Garbo, as a lonely ballerina, seemed to prophesize her destiny with her famous line, ''I want to be alone.'' In ''Queen Christina'' (1933, MGM/UA, $29.95) a radiant Garbo plays the 17th century Swedish queen who stuns her subjects by giving up her throne for love. Her last movie, the 1941 change-of-pace romantic comedy ''Two-Faced Woman'' (MGM/UA $29.25), also is new to video. Others available include her first talkie, 1930's ''Anna Christie,'' ''Anna Karenina'' (1935), ''Camille'' (1936) and the lighthearted ''Ninotchka,'' a hit in hit-rich 1939 in which, as the ads trumpeted, ''Garbo laughs.'' But, two years later, Garbo left.

#90109u1190 04/19/1990 ~United Press International

VIENNA (APRIL 19) UPI - As thousands of East Europeans grow accustomed to wandering freely under the Iron Curtain, many are being encouraged to look at South Africa as the land of hope and promise.

The South African Embassy in Vienna in recent weeks has seen as many as 2,500 people, mainly Hungarians, line up each day for immigration visas. Since the beginning of the year, more than 30,000 have tried to take advantage of South Africa's recent pro-immigration campaign, embassy officials said Thursday.

The flood of East Europeans began after a visit to Budapest in January by South African Foreign Minister Pik Botha. At that time, advertisements and newspaper articles depicted South Africa as a land of money, jobs, citizenship, and natural beauty.

The South African government has offered to pay up to 80 percent of travel costs for skilled workers from Warsaw Pact countries in fields like engineering, mechanics, and computers. But of the applications received so far, fewer than 10 percent are likely to be approved.

Because of the inability of the South African Embassy to cope with the influx of applications, spokesman Wolf Rothkegal gave a series of interviews to the Hungarian media to put the offer from the South African government ''into perspective.''

He stressed that although there are no limits on numbers of immigrants, South Africa does have a demand for certain fields of expertise only. Despite the warnings, 700 people arrived at the embassy last week, a number three times higher than before the raising of the Iron Curtain.

South Africa's apartheid and its accompanying racial tensions do not appear to deter most would-be immigrants as they seek to escape rising unemployment, polluted environments and devastated economies.

The Austrian Anti-Apartheid Movement has condemned the campaign, saying the South African authorities were trying to avoid training blacks for the same jobs and exploiting East Europeans' desire for an improved standard of living.

Rothkegal said it is a case of supply and demand. Certain kinds of professionals are needed now. As long as an immediate demand exists, all people are welcome, he said.

#90109u1200 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - Per capita income increased more in the East, the Midwest and the Rocky Mountain regions than in the country as a whole during 1989, the government reported Thursday. The Commerce Department's Bureau of Economic Analysis said regional per capita income growth exceeded the 1989 national average of 6.5 percent.

In the Mid-Atlantic it grew 7.1 percent; Great Lakes, seven percent; Southeast, 6.7 percent; and Rocky Mountain, also 6.7 percent; and New England, 6.6 percent.

The figures were not adjusted for inflation. According to the Labor Department, consumer prices rose 4.6 percent in 1989. Alaska and Hawaii,

which are not included in any BEA region, saw their per capita income expand at 11.2 percent and 9.1 percent, respectively.

Regional per capita income growth was below the 1989 national average in the Southwest, 6.1 percent; Far West, 5.6 percent; and Plains, 5.5 percent. Per capita income grew faster in 1989 than in 1988 in the Southwest, Plains and Great Lakes regions.

The bureau noted that in a third consecutive year of accelerating growth, per capita income in the Rocky Mountain region - Montana, Idaho, Utah, Colorado and Wyoming - expanded faster than the U.S. average.

Per capita personal income in the Rocky Mountain region grew 5.4 percent in 1988 and four percent in 1987 due to a late recovery in mining, manufacturing and services from the 1981-82 recession. Nevertheless, the region had a 1989 per capita income of $15,316, the nation's second lowest after the Southwest. U.S. per capita income grew 6.6 percent in 1988 and six percent in 1987.

In contrast to the Rocky Mountain region, New England, hit by lower federal defense expenditures, had in 1989 a second consecutive year of decelerating per capita income growth, the BEA said.

New England per capita income advanced 6.6 percent in 1989, down from 8.3 percent in 1988 and 8.6 percent in 1987, and the region's growth barely exceeded the U.S. average, in contrast with well-above-average expansion earlier in the 1980s.

The bureau noted that earnings increases in New England's manufacturing and private service industries in 1989 were the smallest since 1975, and construction earnings fell for the first time since 1975.

Despite the relative slowdown last year, per capita income in New England, at $21,509, was higher than in any other region. Within the region, Connecticut had a per capita income of $24,604, the best among the states.

The region with the second highest per capita income in 1989, at $20,231, was what the Bureau of Economic Analysis calls the Mideast - New Jersey, Maryland, New York, Delaware, Pennsylvania, and Washington D.C.

Third highest regional 1989 per capita income, at $19,153, was registered in the Far West - California, Nevada, Oregon, and Washington. Fourth highest, at $17,387, was registered in the Great Lakes region - Illinois, Michigan, Wisconsin, Ohio, and Indiana.

The Plains - Minnesota, Missouri, Kansas, Iowa, Nebraska, North Dakota, and South Dakota - had in 1989 a per capita income of $16,231. The Southwest - Arizona, Texas, Oklahoma, and New Mexico - had at $15,231 the

nation's lowest regional income in 1989.

The Southeast - Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia - inched up the nation's per capita income pole.

Until 1987 the nation's poorest area, the Southeast's per capita income surpassed the Southwest's per capita income in 1988, and at $15,423 both the Southwest's and the Rocky Mountain's per capita incomes the following year.

Mississippi had the nation's lowest state per capita income in 1989, $11,835, the only state with a per capita income lower than $12,000.

#90109u1229 04/19/1990 ~United Press International

LONDON (APRIL 19) UPI - Four inmates were on the run Thursday after a late night escape from Gloucester Prison in the latest in a series of troubles plaguing Britain's prison system, authorities said.

Prison governor Brendan O'Friel quelled fears, however, that bodies of dead prisoners would be found at Strangeways Prison at the end of the longest jailhouse seige in British history.

He said all inmates at the prison in Manchester, 200 miles northwest of London, had been accounted for but authorities would not be able to search the entire prison until seven protesting inmates surrendered.

Prisoners who originally took part in the protest but later turned themselves in to police had reported dead prisoners were lying in the areas held by the protesters.

O'Friel said at a news conference that families of the holdouts made recorded messages pleading with the prisoners to end their 19-day seige. But he said it had not been decided whether to play the tape for the inmates.

Four Gloucester Prison inmates were at large after they and three others broke through a welded steel roof of a temporary dormitory at 12:30 a.m. Thursday, said spokeswoman Beth Frier of the Home Office, which oversees the nation's 125 penal institutions.

The seven inmates used knotted sheets to descend 20 feet from the prison roof and then pull themselves over perimeter walls, Frier said.

Prison officials captured two prisoners who were injured trying to scale an outer wall at the jail, 104 miles northwest of London. Frier said a

third man was nabbed by police in Gloucester at 4 a.m.

Police were conducting a widespread search for the remaining four inmates, she said. The seven were among prisoners who had recently been transferred from Bristol Prison.

At Strangeways, police have blasted loud sirens, doused inmates sporadically with fire hoses and thrown firecrackers on a part of the prison roof held by the protesters, but the pressure tactics have only elicited defiance from the handful of holdout inmates.

The Home Office's Frier said there have been no formal negotiations since Monday, but added authorities have maintained informal contacts with individual inmates at the wrecked facility.

O'Friel has refused to use force to dislodge the last inmates from the sections of the prison which have been controlled by prisoners since an April 1 uprising to protest overcrowding and poor conditions. The inmates control access to the jail's five main wings.

The Strangeways rebellion sparked disturbances in 10 other facilities. Scores of inmates and some guards have been injured and one inmate was killed in the outbursts, which have inspired public debate about the need to reform the nation's prisons.

WASHINGTON (APRIL 19) UPI - The Food and Drug Administration should strengthen the warning label on the world's most-prescribed sleeping pill to alert consumers to ''serious psychological and behavioral side effects '' a health advocacy group said Thursday.

In a petition filed with the FDA, Public Citizen Health Research Group

claimed the agency received an unusually high number of reports of ''nervous system side effects'' related to Halcion since the sleeping pill was put on the domestic market in December 1982.

Those side effects included amnesia, aggression, anxiety, paranoia, delirium, hallucinations and withdrawal seizures ''up to 45 times more often than other drugs in its class,'' Public Citizen said.

Halcion, or triazolam, made by Upjohn Co. of Kalamazoo, Mich., belongs to a chemical family called the benzodiazepines. It is the best-selling sleeping pill in the world, with more than 11 milion prescriptions filled in the United States in 1988.

''The FDA continues to deny that Halcion is unique. This policy has been disastrous and must be changed,'' said Dr. Sidney Wolfe, director of the Health Research Group, which was founded by Ralph Nader.

Upjohn disagreed, calling Public Citizen's action ''self-serving and medically irresponsible, and unnecessarily alarming to the millions of patients.''

''Halcion is a very safe and effective sleep medication when prescribed and used appropriately,'' said Upjohn spokeswoman Nancy Lassen, noting it is only intended for short-term use.

Public Citizen wants the FDA to make Upjohn include a box warning to doctors and patients on ''the greater number of reports of serious central nervous system side effects'' associated with Halcion than for similar medications, and also noting the drug's ''ineffectiveness'' after two weeks of continuous use.

The FDA said Thursday that it had not received Public Citizen's petition, but said ''concern about the side effects of Halcion is not new and has been discussed publicly in detail.'' Agency officials pointed out that at an open meeting last September, an FDA advisory committee said it found no evidence that Halcion posed a public health threat.

Wolfe said his group obtained internal FDA documents that show the agency ''has known about the problems with Halcion for years.'' One manuscript, written by FDA researchers, indicated Halcion generated more reports of serious central nervous system side effects than similar medicines, Wolfe said.

Upjohn officials contend the increased number of reports of Halcion-linked

side effects are due to recent publicity about violent behavior and death allegedly linked to use of the sleeping pill.

In one case, a judge dismissed charges against a Utah woman who had used Halcion before fatally shooting her mother. Two doctors testified the anti-insomnia drug contributed to the violent act, but Upjohn argued the woman was using other drugs and Halcion was not a factor.

The FDA advisory committee that found Halcion did not endanger public health also recommended the government order Upjohn to change Halcion labels to advise doctors the drug may be more likely to cause amnesia than similar medications.

Lassen said Upjohn is ''in the process of talking with the FDA'' about changing Halcion's labeling to warn of the possibility of amnesia at higher doses.

Upjohn is also ''following up and working to accomplish'' the advisory panel's recommendation that all makers of hypnotic benzodiazepines prepare material to warn patients about possible adverse effects from side effects and urge them to contact a doctor if those occur.

Upjohn discontinued production of its strongest dosage of Halcion pills in late 1988. Company officials said they think much of the amnesia problem stems from people taking Halcion in excessive doses.

#90109u1265 04/19/1990 ~United Press International

WEST HAVEN, CT (APRIL 19) UPI - Immune cells taken from people who received a potential AIDS vaccine appeared able to protect special immune-deficient mice from AIDS infection, a drug company said Thursday.

Researchers at Medical Biology Institute of La Jolla, Calif., removed white blood cells from people who received a experimental AIDS vaccine made by MicroGeneSys Inc. and injected them into mice engineered to contain a human immune system.

Attempts were then made to infect the mice with the AIDS virus, but the immunized white blood cells apparently enabled the animals to fend off infection, MicroGeneSys officials said. In contrast, mice who received white blood cells from unvaccinated people were not protected from infection by acquired immune defciency syndrome, officials said.

"This study is the first and most direct evidence to date that an AIDS vaccine can actually produce a clinically protective immune response in humans," said Franklin Volvovitz, president of MicroGeneSys of West Haven, Conn.

The results, presented to a scientific symposium on AIDS held earlier this month in Keystone, Colo., also point to a new way of studying the ability of human immune cells to fight AIDS infection without exposing vaccinated humans directly to the AIDS virus.

"It's potentially a very important finding," Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases, told the New Haven, Conn., Register.

Fauci said the work was particularily interesting because it looked at the type of white blood cells, called peripheral blood leukocytes, that are the prime targets of the AIDS virus. But he added, "Every animal model has its weaknesses. No one else is doing this kind of experiment."

The MicroGeneSys vaccine, called VaxSyn HIV-1, was the first possible AIDS vaccine to be cleared by the Food and Drug Administration for testing in humans. Since August 1987, more than 200 people have received the vaccine in trials to test its safety.

The vaccine is based on a genetically-engineered form of a protein, called gp160, which is part of the outer coat of the AIDS-causing human immunodeficiency virus or HIV.

Theoretically, one of the best ways to prevent the spread of AIDS would be through vaccination. But because of the complex and rapidly mutating structure of the AIDS virus, most experts predict any widescale vaccine is at least five years away.

Bristol-Myers Squibb Co. of New York has also been conducting human tests of a genetically engineered AIDS vaccine since November 1987. In addition, the FDA last month approved nationwide testing of a post-exposure AIDS vaccine developed by Dr. Jonas Salk, who pioneered the polio vaccine. It is hoped that vaccine, which consists of "killed" AIDS virus, will spur an immune response that will halt or reverse disease progression people already infected with HIV.

#90109u1285 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - With the sting from the tax man's annual bite still fresh, the nation's top tax collector told a House panel Thursday that at least $100 billion in unpaid taxes will slip past the Internal Revenue Service this year.

IRS Commissioner Fred Goldberg said the agency, through its enforcement operations, can expect to recoup only about 20 percent to 25 percent of the so-called tax gap, leaving about $80 billion uncollected.

The tax gap is the difference between the amount of income tax that taxpayers owe and the amount they voluntarily pay.

In a report presented to the oversight subcommittee of the House Ways and Means Committee, the IRS estimated that the individual taxpayer's voluntary compliance rate has slipped from 83 percent in 1973 to 82.7 percent in 1988.

Goldberg said a 1 percent swing in voluntary compliance can increase or decrease tax revenues by as much as $5 billion annually. Among individual taxpayers, the tax gap more than tripled during the same period, according to the IRS report.

Goldberg said much of the shortfall stems from the public's misunderstanding of tax laws rather than from blatant cheating.

''Taxpayers are willing to pay what they owe,'' he said. ''They cannot abide complexity, uncertainty, administrative burdens and hassles with the IRS that may take months or years to resolve.''

He urged Congress to support greater investments in the IRS to modernize its computer system, expand and improve its educational programs and taxpayer services, improve enforcement quality and the effort to simplify tax laws and administrative procedures.

Rep. J.J. Pickle, D-Texas, chairman of the subcommittee, said he thinks the $100 billion annual tax loss is on the conservative side and ''grossly misleading.''

Pickle said the IRS estimate is inaccurate because it does not include missed taxes on income from illegal activities, estate and gift taxes and other tax areas.

''The total amount from all taxpayer non-compliance, reflecting all sources, may actually exceed $200 billion a year,'' he said.

In a report presented to the panel, the General Accounting Office said the IRS tax gap could reach as high as $113.7 billion by 1992. The GAO report said the IRS should improve its non-compliance research to target the types of taxpayers who shortchange the government.

More than half of the $84.7 billion tax gap in 1987, for example, came from four groups: sole proprietors or the self-employed; informal suppliers such as street vendors who work on a cash basis; small corporations and large corporations, the GAO report said.

''The IRS does not have sufficient data to either identify the issues most responsible for the most troublesome pockets of the tax gap or to track how well its programs reduce the tax gap,'' said Paul Posner, the GAO's associate director for tax policy.

#90109u1337 04/19/1990 ~United Press International

MOSCOW (APRIL 19) UPI - The Soviet government Thursday drastically reduced natural gas supplies to Lithuania, stepping up its economic warfare against the Baltic republic to force it to repeal its independence declaration, Lithuanian officials said.

Moscow did not confirm that it turned down the natural gas tap but said it stopped shipping oil late Wednesday to the rebellious republic, where lines of motorists that began forming Monday at gasoline pumps grew longer Thursday.

Government rationing limited each car to 2.6 gallons of gasoline per purchase and by late Thursday afternoon it took as much as four hours to get to the pumps at some stations.

Matuzas Saulus, an economic planning spokesman for Lithuania, said the cutoff in natural gas - about 84 percent of the republic's needs - was far more serious than the oil reductions.

''It can bring Lithuania's industry to a halt in two days,'' he said.

Lithuanian Prime Minister Kazimiera Prunskiene was rebuffed by the Norwegian government in her request for supplies but scheduled meetings with private and state-run oil firms and declared her republic's resolve for secession.

''There is no question of rescinding our declaration of independence,'' Prunskiene said in Oslo, Norway.

The republic depends on the Soviet Union for oil, gas, metal, chemical products, cotton and timber.

White House press secretary Marlin Fitzwater said President Bush began consultations with U.S. allies on ''appropriate responses'' to the Soviet Union.

''He telephoned West German Chancellor Kohl yesterday on this matter. He will discuss it with President (Francois) Mitterrand this afternoon and we will be in touch with all of the Allies either directly or through diplomatic channels in the next few days,'' said Fitzwater, who is accompanying Bush to a meeting in Florida with the French leader.

Saulus, the Lithuanian spokesman, said Moscow was delaying the republic's access to its hard currency reserves that are held in the Soviet capital. He stressed that they were not frozen, but that ''transactions that used to take two to three days have been taking up to two to three months.''

Lithuania has had economic autonomy since January, allowing the republic to hold foreign currency reserves.

Saulus said ''the difficulties have intensified lately'' with the foreign currency. He would not say how much of its hard currency reserves was in Moscow's Vneshtorgbank, but described it as a ''considerable sum.''

Lithuania would have to part with the precious reserves if any country decided to sell it oil to replace that being withheld by Moscow.

The Soviet government shut off oil supplies to Lithuania's sole oil refinery after the republic's parliament rejected President Mikhail Gorbachev's ultimatum to repeal its laws on independence.

Lithuania's bureau of information said Thursday the republic's chief

natural gas supplier, Western Trans Gas in Minsk, Byelorussia, informed Lithuania's gas ministry ''orders had been received to cut off the Minsk-Vilnius gas line beginning at 12 noon.''

Saulus, of the Lithuanian planning commission, confirmed the gas supply had diminished.

Lithuania's information bureau estimated that the Minsk-Vilnius gas line supplies some 15 million cubic meters of the 18 million cubic meters of natural gas that Lithuania consumes daily.

''This decrease in natural gas supply will leave Lithuania only 16 percent of the total it needs per day to function,'' the information bureau said.

It said a second gas pipeline of smaller capacity apparently will not be affected. That pipeline from Slonim in Byelorussia to Vilnius carries about 3 million cubic meters to the republic.

Gorbachev issued an ultimatum April 13 that he would cut key supplies if Lithuania did not rescind, within two ldays, its March 11 declaration of independence and other laws asserting sovereignty. The republic ignored the threat.

In the first confirmation of the crude oil cutoff, official television said Thursday in a one-line report on the midday news, ''The U.S.S.R. ministry of the oil industry reported that last night the pipeline by which oil was delivered to Lithuania from Russia was cut off.''

#90109u1358 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - The Pentagon told Congress Thursday it plans to withdraw up to 15,000 of the 135,000 U.S. troops in Asia during the next three years and will make further ''modest cuts'' over the course of the decade.

Paul Wolfowitz, undersecretary of defense for policy, also told the Senate Armed Services Committee the United States expects to hold only a supporting role in South Korea in the next five to 10 years.

Wolfowitz, who released the adminstration's 10-year military strategy for the Pacific, stressed that reductions in U.S. forces in Asia should be carried out cautiously and in reaction to regional changes.

''Welcome trends we have seen in Europe have yet to transform the security situation in Asia as dramatically as they have transformed the European landscape,'' Wolfowitz said. ''Threats to U.S. interests remain, both Soviet and non-Soviet.''

He noted that the Korean peninsula remains ''one of the most potentially explosive areas in the world.''

In an accompanying report titled ''A Strategic Framework for the Asian Pacific Rim: Looking Toward the 21st Century,'' the Pentagon said it would use a three-phased approach to troop reductions in Asia.

Under Phase 1, covering the next one to three years, ''Our overall force total of 135,000 forward-deployed in Asia will be reduced by 14,000 to 15,000 personnel'' - an 11 percent cut, the report said.

Wolfowitz said that during this phase, the United States will withdraw about 2,000 Air Force and 5,000 ground troops from South Korea, some 5,000 to 6,000 troops from Japan and Okinawa, and another 2,000 from the Philippines.

The United States will also return excess military facilities to the Japanese government, ''particularly those in Okinawa,'' Wolfowitz said.

Phase 2 of the strategy covers the next three to five years, during which the United States will make ''proportionately greater reductions in combat forces'' on an incremental basis ''to ensure that our potential adversaries do not misread our deterrent capability and intentions,'' the report said.

Wolfowitz said the North Korean threat will be re-examined after the first phase and ''we will look at restructuring the 2nd Infantry Division'' in South Korea during the second phase.

The final phase of the strategy covers the next five to 10 years, during which the United States will continue to make ''modest cuts ... as appropriate, given existing circumstances,'' the report added.

''During the third and final phase (1995-2000) we hope to be able to further streamline forces and stablize at a somewhat lower level as circumstances permit,'' Wolfowitz said.

''Specifically in Korea, we anticipate that, by this time, the U.S. forces will be clearly in a supporting role, with the South Korean military in a leading role on the peninsula,'' he said.

In a speech on the Senate floor later, Armed Services Committee Chairman Sam Nunn, D-Ga., said the United States should shift its emphasis in South Korea from infantry units to tactical air and long-range artillery support of South Korean forces.

''This augmented firepower approach should permit a significant drawdown,

over time, of U.S. stationed forces in Korea,'' Nunn said.

ST. LOUIS (APRIL 19) UPI - Ralston Purina Co. said Thursday second-quarter earnings were $91.6 million, or $1.47 a share, up from $90.8 million, or $1.39 a share, in the year-ago period. Sales for the quarter ended March 31 were $1.7 billion, up from $1.6 billion.

Earnings for the six months ended in March were $221.9 million, or $3.52 a share, down 24.4 percent from $293.5 million, or $4.44 a share, a year ago. Sales for the period were $3.6 billion, up from $3.3 billion.

Ralston Purina said earnings for both periods were affected by an after-tax charge of $6.8 million, or 11 cents a share, resulting from the closing of a pet food plant and the settlement of patent infringement litigation related to its pet food business.

The company said the operating profit for its human and pet foods, excluding the charge, was down for the six months, but up slightly for the quarter. Pet foods operating profit declined on higher advertising and promotional spending for new products, as well as flat volume.

In Ralston Purina's other consumer products division, operating profits for Eveready Battery were higher, primarily because of added earnings from a French-based battery manufacturer. Eveready bought the company in second quarter last year.

Operating profit in soy protein products continued to improve on higher volumes and margins.

#90109u1369 04/19/1990 ~United Press International

BOGOTA, COLOMBIA (APRIL 19) UPI - The administration of President Virgilio Barco called on the largest leftist rebel group in the country Thursday to halt attacks on the army to pave the way for peace talks with the government.

The government urged the Revolutionary Armed Forces of Colombia, known by the Spanish initials FARC, to call a cease-fire and retreat to previously agreed camp sites in order to regain credibility damaged by mixing calls for peace with ambushes and kidnapping sprees.

Barco announced a peace plan for the more than 10,000 armed leftist rebels in the country in September 1988, but so far only the April 19 Movement has worked out a deal with the government and handed over its arms.

''The government ... would be ready to begin new dialogues under the condition that the fronts of the FARC gather in sites previously arranged with the government ... for a definite time while a viable process is worked out for the conversion of the FARC into a political party,'' chief government negotiator, Rafael Pardo Rueda, said in a communique published Thursday in Bogota newspapers.

''Only in this way can the government and the country be sure that the advances in the talks and the commitments assumed will not be altered by the continuation of kidnappings, extortion, the holding of the civilian population hostage, and attacks on patrols of the military forces and the police,'' read the communique, directed to the Secretariat of the FARC.

The negotiator also criticized the rebels for refusing to settle on a concrete set of topics for talks, and accused the FARC of reneging on their own unilateral cease-fires.

''Let's not continue with this ambiguity that they declare a cease-fire, but they don't comply and continue killing people and kidnapping,'' Pardo Rueda said. ''There is little doubt that in the context of contemporary politics armed struggle is an anacronism.''

The FARC, the largest Colombian group and the oldest active guerrilla army in Latin America, has negotiated with the government sporadically since the early 1980s, but has never agreed to lay down their weapons.

The FARC emerged in the early 1960s from communist-led self-defense groups formed in rural areas southwest of Bogota during an undeclared civil war in the 1950s.

In Medellin, the drug cartel stronghold 190 miles northwest of the capital thugs hurled a bomb in an upper class residential neighborhood overnight, causing considerable property damage but no casualties, a Defense Ministry source said Thursday.

Also Thursday, the Valle De Cauca state government blamed rampaging drug traffickers on a recent killing spree which has left at least 11 people dead.

In March the cocaine cartels declared a new offensive to halt government anti-drug operations after a three-month lull in cartel attacks. Last week drug cartel terrorists detonated a powerful car bomb in Itagui, south of Medellin, killing 22 people and wounding more than 80 others.

#90109u1395 04/19/1990 ~United Press International
BY VERNON SCOTT

HOLLYWOOD (APRIL 19) UPI - Where are the next generations of film legends like Bette Davis and Katharine Hepburn coming from?

Or have their likes disappeared from movie screens?

Davis and Hepburn were, of course, more than mere stars. They were superlative actresses whose performances often had a stunning impact. Their presence demanded attention, gave substance and quality to their works.

Today, performers of their stature are rare indeed, though Shirley MacLaine and Jane Fonda have demonstrating a similar staying power in an age when the life-span of leading ladies is often prematurely cut short.

There are a few workhorse actress-stars - always putting the actress before the star - who show promise of enjoying long careers. Meryl Streep comes to mind.

But what about other prospects?

One newcomer who would appear to have a chance at making a long-term

impression is Pamela Reed, a New York actress who will be seen in three new movies this year and co-stars in the NBC sitcom, ''Grand.''

Reed has small but strong features: a straight nose, expressive mouth, round face and sad, penetrating eyes. Her hair is short and dark blonde.

Reed currently can be seen in ''Chattahoochee,'' a rough, unpleasant movie of 1950s abuse in criminal mental institutions. Her performance is outstanding.

Later this year she will be seen in ''Cadillac Man'' with Robin Williams, and still later in ''Kindergarten Cop'' with Arnold Schwarzenegger, both comedies.

The TV series and trio of films will make Reed one of the most visible actresses of 1990.

Reed has also performed on stage. She won a Drama Desk Award for her performance in ''Getting Out,'' and appeared on Broadway in ''The November People'' and in Neil Simon's ''Fools.'' She also won an Obie for sustained excellence of performance.

Reed starred most recently on stage as the title character in the world premiere of Ezra Pound's translation of Sophocles' ''Elektra,'' winning unanimous critical acclaim.

With a wealth of experience in classic drama as well, Reed decided two years ago to move to Hollywood and establish herself in movies.

Asked how she accounted for this astonishing flurry of work in such a brief time, Reed laughed and said, ''I paid a lot of money to a lot of people and I went to bed with about 65 guys, and now I'm working.

''I spent many years looking for the casting couch, and I found it. And it works.''

No, seriously.

''Well I auditioned for a lot of jobs and I was fortunate enough to get them,'' she said. ''I took the series first and liked it before I focused in on movies.

''I will do theater all my life, but I had to stop right now for very practical purposes, to be more available to the general public. By doing commercial films and being on TV there's a little more insurance. One has to think about that as an actor.

''You have to consider your career as a whole. Getting my face out there

is a practical consideration. Also, my husband and I want to have a child and an education is expensive. So if there was a chance to do a few films in a row, I wanted to put some money away.

''I've been working as an actress for 15 years and now find that the American dream is coming true. I'm buying a house here in Hollywood.''

Among movie actresses, Reed would most like to pattern her career after Streep or Debra Winger.

She is not exactly new to movies. Reed made her film debut in ''Melvin and Howard'' and played the legendary Belle Starr in ''The Long Riders,'' followed by a co-starring role opposite William Hurt in ''Eyewitness.''

Her other credits include ''Young Doctors in Love'' and ''The Right Stuff'' as well as several television movies, among them ''The Life of Ernest Hemmingway,'' in the role of Mary Hemmingway.

Still, Reed's is far from a household name. Her face is not etched in the public mind. However, her impressive performances and off-beat looks have convinced filmmakers she is something special.

#90109u1407 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - Sen. Sam Nunn, D-Ga., said Thursday the Pentagon should plan on cutting European troop levels by up to two-thirds in five years and suggested the Navy think about making do with as few as 10 aircraft carriers.

The influential chairman of the Senate Armed Services Committee, in a major address laying out his ideas about how U.S. forces should be reorganized in view of the reduced threat, also proposed a greater reliance on reserve forces and suggested informal military cooperation with France.

And Nunn, who in a few days will announce his proposals to reduce the administration's fiscal 1991 defense budget, said cuts proposed by House Democratic leaders are too deep, but are ''within the realm of responsibility.''

The core elements of Nunn's military strategy are:

-Sufficient nuclear forces to deter attack.

-Reduction in troops deployed worldwide.

-Increased emphasis on reserve forces over active duty troops.

-A concept of flexible readiness with high readiness for certain forces that might be needed immediately and lower readiness for other units.

-Greater emphasis on reducing weapons procurement costs while maintaining strong research for technological superiority.

There are currently about 310,000 troops in Europe, mostly in West Germany and the United States has proposed going down to 225,000 in all of Europe with 195,000 in the central area.

''Despite the administration's view that 195,000 U.S. troops in central Europe is a 'floor' below which the United States cannot reduce, that is not the right assumption,'' said Nunn.

''I think we must begin planning for a significantly lower level in the years ahead. I agree with former Secretary of Defense James Schlesinger that we should start planning on a residual force in Europe on the order of 75,000 to 100,000 troops within five years.''

Nunn, noting pressures for housing and other services in Germany and calls for lower troop levels there, added later to reporters, ''I believe the question will be whether that may be too many for the Germans in three or four years.''

France long ago pulled its military forces out of NATO, preferring to chart its own military course in Europe, but recently has started joint exercises with Britain and even West Germany.

Nunn said he was not seeking a formal arrangement with France, but asked, ''Why can't the French and the Americans have occasional exercises involving French ports and airfields?''

He specifically advised the Navy to start thinking of slimming down, saying the money will no longer be available to keep ships operating at Cold War levels.

''The Navy will be faced with choosing between reduced operational tempos, including more ships in reserve status, or a much smaller all-active Navy '' he said.

By making use of reserves, he said, ''I believe the Navy can meet future requirements with between 10 and 12 carrier battle groups.'' There are now 14 such groups.

All the services, he said, will have to decide what their structure in coming years will be. Nunn said his preference is to maintain a larger

force under his flexible readiness concept, which would see units that would be the first to fight equipped with the newest gear and units not designated for early use given the older equipment and manned at less than full strength.

The Pentagon is reviewing the structure of its forces and the relationship between active duty and reserve forces, and Nunn noted that reserve forces save lots of money.

He said the Pentagon should call up reserve units on a regular and routine basis to obviate creation of a perceived crisis by Americans sensitive about infrequent call-ups of reserves.

Pentagon spokesman Pete Wilson said officials had not seen Nunn's speech but added: ''He's a very thoughtful person. We're going through the process of coming up with the '92-'97 budget - and I'm sure that's one question (a reduction in carrier forces) we'll be looking at. We haven't made any final decisions yet.''

#90109u1415 04/19/1990 ~United Press International

KUALA LUMPUR, MALAYSIA (APRIL 19) UPI - Top government officials Thursday lashed out at the United States and refugee groups for claiming Malaysians were denying entry to boat people and forcing them to go to Indonesia.

''The Americans are making us look bad,'' Deputy Prime Minister Ghafar Baba told reporters. ''If they are sincere in helping, then why do they select the best and take them all away?''

There are 13,500 refugees on the island of Pulau Bidong off Malaysia's east coast awaiting screening to determine if they are eligable for refugee status and resettlement. An additional 5,694 refugees housed in the Sungai Besi camp on the outskirts of Kuala Lumpur arrived before screening was introduced and have already been allocated places in the resettlement program.

Court Robinson from the U.S. Committee for Refugees and Lionel Rosenblatt representing Refugees International said Wednesday that 5,661 boat people had arrived in Indonesia since May 1989 claiming they had been towed away from Malaysia despite the government's denials it was practicing a push-off policy.

Boat people arriving on Galang island, Indonesia's refugee facility, say they had been towed out to sea for up to 36 hours by naval and marine police craft after being refused permission to land in Malaysia.

Some boat people said they had been hidden away in forest camps on the

Malaysian mainland before being herded into boats and towed back out to sea.

Responding to the accusations, government officials said Thursday the charges are unfounded and that the boat people left Malaysia voluntarily after being supplied with adequate food and water.

Deputy Foreign Minister Abdullah Fadzil Che Wan denied allegations the country was violating the Comprehensive Plan of Action agreed upon at the International Conference on Indochinese refugees in Geneva last year.

''Our policies are clear,'' Abdullah said. ''We abide by the U.N. declaration on refugees as we are signatories to the CPA.''

Abdullah said some boatpeople had been towed away, but ''this was done at their request. We supplied them with food and fuel because they said they wanted to go to other countries. They were not turned away.''

He repeated criticisms made last week by Prime Minister Mahathir Mohamad that resettlement countries like the United States, Canada, Australia and France were selecting only the refugees who were qualified and had rejected ''the disabled, unqualified arrivals,'' leaving the remainder in Malaysia.

Details of the boat people's plight came to light following protests from the U.S. administration and the United Nations High Commissioner for Refugees who expressed grave concern over Malaysia's policy.

#90109u1441 04/19/1990 ~United Press International

(APRIL 19) UPI - Unions of Eastern Airline's are expressing cautious optimism today about the carrier's future after yesterday's action by a federal bankruptcy judge in New York. Judge Burton Lifland ordered the appointment of Martin Shugrue as Eastern's trustee, stripping Texas Air Chairman Frank Lorenzo of control of Eastern. The move opens the possibility that the long-simmering strike against Eastern may end.

The National Weather Service reports heavy thunderstorms moved through parts of Texas, Arkansas and Oklahoma early today... dropping two or more inches of rain in some areas. Flash flood watches were posted in north and west Texas. Very strong wind gusts toppled trees and damaged several homes in Albuquerque, New Mexico as a line of thunderstorms moved through the area.

French President Mitterrand and West German Chancellor Kohl are calling on the European Community to plan for political and monetary integration by 1993. The two leaders made the appeal in a ''message'' sent to Irish Prime Minister Haughey, who currently holds the rotating E-C presidency. They also say the 12-nation E-C should adopt common policies on defense and foreign affairs.

Houston developer Jerry J. Moore says he's going to build a car museum that will feature a 1933 Duesenberg convertible Victoria custom-built for Greta Garbo. Plans call for a one-thousand-car facility to replace Moore's existing Antique Car Museum. His collection of 650 antique atuomobiles was rated Number One in the world this year for the third year in a row by the magazine Car Collector.

WASHINGTON (APRIL 19) UPI - President Bush has nominated Lt. Gen. Carl Stiner, who commanded the U.S. invasion of Panama, for commander in chief of the elite U.S. Special Operations Command, the Pentagon announced

Thursday.

Stiner, 53, currently commander of the 18th Airborne Corps at Fort Bragg, N.C., will replace Army Gen. James Lindsay, who is retiring as the first commander in chief of the U.S. Special Operations Command.

The command, based at MacDill Air Force Base, Fla., was activated June 1, 1987, and includes the elite of the military - Army Rangers, Green Berets, Navy Sea-Air-Land SEALs, and the Air Force Special Operations Wing.

Stiner told reporters last month that leaks about the Dec. 20 invasion of Panama ''compromised'' the operation and contributed to the deaths of the 23 U.S. soldiers killed.

But Pentagon spokesman Pete Williams later said an investigation found no evidence of leaks to Gen. Manuel Noriega's Panama Defense Forces about the timing of the U.S. invasion.

LONDON (APRIL 19) UPI - Stock prices closed broadly lower in nervous trading on the London International stock exchange Thursday as investors continued to worry over wage demands and inflation.

The blue-chip Financial Times 100-stock index, which fell 8.6 points Wednesday, closed off 21.2 points to 2,184.7. The narrower top 30 industrial average lost 20.4 points to 1,712.2.

Volume amounted to around 491 million shares, compared with 353 million shares Wednesday.

Market watchers said a government report issued Wednesday showing a 1.4 percent increase in British labor costs in February from January and 7.2 percent increase on the year, discouraged investors. Analysts said prices hit their lowest levels since November amid threats of industrial action over wage claims.

The Treasury Department reported the public sector borrowing requiremnt, the most widely used measure of Britain's deficit or surplus, showed a deficit of $2.66 billion in March, compared with a surplus of $1.69 billion in February.

On the corporate news front, B.A.T. Industries fell five cents to $11.52 after its U.S. subsidary BATUS, Inc. announced it will sell its 24-store Marshall Field's department store chain to Dayton Hudson Corp. for $1.04 billion.

B.A.T. Industries put the 130-year-old Chicago department store chain up for sale last September as part of its strategy to evade a $21.7 billion hostile takeover by Sir James Goldsmith.

BTR slipped six cents to $6.67 on news of its continuing attempt to acquire Norton Co., the world's largest manufacturer of abrasives and grinding wheels, despite U.S. opposition.

Concern over high interest rates sent Speyhawk plunging 54 cents to $2.67, while Pearson was down 32 cents to $11.12.

Banks remained troubled by recent comment about the escalating level of domestic corporate debt. NatWest lost 11 cents to $5.32.

NEW YORK (APRIL 19) UPI - Mobil Corp. said Thursday that its chemical company was expanding its production of plastic grocery sacks to keep with a demand that has tripled in the last five years.

Mobil Chemical Co. said it was adding 15 percent to its high density polyethylene sack capacity with four new manufacturing lines at its Temple Texas, plant that will begin operation late this year.

"With this expansion, Mobil is almost tripling its production of plastic grocery sacks since 1985 to keep up with booming demand," said Mobil Chemical vice president and general manager D.J. Bolger.

Mobil said that since 1982 plastic grocery sacks have grown from five percent to 60 percent of the total grocery sack market, which is projected to total 33 billion sacks by the end of 1990.

#90109u1469 04/19/1990 ~United Press International

GENEVA (APRIL 19) UPI - The director general of the World Health Organization said Thursday the United States has advised it will cut off its $78 million annual contribution to the WHO if the Palestine Liberation Organization is admitted as a member of the U.N. agency.

In a press conference, director general Dr. Hiroshi Nakajima of Japan also asked the United States to ease its visa policies regarding AIDS patients.

Nakajima told the WHO news conference he is making ''urgent, informal appeals'' to the PLO - both directly and through Arab channels - to head off a possible confrontation on the subject of membership. The annual world health assembly convenes May 7.

The PLO asked for membership to the health organization last year and the request effectively blocked work at the assembly for most of the 1989 session. The motion was eventually postponed until this year's meeting.

Last week, the PLO renewed its application for full membership.

Nakajima said he had been informally advised by Washington that the regular U.S. contribution to the agency's budget would be withheld if the application was approved.

The United States took the same stand last year.

''Contributions to our regular budget are already running some 7 to 10 percent behind schedule, and if the Americans were to withhold their contribution, then we would see a 30 percent cut in our money available for regular programs,'' Nakajima told the press conference.

''This is a very serious problem,'' he said. ''We should not politicize the WHO, and the PLO knows perfectly well what the problem is. But this is a political issue.''

On another issue, Nakajima said he was ''on the verge'' of naming a director of the agency's AIDS program to replace Dr. Jonathan Mann, who resigned in March after disagreeing with Nakajima over the direction of the program.

The WHO director general appealed to the U.S. government to ease its visa policies regarding people infected with acquired immune deficiency syndrome.

The U.N. agency had threatened at one time to boycott the Sixth World Conference on AIDS, which is scheduled for June in San Francisco, because of visa restrictions impeding entry of AIDS sufferers.

The United States is one of 10 nations that as of December had AIDS-related travel restrictions. Currently, HIV-infected people are barred from travel or immigration in the United States but can obtain waivers allowing them to visit for 30 days.

On Friday, the Bush administration announced the Immigration and Naturalization Service will not require AIDS testing for foreigners planning to attend ''professional, scientific or academic conferences'' judged to be ''in the public interest.''

Nakajima, however, said restrictions should be relaxed even more to cover all AIDS victims and carriers of the disease virus who are seeking to enter the United States.

PUERTO VALLARTA, MEXICO (APRIL 19) UPI - As Mexico maneuvered to gain greater access for its products in foreign markets, 29 key trade and commerce ministers from around the world began two days of meetings Thursday in an effort to draw up the outline of an agreement on liberalizing world trade.

Ministers from nations in Asia, Africa, Latin America, Europe, and North America held four hours of preliminary talks Wednesday to work out an agenda for the Thursday and Friday sessions.

All are members of the General Agreement on Tariffs and Trade, or GATT, and they are aiming to draft an agreement that could successfully conclude the Uruguay Round of international trade talks, which began in 1986 and must be completed by the end of this year.

Mexican President Carlos Salinas de Gortari held an informal dinner for the ministers Wednesday night in Puerto Vallarta, a Pacific resort 375 miles northwest of Mexico City. Mexico, the United States' third largest

trading partner, is expected to seek greater access to industrialized markets for goods from developing countries.

Mexican Commerce Minister Jaime Serra Puche told the Mexican Senate Wednesday that Mexico would not join a common North American market but extolled the virtues of the far-reaching 1988 free trade agreement between the United States and Canada.

Serra Puche noted that in a visit to Mexico last month, Canadian Prime Minister Brian Mulroney stressed the agreement "does not compromise the sovereignty of the two sides" and "does not imply the formation of a common market."

The agreement did not cause Canadian companies to go bankrupt and helped to create 250,000 new jobs, a "clearly positive stimulus for the Canadian economy," Serra Puche said.

Salinas has opened the Mexican economy to imported goods and foreign investment since taking office in December 1988. Now Mexico is seeking better treatment from developed nations for its products.

"With the United States and Canada, great opportunity is being opened, without forming a common market and without giving up sovereignty," Serra Puche said.

Mexican officials have held trade talks in Washington in recent weeks, although the extent of the negotiations has not been made public. Serra Puche said the mechanism for commercial relations between Mexico and the United States would have to based on the "maximum possible import duty reductions" for Mexican exports and to take into account "economic differences between the two countries."

Negotiators have said the meetings in Puerto Vallarta are of an informal nature, although members are aiming to draw up an outline agreement by July. If they succeed, GATT would aim to finalize the agreement in December.

The Uruguay Round has been been highlighted by contentious differences between the United States and the European Community over what the United States calls "outdated" European farm subsidies and EC charges of unilateral protectionism on part of the United States.

Developing countries are concerned with finding adequate access for marketing their products in the developed world and complain that their demands for fair play in trade have been largely ignored.

#90109u1496 04/19/1990 ~United Press International
BRUSSELS, BELGIUM (APRIL 19) UPI - A company headed by a slain ballistics expert linked to the case of an Iraq supergun will be dissolved for security reasons, the man's son told a Belgian news agency Thursday.

Candian-born U.S. businessman Gerald Bull, who is believed by some to have designed parts of what authorities say was a massive gun ordered by Iraq, was found shot to death outside his Brussels apartment in March.

His son, Michael Bull, told the Belga news organizaiton the decision to dissolve Bull's Space Research Corp. was based on the slaying and not the ''so-called story of the delivery of a super-cannon to Iraq, in which we have no role.''

Gerald Bull, a ballistics genius, developed long-range artillery weapons in the 1960s and has been linked in some news reports to steel pipes seized in England last week. The British government says the pipes, bound for Iraq, were to form part of a huge gun.

Space Research Corp. had maintained an office in Brussels since the early 1980s.

''In reality, it never had a principal office,'' his son said. ''It was a family enterprise and we traveled constantly.''

Gerald Bull, 62, was shot twice in the neck and three times in the back on March 22, outside his Brussels apartment, apparently with a silenced pistol. Police said $20,000 was found with his body.

Michael Bull said Space Research Corp. was ''tarnished'' in press reports about the so further work in the defense field would be difficult. He said dissolution of the firm would take place ''as soon as possible.''

Bull declined to discuss affiliates of the firm in other countries, saying his father's slaying made him ''a little apprehensive because we still don't know what lies behind this act.''

#90109u1498 04/19/1990 ~United Press International
WASHINGTON (APRIL 19) UPI - A poll showing that Americans strongly oppose art censorship should ''send a shiver down the spine'' of members of Congress trying to restrict how taxpayer money is spent on arts projects, a liberal advocacy group said Thursday.

Arthur Kropp, president of People for the American Way, released the survey at a news conference, saying the poll also examined the public's attitude toward the National Endowment for the Arts, the federal agency

under fire for funding two art exhibits some consider obscene.

Key findings in the poll included:

-Americans overwhelmingly oppose censorship of controversial art, even if they find it personally offensive, with 93 percent responding that even when they found a piece of art offensive, ''others have the right to view it.''

-When asked whether NEA funds should be cut or whether the agency should have content restrictions placed on its ability to fund projects, 61 percent of the respondents opposed NEA budget cuts or content restrictions and 80 percent support maintaining or increasing the NEA's budget.

-Only 4 percent supported congressional involvement in NEA's funding process, which currently relies on a system of citizen-review panels; 63 percent support leaving artistic decisions to the citizen panels or the NEA itself.

Sen. Jesse Helms, R-N.C., and Rep. Dana Rohrabacher, R-Calif., have been spearheading a drive in Congress to slash federal funding for the Endowment and to place content restrictions on artists who receive NEA grants.

The conservative group the American Family Association, led by the Rev. Donald Wildmon, paid for advertisements in several major newspapers saying the NEA uses taxpayer-funded grants to ''support pornographic and anti-Christian works of art.''

''We hope it (the poll) sends a shiver down the spine of Jesse Helms, Dana Rohrabacher and the Reverend Donald Wildmon,'' Knopp said. ''They're out of the mainstream and we have the evidence to prove it.

''Americans overwhelmingly reject censorship of the arts and they strongly support the NEA.''

The two NEA-sponsored exhibits that have drawn fire are a photographic exhibit by the late Robert Mapplethorpe depicting homosexual eroticism, and one by photographer Andres Serrano showing a crucifix immersed in urine.

Nicholas Tortorello of Research & Forecasts Inc., the market research firm that conducted the poll, said the random telephone survey of 1,200 people was conducted in March, before the most recent flare-up over the Mapplethorpe exhibition in Cincinnati.

''The main objective of this random survey,'' said Tortorello, ''was to elicit opinions regarding the funding controversy. Specifically, we wanted

to learn how the public viewed the NEA and to gauge attitudes toward legislation pending ... as well as how the public views political efforts to restrict the NEA's ability to fund.''

Police in Cincinnati tried unsuccessfully to close the exhibition, and a grand jury indicted the Cincinnati Contemporary Art Center and its director on two obscenity charges. The exhibit received no federal funding.

''In 1980 the Moral Majority tried to put their imprimatur on all forms of expression,'' said Kropp. ''What we're seeing and have seen in the past few years especially is an unrelenting attack on all forms of media.

''We call it a cultural civil war. The tactics used involve demagoguery, distortion, misrepresentation, outright lies, and hopefully what this survey will do ... is show the American public is not buying the line the right is trying to sell.''

#90109u1531 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - The Pentagon said Thursday it has delayed work on a new Lance short-range nuclear missile for Europe and administration officials said consultations were under way with allies about dropping the modernization program.

White House spokesman Marlin Fitzwater, with President Bush in Florida, told reporters the program is under review and is being discussed with U.S. allies but that no decision has been made yet to scrub it.

Bush discussed the matter with British Prime Minister Margaret Thatcher in Bermuda last week and was expected to talk about it at his meeting Thursday in Florida with French President Francois Mitterrand, Fitzwater said.

The New York Times reported Thursday the Bush administration is developing an arms control initiative that would cancel deployment of new short-range nuclear missiles in West Germany, and that the Pentagon ordered the Army Missile Command in mid-March to stop work on the weapon.

''It is true that the Army has delayed the release of the final Request for (contract) Proposals on the follow-on (missile) to Lance,'' Pentagon spokesman Pete Williams said.

The delay, he said, was ordered out of ''concern about the precise nature of the contract. ... We want to look again at the precise technical design of the missile. ... And we want to re-look at the contract in light of a study mandated by Congress on design of the system.''

But, he conceded, ''It's not strictly a design holdup. There's also some questions that Congress has raised about it (the missile).''

''Nonetheless, we haven't made a decision not to proceed with an RFP, a Request for Proposals. We merely pulled it back to modify it some,'' Williams said.

Lance nuclear missiles already stationed in West Germany are expected to become obsolete in the mid-1990s and the administration has proposed replacing them with an updated version of the weapon.

Democratic reforms in Eastern Europe and opposition within West Germany about the basing of new nuclear missiles on its soil, however, have raised questions about the future of the modernized Lance missile.

The Pentagon spokesman declined to confirm or deny the Times report that the administration is developing an arms control proposal that would cancel the placing of new short-range nuclear weapons in Europe.

''The position the United States has on the Lance is an alliance position. Our position is part of NATO's comprehensive concept, which was agreed to at last May's summit,'' Williams said, referring to a meeting of NATO defense ministers.

The NATO defense ministers agreed last May that no decision would be made on stationing the newest Lance missile in Europe until 1992 and that negotiations on short-range nuclear missiles should take place with the Soviet Union after there is an agreement on reducing conventional forces in Europe.

''We are continually discussing these issues with our allies and anything further we might say could only come as a result of such conversations,'' he said. ''We negotiate with our allies privately.''

The issue is expected to dominate the next meeting of NATO defense ministers who will meet near Calgary, Canada, from May 8-10.

#90109u1541 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - The Pentagon doesn't know how much low-level radioactive waste it has generated and needs a uniform system for disposing of the deadly material, Sen. John Glenn, D-Ohio, said Thursday.

Glenn released the findings of a General Accounting Office study of the problem and said he may propose legislation to deal with it after hearing what Defense Secretary Dick Cheney has to say about his concerns.

His interest in the topic was sparked by a 1986 spill of radioactive material at Wright-Patterson Air Force Base - a spill that cost $1 million to clean up.

The GAO study said the military, with a far-flung network of bases, does not have a clear picture of how much low-level waste it has generated. It noted that the Navy, in an attempt to catalog its supply, sent 423 questionnaires to installations seeking information, but just 212 were returned.

''None of the three services has a complete grip of what type and how much ... waste it has generated nor where exactly such waste is buried or stored,'' Glenn said.

He also said that storing the wastes on the base where they are generated increases the chances of an accidental spill.

Although Glenn said he asked the GAO to estimate cleanup costs, the investigators could not because there was no comprehensive list of what wastes existed. But he noted that the costs are likely to be significant and may escalate, citing a small research reactor at Wright-Patterson that will cost $64 million to decommission rather than the $32 million first estimated.

Most of the low-level waste is clothing, cleaning materials, construction materials, tools, filters, filter sludges, lubricating oils and greases.

The wastes are generated in a variety of operations, including work at military medical facilities, research laboratories, weapons labs that deal with depleted uranium shells, and in instruments that use tritium gas.

Because of the problems, Glenn said, the Pentagon should establish a comprehensive low-level radioactive waste disposal program at a senior level within the department.

He noted that the GAO found varying practices among the branches of the armed forces for dealing with the wastes, and said a high-level office could standardize practices and increase safety throughout the military.

#90109u1544 04/19/1990 ~United Press International

VERNON HILLS, IL (APRIL 19) UPI - Scotsman Industries Inc. said Thursday the U.S. Consumer Product Safety Commission has provisionally accepted a consent order agreement to settle claims related to lead levels in water from tank-style water coolers made by a Scotsman subsidiary. Under the agreement, Scotsman would conduct a replacement-refund program for Halsey Taylor tank-style water coolers manufactured before April 1, 1979.

Tests have shown the coolers contribute lead levels of more than 20 parts per billion to the water - a level unacceptable under the Lead Contamination Control act of 1988.

The consent agreement would resolve any claims the CPSC might level under the Lead Contamination control Act to order recall, repairs, replacement or refunds for water coolers manufactured by Scotsman's Halsey Taylor division. Terms of the proposed agreement were published Thursday in the Federal Register for public comment.

The consent agreement will become final if no objections are received by the CPSC within 30 days. If there is an objection during the period, the CPSC will consider it and vote on whether to accept the agreement or to take further action in the matter.

Scotsman said it previously made provisions to cover the expected costs of the replacement-refund program called for in the agreement. The actual cost will depend on, among other things, the number of cooler owners participating in the program. The company said, however, that it believes that the cost of the program will not have any significant adverse effects on its financial condition.

Scotsman is a market leader in the manufacture of commercial refrigeration products, with a primary market focus on the food service industry. The global manufacturing and marketing of ice machines is the largest component of Scotsman's business.

#90109u1560 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - The State Department was sharply and openly critical Thursday of Israeli Prime Minister Yitzhak Shamir for his reported expansion of Israeli settlements in occupied territory.

Shamir, acting as caretaker head of government since the breakup of the National Unity Government partnership with the Labor party, is reported to have stepped up the pace of expanding civilian settlements now that he no longer has to act in concert with his political opponents.

State Department Spokeswoman Margaret Tutwiler said, ''We would oppose such activity.''

Without mentioning his name, she continued with the criticism of Shamir, who refused to join a U.S.-sponsored attempt to establish direct contacts between Israelis and Palestinians in order to have elections in the occupied territories. As a result of his refusal, the unity government fell.

''It would be disappointing that a leadership that was not prepared to go forward on peace, would be prepared to take steps on settlements, which in our view would make it more difficult to develop a meaningful peace process,'' Tutwiler said.

On the specific issue uf the Israeli court decision, which ordered some Jewish settlers to vacate a building they had taken over near the Church of the Holy Sepulcher in Old Jerusalem, Tutwiler said, ''We are very pleased.''

She added, ''It would be best if this incident were concluded as soon as possible.''

#90109u1570 04/19/1990 ~United Press International

KATMANDU, NEPAL (APRIL 19) UPI - Nepal's long-banned political parties took power Thursday in an interim government allowed by King Birendra, who was pressured by a growing wave of pro-democracy demonstrations in the Himalayan kingdom.

Birendra swore in former opposition leader Krishna Prasad Bhattarai, 65, as prime minister in a ceremony in the royal palace installing Nepal's first non-monarchial government in nearly 30 years.

Bhattarai also was appointed to the country's new 11-member Cabinet and administered the oath of office to nine fellow Cabinet members. One member was not present.

Bhattarai was acting president of the newly legalized Nepali Congress Party. Most members of the new government are members of the socialist NCP or communists from the United Left Front alliance.

Bhattarai, now minister of foreign, defense and royal palace affairs, administered the oath of office to the ministers before reporters and others.

The multi-party government was the fruit of weeks of massive pro-democracy demonstrations that began Feb. 18, paralyzing the capital and leaving at least 53 people dead in crackdowns by troops and police.

The protests led the king earlier this week to disband the 29-year-old partyless system that forbade political opposition.

The monarch also authorized opposition parties to form an interim government pending elections, which Bhattarai has promised within a year.

The NCP held power for 18 months after being elected in Nepal's first general elections in 1959 but King Mahendra, father of the present king, dismissed the legislature in December 1960 and introduced the partyless panchayat form of government dominated by the royal palace.

When Mahendra died in 1972, Birendra assumed the throne in the landlocked nation that is home to eight of the world's highest peaks, including 29,028-foot Mount Everest.

India's Prime Minister V.P. Singh sent ''warmest congratulations'' to Bhattarai on Thursday, and pledged his full cooperation in efforts to restore relations battered by a trade and transit dispute.

''Valuing this relationship highly, India desires most sincerely to restore it in its entirety and, going further, to deepen and strengthen it in all areas,'' Singh said.

Relations between the two countries were strained when bilateral trade and transit treaties expired in March 1989 and India closed 13 of 15 border checkpoints used by landlocked Nepal for importing and exporting goods through the Indian port city of Calcutta.

The closures greatly restricted the amount of goods moving in and out of Nepal, resulting in shortages of fuel and other essential commodities, increased inflation and higher unemployment in a country already ranked one of the four poorest in the world.

New Delhi said that it wanted to negotiate a single treaty on trade and transit that would close loopholes it claimed were being exploited by Nepalese businessmen.

But foreign diplomats and Nepalese officials said New Delhi was actually angered by Katmandu's purchase of anti-aircraft guns from China, India's rival for influence in the Himalayan kingdom, and was using the dispute to pressure Nepal to accept it as its sole weapons supplier.

But what was expected to have been a final round of talks earlier this month on two new treaties ended in deadlock.

#90109u1574 04/19/1990 ~United Press International

(APRIL 19) UPI - The American-backed Contra rebels and the Nicaraguan government reached agreement today on an immediate cease-fire in their civil war. The agreement also establishes a formula for the withdrawal of the rebels to so-called ''security zones'' by April 25th... the day the new government of Violeta Chamorro takes power. The formula also provides for the disarmament and demobilization of the Contra forces by June 10th.

The negotiators for the Contras, the outgoing Sandinista government and the incoming Chamorro administration reached agreement on the pact in an all-night bargaining session in Managua. Outgoing President Daniel Ortega had insisted that the Contras disarm by April 25th. But his brother... who also is commander of the military... says he is satisfied with the agreement. The pact will be monitored by the Organization of American States, a U-N verification team and representatives of the nation's Roman Catholic archbishop.

The Lithuanian government says the Soviet Union today ordered a drastic cut in natural gas supplies into the rebellious republic... leaving the region with just about 16 percent of its daily requirement. The Soviets already cut off oil shipment into Lithuania's only refinery. The actions come because of Lithuanian refusal to bow to a Soviet ultimatum to rescind independence laws.

Solidarity leader Lech Walesa called to order the first union congress since martial law was declared to bar its activities on December 13th, 1981. Even as Walesa gaveled the congress to order, about 15-hundred bus and tram workers held an occupation strike in the Baltic seaport city where the delegates gathered. And some delegates threw pamphlets into the air, charging Solidarity with trying to establish what it terms a ''dictatorship'' to distract the people from social and economic problems.

-30- 2030

#90109u1579 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - A bipartisan group of about 100 members of Congress signed a letter Thursday asking President Bush to intervene in the proposed hostile takeover of Norton Co. by Britain's BTR PLC, citing national security interests.

The request for an investigation is an attempt to thwart BTR's $75-a-share $1.64 billion bid for Norton, which employs about 16,000 people in Worcester, Mass.

On Wednesday, Gov. Michael Dukakis, D-Mass., signed anti-takeover legislation requiring companies to elect their boards of directors to staggered terms, only one-third at a time. This would prevent BTR from gaining a majority on the Norton board until two annual meetings are held.

The entire 13-member Massachusetts congressional delegation held a news conference to release their letter to Bush - signed by scores of other members of Congress including Sen. Jesse Helms, R-N.C. - asking for an investigation of the proposed takeover.

''In our collective judgment, there are critical national security and

international competitiveness considerations that require a thorough and careful review,'' the letter said.

''It is absolutely essential, however, that no action of any kind be taken without assuring that there are very carefully developed plans to protect the capability that Norton has pioneered through the years of investment '' it said.

Norton is a Defense Department contractor, supplying radar protection equipment, missile domes, advanced ceramic high technology bearings and ceramic aircraft engine parts. It is also developing a diamond film technology for computer application.

The lawmakers are requesting an investigation under the Exon-Florio Act of 1988, which permits the government to review purchases of American companies by foreign firms. If the Committee on Foreign Investment in the United States, a sub-Cabinet group, concludes the acquisition would threaten national security, the takeover would be prohibited or subsequently nullified.

President Bush has invoked the law once, when he nullified in February the sale of Mamco Manufacturing of Seattle to a military agency of the Chinese government.

#90109u1588 04/19/1990 ~United Press International
HOUSTON (APRIL 19) UPI - Leaders of the seven major industrialized democracies will face a crowded work schedule for the 1990 economic summit but they also will be treated to a country-western extravaganza planned in part by President Bush, conference organizers said Thursday. Summit Director Frederic Malek released the first tentative schedule for the gathering, planned July 9-11 at Rice University in Houston.

The meeting plan includes arrival ceremonies July 9, followed by an afternoon work session and a working dinner. A main plenary session will take place the morning of July 10, followed by a working lunch, a main plenary session and an official dinner. The final day features a morning plenary session and President Bush's presentation of the final communique.

"These are very substantive sessions we are going to have," Malek said. "He (Bush) views it as most important and that we carefully consider the need to have a schedule and venue to set the stage for discussions as substantive as possible."

But Malek said Bush also wants the political leaders from Italy, Japan, West Germany, Canada, the United Kingdom, France and the Commission of European Communities to be able to enjoy Houston during their time in the

city.

For that reason, the schedule includes a working dinner at the Bayou Bend Collection of American Decorative Arts and a second official dinner with the leaders, spouses, and aides at the Houston Fine Arts Museum.

Political leaders who arrive in Houston a day early can attend an extravaganza July 8 that includes a rodeo, barbecue, and country-western entertainment.

"The summit really begins on Monday, and we're leaving it entirely to their discretion as to when they arrive," Malek said. "But we expect some will arrive earlier and will attend."

Details have not been finalized, including the selection of performers, Malek said. But Bush will have the last word. "President Bush is very deeply involved in every aspect of this, I assure you," he said, noting the president wanted a blend of the "southwest flavor" of Houston, his adopted hometown, and the cultural side of the city.

Barbara Bush is planning her own schedule of events for the wives of the delegates, but details will not be announced for several more weeks, Malek said.

The Bushes also have scheduled a "Salute to Houston" event July 11 to thank those involved in planning and organizing the summit. The event will take place at Wortham Center in downtown Houston.

CAIRO (APRIL 19) UPI - Saudi Arabia and Kuwait have agreed to slash their oil output next month if the United Arab Emirates does so, but the UAE has thus far not committed itself to any cuts, oil industry sources said Thursday. News of the agreement triggered a rally on world oil markets Thursday, with prices shooting up about a $1 a barrel in the United States and Europe.

"The information we have is that Saudi Arabia has agreed to cut its

production next month (May) by about 600,000 barrels per day, and Kuwait has agreed to cut its production by about 200,000 barrels per day," one Gulf-based oil industry executive told United Press International.

But the Arab oil industry source said that the Saudi and Kuwait cuts would depend on whether the United Arab Emirates also followed suit. "We understand the United Arab Emirates is the only one of the three who has not given a firm commitment to cut production," the source said. "The Saudis and Kuwaitis have made it clear their cuts will depend on what the UAE decides."

The three are key producers of the 13-nation Organization of Petroleum Exporting Countries, which pumps more than a third of the world's crude oil and attempts to support world prices by limiting its output.

In November, OPEC set an output ceiling of 22 million barrels a day. But because of quota violations, production has been running near 24 million barrels a day. Production over OPEC quotas, especially by Kuwait and the UAE, has caused a global glut of crude oil and a recent 14 percent decline in prices.

Saudi Arabia, Kuwait, and the UAE met in the Saudi Red Sea resort of Jeddah on Tuesday to discuss how to bolster world oil prices in the wake of this overproduction.

Gulf Arab oil analysts said Saudi Arabia, the world's biggest oil exporter was currently pumping about 300,000 barrels a day more than its alloted quota of 5.4 million barrels a day.

A cut of 600,000 barrels a day would mean that the Arab kingdom next month will be pumping 300,000 barrels a day less than it is allowed to produce under its OPEC quota.

Kuwait's apparent offer to reduce its production by 200,000 barrels a day starting next month would still leave the cartel member pumping some 200,000 barrels per day more than its OPEC quota of 1.5 million barrels a day.

The UAE refused to accept a quota at the most recent November meeting of all 13 OPEC oil ministers in Vienna. Its production has been estimated at more than 800,000 barrels over its previous June quota of 1.1 million barrels a day.

In the past, Saudi Arabia has threatened to flood the market with crude, and cause a correspondiong drop in world oil prices, unless OPEC member states agreed to stick to their quotas.

In a related development, Algerian oil minister and current OPEC president

Sadek Boussena Wednesday called for an urgent meeting of OPEC's eight-member monitoring and prices committee May 2 in Geneva. Boussena said the monitoring committee would be enlarged to include all 13 members of the cartel.

"In the face of the persistence of the deterioration registered on the international petroleum market and following consultations taken in recent days, it has been decided to hold May 2, 1990, an urgent reunion of the market monitoring committee of eight, enlarged to include all members of the organization," the Algerian Press Service quoted Boussena as saying in a statement.

"This reunion will examine what measures to take to stop the degradation registered on the market, and to redress prices in order to re-establish them at the level required by OPEC," Boussena said.

Boussena said the next scheduled May 25 Geneva full meeting of all OPEC oil ministers would be postponed until June 26, 1990, "in order to permit the measures envisaged to produce their full effect in the re-establishment of a better equilibrium between supply and demand."

#90109u1612 04/19/1990 ~United Press International

(APRIL 19) UPI - A White House aide says the administration received information through diplomatic channels in Damascus that an American hostage in Lebanon will be freed. In addition, the U-S ambassador to Syria rushed back to Damascus from Bonn where American diplomats are meeting. Sources told Arabic radio in Beirut yesterday that the Islamic Jihad For the Liberation of Palestine would release 42-year-old hostage Jesse Turner a Beirut college professor held captive for more than three years.

East German Prime Minister Lothar de Maiziere called for the Berlin Wall to be torn down within the next few months. In a statement to parliament at East Berlin, the new conservative leader also called for swift reunification, economic liberalization and a drastic reduction of German troops. He says that Soviet troops will remain on East German territory for an interim period.

French President Mitterrand and West German Chancellor Kohl called on the European Community to plan on political and monetary integration by 1993. The two leaders made the appeal in a message to Irish Prime Minister Charles Haughey, who holds the presidency of the 12-nation European Community. The text of the message was revealed hours before Mitterand was scheduled to hold talks in Florida with President Bush on NATO's future.

#90109u1617 04/19/1990 ~United Press International
CHICAGO (APRIL 19) UPI - Grain prices were mostly higher Thursday on the Chicago Board of Trade, although gains were limited by improving weather conditions.

Soybeans were at or near session highs at the close. The market was supported by active trading of soybean meal at steady to firm prices in Rotterdam and weather-related delays in the South American soybean harvest.

A late surge in soybean oil prompted additional buying of soybeans. Commission house demand for oil was based on renewed indications that Pakistan would soon be in the market for vegetable oil.

Corn and wheat were moderately higher in relatively quiet trading. Some new-crop corn made contract highs late in the session.

Commercials dominated the trading in the grains.

The entire floor was pressured by the extended weather from the National Weather Service. It called for above-normal temperatures and above-normal rainfall for much of the Midwest in the 6- to 10-day period.

At the close, corn was up 2 1/2 to 3 3/4, soybeans up 3 1/2 to 6 1/2, wheat up 3/4 to 3 3/4 and oats up 1/4 to 1/2.

JAKARTA, INDONESIA (APRIL 19) UPI - An earthquake registering 6.5 on the Richter scale jolted the Indonesian island of Sulawesi, injuring at least 25 people and damaging a number of buildings, officials said Thursday.

The quake, rocked several town in northern part of Sulawesi Wednesday night and was followed by five aftershocks extending into early Thursday, an official said.

At least 25 people were injured and more than 30 houses and office buildings were severely damaged, the official said.

An official of the Meteorological Institute in Jakarta said that the epicenter was at sea southwest of Gorontalo, some 1,145 miles northeast of Jakarta.

H.A. Mokoginta, a deputy governnor of north Sulawesi province, said the quake was ''strong and frightening'' and last about 12 seconds.

Mogoginta said a quake rocked the area on April 12, damaging scores of houses.

WASHINGTON (APRIL 19) UPI - U.S. industry, led by chemical manufacturers, metal plants and paper mills, discharged at least 4.57 billion pounds of toxic chemicals to air, land and water in 1988, down 9 percent from 1987, the EPA said Thursday.

In its second annual report on toxic pollution, the Environmental Protection Agency said 19,762 industrial plants spewed 2.43 billion pounds of hazardous chemicals into the air, injected 1.22 billion pounds into underground wells, buried 560 million pounds in landfills and dumped 360 million pounds into rivers, lakes and streams.

In addition, 1.1 billion pounds were shipped to treatment or disposal facilities and 570 million pounds were pumped into public sewage systems. EPA officials said those categories were not included in the 4.57 billion-pound total because they were not direct releases to the environment.

The industries emitting the most toxic materials were chemical manufacturers, 2.3 billion pounds; steel and other primary metal plants, 655 million; paper mills, 351 million; transportation equipment, 226 million; and rubber and plastic plants, 184 million.

States with the largest totals were Louisiana, at 715 million pounds; Texas, 596 million; Ohio, 229 million; Florida, 226 million; Indiana, 212 million; and Tennessee, 203 million.

The smallest releases were in North Dakota, 1.2 million; Vermont, 1.6 million; Hawaii, 2.1 million; and South Dakota, 2.4 million.

The most widely released toxic chemicals in 1988 were ammonium sulfate, a salt used in production of fertilizers, 550 million pounds for all types of discharges; hydrochloric acid, 460 million; ammonia, 325 million; methanol, 268 million; toluene, 266 million.

The 4.57 billion-pound total estimate represents the minimum amount of toxic pollution discharged because EPA disclosure requirements cover only

a fraction of all industrial plants and chemicals.

The EPA required 1988 toxic discharge reports only from those facilities releasing more than 50,000 pounds of one of the 332 chemicals included on the agency's ''community right-to-know'' list.

The 332 chemicals are those EPA experts and Congress consider the most harmful to human health or the environment, but many other hazardous substances go unreported.

Similarly, the EPA study does not include discharges from the tens of thousands of smaller facilities that emit less than the 50,000 pounds per year reporting threshhold.

EPA officials noted the list of reportable chemicals has undergone changes since Congress first enacted the Emergency Planning and Community Right-to-Know Act in 1986.

Over the last two years, the agency has removed from the list several chemicals that are released in huge quantities, but which the EPA says do not need to be disclosed because they pose little health or environmental risk.

For example, the agency ''delisted'' sodium sulfate for 1988, a substance that accounted for 12 billion of the 18 billion pounds of toxic chemical releases reported in 1987, the first year the law took effect.

The EPA said that after such low-risk chemicals are removed the total estimate of chemical releases in 1987 was 5 billion pounds.

For 1988, the most accurate total estimate, the EPA said, was 4.57 billion pounds, down 8.8 percent from the corrected 1987 total.

The agency said the reasons for the decrease were not yet clear and did not necessarily indicate a downward trend in pollution.

It said the decline might be attributable to more accurate emission estimates by reporting plants, more recycling of toxic chemicals or simply lower production levels.

#90109u1720 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - Members of a House panel investigating the reliability of the Army's Apache attack helicopter said Thursday the aircraft is a costly ''disgrace'' that is ''riddled with design and maintenance problems.''

''The Apache is another vivid example of rushing a major and outrageously expensive new weapons system into production before the system has been adequately tested,'' said Rep. John Dingell, D-Mich., chairman of the oversight and investigations panel of the Energy and Commerce Committee.

''The reliability and maintainability of this weapon is a disgrace,'' Dingell said.

The General Accounting Office, an independent congressional agency, recommended that plans for buying 132 new Apaches be scrapped.

The GAO said that because of repeated failures of certain parts and problems in maintenance, the Apaches on average are fully capable of flying a mission only about 38 percent of the time.

During the U.S. invasion of Panama, according to testimony, Apaches were disabled by rain and maintenance workers were forced to dry out parts in kitchen ovens to get them flying again.

''Is this the Betty Crocker approach to Apache maintenance?'' quipped Rep. Gerry Sikorski, D-Minn. ''If you've got to use ovens to dry out parts, it really restricts its use ... in the field.''

Rep. Ron Wyden, D-Ore., said the Apache ''is just riddled with serious design and maintenance problems.''

The AH-64 Apache was originally designed as a highly sophisticated attack helicopter for use against Soviet tanks in Europe.

At a cost of $10.5 million each, the Army has already contracted with the McDonnell Douglas Corp. in Mesa, Ariz., for 675 Apaches, with more than 500 of those delivered. At issue is the Army's plan to spend $1.5 billion, already appropriated by Congress, for 132 additional Apaches.

GAO Army issues director Richard Davis told the panel ''the Apache can perform impressively, but too often it is not fully ready to do the job.''

Davis recommended that procurement of the last 132 Apaches be halted and the funds used to upgrade design and supply parts for the existing aircraft, ''in other words, why buy more headaches.''

But Secretary of the Army Michael Stone, who was subpoenaed to the hearing after initially being unwilling to testify, defended the Apache as ''an excellent aircraft. It is a safe aircraft.''

''The Army concedes that we have had serious problems in terms of readiness and maintainability,'' Stone said, adding, ''I am confident that we are making progress in the solution of all of the problems that have been discovered.''

Stone said the Apaches used in Panama flew a total of 250 hours and ''despite the problems ... the mission-capable rate there was still in excess of 80 percent.''

#90109u1726 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - Senate Republican leader Robert Dole said Thursday it was a mistake for the Senate to adopt a resolution he co-sponsored recognizing Jerusalem as the capital of Israel, calling the measure ''dangerous nonsense.''

But Dole, who said the resolution gave Arab leaders an easy excuse to

stifle peace talks, did not call for it to be repealed, saying, ''It is too late to 'unscramble the egg' of the Jerusalem question. The damage is done. The less said about the substance of that issue the better.''

The resolution was introduced March 20 by Sens. Daniel Moynihan, D-N.Y., and Rudy Boschwitz, R-Minn. It acquired 84 co-sponsors, including Dole, by the time it was adopted two days later on a voice vote without being read.

Dole, who returned this week from a Middle East tour during which he and other senators met with leaders of Iraq, Syria, Jordan, Eygpt and Israel, said the resolution needlessly raised a ''highly charged'' issue in the Middle East.

''The issue of Jerusalem is serious business. It is not 'National Silkworm Week' or 'Underwater Breathing Week,''' Dole said on the Senate floor.

''The issue is whether the Senate should be jumping into the middle of an extremely sensitive situation without looking, or even thinking, first. ... These kinds of resolutions, hastily prepared and even more hastily passed, are nonsense - dangerous nonsense. And we ought to do something about it.''

Moynihan had no immediate comment on Dole's remarks, a spokeswoman said. Boschwitz was en route to Washington from Minnesota.

Israel captured East Jerusalem in the 1967 Middle East War and has affirmed the unified city as its capital. The United States recognizes Tel Aviv as the capital, and Dole said he believed America should stick to its position that Jerusalem remain a unified city whose status will be decided by negotiations.

Dole, who has called this year for Congress to consider reducing foreign aid to Israel, said he remained a ''strong supporter'' of the Jewish state.

But he said everywhere he went in the Arab world leaders were angered by the Jerusalem resolution. Dole said the leaders consider the city ''part of their homeland'' and fear that recognition of Israeli sovereignty in East Jerusalem could lead to recognition of Israeli control of the West Bank.

Dole said he was not arguing the point either way, but he added, ''In any case, if the Arab leaders were looking for an excuse to avoid the broader peace issue ... (the resolution) gave it to them on a silver platter.''

Dole said he ''made a mistake'' by co-sponsoring the resolution and by failing to demand more time for its consideration. He said the Bush administration also was at fault for not saying more when contacted by his staff.

''The answer I got was like the answer I get a lot: 'We don't like it, but we're not going to throw ourselves on any swords over this issue,''' he said.

Dole said the resolution was typical of many that are adopted with little thought by the Senate, but are taken seriously by other countries.

''We all know how it works around here,'' he said. ''We carry our resolution ... into the cloakroom. We button-hole every senator who walks in, and push them for an immediate signature. Half the time the signer doesn't even read the text. Most of the time that doesn't matter. This time, it mattered a lot.''

#90109u1765 04/19/1990 ~United Press International

BEIJING (APRIL 19) UPI - Unemployment in China's cities is expected to more than double this year to an estimated 10 million people, forcing Beijing to send 100,000 non-resident workers back to their native countryside, the official press said Thursday.

Two articles in the state-run China Daily newspaper, reporting on mounting unemployment, accentuated the government's concern over the growing ranks of jobless people, increased by an economic austerity program.

The English-language newspaper did not allude to those worries, but officials are known to fear a large pool of unemployed as potential tinder for unrest in China's crowded cities.

In 1990, the China Daily said, ''the number of the country's urban job hunters is expected to exceed 10 million,'' more than double this year's figure.

''According to a recent report of the State Statistics Bureau, the prospects of solving the unemployment problem look rather serious,'' the newspaper said.

The China Daily said the total of urban unemployed reached 4 million last year, an increase of 0.6 percent over 1988, leaving the official unemployment rate at just under 3 percent.

But a Western analyst said the actual unemployment rate is estimated at between 4 percent to 5 percent.

The analyst said the China Daily report cited ''higher figures than we've seen before,'' but pointed out China's jobless estimates do not include its vast ''floating'' population of transients who have moved from the

countryside to cities to seek work.

In a separate report, the China Daily said officials in the capital have decided to send as many as 100,000 people back to the rural areas from which they came ''to provide work for unemployed local residents.''

Gong Shuji, chief of the Beijing municipal Labor Bureau, said exact numbers would be given to local departments by May 30 and would focus on the large number of rural workers in shops, restaurants, factories and construction sites.

The orders will attempt to bar hiring rural laborers from certain jobs to hold them for city residents, Gong said.

The China Daily also quoted an unidentified Labor Ministry official as saying ''the country's policy makers and governments at all levels should lose no time in resolving the increasing number of the urban unemployed.''

China's job market is feeling the pinch of an ongoing austerity program imposed in late 1988 to check double-digit inflation and an overheated economy. Tight money policies have checked inflation, but production has dropped as well, idling millions of workers.

The predicted 10 million urban job seekers in 1990 include 3.78 million who lost their jobs last year as well as 3 million new high-school and college graduates who will be looking for work, the report said.

#90109u1768 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - Census Bureau Director Barbara Bryant defended the beleaguered 1990 decennial census Thursday, predicting the agency will ''complete this work accurately and on time.''

While acknowledging ''some operational problems'' and a ''lower than expected'' mail-back rate, Bryant told a meeting of the House subcommittee on census and population: ''We are convinced none of those (problems) will reduce the ultimate accuracy of the census.''

Bryant testified amid growing concern that major flaws in the $2 billion head count could jeopardize its accuracy and cost some states political representation and hundreds of millions of dollars in federal money.

Bryant said the current response rate of mailed-back census forms is at 63 percent - about 7 percent lower than the bureau had hoped.

But she said the lower-than-expected return rate ''does not mean the census will be less accurate. It only means we will have to work harder to

complete the enumeration. We have the plan and procedures to do that.''

In response to questions, Bryant also told the subcommittee that within the next week the bureau will come to Congress seeking at least an additional $130 million to complete the 1990 census, including a needed $10 million for every percentage point the mail-back response falls below the 70 percent rate.

She said the bureau ''is in hourly contact'' with Commerce Department and Office of Management and Budget officials as well as leaders of the House and Senate Appropriations Committees to come up with more money for the agency.

Rep. Tom Sawyer, D-Ohio, chairman of the subcommittee, agreed with Bryant that hand-wringing is premature and the census is not in ''imminent jeopardy. That simply is not the case.''

But, he said, ''Its quality ... is at risk,'' and ''I am concerned that public confidence in the census has been shaken by problems with the delivery of questionnaires.''

''I am deeply troubled by the low level of participation in the census so far,'' Sawyer said.

Following the hearing, Democratic Party Chairman Ron Brown and a group of Democratic House members sharply criticized the first phase of the census and urged President Bush to take the lead in promoting citizen response.

Brown specifically urged Bush to ''spend five minutes on prime time television urging everyone to fill out their 1990 census form.''

Bush has taped two public service announcements, but Brown said the appearance should be live.

In addition, Brown called on Bush to support the bureau's request for more money to complete the 1990 count.

''In Congress, the Democratic leadership has consistently supported the funding needed to meet the cost of the 1990 census,'' he said. ''It is time now for President Bush to take a leadership position on this critical task.''

Rep. Vic Fazio, D-Calif., head of the party's reapportionment committee, said Republican administrations have had 10 years to prepare for the census. ''Obviously, at this first phase, they are presiding over a failure,'' he said.

Rep. Beryl Anthony, D-Ark., chairman of the Democratic Congressional

Campaign Committee, noted that those most likely to not be counted by the census - the urban and rural poor and minorities - ''are the constituencies the Democratic party has long represented.''

Bryant said only 3 million questionnaires remain undelivered and the agency has already sought to hand-deliver 1.8 million of the 4.8 million census forms returned by the Postal Service as undeliverable.

She said that on April 26, some 330,000 census takers will begin door-to-door visits of the those housing units that have not returned their forms and the process will continue through the summer.

''We expect to start and finish non-response follow-up on time,'' she said.

''We are confident we are going to be do a good census,'' Bryant said. ''We are confident that we will complete this work accurately and on time.''

HOUSTON (APRIL 19) UPI - Cooper Industries Inc. Thursday reported first-quarter earnings rose to $47.4 million, or 43 cents a share, from $38 million, or 37 cents a share, in the first quarter of 1989. Revenues climbed to $1.42 billion from $1 billion in the year-earlier period.

"Our results for the quarter met our expectations," said Cooper Chairman Robert Cizik. "Although all sectors of the economy did not grow equally, the modest overall expansion contributed to higher revenues for many of our businesses."

In addition to volume gains from market growth, revenues increased as a result of contributions from the Champion Spark Plug and Cameron Iron Works operations, which were acquired during 1989.

"We anticipate further earnings increases throughout the rest of the year, provided the economy remains healthy, and we are confident that earnings will continue to climb over the longer term," Cizik said. "We're in a good position to take advantage of improvements in the markets for oil and natural gas exploration, production and transmission equipment."

Cooper Industries is a diversified, worldwide manufacturer of electrical products, tools and hardware, automotive products, and petroleum and industrial equipment.

#90109u1789 04/19/1990 ~United Press International

MANAGUA, NICARAGUA (APRIL 19) UPI - A cease-fire between Contra rebels and the Nicaraguan government went into effect Thursday after the signing of an accord that promised an end to eight years of civil war and the disarming of the rebels by June 10.

Contra leader Oscar Sovalbarro, known as Commander Ruben, Sandinista Defense Minister Humberto Ortega and Antonio Lacayo, the representative of President-elect Violeta Chamorro, signed the detailed agreement Thursday morning after an all-night bargaining session.

''As from 12 noon, April 19, 1990 an effective and definitive cease-fire is established,'' the document said.

The Nicaraguan government and the Contras ''are committed to ceasing all military hostilities, as well as any other kind of operation that could lead to the resuming of hostilities,'' the document added.

There were no immediate reports of fighting from the countryside Thursday afternoon.

In Washington, State Department spokeswoman Margaret Tutwiler said, ''We are very pleased'' with the Nicaraguan agreement. She said the procedures for disarming the Contras will be difficult ''and requires good will'' on the part of all sides.

U.S. Assistant Secretary of State Bernard Aronson arrived in Nicaragua Thursday morning and was scheduled to meet separately with President Daniel Ortega and Chamorro Thursday afternoon.

The document, the signing of which was witnessed by Managua Archbishop Miguel Obando y Bravo, calls for all Contra forces to move into security zones on April 25 and the complete disarmament and demobilization of rebel forces by June 10.

The government will ''withdraw its armed forces, paramilitary and security forces from anywhere within 20 miles of the security zones'' where the Contras will begin to gather April 25, the document said. ''Security forces will in no way obstruct the free movement of the combatants into the security zones.''

Nicaraguan Defense Minister Humberto Ortega, President Daniel Ortega's brother and commander of the military, said he was satisfied with Thursday's agreement.

''The 10th of June is breathing space,'' he said. ''These are technical details. We want peace as soon as possible. Now we have a date. Now we have an end to this war.''

Asked whether he expected about 10,000 Contras to disband and end their eight-year civil war against the Sandinista government, Sovalbarro said, ''I don't think there are any Contras who will not accept this agreement.''

''The one point Dona Violeta (Chamorro) has emphasized is that when she takes office, the disarmament process will be irreversibly underway,'' said Chamorro adviser Alfredo Cesar. Chamorro is scheduled to be sworn in to office April 25.

Sovalbarro, who has headed the Contra negotiating team since talks began in March, said, ''There is no doubt, I represent the Nicaraguan resistance and came to sign the cease-fire in compliance with a mission entrusted by Commander Franklin.''

Israel Galeano, the Contra commander-in-chief known popularly as Commander Franklin, told United Press International last month he supported the agreements signed by Sovalbarro, who he said has decision-making power within resistance.

''What has been signed here is something serious, formal, we are all willing to fulfill what we are signing,'' Sovalbarro said.

The pact, which comes after two days of tense negotiations at the Organization of American States building in Managua, will be monitored by OAS and U.N. verification teams and by representatives of Obando y Bravo.

The seven-member Contra delegation arrived Tuesday from its headquarters in Tegucigalpa, Honduras, for the negotiations.

Under the agreement, the U.N.-O.A.S. International Commission for Support and Verification will transport humanitarian aid to the rebels and their dependents.

One of the things the rebels sought were pledges of reconstruction of some of the war-torn areas of the Central American country, said Aristides Sanchez, a civilian member of the Contra negotiating team.

''We know that Nicaragua is in a serious economic condition,'' Sanchez said. ''We also know that Nicaragua has undergone eight years of civil war. We want to see the reconstruction of the countryside.''

#90109u1810 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - The Senate began work Thursday on a major trade bill that would require President Bush to submit to Congress for its approval any trade agreement with the Soviet Union.

Inclusion of the provision did not signal Capitol Hill opposition to a trade agreement with the Soviet Union, but was included to make certain Bush does not circumvent Congress.

The Senate Finance Committee, in its report, said that the White House could enter, on the basis of a Supreme Court decision, into a trade agreement with the Soviet Union and grant most-favored-nation status without ever seeking congressional approval.

Sen. Lloyd Bentsen, D-Texas, chairman of the Senate Finance Committee, said the provision would eliminate any constitutional question about Congress's role in the trade agreement.

Without it, Bentsen said, any decision to give the Soviet Union or Eastern European countries most-favored-nation status would be ''vulnerable'' to a court challenge, adding, ''It's just not worth the chance to let the lawsuits start flowing.''

The administration has given no indication that it would bypass Congress. But Bentsen noted the possibility of President Bush and Soviet President Mikhail Gorbachev signing a trade agreement at the June summit and pointed out that the United States had recently signed an agreement with Czechoslovakia.

The bill is a compilation of numerous trade and tariff provisions, most of which were approved by the House last year but not considered by the Senate in the final days of the session.

In an effort to provide investors with greater confidence, the measure would make permanent the duty-free status of eligible imports from nations in the Caribbean Basin Initiative. The duty-free status is now set to

expire in 1995.

To provide a greater incentive for tourists to make purchases in the Caribbean, the bill also increases from $400 to $600 the amount of goods that can be brought back duty free. U.S. tourists will also be able to bring home one more liter of alcohol without paying duty or tax.

The measure also imposes sanctions on Burma, banning the importation of teak or other tropical wood cut in that country, and fish and other water animals caught in Burmese waters.

The sanctions are based on Burma's violations of human rights and failure to control the drug trade.

#90109u1828 04/19/1990 ~United Press International

(APRIL 19) UPI - A White House aide says U-S officials received word through diplomatic channels that a U-S hostage in Lebanon will be freed. An Arabic radio report yesterday said the hostage to be freed by tomorrow by a pro-Iranian group will be Jesse Turner, who was kidnapped in Beirut in 1987.

President Bush apparently is taking the hostage release statements seriously. White House News Secretary Marlin Fitzwater says the administration has sent a reception team to Wiesbaden, West Germany. Fitzwater says that in Wiesbaden, ''they have the medical facilities to receive any hostage that might be released.''

Moscow is tightening the screws to get Lithuania to abandon independence from the Soviet Union. There is NO confirmation from the Kremlin that the natural gas tap was turned off, but the Soviet oil ministry says oil stopped flowing. A Lithuanian official says the cut-off in natural gas totals some 85 percent of the Baltic republic's needs and is more serious than oil reductions.

The White House disclosed today that President Bush has begun consulting with allies on U-S retaliation for the Soviet crackdown on Lithuania. Bush warned earlier this week that he planned what he termed ''appropriate responses'' to the Soviet action.

A Pentagon official told the Senate Armed Services Committee today that the United States will make some cuts in Asian troop strength during the next three years. Paul Wolfowitz said that as many as 15-thousand of the 135-thousand U-S troops in Asia will be withdrawn initially and further ''modest cuts'' will be made during the rest of the 1990's.

#90109u1851 04/19/1990 ~United Press International
(APRIL 19) UPI - Nicaragua's U-S-backed Contra rebels and the Sandinista regime agreed today on an immediate cease-fire and a plan to disarm and demobilize the rebels by June 10th. The detailed agreement was signed this morning after an all-night bargaining session. It also calls for withdrawal of Contra forces to so-called ''security zones'' by April 25th.

The House Budget Committee today expects to tackle a five-year spending plan unveiled yesterday by House Democrats. Panel Chairman Leon Panetta says he expects the House Budget Committee to pass the proposal essentially intact later today. The measure puts Democrats on a collision course with President Bush on the size of cuts in defense spending.

Memorial services for Reverend Ralphy Abernathy are scheduled for Sunday evening at his Atlanta church. The 64-year-old civil rights activist and close friend of Martin Luther King Junior died on Tuesday of a heart attack. His headstone will bear the inscription that Abernathy's himself requested... ''I tried.''

The Food and Drug Administration is under fire to strengthen the warning

label on the world's most prescribed sleeping pill. The F-D-A reportedly has received an unsually high number of complaints related to the drug Halcion. Some users complain of side effects like anxiety, paranoia and hallucinations.

The families of the 47 sailors who died in a gun turret explosion aboard the U-S-S Iowa are conducting an anniversary memorial service today in Norfolk, Virginia. The private ceremony is being held on the deck of the World War Two-era vessel and will include the dedication of a plaque with the names of the victims.

#90109u1906 04/19/1990 ~United Press International
LONDON (APRIL 19) UPI - Prime Minister Margaret Thatcher accused two British firms Thursday of failing to alert the government of their plans to supply parts for a giant artillery cannon to be built for Iraq.

Thatcher told the House of Commons that Walter Somers Ltd. and Sheffield Forgemasters did not accurately report their work for Iraq to the Department of Trade and Industry in applications for export licenses.

''If a company wishes to export something which needs an export license, and military equipment does, it is their duty to accurately describe it and apply for an export license for what they are exporting,'' Thatcher said.

''No such application came for a gun or other military application. That is the fault of the companies seeking to export the projects.''

Ian Hogg, an expert on ordnance design and construction, said the weapon formed of steel sections totaling 131 feet is designed to hurl nuclear or chemical shells hundreds of miles, which would put Iran and Israel within Iraq's range.

Walter Somers is under investigation for its part in helping design the seized pipes, which were built by the northern England firm Sheffield Forgemasters.

David James, chairman of the parent company of Walter Somers, has said gear shipped to Iraq by Walter Somers includes hydraulic equipment that could be a recoil system for the gun, items for polishing the inside of a gun barrel and piping that could be used to form barrels for two long-range 13-inch guns.

Member of Parliament Hal Miller said in 1988 he notified the Department of Trade and Industry, the Defense Ministry and a third agency, believed to be intelligence services, of concerns by Walter Somers that hydraulic equipment it shipped to Iraq could form a recoil mechanism for a huge gun.

Miller also ridiculed a claim by MP George Galloway that British authorities seized the steel tubes as a result of information from Mossad, the Israeli intelligence agency.

''The idea that Mossad tipped them off is absolute cock. I told them two years ago,'' Miller said.

Opposition Labor Party leader Neil Kinnock was dissatisfied with Thatcher's statement blaming the two firms.

''That is the most devious evasion. The testimony of Sir Hal Miller of Bromsgrove has shattered the idea that the government did not know over the last two years. I repeat, which minister is to blame?''

Trade Secretary Nicholas Ridley said Wednesday the steel pipes seized by customs agents en route to Iraq were for a gun designed and developed by Gerald Bull, a Canadian artillery expert slain in Brussels, Belgium, last month by unidentifed gunmen.

Bull's Space Research Corp. is being dissolved for security reasons, his son Michael told the Belgian news agency Thursday.

The decision to dissolve was based on the slaying and not the ''so-called story of the delivery of a super-cannon to Iraq, in which we have no role '' Michael Bull said.

Ridley's Department of Trade and Industry, which oversees all exports from Britain, had been silent since the confiscation April 11 of eight steel tubes by customs officials who said the cylinders were for building a 39-inch caliber gun.

Iraq has denied it is building a gun and said the tubes were for a petrochemical complex. It blamed the allegations on an anti-Baghdad propaganda campaign mounted by Britain, the United States and Israel.

The government of President Saddam Hussein was accused in late March of trying to smuggle U.S.-made components that could be used to trigger nuclear devices.

#90109u1915 04/19/1990 ~United Press International

BERN, SWITZERLAND (APRIL 19) UPI - Switzerland has expelled a Soviet

diplomat on allegations of spying and named two other former members of the Soviet mission in Geneva as accomplices, the federal prosecutor's office said Thursday.

The charges against the three involve attempts - apparently unsuccessful - to acquire sensitive technology from the West, a communique from the prosecutor's office said.

None of the three will be permitted to re-enter Switzerland.

The three, who were not named, had already left the country as of Thursday the prosecutor's office said, adding that the two former mission members had been out of the country before charges were brought against them.

''Investigations by the federal and Geneva cantonal (state) police have uncovered illegal activities on the part of certain officials of the Soviet diplomatic mission,'' the prosecutor's office said.

''These activities concerned the acquisition of protected scientific-technical information and related materials from the military and scientific area,'' the communique said.

However, a spokesman for the prosecutor's office said the diplomat was arrested before he could actually acquire the technology in question.

''It didn't come down to a transfer of information,'' he said.

There were no additional details on what type of information and materials was involved.

Switzerland - and Geneva in particular - has been the scene of regular arrests of Soviet and Eastern European agents in the past. The last such affair - also involving a Soviet mission staff member - was four years ago.

(APRIL 19) UPI - TODAY'S PEOPLE:

ALL IN THE FAMILY: Did he make her an offer she couldn't refuse? The New York Daily News says John A. Gotti, the eldest son of reputed Mafia boss John Gotti, is getting married Saturday but the bride's identity is a secret. Under a headline saying ''Gotti Jr. Taking Bride and His Pals Taking the Fifth,'' the News said no one in Gotti's Queens neighborhood was talking for the record, not even the parish priest. The elder Gotti's lawyer, Bruce Cutler, said, ''I can't say anything. I fiercely guard their privacy. I think they should be able to enjoy a happy occasion in private.'' Gotti himself offered only an icy stare when asked about a wedding as he pulled up to his favorite social club. The Dapper Don's brother, Pete, put it this way: ''I don't know nothing about a wedding. Didn't hear about a wedding. Shows how stupid we are. We don't even know about a wedding.'' The younger Gotti works in the trucking business and has had a run-in with the law for brawling. Authorities have told the News his father is grooming him to move into the family business.

McCARTNEYMANIA: Paul McCartney received a big welcome in Rio de Janeiro Wednesday. Hundreds of screaming fans - some of whom had waited all night - were at the airport when McCartney, wife Linda, their four children and 120 members of his entourage landed on a chartered plane. McCartney's tour marks the first time a former Beatle has visited Latin America. Tickets for his Thursday and Friday shows in Rio cost between $6 and $120 and some 300,000 have been sold. Nearly all the major newspapers in the city published special sections and television stations broadcast specials about McCartney and the Beatles.

WINFREY'S FRIEND: The Art Against AIDS fund-raiser in Chicago Wednesday night was especially poignant for Oprah Winfrey. She was supposed to have been working on her new television show, ''The Women of Brewster Place,'' but a personal tragedy compelled her to show up. William Rizzo, vice president of promotions for Winfrey's Harpo Studios and founder of an AIDS support network, died earlier this week. ''I had planned on working tonight,'' Winfrey told the crowd. ''But William Rizzo, we lost him Monday. He fought the good fight. I am feeling his loss a great deal tonight and will be leaving to attend his funeral. In his spirit, I thank you for doing all that you can to help us find a cure for this disease that is taking away a lot of our friends.''

JOCK PRESIDENT: There's a trend toward athletic presidents in South America. Brazilian President Fernando Collor de Mello says he will play in some practice games with his country's national team, which will compete in the World Cup tournament in Italy this summer. Collor de Mello, 40, plans to start training immediately so he'll be in shape to report for practice on May 12. In the past five weekends Collor de Mello, a former national blackbelt karate runner-up, has raced a motorcycle, water skied, practiced karate and judo and run a marathon. Argentine President Carlos Menem also is quite a jock. He has played with his country's national soccer squad, competed with the national basketball team, volleyed with

Argentine tennis star Gabriela Sabatini and driven a race car.

GLIMPSES: Jack Nicholson is a new father. Actress Rebecca Broussard gave birth to their daughter Monday morning at Cedars-Sinai Medical Center in Los Angeles. The baby, named Lorraine Broussard Nicholson, weighed in at 7 pounds, 14 ounces ... Playwright Arthur Miller will receive the 1991 Algur H. Meadows Award for Excellence in the Arts and a cash prize of $50,000 from Southern Methodist University in Dallas. Miller, the author of ''Death of a Salesman'' and ''The Crucible,'' will join Ingmar Bergman, Martha Graham, John Houseman, Mstislav Rostropovich, Merce Cunningham and Robert Rauschenberg as recipients of the award, which is named for an arts patron.

#90109u1955 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - The House Budget Committee voted along party lines Thursday to approve a $1.2 trillion fiscal year 1991 budget blueprint after rebellious Democrats forced deeper defense cuts than their Democratic leaders had proposed.

The Democratic-sponsored budget plan, which the full House is expected to debate next week, could set up a major defense spending confrontation with President Bush, who proposed far more modest defense cuts than congressional Democrats want.

The budget resolution, a non-binding spending, savings, revenue and deficit reduction plan that guides other House committees, passed on a party line vote, with all 21 Democrats supporting it and all 14 Republicans voting no.

The final vote came after the committee rejected on a nearly party line vote of 22-12 the fiscal 1991 budget submitted in January by Bush. Rep. Bill Schuette, R-Mich., was the only Republican to oppose Bush's budget for the fiscal year starting Oct. 1.

Chairman Leon Panetta, D-Calif., of the House Budget Committee, author of the five-year budget plan, acknowledged he may have trouble winning House passage because of continuing Democratic divisions on defense spending.

Only hours after Panetta and House Democratic leaders unveiled their budget plan Wednesday, Panetta was confronted by angry committee liberals. They told him that $286 billion in defense budget authority in the plan for fiscal 1991 was unacceptable.

So Panetta agreed to cut the defense figure $3 billion, to $283 billion, before presenting his plan to the budget panel on Thursday.

''That's about as high as many of us could support,'' Rep. Charles Schumer, D-N.Y., one of the rebellious Budget Committee liberals, said of the $283 billion figure.

That eleventh-hour move won Panetta the liberal votes he needed to win committee passage, but it angered conservative Democrats whose votes Panetta will need next week on the House floor.

Asked if the budget plan would pass the full House, Panetta said, ''I don't think anybody knows right now....It's going to take some work - a lot of work.''

One conservative Democrat, Rep. Jerry Huckaby of Louisiana, said the lower defense figure demanded by liberals ''gives a lot of us conservatives real heartburn'' and said full House passage ''will be close.''

He said Panetta, meeting with conservative Democrats Thursday, stressed that the lower defense number was merely an neogtiating position that probably would not survive an eventual House-Senate conference committee.

Rep. Bill Frenzel, R-Minn., the budget panel's ranking Republican, said Panetta's budget plan was merely ''a Democratic exercise'' to stake out a negotiating position for an expected budget summit between Bush and Congress later this year.

Panetta and the House Democratic leadership on Wednesday proposed Pentagon spending of $295.5 billion in fiscal 1991 and $285.9 billion in defense budget authority, which is the amount that can be obligated next year but spent in 1991 and in later years.

Panetta cut the budget authority number to $283 billion. The totals are about $8 billion less than Bush's proposal for $303 billion in defense outlays and $24 billion less than he defense budget authority proposal.

During committee debate, every significant amendment to Panetta's budget plan was defeated, including liberal efforts to slash up to $6 billion more from the Pentagon and conservative efforts to trim back the plan's $6 billion for additional domestic spending in science, transportation, education and health.

Panetta's budget would reduce the budget deficit to $63.8 billion in fiscal 1991 - just under the Gramm-Rudman balanced budget law's $64 billion deficit target.

In addition to the defense cuts, the Democratic budget plan would:

-Stop using the huge Social Security trust fund surplus to mask the true size of the budget deficit.

-Include funds for NASA to build its space station.

-Sharply reduce, from $13.9 billion to $4.2 billion, the cuts Bush proposed in entitlement programs, such as Medicare and federal retirement programs. Panetta's budget would chop Bush's proposed $5.5 billion cut in Medicare spending to $1.7 billion.

-Provide a 4.1 percent pay raise to federal workers and the military.

The Senate Budget Committee is expected to begin public hearings on its own budget plan next week.

#90109u2052 04/19/1990 ~United Press International
(APRIL 19) UPI - President Bush is talking with U-S allies on his response to the Soviet Union's intimidation of secession-bent Lithuania. White House spokesman Marlin Fitzwater says Bush is notifying allied leaders of possible step the United States may take to retaliate for a Soviet crackdown on Lithuania.

Lines of cars grew longer at gas pumps in Lithuania today after Moscow cut off supplies of oil and natural gas. Lithuania's prime minister was NOT able to get a promise of help from Norway. A government official also said Moscow is delaying the republic's access to its hard currency reserves, which are held in the Soviet capital. He stressed that the reserves were NOT frozen, but that ''transactions that used to take two to three days have been taking up to two to three months.''

A State Department ''reception team'' is being sent to Wiesbaden , West Germany, in case a pro-Iranian group releases an American hostage in Lebanon. A newly freed hostage would go first to medical facilities in West Germany. A White House spokesman says the administration has statements of an imminent release from Islamic Jihad for the Liberation of Palestine and from Syria. But Marlin Fitzwater says there is NO way of knowing that a U-S hostage will be freed tomorrow, as reports indicate.

The U-S-backed Contra rebels and the Nicaraguan government have agreed to an immediate cease-fire. After an all-night bargaining session, the two sides today signed a detailed agreement to disarm and demobilize the Contras by June 10th. President Daniel Ortega had insisted on disarmament before Violeta Chamorro succeeds him on April 25th.

#90109u2066 04/19/1990 ~United Press International

BEIRUT, LEBANON (APRIL 19) UPI - A pro-Iranian group said Thursday it would delay the promised release of one of three American hostages because Washington had not followed the group's demand that a key State Department official be dispatched to Syria.

The Islamic Jihad for the Liberation of Palestine had said Wednesday that it intended to free one of its captives within 48 hours provided that U.S. Assistant Secretary of State John Kelly arrived in Syria before the end of the deadline.

''Concerning the release of an American hostage, preparations were set to be finalized, but the failure of Kelly to cooperate stumbled the process '' the organization said in a hand-written statement delivered to the An-Nahar newspaper in Beirut.

''We have decided to delay the release until the situation is clarified,'' it said.

Secretary of State James Baker had said in Washington Wednesday that Kelly was traveling in Europe and that ''the Middle East is not on his agenda.''

The Jihad statement Thursday was accompanied by a Polaroid photograph of U.S. hostage Robert Polhill, 55, looking grim-faced and defeated.

The group had attached a photograph of Polhill's American colleague, Jesse Turner, to its statement released Wednesday. The two former professors at Beirut University College were abducted along with American teacher Alann

Steen on Jan. 24, 1987.

The group did not say in its communique Thursday that it was delaying the release indefinitely and stressed that Kelly should now be sent to Syria. It also asked that Syria's Chief of Intelligence in Lebanon, Brig. Ghazi Kenaan, be sent to Beirut to ''settle the issue'' after Kelly arrived in Damascus.

Observers said the captors were implying they were not seeking to embroil Kelly in the detailed mechanics of the release.

President Bush, at a Thursday afternoon news conference with French President Francois Mitterrand in Key Largo, Fla., replied to a reporter's question by saying he had not heard of the latest communique from the Jihad group but reiterated that U.S. policy was not to negotiate with terrorists or hostage takers.

''I hadn't heard the connection with Ambassador Kelly, but I think the U.S. position is clear, we do not meet demands,'' Bush said. ''We've been disappointed before, hopes raised only to have them dashed by excessive speculation.

''I would add that we are not talking to the hostage holders,'' he said. ''I would further add that we are grateful to Syria for trying to play a constructive role in what is going on.''

Bush said he couldn't ''think of anything'' that he could say that would help the situation.

Syria had backed up the Jihad group's original statement by announcing Thursday that preparations were under way for the release of a Western hostage on Friday.

The United States had reacted to the announcement by dispatching a hostage reception team to Wiesbaden, West Germany and by sending back to Damascas the U.S. Ambassador to Syria, Edward Djerijian, who had been attending a meeting with Kelly in Bonn, West Germany.

White House press secretary Marlin Fitzwater said Thursday the State Department had sent the reception to team to Wiesbaden, ''where they have the medical facilities to receive any hostage that might be released.''

In a Damascus Radio broadcast Thursday, Syria said preparations for the hostage release ''is the strong evidence that the U.S.-Syrian relations have now become more important and serious than ever before.''

It also said Syria played ''an important role'' in previous hostage releases and prevented kidnappers from carrying out threats to execute

more hostages after the execution of Lt. Col. William Higgins.

The Jihad said a message would be sent to President Bush regarding the hostages, but it did not elaborate.

In the past, the Jihad has repeatedly called for freeing some 400 Arabs imprisoned in Israel.

(APRIL 19) UPI - West and East Germany may be heading for an economic showdown. In his first official speech since he took office on April 12th, East German Prime Minister Lotharde de Maiziere today insisted on a one-to-one currency exchange rate when the two countries merge. The stand is the first major disagreement with the conservative-led West German government.

Reports from Prague indicate that the Vatican and Czechoslovakia restored full diplomatic ties and are exchanging ambassadors. Relations were broken off, but NOT officially severed, in 1950 by the Czech Communist government. Since Vaclav Havel became president, full religious freedom has been restored to some 10-Million Czech Roman Catholics, about 68 percent of the population.

Eastern Europe and the post-Cold War role of NATO will headline the topics that President Bush and French President Francois Mitterrand will discuss today in the Florida Keys.

WASHINGTON (APRIL 19) UPI - U.S. industry, led by chemical manufacturers, metal plants and paper mills, discharged at least 4.57 billion pounds of toxic chemicals to air, land and water in 1988, down 9 percent from 1987, the Environmental Protection Agency said Thursday. However, the EPA said the reasons for the decrease were not yet clear and did not necessarily indicate a downward trend in pollution.

In its second annual report on toxic pollution, the EPA said 19,762 industrial plants spewed 2.43 billion pounds of hazardous chemicals into the air, injected 1.22 billion pounds into underground wells, buried 560 million pounds in landfills, and dumped 360 million pounds into rivers, lakes, and streams.

In addition, 1.1 billion pounds were shipped to treatment or disposal facilities and 570 million pounds were pumped into public sewage systems. EPA officials said those categories were not included in the 4.57 billion-pound total because they were not direct releases to the environment.

The industries emitting the most toxic materials were chemical manufacturers, 2.3 billion pounds; steel and other primary metal plants, 655 million; paper mills, 351 million; transportation equipment, 226 million; and rubber and plastic plants, 184 million.

States with the largest totals were Louisiana, at 715 million pounds; Texas, 596 million; Ohio, 229 million; Florida, 226 million; Indiana, 212 million; and Tennessee, 203 million. The smallest releases were in North Dakota, 1.2 million pounds; Vermont, 1.6 million; Hawaii, 2.1 million; and South Dakota, 2.4 million.

The most widely released toxic chemicals in 1988 were ammonium sulfate, a salt used in production of fertilizers, 550 million pounds for all types of discharges; hydrochloric acid, 460 million; ammonia, 325 million; methanol, 268 million; and toluene, 266 million.

The 4.57 billion-pound total estimate represents the minimum amount of toxic pollution discharged because EPA disclosure requirements cover only a fraction of all industrial plants and chemicals.

The EPA required 1988 toxic discharge reports only from those facilities releasing more than 50,000 pounds of one of the 332 chemicals included on the agency's "community right-to-know" list.

The 332 chemicals are those EPA experts and Congress consider the most harmful to human health or the environment, but many other hazardous substances go unreported.

Similarly, the EPA study does not include discharges from the tens of thousands of smaller facilities that emit less than the 50,000 pounds per year reporting threshhold.

EPA officials noted that the list of reportable chemicals has undergone changes since Congress first enacted the Emergency Planning and Community Right-to-Know Act in 1986.

Over the last two years, the agency has removed from the list several chemicals that are released in huge quantities, but which the EPA says do not need to be disclosed because they pose little health or environmental risk.

For example, the agency "delisted" sodium sulfate for 1988, a substance that accounted for 12 billion of the 18 billion pounds of toxic chemical releases reported in 1987, the first year the law took effect. The EPA said that after such low-risk chemicals are removed the total estimate of chemical releases in 1987 was five billion pounds.

For 1988, the most accurate total estimate was 4.57 billion pounds, down 8.8 percent from the corrected 1987 total, the EPA said. The federal agency said the decline might be attributable to more accurate emission estimates by reporting plants, more recycling of toxic chemicals or simply lower production levels.

JERUSALEM (APRIL 19) UPI - The underground leadership of the Palestinian uprising issued an unprecedented execution order Thursday against an Armenian who allegedly turned over an Old City Christian quarter house to Jewish settlers.

But the Unified Leadership of the Uprising said the order issued against Martyros Matossian would not be carried out for an ''unspecified time.''

In a statement to the Jerusalem Post, relatives of Matossian said the Armenian believed he had given over his lease to a Christian Arab and his family was ''chased out of the house at gunpoint by alleged security men'' on April 11.

The Palestinians believe Matossian turned over the lease knowing that 150 Jewish settlers would occupy the 72-room building.

The Jewish occupation prompted demonstrations by Moslems and Christians, including the Greek Orthodox patriarch whose church owns the property, known as St. John's hospice. A district court ordered the eviction of the settlers, who have appealed the decision to Israel's High Court Thursday.

If the court upholds the eviction order, it is not expected to be carried out until Friday at the earliest. The house is around the corner from the Church of the Holy Sepulchre, one of Christianity's holiest sites. Police continued to guard the house. The settlers have said they will obey any court order.

In its latest leaflet issued Thursday, the underground leadership of the 28-month-old Palestinian uprising declared April 22 a day of Jerusalem and called for a general strike to protest the Jewish settlers' occupation of

the house. The leaflet called for Moslem-Christian solidarity ''in the capital of the state of Palestine in the face of the aggressors.''

''On this occasion, the Unified Command of the Intifada (Uprising) declares that it issued the execution order against so-called Martyros Matossian and others whom their names will be declared,'' the leaflet said. ''This sentence will not be applied for an unspecified time.''

The naming of a specific person for execution is an unprecedented move by the Unified Command, also known as the Unified Leadership.

At the same time, the leaflet also cautioned Palestinian strike forces against killing suspected collaborators unless ''such orders are issued by the higher bodies,'' apparently a reference to the Unified Leadership and the Palestine Liberation Organization.

The Labor and Likud parties met separately Thursday to evaluate their positions after more than a month of intense political manuveuring to form a coalition government. In a surprise announcement, Avraham Verdiger, a member of the ultra-orthodox Agudat Israel Party, said he had signed an agreement with Labor, giving the center-left party 60 seats in the 120-member parliament.

Verdiger and a fellow party member thwarted Labor's effort to form a coalition government last week by refusing to support the party at the last minute.

Labor's agreement with Verdiger, who had reservations about Labor's commitment to pursuing the peace process, promised elections before Israel would give up any territory.

In the occupied Gaza Strip Thursday, soldiers shot and wounded 13 during clashes, Palestinian sources said.

NEW YORK (APRIL 19) UPI - Assets of the nation's 508 money market mutual funds decreased $1.25 billion to $388.60 billion for the week ended Wednesday, the Washington-based Investment Company Institute reported Thursday.

The institute said broker-dealer fund assets increased $237.3 million to $165.32 billion, assets of general purpose funds fell $467.3 million to $133.05 billion and institutional fund assets decreased $1.02 billion to $90.23 billion.

"With short-term interest rates continuing to hold fairly steady, the overall change in money market fund assets held in individual accounts was small," said Dr. Jacob Dreyer, vice president and chief economist at the institute.

"Massive flows of individual tax payments and refunds, typical for mid-April, also had no discernible effect on money market fund assets. On the other hand, money market fund assets held in institutional accounts dropped over $1 billion, most probably in response to an abrupt rise in the federal funds rate."

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization, of Holliston, Mass., said that average seven- and 30-day simple yields on money market funds were unchanged at 7.69 percent and 7.68 percent, respectively. The average maturity of fund portfolios declined to 44 days.

The Bank Rate Monitor, of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions were mixed in the latest week.

The Monitor's index of average rates: money market deposit accounts, 6.06 percent, down from 6.07; Super-Now accounts, 5.0 percent, unchanged; six-month certificates of deposit, 7.71 percent, up from 7.70; one-year CDs, 7.79 percent, unchanged; 2 1/2-year CDs, 7.81 percent, unchanged; and five-year CDs, 7.85 percent, unchanged.

The average rate for a one-year adjustable-rate mortgage was 8.57 percent, down from 8.58.

Average rates on 15- and 30-year fixed-rate mortgages moved up in the latest week, to 9.94 percent and 10.11 percent, respectively. Corresponding rates were 9.91 percent and 10.08 percent a weak earlier.

The average rate for a four-year automobile loan was 12.24 percent, up from 12.23.

PANAMA CITY, PANAMA (APRIL 19) UPI - Rescue crews found the wreckage of a twin-engine plane Thursday that crashed into the Pacific Ocean on its way to Panama City, presumbaly killing 20 of the 22 people on board, authorities said.

Civil Aviation President Jaime Fabrega said divers found the Twin Otter Thursday afternoon a mile from the tourist resort island of Contadora and began extracting bodies from the wreckage.

Two survivors from the Wednesday morning crash of Aeroperlas Flight 451 were recovering in a Panama City hospital. No other survivors have been found, and authorities say they believe the 22 other passengers and crew members on board the plane perished.

Four of those on the plane were U.S. citizens, three were French, one was Swiss and 14 were Panamanians, the airline said.

Aeroperlas issued a statement identifying the Americans as Anita Heck, Carl Heck, Lisa Larglow and Richard Poux. Their hometowns were not immediately available.

Germinal Sarasqueta, chief of security for Panama's Civil Aviation Directorate, said the aircraft crashed at 11:05 a.m. a few minutes after leaving Contadora, a popular tourist resort 75 miles south of Panama City.

The plane, a DHC6 Twin Otter rented from a U.S. company for the past month ran into a flock of birds that hit the right engine, the Aeroperlas statement said. The name of the U.S. firm was not immediately known.

Darkness forced the U.S. Air Force to suspend its search until Thursday for the missing 20 people, all of whom were presumed dead.

Surviving passengers Frederick Pirot Jr., 12, of France, and Anne Juri, 40 of Switzerland, were taken to Paitilla Medical Center in Panama City, the statement said.

Eduardo Sousa Lennox, a doctor at the hospital, said Juri told him she was two seats from the door when the plane nosedived into the water. Juri and Pirot escaped through the hatch when the door came off and were picked up by a Panamanian helicopter, Souza said.

Juri told Souza the accident occured about two minutes after takeoff. She said she saw the pilot and copilot trying to level the aircraft, and smoke coming out of one of the engines.

The plane then tipped toward the side of the burning engine and ditched into the sea, Souza said.

Authorities identified the pilot as Panamanian Roberto L. Deville and the copilot as Panamanian Alvaro Berroa.

Souza said Juri suffered strained muscles in her back and would be released from hospital within three days. He declined to comment on the French boy's condition.

Raul Arias Espinosa, the director of Aeroperlas, said 10 of the passengers were employees of the Hotel Contadora on the island.

WASHINGTON (APRIL 19) UPI - Drug testing begins Friday for certain employees of companies operating 1.7 million miles of pipelines used to transport natural gas and hazardous liquids, the Transportation Department said Thursday.

The department's Research and Special Programs Administration said the new rules cover operators of pipeline facilities with more than 50 employees whose duties involve operation, maintenance or emergency response functions.

Drug testing for companies with 50 or fewer employees becomes effective Aug. 21.

The department estimates that more than 116,000 pipeline employees nationwide are now subject to pre-employment, post-accident, random and reasonable cause testing for marijuana, cocaine, opiates, amphetamines and phencyclidine, or PCP.

#90109u2252 04/19/1990 ~United Press International

NEW YORK (APRIL 19) UPI - The dollar was mixed in New York trading Thursday as players followed through on a correction in the Japanese yen, which was strengthening on technical factors and turbulence in capital markets.

Traders and analysts said the dollar had fallen off highs set in recent weeks after failing to push above 160 yen. The fall was speeded by talk of much-reduced Japanese interest in U.S. investments.

Technical factors favored the yen. Speculators dumped West German marks for yen to take profits in so-called cross-trading, which indirectly depressed the dollar against the yen in currency markets.

In late New York trading, the dollar changed hands at 1.68 marks, up from 1.6725 Wednesday. Against Japan's currency, the dollar was quoted at 156.95 yen, down from 158.20.

Chicago currency analyst Marc Chandler, of MMS International, said the market was still being driven Thursday by reports of Japanese insurance

companies and other institutional investors unloading U.S. Treasury bonds.

One reason for the Japanese selloff, which drove down bond prices Wednesday, was that investors wanted to realize foreign exchange gains stemming from the dollar's recent rise in value against the yen.

But Chemical Bank vice president Linda McLaughlin said the selloff might just be consolidation and positioning before a U.S. Treasury refunding auction in May and an upcoming Japanese government bond sale.

McLaughlin said the dollar will probably stabilize soon before making another upward move against the yen. "There's no reason to extrapolate what we've seen," she said, stressing the technical nature of the move.

Chandler said the dollar rallied against the deutsche mark after sinking to a technical support level around 1.6705 marks. But it is stuck in a range that isn't likely to change much until there are concrete decisions made about East German-West German monetary union, he said.

Other dollar rates: 148.50 Swiss francs, up from 147.95; 5.6450 French francs, up from 5.6225; and 1,234 Italian lire, up from 1,228.75. The British pound moved up to $1.6445 from $1.6390.

In Europe, the dollar declined against most currencies under profit-taking but analysts said they expected it to bounce back. "This is a short-term setback," said currency-watcher Nick Murphy of Barclays de Zoete Wedd, a London investment bank.

The dollar moved up in Frankfurt to 1.6765 deutsche marks against 1.6725 but was unchanged in Zurich at 1.4805 Swiss francs. In London, the pound rose to $1.6450 from $1.6370.

The dollar eased in Paris and Milan to, respectively, 5.6235 French francs against 5.6465 and to 1,229.40 Italian lire against 1,234.60.

In Tokyo, the dollar declined on disappointment with U.S. trade figures and ended at 157.75 yen compared with 159.87. Players noted the U.S. deficit with Japan rose although the deficit narrowed overall.

A major U.S. Treasury bond selloff "led to concern that the dollar is heading down," said Mitsui Taiyo Kobe Bank Vice President Junpei Ishii.

Republic National Bank in New York closed cash gold at $377.50 an ounce, up from $376.50 Thursday. The New York Commodity Exchange settled gold at $377.30 an ounce, ahead from $376.10. In Zurich, gold fell to $375.50 an ounce from $376.75. London gold rose to $376.25 an ounce from $375.25.

Republic closed cash silver at $5.09 an ounce, unchanged. Comex spot

silver edged up to $5.067 an ounce from $5.065. Zurich silver declined to $5.06 an ounce from $5.11. London silver fell to $5.10 an ounce from $5.12.

#90109u2257 04/19/1990 ~United Press International

(APRIL 19) UPI - President Bush today began consulting U-S allies on possible retaliation to the Kremlin's bid to force Lithuania to rescind its independence laws. White House spokesman Marlin Fitzwater says U-S officials are still grappling with conflicting reports on whether the Soviet Union pushed the stand-off to the brink of broader confrontation by cutting off flows of oil or gas to Lithuania. Fitzwater was careful to set NO deadlines for U-S action.

Lithuania's prime minister says the Baltic Republic is determined to pursue independence. The prime minister and her foreign minister arrived in Norway yesterday, seeking ways to compensate for reductions in Soviet fuel shipments. The officials told an Oslo news conference that ''Lithuania will survive ... although life will be reduced to a minimum.''

The mother of American hostage Jesse Turner says she is dealing with shock and excitement over the possible release of her son. In Boise , Idaho, Estelle Ronneburg finally went to bed this morning after spending the early morning hours talking to news media from around the country. There are strong indications that Turner may be released by a pro-Iranian group tomorrow. The U-S has sent a hostage reception team to West Germany, just in case.

NATO's top official insists that the Western military alliance still plays a vital role in post-Cold War Europe. Secretary General Manfred Woerner today told the Italian Senate in Rome that the world needs NATO to guarantee security because the Soviets retain what he called ''the power to intimidate.''

#90109u2272 04/19/1990 ~United Press International

NEW YORK (APRIL 19) UPI - The Federal Reserve Board said Thursday that the basic U.S. money supply, narrowly defined under the name of M1, decreased $2.4 billion in the latest reporting week, while broader aggregates M2 and M3 also increased.

M2 rose $6.5 billion and M3 rose $12.8 billion.

M1, which is made up of cash, checking accounts and NOW accounts - money that is available for immediate spending - rose to a seasonally adjusted average of $805.6 billion in the week ended April 9 from a revised $808.0 billion the week before.

Over the latest 13 weeks, M1 averaged $801.2 billion, a 4.8 percent rate of increase from the previous 13 weeks, the Fed reported.

The broader M2 money measure averaged an estimated $3,275.8 billion in the latest week, up from a revised $3,269.3 billion. M2 includes M1, plus passbook savings, small time deposits including money market deposit accounts, consumer money market mutual funds and certain other short-term assets.

M3, which includes M2 plus large time deposits, repurchase agreements longer than one day at banks and thrifts and institutional money market funds, averaged $4,076.5 billion in the latest week, up from a revised $4,063.7 billion, the Fed said.

#90109u2278 04/19/1990 ~United Press International

MOSCOW (APRIL 19) UPI - The Soviet Union escalated an economic battle of wills with a defiant Lithuania Thursday by slashing the republic's supply of natural gas a day after cutting off its oil.

A planning official said Moscow was also making it difficult for Lithuania to draw from its hard currency reserves, which it would need to purchase oil from foreign producers.

Lithuanian leaders were concerned about the sanctions but remained steadfast in their resolve to secede from the Soviet Union, saying they would endure any hardship to achieve independence.

The republic's Council of Ministers held an emergency meeting to discuss the Soviet sanctions and draw up a plan for rationing and conservation. Lithuanian Prime Minister Kazimiera Prunskiene traveled to Norway to seek alternative energy sources, but received no promises of help from the government.

''There is no question of rescinding our declaration of independence,'' Prunskiene said in Oslo. ''Lithuania will survive ... although life will be reduced to a minimum.''

Motorists waited for four hours Thursday at gasoline stations in the republic's capital Vilnius to receive a ration of 2.6 gallons each. The government information bureau said beginning Friday gasoline rations would be set at 7.9 gallons per car per month.

Even with rationing, without new oil supplies gasoline reserves will only last two weeks, Lithuanian Energy Minister Leonas Asmontas said.

Asmontas said much of the natural gas Lithuania lost was used to produce electricity - 40 percent of which was exported - and the crisis was made worse by the fact that the republic's nuclear power plant is closed for repairs.

He added the republic would need to find 500,000 tons of oil a month to meet minimum consumption requirements.

The republic stands to lose $960,000 a day from lost production at the Mazeikiai oil refinery, but the Soviet Union will lose the $4 million per day it earned from the facility plus $100,000 in hard currency exports, the republic's information office said.

The economic sanctions were imposed by the Kremlin in an effort to force Lithuania to revoke its March 11 declaration of independence from the Soviet Union. The republic depends on the Soviet Union for oil, gas, metal chemical products, cotton and timber.

The Soviet Union late Wednesday cut oil shipments to the rebellious republic, leaving it with a two to four day reserve, and at noon Thursday natural gas was cut back in a pipeline from western Russia. Moscow said it was continuing 15 percent of the gas supplies so residents could cook and heat their homes.

Matuzas Saulus, a Lithuanian economic planning spokesman, said the gas cutoff was far more serious than the oil reductions.

''It can bring Lithuania's industry to a halt in two days,'' Saulus said.

White House press secretary Marlin Fitzwater said President Bush began consultations with U.S. allies on ''appropriate responses'' to the Soviet Union.

Speaking to reporters aboard Air Force One, Fitzwater said Bush had discussed the matter Wednesday by telephone with West German Chancellor Helmut Kohl, would raise it Thursday with President Francois Mitterrand of France and ''will be in touch with all of the allies either directly or through diplomatic channels in the next few days.''

The intent, he said, was not to marshal unified Western pressure on Gorbachev, but to ensure there is a shared understanding of ''what the situation is, what we might do, what other countries might do.''

Saulus, the spokesman at Lithuania's planning agency, said the republic's foreign currency reserves were not frozen yet, but ''transactions that used to take two to three days have been taking up to two to three months.''

Lithuania was given economic autonomy by the Supreme Soviet late last year allowing the republic to hold foreign currency reserves - but the money is in a Moscow bank.

Saulus said ''difficulties have intensified lately'' with the foreign currency. He would not say how much hard currency the republic had in Moscow's Vneshtorgbank, but said it was a ''considerable sum.''

Lithuania would have to part with the precious reserves if any country decided to sell it oil or gas to replace that being withheld by Moscow.

#90109u2313 04/19/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (APRIL 19) UPI - President Frederik de Klerk Thursday promised white South Africans the power to veto any constitution drafted in power-sharing negotiations with the black majority.

Also Thursday, police shot four anti-government demonstrators to death in a black township south of Johannesburg, prompting an immediate police investigation.

Police denied accounts by local activists that the shooting in the township of Rammulotsi, 120 miles south of Johannesburg, was unprovoked. They said a mob of about 200 had stoned a police patrol and ignored orders to disperse.

A spokesman said the five-member patrol was ''compelled to open fire'' with rubber bullet shotgun fire, killing four youths, seriously wounding another and leaving several others slightly injured.

But Police Commissioner Gen. Johan van der Merwe ordered an ''urgent inquiry'' in what appeared to be an attempt to avert another suspension by the African National Congress of peace talks scheduled to begin May 2.

Last month the ANC temporarily suspended talks with the government over the police killing of 13 demonstrators in another township.

A fugitive white extremist, meanwhile, claimed responsibility for the largest weapons theft ever from the South African Defense Forces and vowed to ''go for the throat'' of the ANC in a growing right-wing backlash over de Klerk's reform initiatives.

De Klerk addressed a joint session of Parliament meeting for a third day Thursday and vowed to give South Africa's white minority veto power over any new constitution hammered out in negotiations with the black majority.

De Klerk said the National Party, which has ruled the country since 1948

and erected the discriminatory legislation known as apartheid, had promised white voters in the last election they would have the final word on any constitutional changes.

''Regardless of whether or not anyone else may have the desire to test their support base on the new constitutional proposals, the National Party will insist on their being tested by the (white) electorate of the House of Assembly,'' De Klerk said.

Separate polls could also be taken by South Africans of Indian and mixed-race, or ''colored,'' descent - now represented in the segregated tri-cameral Parliament - as well as by the black majority, which has never voted in a national election.

On Tuesday De Klerk rejected any charter leading to black majority rule and called for a system ''fair to all.'' Responding to demands from opposition lawmakers for more specifics, De Klerk said Thursday he believed a common voters roll could be negotiated.

''Universal adult franchise on a common voters' roll within a qualified system of political representation into which the constitutional mechanisms of protection are built, is indeed an achievable possibility,'' de Klerk said. ''The whole argument centers and centered around 'simplistic majority rule' without the balance of protection for minorities.''

Thabo Mbkei, the ANC foreign affairs secretary, denounded De Klerk's position on black majority rule as ''totally unacceptable.'' But he told reporters in Harare Wednesday night talks with the government would go ahead as scheduled on May 2 on removing obstacles standing in the way of formal power-sharing negotiations.

The Afrikaans daily Die Burger reported that 64 different weapons and a large quantity of ammunition were stolen in an ''almost laughably simple'' raid on the weapons safe at air force headquarters in Pretoria Friday night.

''This is the beginning of the counterrevolution,'' self-styled extremist Piet ''Skiet (Shoot)'' Rudolph told The Pretoria News.

''I was forced to take things from the government, which I am hostile to '' Rudolph was quoted as saying. ''The weapons will not be used against the defense force or the police, but against the ANC. We are now going for the ANC's throat.''

CLEVELAND (APRIL 20) UPI - M.A. Hanna Co. said Thursday that first-quarter earnings were $3.6 million, or 13 cents a share, down 74 percent from $13.8 million, or 54 cents a share, during the same period last year.

First-quarter sales, however, increased to $267.9 million from $256.4 million.

The latest quarter included a non-operating loss of $11.5 million from the Colowyo Coal Co. related to a Colorado-Ute bankruptcy filing.

Hanna's products include formulated polymer and energy resources.

#90109u2381 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - Sen. Robert Kasten, R-Wis., called on President Bush Thursday to cancel his upcoming summit with Soviet leader Mikhail Gorbachev unless the Soviet Union eases its pressure on Lithuania.

The Soviet Union escalated an economic battle of wills with the independence-minded republic Thursday by slashing its supply of natural gas a day after cutting off its oil.

White House press secretary Marlin Fitzwater said Bush began consultations with U.S. allies on ''appropriate responses.'' Secretary of State James Baker said Wednesday a Soviet crackdown would threaten its growing ''commercial contracts'' with the United States.

Kasten, ranking Republican on the Senate foreign appropriations subcommittee, said United States should send a ''strong message'' to the Soviets, including economic sanctions and the canceling of the summit starting May 30.

''Let Gorbachev choose. Hands off Lithuania or get kicked out of the bank that can finance a Russian economic recovery. Hands off Lithuania or we'll scrap the summit. Hands off Lithuania or you can kiss those trade preferences goodbye,'' said Kasten.

''All of the hostile acts Moscow has committed are part of a single pattern,'' he said. ''The Soviets are waging a war of nerves against Lithuania. They are trying to provoke violence by Lithuanians in order to provide a pretext for a full, brutal repression of the independence movement.''

#90109u2468 04/19/1990 ~United Press International

WASHINGTON (APRIL 19) UPI - A food processing firm in Puerto Rico voluntarily is recalling two canned turkey products because food spoilage organisms have been found in one of them, the government said Thursday.

The problem was discovered during testing by the Food Safety and Inspection Service.

Federal Packing Company Inc., of Carolina, Puerto Rico, produced the products for the Puerto Rico Department of Education. They were distributed to schools, churches, charitable organizations and the Head

Start program in Puerto Rico.

Involved in the recall are products labeled ''Canned Boned Turkey in Bouillon,'' ''Canned Boned Turkey in Broth'' or ''Canned Boned Turkey with Natural Juices Diced Fully Cooked.'' They were packed in 50-ounce cans.

Establishment number P-6694 appears inside the Agriculture Department inspection seal on the label and the words ''Packed for AJM Meat Packing Inc.'' appear on the bottom of the label.

The Inspection Service advised organizations to check their inventories to see if they had received any of the products and, if they did, to contact the distribution warehouse that supplied them.

The food spoilage organisms were discovered during a test of the canned boned turkey in bouillon.

No other Federal Packing product was involved in the recall.

Consumers with questions about the recall may phone the toll-free Meat and Poultry Hotline, 800-535-4555. If callers in Puerto Rico cannot reach that number, they can call 202-447-3333.

#90109u2469 04/19/1990 ~United Press International

(APRIL 19) UPI - Lithuanians are waiting up to four hours in line for gas today, as the Soviet Union makes good on a promise to cut supplies to the republic unless it renounces its independence declaration. An economic spokesman for Lithuania says the cutoff of natural gas ''can bring Lithuania's industry to a halt in two days.''

The White House says President Bush is discussing what to do about Lithuania with French President Francois Mitterand. The two leaders are meeting today in Key Largo, Florida. Secretary of State Baker has warned that the United States may end chances for improved Soviet trade relations if the Soviets crack down on the Baltic republic.

Besides Lithuania, Bush and Mitterand are to discuss differences over NATO's role in a changing Europe. Bush wants a more political role for the alliance, while the French traditionally want to limit NATO's mission.

Nicaragua may have hit upon a formula for lasting peace. After an all-night bargaining session, government and Contra representatives signed a detailed agreement for an immediate cease-fire and the withdrawal of all Contra forces into security zones. The pact calls for complete Contra disarmament by June 10th.

The Senate Agriculture Committee today tentatively approved a plan to cultivate farm research with a big infusion of cash. The research money would include a nearly tenfold boost in work to find ways to reduce reliance on chemicals. Interest in so-called ''sustainable agriculture'' has grown with concern about groundwater contaminated with chemicals.

#90109u2501 04/19/1990 ~United Press International

NEW YORK (APRIL 19) UPI - Stocks closed sharply lower in moderate trading Thursday after a late tumble, but weakness in the bond market weighed on prices throughout the day.

The Dow Jones industrial average, which fell 32.89 Wednesday, lost 20.94 to close at 2711.94.

Among broader market gauges, the New York Stock Exchange composite index fell 1.36 to 185.57 and Standard & Poor's 500-stock index lost 2.63 to close at 338.09. The price of an average share fell 25 cents.

Declines led advances 920-513 among the 1,952 issues crossing the NYSE tape. Big Board volume totaled 152,930,000 shares, compared with 147,130,000 shares traded Wednesday.

Analysts said prices simply eroded further late in the day as the momentum from Wednesday's decline carried over into Thursday's trading.

Treasury bond declines of over a point sent the Dow industrials to their biggest loss in almost two months Wednesday and stocks came under pressure

from the opening bell Thursday as bonds weakened again. In late trading, Treasury bonds were down about 1/4 point.

''I think momentum just pushed the market down after what happened yesterday,'' said Chester Pado, director of technical research at Jefferies & Co. in Los Angeles.

As factors in the bond market's nosedive this week, analysts blamed widespread talk of Japanese selling, news of a sharp jump in inflation last month and fears about the supply of bonds the market must absorb in the quarterly Treasury refunding in early May, estimated at about $30 billion.

''Rates are rising and pressure has built on the market,'' Pado said. ''That's not likely to change till rates change and that won't happen any time soon.

''With the Japanese pulling out of the (bond) market and the refunding coming up, it doesn't augur well for the month of May.''

Rate concerns also weighed on prices on the Toronto Stock Exchange, which posted its largest single-day decline so far this year on concerns about high Canadian interest rates sparked by the rise in the Bank of Canada rate to 13.77 percent from 13.61 percent. The rate is charged by the central bank on loans to financial institutions.

On the trading floor, Harcourt Brace Jovanovich was the most active issue, up 5/8 to 3 7/8 amid takeover speculation said to involve Toronto-based Thomson Corp.

Comdisco followed, plummeting 8 1/4 to 18 1/4 after saying it expects second-quarter earnings to be as much as 25 to 30 percent lower than the year-ago quarter's 60 cents a share. Digital Equipment was third, up 1 5/8 to 81 5/8 after a surprisingly strong earnings report for its March quarter. Operating results were well above expectations.

Among the blue chips, AT&T lost 1/8 to 41. American Express slumped 1 1/4 to 27 5/8 after reporting a $620 million loss in the first quarter, compared with net income of $252 million, or 59 cents a share, in the year-ago period. Coca-Cola tumbled 2 to 77 1/4 amid reports saying some money managers feel it may be overpriced. IBM lost 5/8 to 109 1/8.

Elsewhere, Dayton Hudson fell 1 5/8 to 69 1/8 after BATUS Inc., the U.S. unit of B.A.T Industries PLC of Britain, said it would sell the 24-store Marshall Field's department store chain to the Minneapolis-based retailer for $1.04 billion in cash.

Mortgage and Realty Trust surged 1 1/8 to 5 7/8. Reports said the real

estate investment trust would suspend its second-quarter dividend as a result of its Chapter 11 filing. The reports said, however, that the trust intended to present a reorganization plan in order to be discharged from Chapter 11 proceedings in time to pay a dividend before June 5, 1991, so as to preserve its status as a real estate investment trust for the fiscal year ending Sept. 30.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 184,953,040 shares, compared with 179,786,630 shares traded Wednesday.

Prices closed sharply lower in active trading on the American Stock Exchange.

The Amex Market Value index lost 2.49 to close at 350.73. The price of an average share dropped 8 cents. Declines led advances 319-208 among the 803 issues traded. Composite volume totaled 18,705,300 shares, compared with 21,004,900 traded Wednesday.

Texas Air led the Amex issues, up 5/8 to 6 3/4. The president of the machinists union called the ousting of Frank Lorenzo and the appointment of a trustee to run embattled Eastern Airlines an ''enormous step'' forward and said talks were now possible between the Eastern, a Texas Air subsidiary, and striking machinists.

(APRIL 19) UPI - The government reports that the best places to watch

salaries grow last year were the East, the Midwest and the Rocky Mountains. The Commerce Department released a report today showing that per-capita income grew faster in those regions than in the country as a whole during 1989. That was the third straight year the Rocky Mountains did better than the rest of the country.

Four inmates are on the run after a late-night escape from a British jail. The break is the latest in a series of troubles for Britain's prison system. Inmates still have the upper hand in their 16-day seige of Strangeways Prison in Manchester. That rebellion has sparked riots at 10 other facilities. At least one prisoner has died.

South African President Frederik de Klerk says he will give whites the power to veto any constitution drafted in power-sharing negotiations with the black majority. De Klerk made the promise to Parliament as police reported that four black youths were killed when demonstrators stoned a patrol outside of Johannesburg.

Immune cells taken from people who received an experimental AIDS vaccination appear to be helping immune-deficient laboratory mice fend off the disease. Researchers at a California institute say the break-through is the first and most direct evidence to date that an AIDS vaccine can produce a clinically protective response.

#90109u2663 04/19/1990 ~United Press International

PITTSBURGH (APRIL 20) UPI - The Aluminum Co. of America said Thursday it collected 17.1 billion used aluminum beverage cans for recycling - about 68 cans for each American - during 1989.

Can collectors earned $232 million by returning the cans to one of the 2,400 centers in ALCOA's national can recycling network, the company said.

The used cans weighed 611 million pounds, greater than the annual production of an average-sized aluminum smelting plant, said George Cobb, president of ALCOA Recycling Co.

The used cans ALCOA collects for recycling are remelted, rolled into new aluminum can sheet and sold to can manufacturers, Cobb said.

#90109u2763 04/19/1990 ~United Press International

(APRIL 19) UPI - Preparations for the possible release of a western hostage... U-S reaction to Soviet sanctions against Lithuania... a warning about a popular sleeping pill... and problems with the 1990 census. Those stories and more, next from U-P-I.

Syria today added its assurances that preparations are under way for the release of a Western hostage believed held in Lebanon.

State-owned Damascus Radio credited the predicted release to ''Syria's efforts.''

The Islamic Jihad for the Liberation of Palestine promised yesterday to release one of its three American hostages by tomorrow.

Sources later told the Arabic-language Monte Carlo radio station that the group will release Jesse Turner, a former mathematics teacher at Beirut University College. He was kidnapped along with two other U-S professors and a native of India on January 24th, 1987.

White House spokesman Marlin Fitzwater said the State Department has dispatched a reception team to Wiesbaden, West Germany, ''where they have the medical facilities to receive any hostage that might be released.''

But Fitzwater emphasized that the United States will maintain its policy of NOT negotiating for the release of any of the 18 Western hostages.

-30- 1393

#90109u2778 04/19/1990 ~United Press International

(APRIL 19) UPI - President Bush is meeting French President Francois Mitterand today in the Florida Keys and one topic of discussion is how far to go to protect Lithuania from the Soviet Union.

Moscow has cut off much of its natural gas and oil supplies to Lithuania to pressure the republic into renouncing its declaration of independence. Bush has joined Lithuania in calling for negotiation, but with NO success.

The White House disclosed today that Bush is notifying allied leaders of steps that might be taken to deter Moscow.

Spokesman Marlin Fitzwater said Bush discussed the matter yesterday by telephone with West German Chancellor Helmut Kohl. Bush plans to be in touch with all of the allies in the next few days.

Fitzwater said the talk is meant for all parties to know what each other might do.

Yesterday, Secretary of State Baker said the United States might end Moscow's hopes for expanded economic relations if Moscow continues to pressure Lithuania.

-30- 1143
#90109u2845 04/19/1990 ~United Press International
(APRIL 19) UPI - The Lithuanian Council of Ministers held an emergency meeting today to discuss Soviet sanctions and to draw up a plan for rationing and conservation.

Lithuania's prime minister traveled to Norway to seek alternative energy sources but received NO promises of help from the government.

Motorists waited for four hours at gasoline stations in the republic's capital, where fuel is being rationed after Moscow cut off oil and natural gas.

The economic sanctions were imposed by the Kremlin in an effort to force Lithuania to revoke its March 11th declaration of independence from the Soviet Union. The republic depends on the Soviet Union for oil, gas, metal chemical products, cotton and timber.

A Lithuanian economic planning spokesman said the gas cut-off was far more serious than the oil reductions.

In his words- ''It can bring Lithuania's industry to a halt in two days.''

A consumer group is asking the Food and Drug Administration to put a stronger warning label on the best-selling sleeping pill in the world.

The Public Citizen Health Research Group says the pill... Halcion ... can cause ''serious psychological and behavioral side effects.''

Halcion has been on the market for more than eight years. More than 11-Million prescriptions for the drug were filled in 1988 alone.

The health group says it has heard from consumers who say it caused ''nervous system side effects,'' including included amnesia, aggression, anxiety, paranoia, delirium, hallucinations and withdrawal seizures.

The pill is made by Upjohn Company of Kalamazoo, Michigan.

Upjohn says Halcion is ''very safe and effective'' and that Public Citizen's action is ''self-serving and medically irresponsible.''

-30- 1912
#90109u2885 04/19/1990 ~United Press International
(APRIL 19) UPI - A cease-fire between Contra rebels and the Nicaraguan government went into effect today after the signing of an agreement that promised an end to eight years of civil war and the disarming of the rebels by June 10th.

Representatives of the Contras, the ruling Sandinistas and President-elect Violeta Chamorro signed the detailed agreement this morning after an all-night bargaining session.

Besides the immediate cease-fire, the pact calls for a withdrawal of all Contra forces to ''security zones'' by April 25th- the day Chamorro is to take office. The Contras are to completely disarm and demobilize by June 10th.

President Daniel Ortega had previously insisted that the Contras disarm by April 25th.

But Humberto Ortega... the president's brother and commander of the military... says he is satisfied with today's agreement.

There were NO immediate reports of fighting from the countryside this afternoon.

In Washington, State Department spokeswoman Margaret Tutwiler said ''We are very pleased'' with the Nicaraguan agreement. She said the procedures for disarming the Contras will be difficult ''and requires good will'' on the part of all sides.

The Pentagon has told Congress that during the next three years, it wants to withdraw some of the 135-thousand U-S troops stationed in Asia.

Speaking to the Senate Armed Services Committee, defense spokesman Paul Wolfowitz today unveiled the administration's 10-year strategy for the Pacific. The three-phase plan includes reducing U-S strength in South Korea to what Wolfowitz calls a supporting role.

In phase one, the Pentagon wants to trim Asian-based forces by 11 percent, withdrawing a total of about 15-thousand air and ground forces from South Korea, Japan and the Philippines. Under the plan, Washington also may return some excess military facilities to the Japanese government.

Phases two and three call for proportionately greater reductions in combat forces throughout the region.

Wolfowitz says the plan will be carried out cautiously since the Korean peninsula remains what the Pentagon considers ''one of the most potentially explosive areas in the world.''

-30- 2361

#90109u2904 04/19/1990 ~United Press International

(APRIL 19) UPI - A jailhouse informant testified in New York today that a

man accused of a racial slaying boasted that he would be cleared of murder by claiming insanity.

Charles Brown told the jury that 19-year-old Joseph Fama confessed to the killing in jail.

Fama is white, and is charged with fatally shooting Yusuf Hawkins. Hawkins was a black 16-year-old who had gone to the predominantly white Bensonhurst neighborhood to look at a used car last August 23rd. His killing ignited racial tensions citywide and led to a series of sometimes violent protests.

Today's witness, Charles Brown, is black, has been convicted of robbery, and was arrested last year on drug charges. Brown has previously testified against a suspected drug kingpin as well as the killer of a student.

Brown said prosecutors promised to notify the parole board of his co-operation if he testified against Fama.

During the testimony, Fama's father twisted in his seat and called Brown ''a liar.''

Census Bureau Director Barbara Bryant is defending her beleaguered 1990 survey of the U-S population.

Bryant admits there have been some administrative problems and a poorer-than-expected response to the census. But today, she told a House subcommittee on census and population that those problems would NOT reduce the survey's ultimate accuracy.

Byrant says the current response rate of mailed-back census forms is at 63 percent... about seven percent lower than bureau expectations. Bryant also says she'll need at least an additional 130-Million dollars to complete the census, which has already cost about two-BILLION dollars.

Next Thursday, census enumerators will begin door-to-door surveys which will continue through the summer.

#90109u3042 04/19/1990 ~United Press International

NEW YORK (APRIL 19) UPI - Bernie Nicholls scored a hat trick and assisted on another goal and goaltender John Vanbiesbrouck stopped 32 of 35 shots Thursday night to lead the New York Rangers to a 7-3 victory over the Washington Capitals in the first game of their Stanley Cup playoff series.

Game 2 of the best-of-seven Patrick Division final will be Saturday night

in New York.

Nicholls' second goal of the game, an unassisted tally at 11:49 of the third period, gave the Rangers a 5-3 lead after the Capitals had rallied from a 3-0 deficit.

Nicholls skated the length of the ice and chased the puck down in the right faceoff circle, then bounced it in off of goaltender Mike Liut. Mike Gartner made it 6-3 with a power-play goal at 13:26 when he deflected Randy Moller's shot past Liut from in front.

Nicholls completed his hat trick with his sixth goal of the playoffs, converting a Gartner rebound.

The Rangers had made it 4-1 on John Ogrodnick's fifth goal of the playoffs at 5:55 of the third period before Washinton closed to within 4-3 on goals by John Druce and Scott Stevens 69 seconds apart.

The two teams played a briskly-paced first period with Washington getting the better scoring opportunities, especially on the power play, and outshooting the Rangers 15-8.

Vanbiesbrouck, however, made a series of outstanding saves, and New York took a 1-0 lead at 11:04 on Nicholls' fourth goal of the playoffs.

Nicholls, standing to the right of Liut just outside the crease, redirected a shot from the right faceoff circle by Jeff Bloemberg into the net.

New York took a 2-0 lead on a power-play goal by Brian Mullen at 2:44 of the second period. Mullen took a behind-the-net pass from Kelly Kisio in the left corner, walked out in front of the net, picked up the rebound of his own shot and beat Liut to the far side.

Jan Erixon scored a short-handed goal at 8:03 to give New York a 3-0 lead. After Mark Janssens won the faceoff just inside the Washington blue line, Erixon gained control of the puck in the slot and fired it into the upper right hand corner of the net.

The Capitals pulled to within 3-1 at 3:01 of the third period on a goal by Bob Rouse. Rouse took a shot from the right point that deflected off of Paul Broten's leg and went into the net past Vanbiesbrouck's right skate.

The brutal, emotionally-charged play of the opening-round was replaced by skilled, technically dazzling offensive and defensive play. Rangers enforcer Troy Mallette was replaced on the power-play unit by playmaker Carey Wilson on the power-play unit with Gartner and Nicholls.

BOSTON 1, MONTREAL 0

Andy Moog stopped 20 shots for the first playoff shutout of his career Thursday night and Dave Poulin scored a power-play goal in the second period, leading the Boston Bruins to a 1-0 victory over the Montreal Canadiens in the opener of their Adams Division final.

Game 2 of the best-of-seven series will be played Saturday night at Boston Garden.

Poulin, acquired from Philadelphia in a Jan. 16 trade, scored his fifth goal of the playoffs at 17:37 of the second period, knocking home the rebound of a Ray Bourque slap shot.

The man-advantage opportunity began at 16:11, when Montreal's Brian Skrudland was called for holding Poulin in front of the Canadiens' goal.

Boston, which had failed on its first six man-advantage opportunities, altered its power play by pulling the defensemen toward the top of the circles. Garry Galley, standing in the left circle, passed to Bourque at the point and the defenseman's slap shot richocheted off the left pad of goalie Patrick Roy. Poulin, on the right of the crease, knocked the puck inside the near post, just beyond Roy's desperate dive.

The game paired the league's two best defensive teams, Boston having allowed a league-low 232 goals and Montreal 234.

The Canadiens went on the power play in the final 48 seconds after Boston's John Carter was whistled for high-sticking. Montreal pulled Roy with 36 seconds left for a two-man advantage but in the frantic final seconds could not make a shot on goal.

Moog was frequently spectacular. He made a glove save on Guy Carbonneau's breakaway 5:21 into the game and a kick-save on Eric Desjardins' slap shot from the right point 1:41 later. Moog also kicked aside Desjardins's shot from the slot at 13:40 and caught Skrudland's attempt off the rebound.

In the third period, Montreal's Stephane Richer missed a 20-foot wrist shot from the left circle, the puck ricocheting off the right post.

The Canadiens were 0-5 on the power play, continuing their post-season frustration. In the playoffs Montreal has scored just two goals in 34 man-advantage opportunities.

Montreal has won 21 of its 24 playoff series with Boston, including 19 of the last 20.

Montreal defenseman Chris Chelios played for the first time since being

sidelined by a knee injury which required arthroscopic surgery on March 22. The Canadiens were without defensemen Petr Svoboda, who has the flu, and Mathieu Schneider, who has a bruised shoulder.

#90109u3171 04/19/1990 ~United Press International

(APRIL 19) UPI - The pro-Iranian group that said it would free a Western hostage said today it will delay the release because the United States has NOT co-operated. The Islamic Jihad for the Liberation of Palestine blamed the delay on the U-S failure to send a U-S assistant secretary of state to Syria.

Lithuania's leaders held an emergency meeting today to discuss a severe reduction of natural gas from the Soviet Union. The Soviets are trying to pressure the republic away from independence, but Lithuanian leaders discussed a rationing plan, rather than concessions.

Civil defense officials on the main island of Hawaii say a ''painstakingly slow'' lava flow has incinerated two more houses. The lava burned one house yesterday and just missed another. But a finger of lava broke off from the main flow today to get the other house on a second effort.

The Environmental Protection Agency said today that U-S industry discharged almost five-BILLION pounds of toxic chemicals in 1988, down nine percent from 1987. The biggest polluters were chemical manufacturers, metal plants and paper mills.

Democratic Senator John Glenn of Ohio today says the Pentagon doesn't know how much low-level radioactive waste it has and needs a uniform system for disposing of the deadly material. Glenn cited a General Accounting Office study.

#90109u3185 04/19/1990 ~United Press International

(APRIL 19) UPI - Switzerland today expelled a Soviet diplomat and accused him of spying. The Swiss federal prosecutor's office also named two other former members of the Soviet mission in Geneva as accomplices.

The cease-fire between Contra rebels and the Nicaraguan government is official, ending eight years of civil war. The two sides signed the detailed accord in Managua this morning after an all-night bargaining session.

Nepal's long-banned political parties took power today in an interim government christened by King Birendra. He swore in Krishna Prasad Bhattarai as the first prime minister of the Himalayan kingdom in nearly

30 years.

In Oklahoma, an estimated 20-thousand teachers remained off the job, and most of them walked a picket line at the state Capitol in Oklahoma City. It's the fourth day of a five-day walkout to protest low teacher salaries and school funding.

-30- 1057

#90109u3383 04/19/1990 ~United Press International

(APRIL 19) UPI - The group that announced the impending freedom of a Western hostage now says the release will be delayed because the United States did NOT meet its demands. The Islamic Jihad for the Liberation of Palestine had asked yesterday that the U-S assistant secretary of state travel to Syria for the release, but he did NOT. The group now says it will delay the release- quote- ''until the situation is clarified.''

The flow of energy supplies from the Soviet Union to Lithuania is drying up. The republic said today that the Soviet Union shut off the main line that feeds natural gas to Lithuania. Lithuania estimates it has only 16 percent of the gas it needs each day to function. Moscow says it is continuing some gas supplies so residents can cook and heat their homes. Lithuania's leaders met today to draw up a plan for rationing and conservation.

Today in the Florida Keys, President Bush and French President Francois Mitterrand met to discuss possible allied responses to the Soviet economic squeeze of Lithuania. Bush says he intends to talk to all allied leaders about the situation in the Baltic republic but will NOT try for Western pressure on the Soviet Union.

President Bush may need to get the congressional O-K on any future trade agreements with the Soviet Union. Today, the Senate began work on a major trade bill. It will require Bush to submit any U-S-Soviet deals to Congress for approval. The provision is designed to make certain Bush does NOT circumvent Congress in upgrading the Soviet Union to most-favored-nation status. Bush and Soviet President Gorbachev plan to meet late next month.

The federal Centers for Disease Control says Americans are drinking less alcohol but using more cocaine. Today's report warns that the increased use of cocaine among adolescents is of particular concern. The C-D-C says the younger people are when they first try drugs or alcohol, the more likely they will abuse those substances as adults.

-30- 2162

#90109u3678 04/19/1990 ~United Press International

(APRIL 19) UPI - The pro-Iranian group which announced it was liberating a Western hostage by tomorrow says it will delay the release because of a lack of U-S cooperation. The Islamic Jihad for the Liberation of Palestine yesterday said it would free one American hostage if Assistant Secretary of State John Kelly went to Syria within 48 hours. Secretary of State Baker said Kelly was traveling in Europe and would NOT go to Syria.

Lithuanian leaders met today to decide how to deal with a Soviet cut back of oil and gas supplies. The Soviet Union has cut off most of its natural gas and all of its oil supplies to the rebellious republic. Lithuania's Council of Ministers considered a plan for conservation and rationing. But the republic's prime minister... in Norway seeking energy suppliers... said there's NO chance the Lithuania will recind its declaration of independence.

President Bush met with French President Francois Mitterrand in Key Largo, Florida, today where the tense situation in Lithuania again dominated discussions. Both leaders made statements urging a peaceful settlement in the crisis. President Bush suggested dialogue, but re-affirmed his support for what he called the Lithuanians' right to ''self-determination.''

The House Budget Committee today approved a budget plan for fiscal 1991 that satisfied liberal Democrats but left some conservatives howling. The one-point-two-TRILLION budget includes a last-minute three-BILLION-dollar cut in defense spending. Republican Representative Bill Frenzel of Minnesota said the budget plan is merely a Democratic negotiating position for a budget summit between Bush and Congress later this year.

-30- 1844

#90109u3725 04/19/1990 ~United Press International

(APRIL 19) UPI - The Oklahoma teachers strike continues to pick up steam. Teachers from the second- and third-largest districts in the state have joined the walkout, protesting low salaries and school funding. Today the National Education Association pledged its support. N-E-A President Keith Geiger asked teachers to hang tough until the Oklahoma legislature endorses a school reform package.

Attorney General Thornburgh has issued a statement admitting that his personal spokesman had a role in a political dirty trick played against Pennsylvania Representative William Gray. A report says Thornburgh aide David Runkel leaked misleading information about Gray. But Gray's chief of staff called Thornburgh's statement ''incomprehensible.'' Thornburgh was in Mexico and UNavailable for further comment.

The former head of the Central Bank of the Philippines testified in a New York City court today in the racketeering case of Imelda Marcos. Jaime Laya said the former Philippines first lady took an avid interest in the

country's economic affairs, and that important letters sent to President Marcos were sent- quoting- ''with a copy to Imelda Marcos.'' The prosecution is trying to undercut Mrs. Marcos' defense placing most of the blame on her husband.

A Tufts University study shows that the cost of developing a new drug has more than doubled in the past decade, and the amount of time the entire process takes has lengthened by an average two years. It now requires 231-Million dollars and 12 years to move a new drug through the development process. The study was released at a Washington, D-C, news conference co-sponsored by the Pharmaceutical Manufacturers Association.

-30- 1860

#90109u3897 04/19/1990 ~United Press International

(APRIL 19) UPI - A pro-Iranian terrorist group in Lebanon is blaming U-S intransigence for the continued captivity of one U-S hostage they have promised to release. The Islamic Jihad for the Liberation of Palestinian says the release has been delayed because the United States did NOT send Assistant Secretary of State John Kelly to Syria this week. That was a key demand of the group.

Secretary of State Baker explained that Kelly is in Europe and that- quoting here- ''the Middle East is NOT on his agenda.'' President Bush- meeting with French President Mitterrand in Key Largo, Florida- added that Kelly did NOT travel to Syria because the United States- in his words- ''does NOT knuckle under to demands'' from terrorists.

Both Bush and Mitterrand urged the Soviet Union to strive for a peaceful settlement with the independence-minded republic through dialogue. Bush said... ''Mr. Gorbachev knows there are limits'' to what the West will accept.

The Soviet Union today cut off natural gas supplies to Lithuania. While the Lithuanian prime minister traveled to Norway to negotiate new energy purchases, the Soviets moved to cut off access to the republic's hard-currency reserves- held in a Soviet bank. Lithuanian leaders maintain they will endure any hardship to achieve independence and they have ordered conservation and rationing of fuel supplies.

-30- 1545

#90109u3933 04/19/1990 ~United Press International

(APRIL 19) UPI - The Defense Department says it has delayed its efforts to put the new Lance short-range missile in Europe. A Pentagon spokesman attributes the delay to a review of the design of the missile, as well as questions raised by Congress. A published report today said the Lance program has been dropped. The White House says the program is under review

with U-S allies.

Two animal rights groups charged today that animal testing done for NASA at an Air Force base in Ohio tortures and neglects monkeys. The groups said baboons... some whose blood had been drained... were strapped in centrifuges and subjected to up to 100 times the force of gravity. Others were kept immobile in body casts for two weeks. The alleged abuse took place at the Wright-Patterson Air Force Base. The Air Force is preparing a response.

A jailhouse informant says the man accused of a racial slaying in New York City boasted that his lawyer would clear him of murder charges with an insanity defense. Informant Charles Brown testified before a jury that Joseph Fama said he shot 16-year-old Yusuf Hawkins. Hawkins and Brown are black, Fama is white. Fama is accused of racist motivations in the August shooting. Brown has been convicted of robbery and statutory rape.

Harvard researchers say that calcium-blocking drugs may offer a way of reducing the dementia, blindness and other neurological symptoms caused by AIDS. About two-thirds of patients in the final stages of AIDS suffer from AIDS dementia complex, which may render them unable to walk or talk. In a test-tube study, a Harvard team found a drug that appears to guard against injuries produced the AIDS virus. Human trials could begin within months.

-30- 1876

#90109u4147 04/19/1990 ~United Press International

(APRIL 19) UPI - The Soviet Union today tightened the economic screws on Lithuania in its continuing attempt to bring the rebellious republic into line.

Moscow slashed natural gas supplies to Lithuania today, after oil shipments had already been curtailed.

And while the Lithuanian prime minister traveled to Norway to try to make other arrangements for energy supplies, the Soviets also cut off Lithuania's access to the republic's hard-currency reserves- held in a Soviet bank.

Lithuanian leaders re-affirmed their resolve to endure any hardship to achieve independence. They say- ''There is ''NO question of rescinding our declaration of independence.''

Motorists were reported to be waiting in line for hours in the Lithuanian capital to receive their rationed supplies of gasoline.

The Lithuanians got vocal support but NO real action today from Presidents Bush and Mitterrand, meeting in the Florida keys.

The French leader urged the Soviets to open a dialogue with Lithuania. Bush said he was ''deeply disturbed'' by the economic measures adopted by the Soviets and added... ''Mr. Gorbachev knows there are limits'' to what the NATO alliance will accept.

The Oklahoma Senate today gave in to four days of protests by the state's public-school teachers and passed a 230-Million-dollar tax package for education reform.

20-thousand teachers were off the job across the state- with most of those picketing outside the Capitol building in Oklahoma City.

Seven months ago Governor Henry Bellmon called the legislature into special session, declaring ''a building crisis'' in the state's education system. Today, the Senate pushed the reform package through in time for the state's next fiscal year, which begins July 1st.

Both the Oklahoma House and Senate had previously passed the package, but the Senate did NOT give it an emergency priority- meaning it would take effect after the new fiscal year began, depriving school districts of any noticeable improvement for the fall term.

The package passed today takes effect immediately, and Governor Bellmon was expected to sign it as soon as it reached his desk.

The bill calls for reduced class size and allows a 15-hundred-dollar raise for teachers for each of the next five years.

Oklahoma's average teacher salary of 22-thousand dollars ranks 48th among the 50 states and the District of Columbia.

-30- 2580

#90109u4178 04/19/1990 ~United Press International

(APRIL 19) UPI - Democrats on the House Budget Committee drew the battle lines for the upcoming fiscal struggle with President Bush today.

The committee voted along party lines to approve a one-point-two-BILLION-dollar budget for the 1991 fiscal year.

Renegade Democrats aroused conservative opposition by forcing even deeper defense cuts than the Democratic leadership had suggested. They trimmed an extra three-BILLION dollars from the defense budget, leaving proposed Pentagon spending at 283-BILLION.

Even the Democrats who voted for the budget proposal say they doN'T know if it will pass the full House.

The ranking Republican on the panel- Bill Frenzel of Minnesota-
dismissed the budget as ''a Democratic exercise'' designed as NOTHING more
than an initial negotiating position for an expected budget summit between
the White House and Congress later this year.

Senator Sam Nunn today laid out a plan to cut European troop levels by up
to two-thirds in five years.

The Georgia Democrat also suggested the Navy think about cutting back from
14 aircraft carriers to 10.

Nunn is the influential chairman of the Senate Armed Services Committee.
He delivered a major address in Washington about how U-S forces should be
reorganized in view of recent changes in Europe.

Nunn proposed a greater reliance on reserve forces and suggested informal
military cooperation with France.

Nunn added that cuts proposed by House Democratic leaders are too deep,
but are ''within the realm of responsibility.''

The Pentagon today UNveiled its own plan for troop reductions in Asia.

The Defense Department told the Senate Armed Services Committee it plans
to pull out 15-thousand of the 135-thousand U-S troops in Asia over the
next three years.

But a Pentagon representative cautioned that recent international affairs
have NOT increased security in Asia as much as in Europe.

-30- 2080
#90109u4229 04/19/1990 ~United Press International
(APRIL 19) UPI - South African President Frederik de Klerk moved to
appease the fears of his nation's white minority today. He promised white
South Africans veto power over any constitution drafted in power-sharing
negotiations with the black majority.

De Klerk addressed a joint session of Parliament, expanding on statements
made earlier in the week in which he dismissed what he called ''simplistic
majority rule.'' He demanded a ''balance of protection for minorities,''
which he claimed would be ''fair to all.''

A high-ranking African National Congress leader responded that de Klerk's
position on one-person-one-vote majority rule is ''totally unacceptable,''
but said power-sharing talks between the apartheid government and the
A-N-C would proceed as scheduled next month.

The constitutional battle simmered as police shot four anti-government demonstrators in a black township south of Johannesburg... and as a fugitive white extremist claimed responsibility for a large weapons theft from the South African defense forces.

The government said today that U-S industry reported it discharged nine percent FEWER toxic chemicals in 1988 than in 1987.

The Environmental Protection Agency says the reasons for the decrease are NOT yet clear and do NOT necessarily indicate a downward trend in pollution.

The E-P-A says industry spewed out nearly five-BILLION pounds of toxic pollution. But government disclosure requirements cover only a fraction of all industrial plants and chemicals.

The E-P-A also does NOT require a toxic discharge report from any company which releases less than 50-thousand pounds of a listed chemical.

It said the decline might be attributable to more accurate emission estimates by reporting plants, more recycling of toxic chemicals or simply lower production levels.

The worst polluters are chemical manufacturers, metal plants and paper mills.

States with the most reported toxic chemical pollution were Louisiana and Texas.

-30- 2167

#90109u4253 04/19/1990 ~United Press International

(APRIL 19) UPI - President Bush and French President Mitterrand voiced their concerns over Moscow's fuel cut-off to Lithuania today while meeting in Key Largo, Florida. Bush said Soviet President Gorbachev knows ''there are limits'' to U-S tolerance of the situation.

The Soviet Union cut oil shipments to Lithuania by 85 percent today, forcing the rebellious republic to conserve and ration what little fuel reserves it has. Lithuanian leaders are NOT backing down, saying they'll withstand anything for independence.

A pro-Iranian group says Washington's failure to send Assistant Secretary of State John Kelly to Syria is delaying the promised release of one American hostage. President Bush says he ''woN'T knuckle under'' to terrorist demands.

Party loyalty proved strong today as the House Budget Committee voted in favor of a one-point-two-TRIILLION-dollar budget for 1991. All 21 Democrats supported the plan while all 14 Republicans voted against it. The budget calls for deep defense cuts.

In its annual report on toxic pollution, the Environmental Protection Agency says U-S industry discharged at least four-and-a-half-BILLION pounds of toxic chemicals to the air, land, and water. Chemical manufacturers, metal plants, and paper mills were the biggest polluters.

One year ago today, the battleship U-S-S Iowa was torn apart by an explosion that killed 47 sailors inside a gun turret. Today, families and shipmates gathered for a private memorial service aboard the ship at the Norfolk Naval Station in Virginia.

-30- 1712
#90109u4299 04/19/1990 ~United Press International
(APRIL 19) UPI - Oklahoma teachers won a big victory this evening when the state Senate passed a 230-Million-dollar education reform package. A four-day teacher walkout has put a lot of pressure on legislators to come up with the money. Oklahoma Governor Henry Bellmon is expected to sign the bill tonight.

Panamanian authorities say rescue crews have located the wreckage of a twin-engine plane that went down in the Pacific Ocean yesterday. 20 of the 22 people aboard the plane were killed. The plane had taken off from Contadora Island, apopular resort town 75 miles south of Panama City.

Nepal's new multi-party government took power today and swore allegiance to King Birendra. It's the first time in 29 years the Himalayan mountain kingdom has a government NOT directly appointed by the monarch.

Civil rights activist Jesse Jackson was in Teaneck, New Jersey, today to meet with the family of a black teen-ager killed by a white police officer. Jackson called the slaying of Phillip Pannell part of a ''national crisis.''

Hawaii's Kilauea volcano spewed molten lava today and torched two more homes as it snaked through the Kalapena Gardens housing area. Today's destruction brings to 82 the number of homes destroyed by the volcano since the beginning of its latest eruption in January 1983.

-30- 1479
#90109u4482 04/19/1990 ~United Press International
(APRIL 19) UPI - President Bush and French President Mitterrand met in Key Largo, Florida, today, with the tense events in Lithuania dominating

discussions. Both leaders said a harsh Soviet crackdown on the rebellious republic could affect East-West relations. Bush said- ''Mr. Gorbachev knows there are limits'' to what the West will accept.

But the Soviets went ahead with sanctions today, cutting off natural gas supplies to Lithuania. Moscow has already have curtailed oil shipments. Motorists in the Lithuanian capital had to wait in line for hours to receive their rations of gas. Attempts to buy gas and oil from nearby Norway have NOT gone well, as Moscow has frozen Lithuanian hard-currency reserves.

A pro-Iranian group that announced plans to free a Western hostage yesterday says the United States ''stumbled the process.'' The Islamic Jihad says it has postponed the release because Washington did NOT meet its demand to send a U-S diplomat to Syria. The group also warned in its latest statement that it will attack airports and airlines carrying Jewish immigrants to Israel.

Senate Republican leader Robert Dole withdrew his support for a resolution recognizing Jerusalem as the capital of Israel today. In an address on the Senate floor, Dole labeled the resolution ''dangerous nonsense'' and also called for a reduction in U-S aid to Israel. Dole said he changed his mind on the issues during his recent trip to the Middle East. Other Republican leaders were quick to criticize Dole's change of heart.

-30- 1701

#90109u4505 04/19/1990 ~United Press International

(APRIL 19) UPI - Striking Oklahoma public school teachers have won a major battle. Four days after teachers began picketing at the state Capitol, the Oklahoma Senate today passed a 230-Million-dollar tax package for educational reform. The package will take effect in time for the fall term. The governor is expected to sign the bill this evening.

In Boston, two lawyers were convicted today of conspiring to launder Millions of dollars in profits belonging to reputed drug kingpin Salvatore Caruana. Edmund Hurley of Boston and Charles Burnett of Pompano Beach, Florida, also were found guilty of defrauding the Internal Revenue Service of four-Million dollars in taxes owed by Caruana. A third defendant was found innocent.

Soviet officials in Chicago today said their country is becoming concerned about the environment, but Moscow first has to worry about feeding the people. Three officials representing the U-S Academy of Sciences are visiting American law schools, including Chicago's John Marshall School of Law. One representative says the Supreme Soviet is trying to balance concerns for the environment with demand for more consumer goods.

A federal judge in Chicago has ruled that a husband and wife were NOT defamed by reports they had oral sex on board on international airline flight. The judge threw out the case yesterday, ruling that news accounts of the incident did NOT identify the couple, and therefore did NOT defame them. The judge also said the couple did NOTHING to prove the reports were wrong, except to blame it on a ''13-year-old girl with an extremely vivid imagination.''

#90110b0055 04/20/1990 ~Business Wire

LOS ANGELES (APRIL 20) BUSINESS WIRE - Health Care Property Investors Inc. (NYSE:HCP) Friday reported that its board of directors increased the company's quarterly cash dividend by $0.0125 to $0.7525 per share.

The dividend will be paid on May 21 to the shareholders of record as of the close of business on May 4. As a result of the increase, the annualized rate of distribution is $3.01 per share. This is the 18th consecutive quarterly increase in the payment of dividends since the company's inception in 1985.

Kenneth B. Roath, chairman and chief executive officer of the company, reported that cash flows from operating activities were at a record high for the quarter ended March 31 and totaled $9,088,000, or 86 cents per share, of common stock. Dividends paid per share for the first quarter of 1990 amounted to 86 percent of cash flows.

Health Care Property Investors Inc. is a self-administered equity-oriented real estate investment trust which invests in health care-related facilities, including long-term-care facilities, acute- care, rehabilitation and psychiatric hospitals, substance-abuse recovery centers congregate-care and assisted-living facilities and medical office buildings.

#90110b0072 04/20/1990 ~Business Wire

CHICAGO (APRIL 20) BUSINESS WIRE - FMC Gold Co. Friday reported first quarter earnings per share of 20 cents, compared with 21 cents per share in the first quarter of 1989.

Net income of $13.3 million was 1 percent below 1989 results. Lower gold production was partially offset by increased silver production; however, higher production costs caused by lower gold grades reduced net income from the last year's quarter. Sales of $37 million for the quarter were

even with last year's quarter.

The average realized price of gold increased slightly to $404 per ounce from $395 per ounce in the 1989 quarter. The average realized price of silver declined to $5.19 per ounce from $5.94 per ounce in the year-ago period.

In the first quarter, FMC Gold produced 72,000 ounces of gold compared with 84,000 ounces in the like period last year. Lower gold grades caused the decline.

At the Jerritt Canyon, Nev., mine, start-up problems continued with the new ore-roasting circuit. During a 13-day shutdown of the ore-roasting circuit in March, these problems were identified, and corrective actions are being taken. Silver production during the first quarter increased to 1.7 million ounces from 1.2 million ounces in 1988, as the richer silver portion of the Paradise Peak, Nev., orebody was mined.

Cash production costs increased during the quarter to $131 per gold equivalent ounce, compared with $116 per gold equivalent ounce last year. Higher operating costs reflected lower ore grades at Paradise Peak and start-up costs associated with the new ore-roasting circuit at Jerritt Canyon. Production costs at Jerritt Canyon should decline as the full benefits of the roaster are realized later this year.

FMC Gold held $79 million in cash and cash equivalents at the end of the quarter, increasing interest income to $1.5 million in the quarter compared with $0.6 million last year.

''Our low-cost operations continued to generate strong cash flow,'' said Robert N. Burt, chairman and chief executive officer. ''These cash resources will support increasing exploration activity at Paradise Peak and Jerritt Canyon and continuing our active acquisition and exploration program to acquire and develop additional reserves.''

In March exploration drilling at Paradise Peak began on several new targets identified last year. Drilling is also planned for areas near the Ketchup Flat and County Line deposits.

Exploration drilling continued at Jerritt Canyon to further define the gold resource discovered earlier this year. This geologic resource contains 2,124,000 tons of material with an average grade of 0.288 ounces of gold per ton, for a total of 612,000 ounces of contained gold -- or 184,000 ounces representing FMC Gold's 30 percent interest.

This gold resource occurs at depths essentially unexplored at Jerritt Canyon and displays continuity of geology and mineralization. Because of these favorable characteristics, and the fact that the mineralization

remains open in three directions, the company is continuing to drill to determine the possible limits of gold mineralization and whether a commercial deposit exists.

As previously announced, FMC Gold Co. entered into a definitive agreement to acquire Meridian Gold Co. for 8 million new shares of FMC Gold stock. Meridian Gold holds between 1.2 million and 1.4 million ounces of proven and probable gold reserves and exploration targets with excellent potential for future reserve additions.

Meridian Gold controls two principal properties: the Royal Mountain King gold mine which has been operating since early 1989 in the Motherlode district of California, and the Beartrack property which is in the pre-development stage in central Idaho. Other exploration holdings include the Lincoln joint venture, an advanced stage exploration project in California.

''The Meridian Gold properties offer us an excellent opportunity to expand our reserves and to capitalize on our proven exploration and development expertise,'' said Burt.

#90110b0076 04/20/1990 ~Business Wire

DENVER (APRIL 18) BUSINESS WIRE - AIRCOA Hotel Partners L.P. (AMEX:AHT) announced financial results for the fourth quarter and its fiscal year ended Dec. 31, 1989.

Partnership operating revenues for the fourth quarter of 1989 were $9,518,000, compared with $11,802,000 in 1988. Revenue for all of 1989 was $55,165,000, down slightly from $55,614,000 in 1988 and was derived principally from operation of the partnership's hotels.

The sale of Kona in the third quarter of 1989 resulted in the partnership only realizing approximately 75 percent of Kona's annual 1989 revenue. The effect on revenue, had Kona remained in the partnership for the twelve months of 1989 would have been to increase the total partnership revenue by approximately $3,300,000.

The partnership reported net income of $27,760,000, or $3.72 per Class A Unit, on 2,520,219 weighted average Class A units outstanding for the year ended Dec. 31, 1989, compared to a net loss of $3,199,000, or $1.70 per Class A unit, on 2,347,392 weighted average Class A units outstanding for 1988.

For the fourth quarter of 1989 net losses totaled $1,172,000, or 47 cents per Class A unit, compared to net losses of $2,409,000, or $1.03 per Class A unit, in the fourth quarter of 1988. Depreciation and amortization for the years ended 1989 and 1988 respectively, were $4,145,00 and $4,121,000.

Comparative operating statistics for the properties owned by the partnership for the calendar years 1989 and 1988 respectively include: percentage of occupancy - 70.7 percent and 70.7 percent; average daily room rate - $75.99 and $73.40; and gross operating profit - $16,389,000 and $16,930,000. Gross operating profit includes all operating revenues less operating expenses, except for debt service, depreciation, amortization, and certain other fixed expenses.

The weighted average daily room rate increased approximately 3.5 percent in 1989 over 1988 while the weighted average occupancy level has remained constant from 1988 to 1989. A review of the individual property performance indicates significant improvement in the daily room rate at Fourwinds, Buffalo and Lakeside.

The appraised value of the properties increased 9.9 percent from the original appraisal in November 1986 to the appraisals made in December 1988. The aggregate appraised value of the properties decreased from December 1988 to December 1989 by .9 percent (excluding Kona Village) principally due to the decrease in value of the Sheraton University property.

Class A unitholders of record as of Jan. 31, 1990, were paid a 57 cent quarterly distribution on Feb. 15, 1990, and the first quarter distribution of 54 cents has been declared and will be paid to Class A unitholders of record on April 30, 1990.

SANTA CRUZ, CA. (APRIL 18) BUSINESS WIRE - The Santa Cruz Operation Inc. (SCO), a leading supplier of open-system software for standard microcomputers, Friday announced Digital Equipment Corp. has selected SCO UNIX System V/386 Release 3.2 as the standard operating system for its new 386-based systems -- the DECsystem 316+, the DECsystem 325c and the DECsystem 333c.

The new DECsystem packages are targeted at organizations for use by up to 64 online users who wish to take advantage of the popular SCO business applications that Digital will distribute, as well as the more than 3,000 applications available today under SCO UNIX System V.

According to Gary Eichhorn, Digital's vice president, General Systems Business: ''The small-business computer market is driven by the availability of business applications. To successfully address this market, we selected SCO UNIX System V as the operating system of choice for our new DECstations because it supports the largest number of these busines applications.

''In addition, SCO UNIX System V suppports many of the standards upon which our Network Application Support strategy is based, including POSIX, X11, TCP/IP, and SQL.''

VANCOUVER, BRITISH COLUMBIA (APRIL 20) BUSINESS WIRE - Skyline Gold Corp. (TSE,VSE:SKX) Friday requested a halt of trading of its common stock.

Unfounded rumors, including the purported sale by the principal shareholder of the company of his holdings and imminent closure of the mine, were circulating in the market. Ronald C. Shon, chairman and chief executive officer has denied such rumors.

The company is currently processing ore at a rate of 350 tons per day.

Since its last reserve report issued in October 1989 it has been unable to replace mineable reserves at the same rate processed by the mill. Underground diamond drilling is continuing in an effort to improve this situation.

The company is pursuing alternatives to strengthen its long-term viability including the acceleration of the exploration of its substantial property interests in the Iskut River area.

#90110b0103 04/20/1990 ~Business Wire

PORTLAND, OR (APRIL 20) BUSINESS WIRE - Portland General Corp. (NYSE: PGN) reported earnings of $37 million or 79 cents per share for the three months ended Mar. 31, 1990, on revenues of $240 million.

This compares with earnings of $38 million or 82 cents per share in the first quarter of 1989 on revenues of $220 million.

Operating revenues for Portland General's principal subsidiary, Portland General Electric Co. (PGE), rose $22 million or 10 percent in the first quarter of 1990 compared with the first quarter of 1989. PGE wholesale electricity revenues increased $20 million due to greater demand from California utilities. Continued strong economic conditions in PGE's service area of northwest Oregon kept retail electricity sales essentially level with the first quarter of 1989, when frigid weather created record-high demand.

The revenue increase was offset by a $24 million increase in operating expenses. Expenses rose primarily because the utility purchased more power than in the comparable 1989 period. Maintenance at two combustion-turbine plants that ran during the 1990 period and getting an earlier start this year on the annual maintenance and refueling outage at PGE's 1.1 million-kilowatt Trojan Nuclear Plant also added to expenses. Trojan closed for its annual outage Mar. 19, completing a plant-record 167 consecutive days of operation.

For the 12 months ended Mar. 31, 1990, Portland General had a loss of $28 million or 61 cents per share on revenues of $817 million compared with earnings of $98 million or $2.13 per share on revenues of $767 million for the period ended Mar. 31, 1989. The loss resulted from reserves totaling $101 million taken in the fourth quarter of 1989 for unresolved rate matters and the discontinuance of real-estate operations. Excluding the reserves, earnings per share would have been $1.58.

Revenues from wholesale electricity sales increased 43 percent in the 12-month period, while retail electricity sales revenues rose 3 percent.

Portland General is an energy company with businesses offering regulated and commercial energy products and services. PGE, an electric utility serving more than 569,000 retail customers, provides almost all revenues. Other businesses provide long-term electricity sales and services to utilities, independent power development, and equipment leasing.

WOODBURN, OR (APRIL 20) BUSINESS WIRE - Seafirst Corp. Friday announced it will be opening Woodburn State Bank as Seafirst Bank Oregon on Monday, Apr. 23.

The opening will follow a weekend-long conversion of signs and systems by a team from Seafirst and Woodburn State Bank, which was acquired by Seafirst Corp. and its parent company, BankAmerica Corp., earlier this month. Following the conversion, the bank will feature a new Seafirst cash machine and will offer a full line of Seafirst products and services to its new and existing customers.

Jeffrey A. Farber will serve as president of Seafirst's Oregon Bank. Previously, Farber was senior vice president and manager of Seafirst's Oregon Division.

Customers will also have access to approximately 1,100 ACCEL and PLUS Network cash machines throughout Oregon. Woodburn State Bank customers have been mailed Seafirst Cash Machine Access cards and personal identification numbers so they can use the machines beginning the week of Apr. 23.

The acquisition adds one branch, and approximately $17 million in assets and $15 million in deposits to Seafirst. Seafirst is also opening a new branch in Fourth Plain, Wash., on Monday, which will bring its total branch count to 185 in Washington state.

Seafirst has had an Oregon presence since establishing an Edge Act office for international banking in Portland in 1982, and has been active in corporate banking since the mid-1980's when it formed its Oregon Division. Real estate and direct sales activities were added in 1987, and in 1988 it opened a second office near Washington Square.

#90110b0169 04/20/1990 ~Business Wire

MILLBRAE, CA. (APRIL 20) BUSINESS WIRE - Homestead Financial Corp. (NYSE: HFL, HFLB) reported its preliminary first quarter 1990 earnings on April 11.

The company finalized its results Friday, confirming the previously reported net income of $4.5 million or 40 cents per share for the first quarter of 1990 compared to a net loss of $21.5 million or $1.90 per share for the comparable period of 1989.

''The quarter's strong results reflect the improvement in core earnings of our savings and loan subsidiary and the continued success of our land development subsidiary. These results are also consistent with the thrift's recently approved Capital Plan,'' commented Lawrence Weissberg, chairman and chief executive officer.

As previously announced, the capital plan of Homestead Savings, the company's savings and loan subsidiary, was approved by the Office of Thrift Supervision.

Net interest income after provisions for loan losses totalled $11.4 million for the first quarter of 1990, increasing $4.8 million over its 1989 first quarter level of $6.6 million.

The improvement was due to both an increase in the average yield on interest-earning assets and a decrease in the average cost on interest-bearing liabilities. Primary interest rate spread increased from

.31 percent at March 31, 1989 to 2.01 percent at March 31, 1990.

General and administrative expenses decreased 11 percent from $14.2 million for the first quarter of 1989 to $12.6 million for the first quarter of 1990. Reduced personnel and commission expenses were the main reasons for the improvement.

Homestead Land Development Corp., the company's residential real estate development subsidiary, reported income from real estate operations of $7.9 million for the first quarter of 1990 compared to $6.8 million for the first quarter of 1989.

HLDC closed 152 homes, resulting in income of $4.70 million, during the first quarter of 1990 compared to 63 homes, resulting in income of $0.15 million, during the comparable period in 1989.

Also during the first quarter of 1990, HLDC sold three land parcels, contributing $4.1 million in income, compared to one land parcel, contributing $7.9 million in income, during the first quarter of 1989.

During the first quarter of 1990, the company reported a $1.6 million loss provision compared to a $0.6 million loss provision for the first three months of 1989.

Since the company changed its method of accounting for purchased service rights effective Jan. 1, 1989, the first quarter 1989 results reflect a $24.6 million aftertax cumulative charge relating to periods prior to Jan. 1, 1989.

Homestead Financial Corp. is a financial services company specializing in savings and loan activities and residential real estate development.

#90110b0174 04/20/1990 ~Business Wire

DAKOTA CITY, NE (APRIL 20) BUSINESS WIRE - Most meatpackers lost money during the first three months of 1990 according to industry sources.

However IBP's financial performance during the first quarter of 1990 was profitable and showed improvement over the same period last year, IBP Chairman Robert L. Peterson announced Friday.

Sales for the first quarter, which ended March 31, totaled $2.4 billion compared to $2.2 billion for the first three months of 1989. Income from operations was $17.8 million, up from the $14.1 million realized for the

same period last year. Net earnings for the first quarter were $4.4 million, or 9 cents per share, which compares to $1.4 million, or 3 cents per share in the first quarter of 1989.

Operating income and net earnings were reduced in both quarters by a non-cash item of $2.8 million, or about 5 cents per share, as a result of the effects of SEC-mandated pushdown accounting adopted by IBP when it sold its stock publicly in 1987.

''Market conditions continue to pressure profit margins throughout our industry,'' Peterson said. ''These pressures have been particularly felt by inefficient packers who have responded by closing plants or reducing production schedules. However, we were able to deliver profitable results in both beef and pork due to our low cost operating position.''

IBP will open its newest and largest fresh pork plant at Waterloo in May. Meanwhile, construction continues on the company's new beef complex at Lexington, Neb. The facility is scheduled to begin operations in the fall of 1990.

IBP is the world's largest producer of fresh beef and pork, employing about 24,000 people nationwide and overseas.

#90110b0190 04/20/1990 ~Business Wire

CLEVELAND OH (APRIL 20) BUSINESS WIRE - Cleveland-Cliffs Inc today reported earnings before special items of $6.6 million, or 56 cents a common share, for the first quarter of 1990, versus comparable earnings of $7.6 million, or 65 cents a share, in the first quarter of 1989. The $1.0 million decline was primarily due to lower sales and production volume, partially offset by decreased net interest expense.

Results for 1990 and 1989 also included unusual items and 1989 results also included discontinued operations. With the special items, 1990 first quarter net income was $5.5 million, or 47 cents a share, as compared to $12.9 million, or $1.11 a share for the comparable 1989 first quarter.

The unusual charge in 1990 primarily reflects an unfavorable court decision regarding benefits alleged to be due certain employees whose jobs were eliminated in 1986.

Cliffs-managed mines in North America produced 9.1 million tons of pellets in the first three months of 1990 versus 10 million tons in the first

quarter of 1989, resulting in lower royalty and fee income. Lower production in 1990 was primarily due to a programmed decrease in production at the Tilden Mine. The normal annual production capacity of Tilden was reduced from 8 million tons to 6.7 million tons in August, 1989 when the mine completed the conversion of facilities to allow the production of both magnetite and hematite pellets. Tilden produced 7.1 million tons for the total year 1989.

Cliffs' total operating revenues from continuing operations were $55.8 million for the first three months of 1990 compared with $68.0 million for the first quarter of 1989. The revenue decrease reflects lower iron ore sales and production volume. Cliffs' pellet sales in the first quarter of 1990 were 1.1 million tons versus 1.5 million tons in 1989.

Cliffs' quarterly results are not necessarily representative of annual results due to seasonal and other factors. Iron ore shipments are restricted in the first quarter due to ice conditions on the Great Lakes. Cliffs' first quarter 1990 sales, while below 1989, were relatively high by historical comparison.

Cleveland-Cliffs Inc, as manager of six iron ore mines in North America and Australia for the ownership interests of Cliffs and various steel companies, is the world's largest producer of iron ore pellets. Cliffs holds a major iron ore reserve position in the United States and is a substantial iron ore merchant.

ST. JOSEPH, MO (APRIL 23) BUSINESS WIRE - St. Joseph Light & Power Co. Friday announced first quarter earnings of 48 cents per common share, a decrease of 14 cents from the 62 cents reported in the first quarter of 1989.

Terry F. Steinbecker, president, reported operating revenues for the first three months of 1990 totaled $19.4 million, down from the $20.1 million reported for the same period a year ago.

''The mild winter weather was primarily responsible for the decreased revenues,'' Steinbecker said.

''Total electric sales declined about 1 percent for these three months in 1990, compared to the first quarter in 1989. Only sales to industrial customers increased during this period.''

Operating expenses, including income taxes, totaled $16.5 million, the same amount that was reported for the 1989 period. Net income totaled $2 million for the first three months in 1990, compared to $2.7 million in 1989.

Light & Power has about 4.2 million shares of common stock outstanding.

#90110b0617 04/20/1990 ~Business Wire
PHOENIX (APRIL 20) BUSINESS WIRE - John W. Teets, chairman, president and chief executive officer, Greyhound Dial Corp. (NYSE:G), Friday announced revenues, income and earnings per share for the first quarter ended March 31, 1990.

For the first quarter of 1990, revenues were $865,504,000, compared to $841,789,000 in the prior year.

Net income was $16,890,000, up 14 percent, compared to $14,836,000 in the 1989 quarter.

Net income per share was 42 cents, up 11 percent from the 38 cents per share reported in 1989.

Travelers Express and the Dobbs companies posted increases in profits in

the services segment. Republic Money Orders Inc., acquired in April 1989, contributed to the Travelers' increase over 1989. The services group, however, had a slight decrease in overall operating income, as these gains were offset by declines in several other areas.

The largest decline was in the food service area, due to the first quarter closure, or reduced activity of a number of major automotive plants. Transportation services also recorded a profit decline largely because the prior year included gains on the sale of buses. Premier Cruise Lines did not achieve the planned mix of package sales (vs. cruise only) in the period, although advance bookings now are back on plan.

Transportation manufacturing experienced weakness in the first quarter as compared to its very strong showing in the 1989 quarter due in large part to substantial engineering modifications on a major transit bus order, which interrupted first quarter transit production.

The financial group had an excellent quarter with net income increasing 30 percent. The increase was due to a higher level of funds employed, improved yields, including higher yields on new business booked, and higher gains on sales, partly offset by increased loss provisions.

Greyhound Financial Corp. also recorded another upgrading in its debt ratings by one of the national rating agencies. This brings to six the total upgrades by the three national rating agencies in the 1989-1990 period.

NEW YORK (APRIL 20) BUSINESS WIRE - Tokyo's Imperial Hotel has named Masao Iwasaki as its new sales manager.

Iwasaki will be responsible for managing the sales efforts of the Eastern region of the United States.

Iwasaki has held a variety of positions with the Imperial Hotel from 1976 to 1983. He served as Senior Assistant Sales Manager at the Hotel Kitano in New York, until 1985 when he returned to the Imperial.

This appointment will be particularly significant as the Imperial launches a year-long celebration and sales effort to mark the centennial anniversary of the hotel.

Located in the heart of Tokyo and featuring the largest banquet facilities

in Japan, the Imperial Hotel has provided the highest- quality personal service and accommodations to its clientele since its establishment in 1890.

#90110b0622 04/20/1990 ~Business Wire

RICHMOND, VA (APRIL 20) BUSINESS WIRE - On Monday, the day after the 20th anniversary celebration of the first Earth Day, Reynolds Aluminum Recycling Co. (RARCO) will prevent more than a million pounds of recyclable aluminum from entering the solid waste stream, keeping more than 1,000 garbage trucks from having to make a trip to local landfills.

''While the nation observes a watershed event in the history of the environmental movement in the United States on April 22, recycling at Reynolds is not something we do only on special occasions,'' says Charles W. Rayfield, vice president and general manager of RARCO.

''Every day, we keep a million pounds of solid waste out of America's landfills. Every day we eliminate the need to mine 2,000 tons of bauxite ore and conserve more than 8 million kilowatt hours of electricity.

''We have shown Americans the value of recycling, and now Americans are recycling a bit more every day than they did the day before. In the future, all of us will have to make every day Earth Day,'' he added.

Since establishing the first aluminum recycling center in the United States in Commerce, Calif., in 1968, two years before the first Earth Day, Reynolds has recycled more than 100 billion all-aluminum beverage cans, plus millions of pounds of other types of non-can scrap including foil, frozen food and dinner trays, lawn- furniture tubing, siding, gutters, downspouts, and storm door and window frames. In the process, Reynolds has paid recyclers more than $1.2 billion.

During the past decade, Reynolds has recycled more than 100 percent of the cans produced by its can manufacturing division, leading the industry to a current recycling rate of more than 60 percent of all aluminum cans made.

Citing Reynolds accomplishments in the consumer recycling field and its significant impact within the environmental movement, Rayfield noted the 20th anniversary celebration of Earth Day by saying, ''This year's anniversary celebration comes complete with new demonstrations, exhibits, environmental advertising and calls for more stringent regulations to protect our air, water and land.

Reynolds Aluminum Recycling Co. is a wholly owned subsidiary of Reynolds Metals Co. that operates a nationwide network of recycling locations. To obtain the location of the nearest Reynolds Aluminum recycling center, consumers can call toll-free, 800/228-2525.

ALBANY, NY (APRIL 20) BUSINESS WIRE - Albany International Corp. (NYSE/PSE:AIN) announced first quarter net income of $2.5 million or 10 cents per share compared with $9.4 million or 37 cents per share in the first quarter of 1989.

The earnings were about in line with the company's expectations announced in March. First quarter 1989 earnings included a gain of 10 cents per share on sale of real property in Sweden. Net sales increased 10.9 percent to $131.0 million from $118.2 million.

J. Spencer Standish, chairman, commented that, as previosly announced, first quarter earnings were reduced by the unstable economic conditions in Latin America, particularly Brazil; costs associated with the company's capital expenditure programs in Europe and increased costs incurred to support anticipated sales increases. Orders exceeded sales in all market areas.

Albany International is the world's largest producer of paper machine clothing, with 36 manufacturing plants in 12 countries.

MILPITAS, CA (APRIL 20) BUSINESS WIRE - LSI Logic Corp. (NYSE:LSI) Friday said it returned to profitability in the first quarter, aided by record

bookings, improved factory utilization and cost controls.

In the first quarter ended April 1, revenues were $139 million, up 4 percent from revenues of $133.9 million in the first quarter a year ago.

Net income in the first quarter was $2.1 million, or 5 cents a share, which included an extraordinary gain of $955,000, or 2 cents a share, related to the early retirement of convertible debt.

While net income in the first quarter was down 74 percent from net income of $8 million, or 19 cents a share, in the like quarter a year ago, it was a turnaround from a loss of $1.7 million, or 4 cents a share, in the fourth quarter of 1989.

In the first quarter, several key financial indicators showed marked improvement from the prior quarter. Operating income of $2.2 million in the first quarter was up five-fold from operating income of $431,000 in the fourth quarter of 1989. Gross margins of 28.9 percent improved more than 2 percentage points from the prior quarter.

Employee headcount at the end of the first quarter was nearly 10 percent below the peak in September of 1989, and flat with the end of the year.

LSI Logic Corp. is a leading supplier of high-performance semiconductors. The company is the premier supplier of HCMOS application-specific integrated circuits (ASIC) and the leading supplier of 32-bit RISC microprocessors, which utilize Reduced Instruction Set Computing technology.

The company also supplies digital signal processing chips used in imaging, high-definition and multimedia applications, and also chip sets and graphics boards for IBM-compatible personal computers.

#90110b0638 04/20/1990 ~Business Wire

HOUSTON (APRIL 20) BUSINESS WIRE - Lyondell Petrochemical Co. (NYSE: LYO) Friday reported net income for the first quarter of 1990 of $78 million, or 98 cents per share, on sales of $1.5 billion.

Bob G. Gower, president and chief executive officer of Lyondell Petrochemical Co., said, ''We are pleased to report that Lyondell's earnings in the first quarter of 1990 represent a 22 percent increase from the fourth quarter of 1989. This was due primarily to higher refining margins and higher ethylene sales volumes, which more than offset slightly

lower ethylene margins.

''We believe Lyondell benefited in the first quarter by being better able to take advantage of favorable market conditions created by weather related disruptions in late December,'' Gower said. ''Our facilities were less affected by the cold weather conditions than many others.

Lyondell Petrochemical Co., headquartered in Houston, manufactures and markets a wide variety of petrochemicals including olefins (primarily ethylene, propylene, butadiene and butylenes), methanol, aromatics and specialty products, polyethylene and polypropylene and refined petroleum products, including gasoline, heating oil, jet fuel and lubricants.

IRVINE, CA (APRIL 20) BUSINESS WIRE - Western Digital Corp. (Amex:WDC) Friday reported net income of $8.8 million, or $.30 per share, for the third fiscal quarter ended March 31, 1990, a 100 percent increase from net income of $4.4 million, or $.15 per share, in the third quarter of fiscal 1989.

The company reported record revenue of $286.8 million for the third quarter of fiscal 1990, an 18 percent increase from revenue of $243.2 million in the third quarter of fiscal 1989.

Net income for the first nine months of fiscal 1990 totaled $14.7 million, or $.50 per share, on revenue of $776.6 million, compared with net income of $30.0 million, or $1.04 per share, on revenue of $748.6 million for the corresponding period of the prior year.

Western Digital Corporation, headquartered in Irvine, California, is a multinational company that designs, develops, manufactures and markets semiconductor devices, subsystems, and intelligent disk drives for original equipment manufacturers and resellers which serve the microcomputer industry. The Storage Products unit provides a broad range of intelligent disk drives and storage controllers. The Microcomputer Products unit provides communications, imaging, systems logic, and integrated systems products.

COLLEGE POINT, NY (APRIL 20) BUSINESS WIRE - EDO Corp. (NYSE:EDO) reported Friday that its Government Systems and Barnes Engineering Divisions had been awarded contracts with an aggregate value of $26.7 million.

The announcement was made by EDO's President and Chief Executive Officer, Gerald Albert. Approximately $16.8 million of the aggregate amount represents contracts won by EDO's Barnes Engineering Division for space related products with the remainder (approximately $9.9 million) attributable to Government Systems Division awards.

The Barnes contract activity includes two contracts, received from GE Astro Space of East Windsor, N.J., for Barnes's Static Earth Sensors to be used aboard Global Positioning System (GPS) satellites and Defense Meteorological Satellites.

The Global Positioning System is a constellation of satellites which will furnish high precision navigation signals to guide ships, aircraft and ground-based vehicles anywhere in the world. Barnes earth sensors will also be incorporated in the Defense Meteorological Satellite Program (DMSP), which supports the U.S. military with up-to-date, global weather information. Barnes, which has been a supplier of earth sensors to GE Astro Space since the early 1970's, is the nation's largest supplier of spacecraft earth sensors, with over 850 delivered to date.

In addition, Barnes received a contract from Hughes Aircraft under which Barnes will provide horizon sensors for Hughes's highly successful communications satellite program, the HS-601 Satellite. The HS-601 will be utilized for both commercial and military programs.

The Government Systems Division awards, received from the U.S. Navy, were in two principle product areas, Airborne Mine Countermeasures (AMCM) and Anti-Submarine Warfare (ASW). The AMCM award is for the production of EDO's MK-105 helicopter towed magnetic minesweeping systems. In the ASW area, EDO was contracted to develop and manufacture the tow body and handling system for the first phase of the Navy's Multistatic Sonar System a program intended to evaluate the concept of towing a very large acoustic source.

Commenting on the recent contract activity, Gerald Albert stated, ''Despite reductions in overall U.S. defense spending, EDO's fields of expertise, such as Anti-Submarine Warfare, Mine Countermeasures and Space systems are priority areas in the defense budget and will continue to provide opportunities for the company.''

EDO Corp. designs and manufactures advanced electronic and specialized equipment for military and commercial aerospace, marine and industrial

markets.

SAN DIEGO (APRIL 20) BUSINESS WIRE - Datatronix Financial Services (traded OTC) Friday announced first-quarter 1990 earnings of $103,252, or 29 cents per share, a 20 percent increase over earnings of $86,000, or 24 cents per share, in the first quarter of last year.

Total revenue for the quarter rose 25 percent, to $1.88 million from $1.50 million in the first quarter of 1989.

James S. Brown, chairman of the board, said, ''In the first quarter, Datatronix continued on the path of steady growth we established over the last two years. The most important news in the quarter, however, is that Datatronix became a public company.

''Being a stand-alone company will allow us to grow much faster through a combination of merger, acquisition, more aggressive marketing and an expanded product line.''

Datatronix Financial Services was formerly BSD Datacorp, a wholly owned subsidiary of BSD Bancorp Inc. Datatronix became an independent, publicly traded corporation on Feb. 13, 1990, through a 1-for-10 distribution of stock to the shareholders of BSD Bancorp Inc. There are approximately 351,000 shares of Datatronix outstanding.

Datatronix Financial Services is an item processing company serving financial institutions throughout Southern California. With headquarters in San Diego, Datatronix operates check processing facilities in San Diego Costa Mesa and Glendale. The company operates one subsidiary, Datatronix Marketing Services, which is responsible for all marketing, sales, customer service and business development activities for Datatronix Financial Services.

#90110b0659 04/20/1990 ~Business Wire

SAN ANTONIO, TX (APRIL 20) BUSINESS WIRE - Datapoint Corp. (NYSE: DPT) Friday combined unprecedented performance and network power, announcing its 7850 -- a network server employing leading-edge 80486 microprocessors.

The powerful system -- specially designed, like all Datapoint products, for use with a local area network -- boasts two 25-megahertz 80486 CPUs and intelligent I/O adapters. Dual resource interface modules (RIMs) will enable the 7850 to serve as many as four separate, interconnecting ARCNET (Attached Resource Computer) local area networks.

The 7850 system will support as much as 32 megabytes of RAM, 2.4 gigabytes of disk storage, and 2.2 gigabytes of tape backup.

Thanks to dual porting, both CPUs have full access to the entire amount of system RAM. The 7850's tightly-coupled, symmetric architecture allows network users transparent access to the power of the two 486s.

The efficient operation enabled by this architecture is like the service provided by a single queue system for multiple agents, such as that often found in banks and post offices and at airline ticket counters, where the next available agent serves the person first in line. In the case of the 7850, the next available CPU processes whatever task is first in the queue.

As an example of its processing power, the 7850 is capable of supporting 64 simultaneous ORACLE database users with sub-second response times. In all, the 7850 offers as much as four times the performance of Datapoint's 7800 network server, which employs dual 16 megahertz 80386 CPUs.

The 7850 comes packaged with Datapoint's comprehensive network operating environment, including disk mirroring, high-speed tape-backup utilities, electronic mail, printer management, and other utilities and office management software.

As well, the network operating environment includes the 32-user industry-standard NETBIOS/SMB DATALAN personal computer network operating system software, so the 7850 is fully equipped to support high-speed file service to the customers' PCs.

Datapoint's licensed version of the ORACLE relational database management system is offered as an option with the 7850. Banding (multi-user-licensing) is available to accommodate the number of simultaneous users the buyer requires.

Using the ORACLE SQL Net NETBIOS interface, the 7850 can serve as the database engine for any other user on the network using a SQL application, offering controlled database access from workstations on the powerful DATALAN PC network.

Versions of C, COBOL, and DATABUS programming languages are also available for the 7850, specially compiled to exploit the advanced features of the 80486.

The Datapoint 7850 system is available for order and immediate delivery. Price for the dual-processor server with 16 megabytes of RAM and support for two networks is $29,990.00. A minimum configuration, comprising the dual-processor server with 16 megabytes of RAM, 300 megabyte disk, 150 megabyte tape, and 32-user network operating environment is $44,985.00.

Datapoint Corp., headquartered in San Antonio, Texas, develops, manufactures, and markets computer and communication products for integrated network systems worldwide.

NEW YORK (APRIL 20) BUSINESS WIRE - General American Investors Co. Inc., a publicly traded investment fund listed on the New York Stock Exchange (GAM), Friday reported total net assets as of March 31, 1990 of $382,095,216, as compared with net assets of $381,932,574 at Dec. 31, 1989 and $317,515,161 at March 31, 1989.

The figure for March 31, 1990 is after deductions of $11,619,317, representing the portion of the 1989 year-end dividends paid in cash on Dec. 27, 1989, and $1,962,732, representing the 1989 spill-over dividends paid in cash on Feb. 6, 1990.

Net asset value per share of common stock at March 31, 1990 was $21.50, as compared with $21.30 per share at Dec. 31, 1989, adjusted to reflect a deduction for the dividends paid in February, 1990 and with $18.23 per share at March 31, 1989.

During the three months ended March 31, 1990, 71,000 shares of the company's common stock were purchased at an average discount from net asset value of 16.4 percent for $1,226,821 and are in the Treasury.

The company reported that it had made new commitments during the first quarter of 1990 in Baker Hughes, Baldwin Technology, FlightSafety International, Ford, Luxottica Group, Molex and Pfizer. In addition, it had increased its holdings in Acuson, Barnett Banks and Glaxo Holdings.

The holdings of C.R. Bard, Hafslund Nycomed and McCaw Cellular Communications were eliminated, while reductions were made in the holdings of Premier Industrial and Rouse.

The largest stock holdings in the company's portfolio at March 31, 1990 included Wal-Mart Stores Inc., The Home Depot Inc., Toys R Us Inc., The Limited Inc. and American International Group Inc.

FRANKLIN LAKES, NJ (APRIL 20) BUSINESS WIRE - Becton Dickinson and Company reported Friday that sales for its second fiscal quarter, which ended March 31, 1990, were $521 million, an increase of 12.5 percent over the $463 million reported a year ago.

Earnings per share for the quarter were $1.16 compared with $1.12 a year ago. Last year's quarter included $.08 from discontinued operations.

Net income for the quarter was $46 million. A year ago, net income was $45 million, including $3 million from discontinued operations.

''We are pleased with the second quarter results. They continue to confirm that our rate of sales growth is accelerating and that operating margins continue to improve,'' said Raymond V. Gilmartin, president and chief executive officer of Becton Dickinson.

The company also noted that, as expected, a higher tax rate offset much of the operating margin improvement.

On a geographic basis, U.S. sales grew 8.4 percent to $306 million, while sales outside the United States grew 18.8 percent to $214 million.

On a business segment basis, diagnostic systems sales increased 15 percent

to $218 million, and medical supplies and devices revenue grew 10.7 percent to $302 million.

For the six months ended March 31, 1990 the company reported sales of $950 million, a 9.3 percent increase over the $869 million reported last year.

Earnings per share for the six months were $1.87 compared with $1.81 a year ago. Last year's period included $.20 from discontinued operations.

Net income for the first six months of the fiscal year was $73 million. A year ago, net income was also $73 million, including $8 million from discontinued operations.

STAMFORD, CT (APRIL 20) BUSINESS WIRE - General Housewares Corp. (NYSE:GHW) announced Friday that it has completed the sale of the Colonial Candle operations of its Giftware Group to Blyth Industries Inc., a privately held company, is headquartered in Greenwich, Conn.

In addition, GHC's board of directors has accepted a proposal from an employee management group to acquire the Kitchen Textile Coordinates business of its Giftware Group. Kitchen Textile Coordinates is a domestic fabric printer/towel maker and cut and sew producer of fashion coordinated aprons, oven mitts, towels and placemats, and marketer of complementary ceramic canister sets and mugs.

While subject to the preparation of definitive documentation and the satisfaction of certain conditions, it is expected that the kitchen textile coordinates transaction will be completed on or about June 30, 1990.

When all transactions are completed, it is anticipated that the proceeds from the sale of both businesses will approximate the group's total 1989 year-end book value of $15 million.

General Housewares Corp. is a leading manufacturer and marketer of cookware and cutlery.

#90110b0702 04/20/1990 ~Business Wire

CINCINNATI (APRIL 20) BUSINESS WIRE - Omnicare Inc. (NYSE:OCR) Friday announced that it has undertaken to divest itself of its medical and industrial oxygen business, which business has been operating unprofitably for several years.

The company has entered into active negotiations to sell a major portion of the assets of its Bunn/Xorbox Group. Given the proposed terms of these negotiations, the company has taken a one-time charge of $2,478,000 after taxes, or 28 cents per share, to its earnings for the quarter ended March 31, 1990.

This charge, along with the operating losses of the Bunn/Xorbox Group for the first quarter of $341,000, or 4 cents per share, are included in Omnicare's results as ''discontinued operations.''

On a continuing operations basis, including the operating results of Omnicare's medical and dental products business (Veratex Group) and its nursing home pharmacy business (Sequoia Pharmacy Services Group), earnings per share for the three months ended March 31, 1990 grew 17 percent to 7 cents per share from the 6 cents per share earned in the same period last year.

Net income from continuing operations of $624,000 for the first quarter of 1990 was 11 percent higher than the $563,000 earned in the same period of 1989. The average number of shares outstanding for the first quarter of 1990 of 8.8 million was 10 percent lower than in the prior year period due to the company's open market repurchase of over 1.0 million shares since March 1, 1989.

Revenues, from continuing operations, for the 1990 quarter rose 19 percent to $24,459,000 from the $20,539,000 recorded in the first quarter of 1989.

In total, as a result of the Bunn/Xorbox divestiture charge, Omnicare recorded an aftertax loss of $2,162,000, or 25 cents per share, in the first quarter of 1990 as compared with net income of $973,000, or 10 cents per share, earned in the same quarter of 1989.

The 1989 period includes net income from discontinued operations of $410,000, representing the earnings of the hospital pharmacy management business, HPI Health Care Services Inc., which Omnicare sold in August 1989, partially offset by the operating losses of the Bunn/Xorbox Group for that period.

Omnicare Inc., headquartered in Cincinnati, is a health care company with leading positions in medical and dental supplies for the private practice market and pharmacy management services for the long-term care market.

MELVILLE, NY (APRIL 20) BUSINESS WIRE - Vicon Industries Inc. (ASE:VII), a leading manufacturer of closed-circuit video (CCVS) systems, Friday reported revenues of $11.4 million and a loss of $3,000 for the second quarter ended March 31.

The announcement was made by Kenneth M. Darby, recently named chief operating officer, at the company's annual meeting.

Second quarter sales last year were $11.1 million as the company earned $17,000 (1 cent per share). For the six months, net sales were $22.6 million, compared with $21.1 million in fiscal 1989. Vicon had a net loss of $215,000, or 8 cents per share, compared with a loss of $243,000, or 9 cents per share for the same period last year.

Donald N. Horn, chairman of the board and chief executive officer, reviewed Vicon's progress and developing its full systems capability over the past four years.

He then introduced Darby, noting it was now appropriate to make a clear distinction between the roles of CEO and COO, adding that, ''the company is being directed by an experienced management team.''

Vicon is clearly focused on profitability as its primary objective,'' said Darby, the company's chief financial officer for the past 12 years. ''While it will take time, we have already cut costs significantly and hope to report a profit for the fiscal year ending September 30. To achieve it, we are re-focused on our basic CCVS business with a heightened emphasis on product quality and customer service.''

Regarding the second quarter results, Darby noted that the CCVS market is highly competitive. Vicon's profit margins were effected by transitioning to its new VC2200 half inch camera line.

Vicon Industries Inc. designs, manufactures, assembles and markets a broad line of products and systems for video surveillance. These products are used for security, safety and control applications by a wide variety of end users.

CHICAGO (APRIL 20) BUSINESS WIRE - Friday, Patrick G. Ryan, President and Chief Executive Officer of Aon Corporation announced at the Annual Shareholders Meeting that Newton N. Minow has been elected as a new director to serve on the Board of Aon Corporation.

Mr. Ryan commented, ''Newt Minow, a senior partner at the law firm of Sidley and Austin, brings a great breadth of experience in both senior government and business circles. I am delighted that Newt has agreed to serve on Aon's Board.'' In addition to Aon's Board, Mr. Minow serves as a Director of CBS, Inc., of Foote, Cone & Belding Communications, Inc., of Encyclopaedia Britannica, Inc., and Sara Lee Corporation.

At the Board meeting following the Annual Shareholders meeting, Aon's Board of Directors unanimously elected Patrick G. Ryan Chairman of the Board of Directors of Aon Corporation. Mr. Ryan will continue as

President and Chief Executive Officer of Aon Corporation.

Mr. Ryan also serves as a Director of the First Chicago Corporation and its wholly-owned subsidiary, as well as of The First National Bank of Chicago, Commonwealth Edison Company and Stone Container Corporation.

Mr. Ryan's election to the office of Chairman of the Board follows W. Clement Stone's decision not to stand for reelection to Aon's Board. Mr. Stone has agreed to serve as Chairman Emeritus of Aon Corporation and will also continue as Chairman of Combined Insurance Company of America, the business enterprise he founded almost seventy years ago.

Aon Corporation is an insurance holding company listed on the New York, London and Midwest Stock Exchanges with assets in excess $9 billion. Its subsidiaries have operations throughout the United States and Canada, as well as Europe and the Pacific.

The principal subsidiaries of Aon Corporation are Combined Insurance Company of America, The Life Insurance Company of Virginia, Rollins Burdick Hunter Group, Inc., Ryan Insurance Group, Inc., and Union Fidelity Life Insurance Company.

ORLANDO, FL (APRIL 20) BUSINESS WIRE - Publishers Miles and Julie Jaffe announced Friday in New York CitySports has selected Stone Golabuk/Chernoff Silver & Associates to handle the advertising and public relations for CitySports magazine, with editions in New York and Boston.

Miles Jaffe said that the budget for these activities is expected to reach $250,000. ''Right now, we're growing quickly. We've added many new events and features to the magazine...it's time to tell our story in the business and consumer media. We want to be positioned to announce some of the exciting breakthroughs just ahead.''

The New York and Boston editons of 'CitySports' have a combined audited circulation of over 124,000 through corporate health centers, clubs, and selected sports specialty shops in both metropolitan areas. Since buying the magazines in 1989, the Jaffes have increased circulation and put the magazine on a profitable footing.

Stone Golabuk/Chernoff Silver is owned by Chernoff/Silver and Associates, a $24 million full-service advertising, sales promotion, and public relations firm based in Columbia, S.C. The Orlando office represents

approximately $6 million in billings. In addition to Columbia and Orlando Chernoff/Silver has offices in Hilton Head, S.C. and Houston.

ATLANTA (APRIL 20) BUSINESS WIRE - Georgia Federal Bank FSB, the state's largest savings institution, announced earnings of $7.6 million for the quarter ending Mar. 31.

The bank also reported total assets of $4.2 billion, deposits of $2.8 billion and net worth of $264 million at quarter end.

Georgia Federal's annualized return on assets of .73 percent for the first quarter and an annualized return on equity of 11.70 percent for the same period continued to be well above the national average for savings institutions.

In 1989, Congress implemented the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA) to restructure and strengthen the savings and loan industry. As of Mar. 31, Georgia Federal exceeded all of the capital requirements required by FIRREA, as illustrated below:

	Minimum Capital Requirements	Georgia Federal Mar. 31, 1990
Tangible Capital	1.5 pct.	3.2 pct.
Core Capital	3.0 pct.	3.5 pct.
Risk Adjusted Capital	6.4 pct.	7.4 pct.

Headquartered in Atlanta, Georgia Federal is a wholly-owned subsidiary of First Financial Management Corp. Georgia Federal currently operates 65 banking offices throughout Georgia, as well as First Family Financial Services, a consumer finance company.

#90110b0788 04/20/1990 ~Business Wire

CINCINNATI (APRIL 20) BUSINESS WIRE - Chemed Corp. (NYSE:CHE) today announced that the slump in the earnings of the U.S. chemical industry during 1989 caught up with Chemed in the quarter just ended.

A composite of 27 large U.S. chemical companies with total 1989 earnings of $6.2 billion showed a decline in profits of 8 percent for the full-year

1989. In the fourth quarter of last year, the 36 percent drop in their earnings was more severe. By contrast, Chemed's net income was up 8.5 percent for the full-year 1989 and up 9.4 percent in the fourth quarter.

For the quarter just ended on March 31, 1990, Chemed's sales showed a 1 percent increase to $143,929,000 over sales of $141,876,000 in the comparable quarter of 1989. Chemed's net income for the first quarter of 1990 was $4,196,000, a 21 percent decline from the prior-year quarter's net income of $5,320,000. As a result of the conversion of Chemed's 12 percent convertible subordinated notes in 1989, the average number of Chemed shares outstanding for the first quarter of 1990 was 10,246,000, a 9 percent increase over the 9,389,000 Chemed shares outstanding during the first quarter of 1989. After giving effect to the conversion, Chemed's fully diluted and primary earnings per share in the first quarter of 1990 were 41 cents as compared with 55 cents on a fully diluted basis and 57 cents on a primary basis in the first quarter of last year, representing declines of 25 percent and 28 percent, respectively.

Chemed's results in the first quarter of 1990 included two significant transactions which largely offset each other. An aftertax gain of $918,000 (9 cents per primary share and 8 cents per fully diluted share) was recorded on the sale of leased plant facilities relating to Chemed's former Vestal Laboratories subsidiary, divested in December 1986.

Substantially offsetting this gain, however, was a loss of $2,478,000 incurred by Omnicare Inc., the company's 29 percent-owned affiliate, relating to the divestiture of its Bunn/Xorbox Group. Chemed's aftertax share of this loss amounted to $668,000 (7 cents per primary share and 6 cents per fully diluted share). Looking forward, it is important to note that this divestiture should allow Omnicare's growth and profit potential to be fully realized. For example, in the first quarter of this year, Omnicare's continuing operations posted gains in revenues and per share earnings of 19 percent and 17 percent, respectively.

Chemed Corp., headquartered in Cincinnati, is a specialty chemical company with leading positions in institutional and industrial cleaning and maintenance; janitorial supply products and services; laundry detergents and related specialties; water treatment; and residential and industrial sewer, drain and pipe cleaning.

RACINE, WI (APRIL 20) BUSINESS WIRE - Twin Disc, Inc. reported consolidated net earnings for the third fiscal quarter ended March 31,

1990 of $462,000, or $.16 per share, compared with $2,557,000, or $.86 per share, a year ago, Michael E. Batten, chairman, president and chief executive officer, announced Friday.

Net sales for the quarter were $41,382,000 compared with $47,151,000.

Net earnings for the nine months were $1,070,000, or $.37 per share, compared with $7,170,000, or $2.41 per share, for the same period last year. Sales for the first nine months totaled $116,772,000, down from the $132,547,000 reported last year.

#90110b0800 04/20/1990 ~Business Wire
NORTH PALM BEACH, FL (APRIL 20) BUSINESS WIRE - FPL Group Inc. (NYSE:FPL) Friday announced unaudited operating results for the first quarter and the 12 months ended March 31.

Earnings for the first quarter were 29 cents per share compared with 54 cents per share for the like period last year. Net income was $39,389,000 compared with $70,550,000 for the first quarter last year, and operating revenues were $1,357,464,000 compared with $1,365,774,000 last year.

The company attributed the decline in earnings to a combination of unusually mild weather in Florida Power & Light Co.'s service area, the effect of a $38.5 million annual rate reduction effective Jan. 1, and an increase in the utility's operations and maintenance (O&M) expenses.

The increase in O&M expenses resulted from normal customer growth, which was not offset by higher sales due to the mild weather, and increased nuclear maintenance costs.

Earnings for the 12 months ended March 31, 1990, were $2.86 per share compared with $3.25 per share for the 12 months ended March 31, 1989. Net income was $379,257,000 compared with $426,590,000 last year, and operating revenues were $6,171,488,000 compared with $5,880,295,000.

Average shares outstanding for the first quarter of 1990 increased to 134,274,000 from 131,122,000 in the first quarter of 1989. For the 12 months ended March 31, average shares rose to 132,417,000 from 131,110,000 in the like period last year.

FPL Group Inc. is a holding company whose principal subsidiary is Florida Power & Light Co., one of the largest electric utilities in the nation. FPL Group's non-utility operations include insurance, non-utility energy

production, agriculture, real estate, technical services, and cable television.

FPL Group's shares are traded on the New York, Tokyo and London stock exchanges.

NEW ORLEANS (APRIL 20) BUSINESS WIRE - Freeport-McMoRan Resource Partners, Limited Partnership (NYSE:FRP), Friday declared a cash distribution for the quarter ended Mar. 31, 1990, of 60 cents per unit payable May 15, 1990 to unitholders of record at the close of business on Apr. 30, 1990.

First-quarter 1990 cash available for distribution totaled $56.8 million and included cash flow from operations and permanent reductions to working capital related to FRP's recent sale of its nitrogen fertilizer assets.

This level of cash available for distribution also enabled FRP to repay $7.4 million of cash distributions previously deferred by Freeport-McMoRan Inc. (NYSE: FTX). FRP's first-quarter 1990 financial results will be announced on Apr. 24, 1990.

Earlier this month, Freeport-McMoRan Inc. announced that it had extended the period for assured minimum quarterly cash distributions of 60 cents per unit on publicly held FRP units through the second quarter of 1993. That period was originally scheduled to conclude at the end of the second quarter of 1991.

FRP is the largest and one of the lowest-cost integrated U.S. phosphate fertilizer producers and is currently the second-largest domestic Frasch sulphur producer. FRP will become the largest U.S. Frasch sulphur producer when the Main Pass Block 299 sulphur deposit reaches full

production in 1993.

The partnership is also the largest U.S. transporter of sulphur produced by others and receives royalties from a proprietary process used by Freeport-McMoRan Inc. for the recovery of uranium oxide from phosphoric acid. Freeport-McMoRan Inc. owns approximately 62 percent of the outstanding FRP units.

LARKSPUR, CA (APRIL 23) BUSINESS WIRE - Synon Inc., announced Friday that the firm has entered into an agreement with IBM Corp. to become an AD/Cycle business partner.

The ageement makes Synon the only AD/Cycle business partner operating in the IBM AS/400 application development arena.

Synon Inc. provides Synon/2E, the leading interactive Computer Aided Software Engineering (CASE) application development environment for the AS/400. Synon/2E is a complete package for designing, coding, documenting and maintaining application software and generates native AS/400 source code in either RPG of COBOL.

Under the agreement, Synon provides AS/400 based applications development and generation capabilites for AD/Cycle. Application design transfer will be supported by IBM's external source format. External source format is a feature of IBM's Cross Systems Product (CSP) which allows selected AD tools to exchange design information. Synon will extend its capabilities to the Operating System/2 Extended Edition (OS/2 EE) workstation with support of common user access for cooperative application development.

Synon joins IBM's other AD/Cycle business partners -- BACHMAN Information Systems Inc., Index Technology Corp., and KnowledgeWare Inc. -- to provide IBM customers with software products and services designed to assist and enhance the application development process.

Synon recently announced the general availability of its Synon AD/Interface. The interface runs on the AS/400 and includes facilities for transferring IBM's external source format. These vendor tools which export specifications from CSP/PWS and popular IBM PS/2 based vendor design and analysis tools which export external source format. These vendor tools include KnowledgeWare Inc.'s Information Engineering Workbench and Index Technology Corp.'s Excelerator.

Synon is the leading supplier of CASE tools for IBM midrange systems. Synon products are used by more than 1,500 customers around the world to develop customer software rapidly. Synon has been enabled for various languages, including Japanese, French, and German,

Synon Inc., headquarters are at 1100 Larkspur Landing Circle, Suite 300, Larkspur, Calif., 94939, (415)461-5000.

WASHINGTON (APRIL 20) - A U.S. Treasury official told Congress Thursday that Japan has not done enough to lower its huge trade surplus, which he said was threatening the world economy and increasing the U.S. trade deficit.

"Clearly, Japan has not done its part," Treasury Undersecretary David Mulford told a Senate Banking subcommittee.

The Senate panel was reviewing a new Treasury forecast for world trade in 1990. The Treasury report was mandated under 1988 U.S. trade legislation.

Japan's closed markets pose "important risks for the world economy," Mr. Mulford said, adding that nations such as Japan must protect the global trading system from protectionism.

The Treasury report said the U.S. trade deficit, after narrowing over the past two years, could worsen this year.

The report said any improvement in the U.S. trade deficit would be "at very best modest."

The dollar has risen in value against the Japanese yen by almost 20 per cent over the last year, the report said.

A stronger dollar threatens to increase the U.S. trade deficit by making U.S. exports more expensive on overseas markets and by allowing foreign producers to lower prices to U.S. consumers.

Senator Alan Dixon expressed concern over the continued weakness of the Japanese currency.

"If the yen keeps falling against the dollar, I don't see how our trade performance can be improved," said Mr. Dixon.

Mr. Mulford cautioned the senators to work on eliminating Japan's structurual trade barriers to foreign goods instead of focusing on currency rates.

"Simply depreciating the dollar against the yen is not going to do" the job of solving the U.S. trade deficit with Japan, he said.

#90110d5690 04/20/1990 ~French/German News Agency

TOKYO (APRIL 20) - The world's largest container consortium TRIO, serving the Japan-Far EastEurope shipping trade route, has decided to divide the group into two separate services as from March 1, 1991, a Japanese member company said on Friday.

Nippon Yusen Kaisha (NYK) officials said the decision to divide the joint service of the five member lines of the group was made to permit more flexible and timely operations in the face of changing trade patterns on the European route.

The TRIO group members are P and O Containers Ltd., Ben Line Containers Ltd., Mitsui O.S.K. Lines (MOL), NYK Line and Hapag-Lloyd A.G.

The TRIO group was formed in 1971 by the five firms from three countries -- Japan, Britain and West Germany, and pioneered the containerization of the European route.

Under the decision, the group will be divided into two joint services -- one by three lines of Japan and West Germany (NYK, MOL and Hapag-LLoyd) and the other by the two British lines (P and O Containers and Ben line).

But the five companies will continue to cooperate with each other in different ways. The lines will individually announce their new service arrangements, they said.

The TRIO group has a fleet of 28 vessels with an annual haulage capacity of 450,000 TEUs (20-foot equivalent units), accounting for nearly 35 per cent of the total cargo handling capacity on the route.

In reporting the regrouping, the Shipping and Trade News, a Tokyo shipping trade newspaper, said that the Far East-Europe shipping market is undergoing a major structural change.

It said the move was apparently prompted by the fast rise of non-conference lines in recent years, the plans of shipping firms for construction of new

large-sized vessels, the expansion of physical distribution in the Far East and Southeast Asia and the integration of the European Economic Community (EEC).

#90110d5840 04/20/1990 ~French/German News Agency

TOKYO (APRIL 20) - Small and medium-size companies in Japan are facing a severe labor shortage and swelling debt burdens which may hamper their expansion, a government report released Friday said.

The Small and Medium Enterprise Agency said in its annual report that production by these firms accounts for about 30 per cent of Japan's gross national product (GNP) and they employ about the half of the country's total workforce.

The small and medium-size companies were classified as those capitalized at less than 100 million yen (637,000 dollars) and with a workforce of fewer than 300 employees.

The continued economic expansion driven by brisk domestic demand has benefitted a wide array of these companies, the report said.

But it added that sharp demands for funds to invest in plant and facilities have made small firms more deeply leveraged as interest rates have made a sharp upturn recently after a long period of decline.

The tightening labor market is also threatening to force small companies to put the brakes on their growth, with 40 per cent of them citing the difficulty of hiring workers.

Statistics showed that Japan's jobless rate declined to 2.1 per cent in 1989 from 3.1 per cent two years earlier.

But the agency was cautious about the introduction of foreign workers to meet the current labor shartage and stressed the need for further study on the issue.

#90110d5900 04/20/1990 ~French/German News Agency

JAKARA (APRIL 20) - The Indonesian economy, having succesfully adjusted to become more market oriented, is now on the verge taking off with more growth and opportunities in the rest of this century, Coordinating Minister for the Economy Radius Prawiro says.

New records were broken in 1989 in areas of investment and export as a result of Indonesia deregulating its economy to reduce its strong

dependence on oil for export and state revenues, Mr. Prawiro told a gathering of American businessmen from the Asia-Pacific region here Thursday.

These indicators point to more growth and opportunity throughout the 1990s,

he said, adding, "You still have time to see what is happening for yourselves before the economy really begins to take off."

The government of President Suharto has set 1994, the beginning of its sixth five-year plan, as the starting point for an economic "take-off", a period of self-sustained growth in which the industrial sector, rather than agriculture,
 plays the dominant role.

The economy grew by more than six per cent last year, one of the largest in Asia, Mr. Prawiro told the meeting of the Asia-Pacific Council of American Chambers of Commerce.

Foreign investment soared to five billion dollars in 1989, double that of four years ago, while domestic investment reached a record amount of 11 billion dollars, he said.

Non-oil exports exceeded 13 billion dollars with manufacturing goods growing by 19 per cent over the previous year's level, he added. Non-oil commodities last year accounted for 60 per cent of Indonesia's total export income, compared to only 20 per cent or 3.9 billion dollars in 1982.

Mr. Prawiro cited footwear, processed wood products, electrical goods and processed foods as sectors industries that made phenomenal export growth rates.

-30- 2002
#90110d5940 04/20/1990 ~French/German News Agency
(APRIL 20) - Chinese exports shrank 1.69 per cent to 256 million dollars compared to the same period last year, while Soviet exports to China decreased during the quarter by 10.59 per cent to 410 million dollars.

The MOFERT official attributed the decline to Moscow's decision to require licenses for all exports.

Total two-way trade volume reached three billion dollars last year, a more than 20 per cent increase over 1988 as the Soviet Union become China's fifth largest trading partner after Hong Kong and Macau, Japan, the United States and West Germany, the New China News Agency (NCNA) said.

China mainly exports light industrial products, textiles and food

commodities to the Soviet Union, which in turn offers China wood, steel, aluminum, copper, machinery and airplanes.

Last month the two neighbors signed a protocol here which foresees an increase in two-way trade for 1990.

The signing of the accord brought together the foreign trade ministers of both countries, Zheng Tuobin of China and Soviet K.F. Katuchev, for the first time in 30 years, the China Daily said.

#90110d5960 04/20/1990 ~French/German News Agency

SUA PAN, BOTSWANA (APRIL 20) - The 920 million rand (353 million dollar) Sua Pan natural soda ash plant in northern Botswana has reached the half way stage on schedule and within budget, operating consortium Soda Ash Botswana (SAB) announced here Thursday.

The plant is designed to produce 300,000 tons of soda ash per year to meet virtually all the southern African demand in the glass, vanadium, steel, and detergent industries, according to SAB, which comprises South African firms AECI, Anglo American and De Beers (52 percent), and Botswana (48 percent).

SAB has chosen South African firm Chemserve, which has a 60 percent market share in South Africa, to sell the soda ash in the republic, pricing it on a free-on-rail from Durban basis.

The price is expected to average around 140 dollars per ton plus 25 dollars a ton for transport.

The target market is the industrial conurbations of the Transvaal, where SAB aims to oust the world market leader the American Natural Soda Ash Corporation (ANSAC), British firm ICI, and Romanian producers.

Sales to the north in Zambia and Zimbabwe, where there is no significant competition, will be handled by a marketing arm to be set up by SAB.

Botswana railways is building a rail link to Francistown, some 175 kilometres (105 miles) to the south-east, to be completed by next April, from where it soda ash can be sent to South Africa and Zimbabwe.

Once the civil wars in Angola and Mozambique are over, soda ash from the project, which has an indefinite supply of brine in the vast Makgadikgadi depression, could be shipped anywhere in southern Africa on the Benguela and Beira corridors, eventually with outlets onto the world market, SAB said.

The plant will also produce 650,000 tons of salt a year, eventually accounting for 25 percent of the revenue, although when the plant comes on stream this time next year the market will be able to take only some 4,000 tons annually, SAB managing director Basil Beeming said.

#90110d6060 04/20/1990 ~French/German News Agency

TAIPEI (APRIL 20) - Executives from five major private domestic airliners are to visit China to pave the way for possible air links across the Taiwan Strait, organizer of the trip Robert Tzeng said Friday.

The 11-member delegation, including legislator Chen Chih-swei, is flying to Hong Kong Sunday for connecting flights to Shanghai, first stop of the 11-day trip, said Mr. Tseng, publisher of the China Civil Aviation Review magazine.

The five airline companies are Far Eastern Air Transport Corp., Foshing Airlines, Great China Airlines, Makung Airlines and Fortune Air System.

The delegates would meet with high-ranking Chinese officals including Vice Premier Wu Xueqian and discuss with mainland aviation officials the possibility of setting up a third party to promote air links between China and Taiwan, Mr. Tseng said.

The Taipei-based Evergreen group, which runs the world largest container fleet and Taiwan's only private international airline, is planning a trip to the mainland in mid-June to inspect the shipping and air transportation market there.

#90110d6620 04/20/1990 ~French/German News Agency

PARIS (APRIL 20) - Flights in France were severely disrupted on Friday by a strike by air traffic controllers' unions, officials said.

The Air Navigation Department said 400 arrivals and departures were slated in Paris, against 1,400 under normal conditions.

It said the strike was "observed well" among controllers at the Athis-Mons regional center, which is responsible for a big sector from northern France to Geneva, Switzerland.

The stoppage was "rather successful" at Charles de Gaulle airport in Paris, the Department said of the only other center affected.

Unions said the strike was "100 per cent".

The strike was due to last from 0500 GMT to 1945 GMT Friday. The controllers are alarmed by the steady rise in traffic since 1985 and by its repercussions on working conditions and flight safety.

The stoppage was called by the National Union of Air Traffic Controllers (SNCTA), together with the CGT and CFDT labor federations.

The situation was worsened by fog in the Paris region Friday morning, and a few flights were diverted to Lyons (in central France) or Lille (in the north).

-30- 1315

#90110d6880 04/20/1990 ~French/German News Agency

KAMPALA (APRIL 20) - Uganda is to receive 190 million dollars from the European Economic Community (EEC) under the Lome IV Convention, radio Uganda announced here Thursday.

Part of the money will be grants and the rest in the form of capital, the radio said.

The EEC Commission's announcement was contained in a message delivered by the EEC delegate to Uganda, Karl Harbo, to Ugandan President Yoweri Museveni,
at his home in western Uganda's Mbarara district, the radio said.

According to the radio, the funds will be used for development of the country's infrastructure, agriculture and nature conservation.

#90110d7080 04/20/1990 ~French/German News Agency

Frankfurt (APRIL 20) - West Germany's automotive sector remained robust in the month of March, with both production and new vehicle registrations growing, according to reports Friday.

The German Automobile Industry Association (Vda) here said vehicle output in March reached 480,000, up eleven percent on the same month last year. Private cars accounted for 452,300 of the total, also eleven percent higher than in March 1989.

The figure put West Germany's production for the first quarter at 1.36 million vehicles, up seven percent, the Vda noted.

Of that total, 793,100 vehicles were exported, up eight percent from the first-quarter 1989 exports, the Vda said.

In Flensburg, the Federal Vehicles Office said that a total of 361,000 new

vehicles were registered in West Germany in March, up 2.5 percent on the same month last year. Private cars accounted for 312,963 registrations, up 2.1 per cent.

For the first quarter, nearly 839,000 new vehicles were registered in West Germany, up 6.3 percent on the same period last year, the office said. New private car registrations numbered nearly 748,000, up 5.6 percent.

#90110d7120 04/20/1990 ~French/German News Agency

MONROVIA (APRIL 20) - Anti-government rebels have seized two Italian lumber workers in the strife-torn neartheast of Liberia, an independent newspaper reported Friday.

The News said Arnaldo Zeno and Amlacare Chiarena were seized along with a Liberian colleague last week at the Flamingo Logging Company camp in Nimba county.

The Italians had gone into the forest to evacuate heavy duty equipment when the rebels launched an offensive for control of the area, the newspaper quoted workmates of the men as saying.

Other employees fled when the attack started. The Italian embassy on Thursday confirmed the disappearance of the men, saying it had last heard from them on April 12.

Rebels led by ex-government official Charles Taylor invaded Nimba from neighboring Ivory Coast last December in a bid to topple the government of President Samuel Doe.

Two weeks ago, the rebels freed a reporter for Britain's Financial Times who was captured when a freight train he was travelling on was ambushed.

#90110d7160 04/20/1990 ~French/German News Agency

BANGKOK (APRIL 20) - Three foreign tourists and a bus driver were killed when a tour bus plunged off a cliff in southern Thailand's Phuket island resort, police said Friday.

The victims were a 10-year-old Swedish girl, a French national of Laotian origin and a West German woman.

The 10-year-old girl, Marie Lundberg, was with her parents on the bus and was killed instantly when it plunged down a 15 meter (yard) cliff on Patong-Phuket highway, said police Lieutenant Ekawut Saneporn.

Phuket Island is some 860 kilometers (535 miles) southwest of here.

Also killed were Daorung Sitthimavong, a French national of Laotian origin, bus driver Jaran Mung-mee, and an unidentified German woman, Lt. Ekwut said.

About eight other passengers were being treated for external injuries.

First reports said the bus's brakes had failed.

#90110d7170 04/20/1990 ~French/German News Agency

RANGOON (APRIL 20) - A spokesman for Burma's military government said Friday it had warned "responsible members" of political parties not to break the law while campaigning for the May 27 elections.

Colonel Aung Thein, spokesman for the ruling State Law and Order Restoration Council (SLORC), denied that the government had held political discussions with selected parties.

"We have not held discussions with any political party but have summoned responsible members of 50 registered political parties to give timely warnings regarding infringement of existing laws," he said at a press briefing at the defense ministry.

The fact that the SLORC had not clamped down on many political parties, despite their law breaking, showed it was allowing freedom of expression, Col. Aung Thein said.

Military intelligence deputy chief Colonel Than Tun displayed examples of party material which he said would "justify the SLORC taking legal action" against the parties.

In response to complaints that some campaign speeches were being screened by the government, Col. Than Tun said only words such as "single-party dictatorship" had been deleted.

More than 90 political parties are contesting the May 27 elections.

Of 161 towns that were under martial law, 72 are now considered to have returned to normal. But a 10:00 p.m. to 4 a.m. curfew, as well as a ban on public gatherings of more than five people, continues to be in effect nationwide.

#90110d7190 04/20/1990 ~French/German News Agency

GDANSK, POLAND (APRIL 20) - Poland's Solidarity movement expressed its support Friday for Lithuania's declaration of independence and called on European nations and the United States to do likewise.

Soldarity officials, holding their second congress in this northern port city, passed a motion "recognizing the right of each people to freedom and independence" and supporting Lithuania's March 11 declaration.

The motion called on "all men of goodwill" and all the peoples and governments" of the 35-member Conference on Security and Cooperation in Europe to recognize Lithuania's independence. The CSCE comprises all European countries except Albania, plus the United States and Canada.

Solidarity said Lithuania's breakaway conformed to the wideranging Helsinki Final Act, signed by the CSCE states in 1975, which covered human rights, disarmament and technical cooperation.

"We are confident that Europe will soon be the common house of all free peoples", read the motion, which drew rousing applause out and was passed with only one vote against and one abstention by the nearly 500 delegates.

#90110d7250 04/20/1990 ~French/German News Agency

NAIROBI (APRIL 20) - The United Nations World Food Program (WFP) Friday announced approval of 12,150 tons of emergency food assistance for drought victims in Namibia while other donors were asked to provide an additional 20,000 tons.

A WFP statement Friday said its aid, comprising 11,250 tons of maize-meal and 900 tons of pulses, would be distributed to 150,000 Namibians over a six-month period. The operation will cost 5.49 million U.S. dollars.

A recent U.N. inter-agency mission found that while there were no signs of widespread malnutrition, drought had seriously hit crop cultivation and livestock prices at local markets had plunged.

The mission estimated total food needs at some 30,000 tons of maize or maize-meal and 2,400 tons of pulses to cover the 16 month-period until the next harvest is available. The mission appealed to bilateral donors to meet the remaining balance after the WFP's contribution.

Chronic drought in Namibia over the past several years has seriously affected subsistence-level farmers and small livestock herders, the statement said.

Although rains began in most parts of the country in January, the drought's cumulative effects had led to serious delays in planting and had affected the farmers' livelihood.

BEIJING (APRIL 20) - State censors will be calling the tunes from now on in Beijing's fashionable sing-along karaoke bars under new municipal regulations published Friday.

All music on tap at a karaoke bar must be "officially published or approved by cultural administrative organs," say the regulations, printed in full in the Beijing Daily newspaper.

Any karaoke operator who fails to ensure that his musical fare is state-approved risks a 2,000 yuan (425 dollar) fine or loss of his business licence.

The far-reaching regulations state that a karaoke bar owner must have at least a high school education in "politics, business and art."

They also ban hard liquor in the bars, though beer can be served.

Karaoke bars, an idea borrowed from Japan, enable patrons to sing along to pre-recorded instrumental soundtracks in a lounge atmosphere. Many have sprung up in the Chinese capital in recent months.

BRUSSELS (APRIL 20) - A financially-plagued Belgian munitions company received an Iraqi order for shells of ''extraordinary size'' which possibly were meant for the Iraq-bound super-cannon which British authorities recently intercepted, reports said Friday.

The newspaper Libre Belgique said the order was discovered by the British holding firm Astra when it went over the books of the Prb munitions firm acquired from Societe General de Belgique in 1989.

According to the newspaper, Astra reported its finding to British authorities, and also had received an assurance from Prb that the shells had not been delivered.

The order for the extraordinary-sized shells was placed in 1988, according to the report.

Astra said that it purchased Prb on the advice of Canadian arms trader Gerald Bull, who was murdered here by professional killers in March, the newspaper said. Bull is suspected of having prepared the plans for Iraq's ''super-cannon''.

Libre Belgique cited Gerald Bull's son, Michael, as saying that he had established a temporary joint venture with Prb in the 1970s supposedly to develop artillery equipment for Israel. But no deals were made due to resistance by Prb.

Prb was spared bankruptcy on Thursday under a last-minute agreement between Astra and Societe Generale de Belgique.

Meanwhile the Belgian foreign ministry, in a terse comment about British allegations, said Brussels had provided no permission whatsoever to the delivery of military equipment to Iraq.

#90110d7310 04/20/1990 ~French/German News Agency

ADDIS ABABA (APRIL 20) - The United Nations is calling on international donors to fund a six-milliion-dollar airlift to deliver grain to famine victims in Ethiopia's northern province of Eritrea, an official said here.

The airlift would shuttle food from the Red Sea port of Assab to the Eritrean capital, Asmara, cut off by road by fighting between government forces and the rebel Eritrean People's Liberation Front (EPLF), director of operations in Ethiopia for the U.N. World Food Program (WFP) David Morton said.

The emergency plan, using just four aircraft, falls short of a call made on March 1 by the Ethiopian government Relief and Rehabilitation Commission (RRC) for a 10-million-dollar a month airlift using 14 planes.

RRC commissioner Yilma Kassaye told journalists earlier this week that he viewed the airlift as "essential if people's lives are to be saved".

Donors have shown strong reluctance to finance the government plan but it was not yet known how they will respond to the scaled-down version.

The airlift call followed the capture in February by the WPLF of the Red Sea port of Massawa, which the U.N. was using as the main port of entry for relief supplies.

The EPLF and the U.N. agree that the port should still be used to supply famine victims in Eritrea, but the government refuses to allow this until Massawa is "put back in order", as Mr Yilma said, referring to Addis Ababa's stated objective of retaking the port.

Meanwhile, 37,000 tons of food still available in February to supply Asmara town and badly-hit drought areas to the south, is virtually exhausted, Mr Yilma said.

Mr. Morton said: "There is a sense of urgency now". We have to get things moving in the Asmara region".

The airlift being proposed to donors by the U.N. would be for an initial two months, delivering 7,000 to 9,000 tonnes a month, but could be stepped up if necessary, he said. The RRC airlift call envisaged deliveries of around 15,000 tons a month.

The U.N. is also proposing immediate delivery by regular cargo flight of 1,000 tons of medical supplies and special food for vulnerable groups in Asmara, for which it already has the funds.

Meanwhile, a convoy of 56 trucks carying more than 500 tons of grain reached Mekele, the capital of rebel-held Tigre this week for the first time since a cross-battle lines operation was mounted here on March 20.

The trucks took the so-called "southern route" moving food arriving from Assab and from the Wollo provincial capital of Dessie north into Tigre.

Bad roads and bridges hampered the operation at the start but some repairs have already been made allowing the breakthrough to Tigre and more are planned to allow trucks with trailers to make the trip north into Tigre and even beyond into Eritrea, doubling the amount of food to be delivered.

Latest government estimates say 4.6 million people are threatened by famine -- more than two million of them trapped behind battle lines in the north of the country, 900,000 war-displaced and the rest in the east and south of the country.

#90110d7460 04/20/1990 ~French/German News Agency

CAPE TOWN (APRIL 20) - President Frederik de Klerk turned his attention again Friday to violence in Natal province, telling parliament: "Constitutional development cannot be attained with the swing of a panga (machete)."

His call came as police in Pretoria reported the deaths of three more people in Natal, including the sixth victim this week to be burnt alive with a flaming tyre necklace in the Port Shepstone area on the province's south coast.

Making three speeches Friday during the debate on the budget vote, he said: "The fabric of violence has changed. What is happening, aside from that which is expected to accompany a process of change, is a vying for position within black rands.

"It is black-on-black violence which comes from intimidation," he said.

The government was already ploughing some of the three billion rand (1.15 billion dollar) social fund, announced in the March 14 budget and topped up by the government, into improving black schools in Natal, he said.

The government was also buying land for black housing around Durban and Pietermaritzburg, he said.

"Poverty is not confined to Natal but it is being aggravated there by the destruction of property," he said.

It was important for refugees to return home, but that was linked to an end to the violence, he said.

More than 12,000 people have been made homeless as the province nears the end of a month of intensified fighting many call civil war.

He called for an end to the politics of confrontation, saying: "Now is the time for broadening consensus, for laying the foundations of a new South Africa.

"I say today to all people who really seek peace, 'Come, here is my hand, let's work together.'"

He also conceded that the present executive presidency allowed the incumbent too much power.

In terms of the present laws there was no check on white domination under a white president, black domination under a black president or Conservative domination under a CP president.

He had earlier stepped up his attack on the CP, announcing an internal inquiry within the National Intelligence Service (NIS) into how a classified document ended up in CP hands.

CP leader Andries Treurnicht on April 10 released an intelligence report on a supposed African National Congress strategy document outlining plans to kill right wingers, asking if the government had known about it and if so why it had not warned those under threat.

Mr. De Klerk lambasted Mr. Treurnicht in parliament Tuesday for going public with a document "clearly obtained in an illegal manner."

"It is totally shocking that the leader of the Conservative Party has, in order to get at the government, acted in a grossly irresponsible manner.

He said the CP's conduct "could have threatened people's lives", saying the party and its leader "owes parliament an explanation."

Security chiefs concluded the information was from a dubious source, and the ANC has denied writing the strategy document.

Mr. De Klerk Friday challenged Mr. Treurnicht to name the NIS agent he said in parliament was the source of the report, asking why CP officials had told police the document had been sent in the post, the envelope destroyed and the original mislaid amid photocopies.

#90110d7490 04/20/1990 ~French/German News Agency

ISTANBUL (APRIL 20) - Warships taking part in the 75th anniversary celebrations of the Gallipoli invasion began arriving here on Friday.

The British frigate Argonaut, which is equipped with missiles and helicopters, and Australia's Tobruk, the world's biggest landing ship, both dropped anchor in the Bosphorus on Friday. Their crews are holding two "open days" opposite the Dolmabace palace, built by the last sultans of the Ottoman empire.

They will be joined on Saturday by other ships, including the British frigate Broadsword, Australia's Sydney and the Australian submarine Otway.

They are due to leave the port of Istanbul on Sunday to attend ceremonies commemorating the British-planned landings on the Gallipoli peninsula by the combined Australian-New Zealand (Anzac) forces on April 25 1915.

Celebrations begin on Wednesday at 3:30 a.m. (0030 GMT), the time of the first landing which marked the beginning of the protracted and bloody campaign to win control of the Dardanelles in World War I. April 25 is

Anzac day in Australia and still its most important national holiday.

Several groups of veterans who took part in the invasion, accompanied by their children and grandchildren, have already arrived in Istanbul.

Forty six Australian veterans, all aged over 90, are expected on Sunday on a specially chartered plane, renamed "the spirit of Anzac" and piloted by the grandson of one of them.

They will be joined in Istanbul, which they never managed to reach in 1915, by a survivor from New Zealand and a dozen Turkish veterans.

More than 25,000 Turks and foreigners will be in Gallipoli for the celebration which is expected to be the last get-together between Turkish and Anzac veterans.

British Prime Minister Margaret Thatcher, Australian premier Bob Hawke and New Zealand Governor-General Paul Reeves will attend.

#90110d7510 04/20/1990 ~French/German News Agency

TUNIS (APRIL 20) - Swedish Foreign Minister Sten Andersson left here Friday after a two-day official visit centerd on pushing forward the Middle East peace process.

He told reporters before leaving that Sweden would remain active in the region in a bid to resolve the Arab-Israeli conflict.

Mr. Andersson helped prepare the start of a dialogue between the United States and the Palestine Liberation Organization in December 1988.

He met Sunday with PLO chairman Yasser Arafat but declined to say whether he had presented the Palestinian leader with new peace proposals.

Mr. Andersson said Swedish diplomacy was deliberately kept low-key to assure its success.

The minister, who has lately been trying to promote Israeli-Palestinian discussions in Cairo under a framework drafted by U.S. Secretary of State James Baker, reiterated his appeal to Israel to begin a dialogue.

#90110d7560 04/20/1990 ~French/German News Agency

BAGHDAD (APRIL 20) - PLO Chairman Yasser Arafat has pledged support for Iraq in talks here with President Saddam Hussein, saying Baghdad's stand had increased Arab power and encouraged the Palestinian uprising.

Mr. Arafat, in six hours of talks with Mr. Hussein late Thursday, praised Iraq for its "courageous fight against Israeli threats aimed at the Arab nation and the Palestinian people," the official Iraqi News Agency (INA) said.

He said Iraq had supplied the Arabs with "dissuasive power to face Israeli aggression and intransigence and American hegemony."

Mr. Hussein's stand, Mr. Arafat added, had "increased the power and hope of the Palestinian uprising (in the Israeli-occupied territories) and will help it regain morale to fight Zionist occupation."

Mr. Hussein earlier this month threatened to use sophisticated chemical weapons against Israel if Iraq came under Israeli attack.

His statement came days after Britain and the United States uncovered an alleged bid by Iraq to obtain devices for nuclear weapons. Baghdad denied the charges, saying they were being used to justify an Israeli strike on Iraq.

INA said Mr. Arafat and Mr. Hussein discussed "ways to guarantee joint Arab action" which the Palestine Liberation Organization chairman said would be necessary to face any "aggression" from Israel and the West.

In Amman Wednesday, Mr. Arafat said he and Jordan's King Hussein had agreed on the need for an emergency Arab summit in Iraq before the end of May to discuss threats against Iraq and the mass emigration of Soviet Jews to Israel.

King Hussein was due in Saudi Arabia later Friday. Saudi King Fahd Thursday received a message from the Iraqi Defense Minister Abdel Jabbar Shanshal concerning the proposed summit, according to reports from Riyadh.

Mr. Arafat was in Baghdad for a meeting of the PLO Executive Committee.

#90110d7640 04/20/1990 ~French/German News Agency

PRETORIA (APRIL 20) - Six black, Indian and Colored children are to fly out next Thursday to occupy officially South Africa's United Nations seats in New York, the Department of Foreign Affairs (DFA) confirmed here Friday.

The six, aged between nine and 12, will spend a week in London before joining up with two white South Africans at school in New York to take part in the U.N.'s World Children's Foundation Day on May 6.

Team leader Funeka Radebe, 10, who comes from Johannesburg's black township

Soweto but goes to the fee-paying Montessori school in the upmarket whites-only suburb of Bryanston, will give a one-minute speech at the General Assembly.

She is expected to be the first South African in 16 years to address the Assembly without sparking a walk-out.

South Africa's Foreign Minister Pik Botha, the country's U.N. ambassador when Pretoria's credentials were rejected by the General Assembly in 1974, met the children at the State Guest House here.

"We're very proud of you," he said. "Tell the world with pride that you come from South Africa."

Picking up on a tree metaphor Funeka is to use in her speech, he said: "We are going into a new season. The season of violence is ended, the season of apartheid is ended.

"You must say you are the new ones from South Africa. You are the bud, you must fill the tree of South Africa with new life. This is your mission. You come back and say that is what you told the world."

BONN (APRIL 20) - West Germany's centre-right coalition government will work on final details of a draft text of a treaty to be concluded with East Germany on economic, currency, and social union next week, Bonn officials said Friday.

Government spokesman Dieter Vogel said the draft treaty is complete in its ''most essential elements''. A major element includes the possibility of East Germany choosing to link up with West Germany on the basis of Article 23 of the West German constitution.

The office of West German Chancellor Helmut Kohl has targeted July as the date by which an accord with East Germany should be reached.

On Thursday, the new East German Premier, Lothar de Maiziere, also said he hoped the union could be negotiated by the summer.

According to Bonn government sources, the draft being prepared here has set aside the thorny issue of at which exchange rate East Germans' Ostmark accounts should be converted into deutsche marks under the currency union.

Alfred Dregger, head of the ruling Christian Democratic UnionChristian Social Union faction in parliament, Friday ruled out a 1:1 rate as being sought by East Germany. He said that compromise proposals on the exchange

rate question were being discussed both in Bonn and East Berlin.

Bonn government sources said that the negotiations with East Berlin would first concern economic and social aspects of the union agreement, and then try to nail down the exchange rate question.

HELSINKI (APRIL 20) - Visas will be required for Romanian citizens entering Finland from Saturday, it was announced here Friday.

Following a sudden wave of Romanian immigration to the Nordic countries the Finnish government has decided to suspend temporarily the bilateral 1968 agreement which abolished visas.

Denmark and Sweden have already suspended similar agreements with Romania and Norway is considering following suit.

The Nordic countries took similar action recently with Bulgaria on the same grounds.

#90110d7700 04/20/1990 ~French/German News Agency

PRAGUE (APRIL 20) - A special commission was formed here Friday to try to resolve an attempt by parliament to change Czechoslovakia's official name.

Members of the federal assembly here voted earlier Friday to call the country the "Czech and Slovak Federative Republic" (CFSR), the CTK news agency reported. On March 29, it was named the "Federal Czechoslovak Republic" in Czech and the "Federal Czecho-slovak Republic" in the Slovak language.

The twin name triggered angry demonstrations.

But two hours after Friday's vote, Czechoslovak radio reported that parliamentary deputy Vaclav Benda had put the validity of the vote in doubt, saying that only 44 deputies had voted for the name out of a total of 74.

Mr. Benda said that a constiutional amendment required 60 percent of the vote -- 44.4 deputies, rounded up to a total of 45. The vote was therefore one vote short of being valid, he argued.

A special commission had been formed to help decide the earlier name change, replacing the "Czechoslovak Socialist Republic" which had stood for 30 years.

#90110d7720 04/20/1990 ~French/German News Agency
PRETORIA (APRIL 20) - South Africa will force banks to be more publicly accountable by requiring off-balance-sheet funding operations to be placed on the balance sheet, Reserve (central) Bank governor Chris Stals said Friday.

But no further steps will be taken to intensify already-restrictive monetary policy aimed at curbing inflation, Mr. Stals said in the Economic Review.

The Reserve Bank had told certain banks of its concern at the "undesirable practice" of carrying out a large part of funding operations off the balance sheets through repurchase transactions, Mr. Stals said.

"In this way they escape the normal prudential requirements of cash reserves and liquid assets," he said.

Compelling banks to include funding for operations on the balance sheet "is not ... intended to place any further squeeze on the banks as part of the present anti-inflationary policy," Mr. Stals noted.

The Reserve Bank remains "very reluctant" to start stimulating the economy before the 15 percent inflation rate has subsided significantly, he said, but it sees no need for "even more pressure."

The move on balance sheets should be seen "as execution by the authorities of their responsibilities for ensuring a sound banking system in South Africa," Mr. Stals said.

-30- 1460
#90110d7800 04/20/1990 ~French/German News Agency
VIENNA (APRIL 20) - Western negotiators at the talks here on Confidence and Security Building Measures (CSBM) on Friday agreed on the need to put a "substantial document" before the expected summit of the Conference on Security and Cooperation in Europe later this year.

"All the concrete elements of an accord are there", the head of the French delegation, Francois Plaisant said. The best way of contributing to the summit's success would be to "adopt the most substantial CSBM accord possible", he added.

He appealed to all those taking part to concentrate "on the main substance of our work" and not on "areas where we only exacerbate our differences and create artificial obstacles".

He said that all the governments concerned had agreed that the CSBM talks should continue after the CSCE summit.

The CSCE groups 35 countries -- all of Europe, except Albania, plus the United States and Canada.

The head of the West German delegation at the CSBM talks, Guenter Joetze, said negotiations needed to be speeded up if they wanted to have a first substantial document ready to put before the CSCE in November.

The sixth round of CSBM talks ends next Friday.

Meanwhile experts were pessimistic at the prospects of signing an agreement at the second "Open Skies" conference between NATO and the Warsaw Pact, which opens in Budapest on Monday.

The head of the U.S. delegation, John Hawes, told the Hungarian news agency MTI in an interview that it was unlikely that the second phase of the conference would arrive at a compromise unless the Soviet Union changed its position.

Hungarian Foreign Ministry experts said the chances of signing an agreement by May 12 -- the conference's closing date -- were "diminishing".

The first "Open Skies" conference, which opened in Ottawa on February 27 in a climate of optimism, ended a fortnight later with disagreement on several points, blamed on the Soviet Union intransigence.

Mr. Hawes said that out of the 23 delegations taking part (16 NATO and seven Warsaw Pact), "22 do not fundamentally disagree".

The objective of the "Open Skies" conference is to fix conditions under which unarmed military planes of both alliances will be able to overfly each other's territory as a confidence-building measure.

Disagreement centers on the number of flights allowed, the type of planes used and the technical instruments on board, Hungarian Foreign Ministry experts said.

The United States is ready to allow 50 overflights per year, while the Soviet Union will only accept 15. Moscow also wants to exclude certain zones and is alone in wanting countries being overflown to use their own aircraft for such flights.

The Hungarians are willing for the conference in Budapest to be prolonged if agreement is not reached by May 12, but the Americans believe a new meeting will have to be fixed, in Ottawa or Budapest.

#90110d7840 04/20/1990 ~French/German News Agency
LONDON (APRIL 20) - The British government Friday confirmed it received a warning that a group of Palestinian extremists led by Abu Nidal planned a terror attack on crowds attending football's World Cup finals in Italy starting in June.

A spokeswoman for Prime Minister Margaret Thatcher said the warning had been given by Jim Swire, spokesman for the Uk (United Kingdom) Families Flight 103 Group, set up after 270 people were killed when a Pan Am airliner blew up over the Scottish town of Lockerbie. Terrorists allegedly planned an attack on English fans in Sardinia where the England team is to be based.

Swire reportedly said: ''My source tells me that the Italian government has received this warning. An attack is likely to be on an airport and, given Nidal's track record, a stadium would be ideal,'' Swire said. He declined to identify his source.

#90110d7950 04/20/1990 ~French/German News Agency
BEIJING (APRIL 20) - Elizabeth Taylor, Marilyn Monroe and Paul Newman are among Hollywood stars whose films are to be shown on Chinese television from Sunday under a new film deal with Rupert Murdoch's 20th Century-Fox Film Corp.

Miss Taylor's classic "Cleopatra" will launch the third season of weekly U.S. feature films supplied by Fox to state-run China Central Television (CCTV), the New China News Agency (NCNA) said Friday.

Other films in the series include "The French Connection," Marilyn Monroe's "How to Marry a Millionaire" and "Long Hot Summer," starring Paul Newman and Orson Welles.

CCTV also plans to carry the Fox-produced prime-time soap opera "Dynasty" this year, despite the Communist Party's oft-stated contempt for "bourgeois liberalization" or undesirable Western influences.

#90110d8030 04/20/1990 ~French/German News Agency
ALGIERS (APRIL 20) - Algeria's Islamic Salvation Front , a Moslem fundamentalist group, Friday shunned demands to call off a rally here, posting stewards along a three-kilometer stretch between the city center and the president's residence.

The ruling National Liberation Front (FLN) party announced Thursday it was calling off a march to be held Friday.

The FLN, in a communique, said it was hoping to avoid "any possibility however minimal of causing security problems" by withdrawing its call for a march, but was maintaining a call for marches outside the Algerian capital.

The president of the Islamic Salvation Front, which is running against the FLN in the country's first multiparty elections since independence in 1962, said the FLN's decision to call off the march in Algiers was a "wise one."

Sheikh Ahmed Sahnoun, a moderate religious leader with a wide audience, had appealed to both the FLN and the Islamic Salvation Front to call off the rival marches.

The FLN called for a march to protest against the use of mosques for political ends after the Islamic Salvation Front had decided to hold a rally.

Friday bearded Islamic Salvation Front stewards wearing Islamic robes were seen between May 1 Square in the city center and the presidential palace at El Mouradia on the hills overlooking the capital.

Organizers of the rally posted banners on walls along Independence Avenue reading "Moslem Algeria", "No to laicism" and "Islam is tolerance, laicism is atheism".

Before the traditional Friday prayer several hundred fundamentalists rallied on El Mouradia Square which can hold a maximum 3,000 people.

Security forces cordoned off the square to prevent demonstrators marching on the presidential palace and the foreign ministry.

On Wednesday, FLN General Secretary Abdelhamid Mehri said his party would ask for a referendum on the issue of whether the country's mosques could be used for partisan purposes.

An Islamic Salvation Front leader on Thursday said his group would "not give in to pressure whatever the source."

#90110d8060 04/20/1990 ~French/German News Agency

JOHANNESBURG (APRIL 20) - The African National Congress Friday expressed outrage at the fatal shooting by South African police of four "defenseless and unarmed" youths Thursday during a protest in a black township.

It was no use the government blaming the guerrilla-backed ANC for violence while security forces were "waging a war of annihilation on the masses," the ANC said in a statement here.

"The government must seriously and urgently address itself to this crisis brought about by ill-disciplined, trigger-happy policemen whose agenda is to undermine and frustrate all attempts to normalise the political situation," the statement said.

Police killed the youths and wounded several others in the Orange Free State's Rammulotsi township after they claimed a patrol had been attacked by a stone-throwing crowd during a demonstration against township facilities.

Commissioner of Police General Johan van der Merwe ordered an internal investigation into the shootings on Thursday.

The ANC statement welcomed the probe, but believed the commission should be headed by a member of the judiciary, "not an interested party like a police officer."

President Frederik de Klerk appointed a judge Wednesday to investigate police shootings in the Transvaal's Sebokeng township on March 26, when up to 16 protestors died.

The ANC called off first-ever "talks about talks" over apartheid with the government following Sebokeng, but, reportedly, only the appointment of the judge led them to reschedule the April 11 meeting to May 2-4.

The latest shootings would not affect the new dates, ANC internal leader Walter Sisulu has told Agence France-Presse.

#90110d8090 04/20/1990 ~French/German News Agency

MOSCOW (APRIL 20) - Soviet President Mikhail Gorbachev Friday slammed "separatist activities" by Soviet militants who were dodging the law to achieve independence.

Pointing to the recently adopted law on secession from the Soviet Union, Mr. Gorbachev said the Soviet federal state was being recast.

However, it could only be "renewed with calm, intelligence, and within the law and not by separatist and extremist activities such as in the Baltic republics, the Caucasus and other regions of the Soviet Union", he added.

Mr. Gorbachev, in a one-hour address to Communist Party leaders gathering at the Bolshoi Theatre on Lenin's 120th birthday, said the Soviet Union

was "in the most important stage" of its existence as a federal nation.

"We will ultimately succeed in making the federation more human", he said.

In repeated references to Lenin's national policy, Mr. Gorbachev said the country's premier revolutionary had faced continued "opposition by Stalin and his supporters who made no difference between the Russian federation and the Union proper".

"Lenin's ideas on the federation, on its aspects, on the level of mutual relations (between the centre and the republics) are the key to our country", Mr. Gorbachev said in his speech which was carried live by national television.

The Soviet leader said unity must be preserved by "setting up a free federation".

DHAKA (APRIL 20) - Some 3,000 Moslems burned U.S. and Israeli flags after Friday prayers in the main mosque in the Bangladeshi capital to show support for Palestinian and Kashmiri independence movements, witnesses said.

The demonstrators emerged from the Baitul Mokarram National Mosque carrying banners and shouting slogans which condemned Washington for backing Israel against the uprising by Palestinians in the Israeli-occupied territories.

They called on Moslems everywhere to take up arms to liberate the Al-Aqsa Mosque in east Jerusalem, which was annexed by Israel after the 1967 Six-Day Arab-Israeli War, and then set the flags on fire, witnesses said.

The demonstration, which was supported by the Jeddah-based Organization of Islamic Conference, was called to mark Al-Qods (Jerusalem) Day, which was decreed in 1979 by the late Iranian spiritual leader Ayatollah Khomeini.

The demonstrators dispersed peacefully after also shouting slogans in support of the Moslems of Jammu and Kashmir in their armed struggle to secede from India.

#90110d8180 04/20/1990 ~French/German News Agency

LAGOS (APRIL 20) - Officials of Nigeria's new National Drug Law Enforcement Agency (NDLEA) will soon meet representatives of foreign airlines operating here to discuss ways of fighting drug smuggling, NDLEA President Fidelis Oyakhilome said Friday.

Mr. Oyakhilome told Agence France-Presse in an exclusive interview "the drug war has become a global one which only joint effort can eradicate ... It is a problem we hope to nip in the bud in Nigeria".

The NDLEA, set up in January, wanted to work out with foreign airlines how their officials and passengers could be "restrained" from trafficking in this "evil merchandize", he stated.

The agency is cooperating with Thailand, where more than 30 persons carrying Nigerian passports have been arrested on drug offences this year, he said.

Nigeria, the fourth country to ratify the 1988 UN convention on trafficking in narcotics, has in the past year signed agreements with Britain and the United States and is negotiating a treaty with neighboring West African countries, Mr. Oyakhilome, said.

NEW DELHI (APRIL 20) - The government Friday said the passport of an Indian national wanted in connection with a criminal case on a payoff scandal and now living in a Gulf country had been revoked.

A ministry of external affairs spokesman confirmed that New Delhi had cancelled the passport held by Win Chaddha, the local agent of Swedish arms firm Bofors, whom newspaper reports said is now in Dubai.

New Delhi was in touch with the authorities in the United Arab Emirates (UAE) to complete the legal processes initiated to bring him back, the spokesman said at a regular press briefing here.

Mr. Chaddha was one of the 14 persons accused in a case registered by the government of Prime Minister Vishwanath Pratap Singh concerning alleged payoffs in a 1986 Indian defense purchase contract.

Bofors were accused of having paid some 40 million dollars in bribes to clinch the 1.3 billion dollar howitzer gun deal.

India's central bureau of investigation (CBI) also named Martin Ardbo, the then chief of Bofors who signed the contract, among the 14 named in the case registered in January.

#90110d8240 04/20/1990 ~French/German News Agency

MANILA (APRIL 20) - President Corazon Aquino said here Friday she would

seek the extension and broadening of the special emergency powers granted to her for a six-month period after the bloody December coup attempt.

"It may be too soon to drop our guard," she said in a statement.

Mrs. Aquino said she had used her emergency powers effectively and had not abused them as she reiterated her call to congress to approve the extension of the powers which lapse in June.

Congress granted Mrs. Aquino the special powers to stabilize the situation after the bloody December coup attempt by rightist renegade soldiers that claimed 119 lives and injured over 500 people.

Mrs. Aquino had used them to impose price ceilings on vital products, take control of air fields nationwide, and order a national inventory of firearms.

She said she would be discussing the extension and broadening of her powers with Senate President Jovito Salonga and House Speaker Ramon Mitra, but did not say what additional powers she would seek.

MONROVIA (APRIL 20) - Anti-government rebels killed two Liberia Telecommunications Corporation employees and wounded two others in an ambush Thursday in troubled Nimba County, official sources said here Friday.

Deputy Information Minister Paul Allen Wie told a press briefing that Emmanuel Johnny Mulbah died when rebels ambushed the van he was driving.

Informed sources also said technician Edmund Green, who was wounded in the ambush, died later.

The telecommunications employees were on their way to restore communications facilities in Ganta where government troops are based.

Two other occupants of the vehicle received bullet wounds in the ambush which took place Thursday between Gbarnga in neighboring Bong County and Ganta.

The rebels, who launched a bid to unseat President Samuel Doe on December 24, are being led by Charles Taylor, a former top civil servant wanted in Monrovia on embezzlement charges.

Dissidents have intensified activities against troops in recent weeks with attacks on Ganta and Sannequellie, the Nimba County capital.

They have also launched several ambushes and set up roadblocks which have cut off southeastern Liberia from the rest of the country and made travel in the region dangerous.

Officials in Monrovia said more than 200 people, including civilians, have died in the fighting while independent sources put the death toll at over 1,000.

Rebels have kidnapped several expatriates this month, including two Catholic priests and a journalist.

A Monrovia newspaper reported Friday that two Italians working at a Nimba County logging firm are currently being held by the rebels.

BRUSSELS (APRIL 20) - The European Economic Community (EEC) on Friday said its members "deplore" Iraq's threat to use chemical weapons against Israel.

"The acquisition of weapons of mass destruction by any state in the Middle East region can only lead to heightened tensions and an increased threat to peace and stability," the EEC 12 added in a statement issued in Brussels.

Iraqi President Saddam Hussein on April 2 said that Iraq possesses binary chemical weapons, which it would use in response to an Israeli attack.

Binary weapons are shells or bombs that contain separate chambers of gases or liquids which become toxic when mixed by an explosion.

The EEC statement noted that Iraq is a signatory of the 1925 Geneva protocol which outlaws first use of chemical and bacteriological weapons. "All states (should) strengthen compliance" with the accord, it said.

The Community appealed to "all parties" in the Middle East "to exercise restraint and to refrain from any actions or statements which could increase tension in the region."

Mr. Hussein's threat has also been attacked as "deplorable and irresponsible" by U.S. President George Bush.

PRETORIA (APRIL 20) - Canada will provide 200,000 dollars in emergency aid to victims of the Zulu civil war in South Africa's strife-torn Natal

province, the Canadian Embassy said here Friday.

"Canada is deeply concerned about the violence in Natal," Canadian Secretary of State for External Affairs Joe Clark said in a statement released by the embassy.

The turmoil "has created enormous suffering ... and poses a serious threat to efforts to secure a peaceful settlement in South Africa," Mr. Clark said.

The statement was also signed by Canadian Minister for External Relations and International Development Monique Landry.

Natal's conflict has over the past month intensified at a cost of more than 200 lives, and up to 3,000 other people have died since fighting escalated in late 1986.

The African National Congress-allied socialist United Democratic Front and the conservative Inkatha movement are battling for supremacy over the townships.

Calls for peace by ANC Deputy President Nelson Mandela and Inkatha President Mangosuthu Buthelezi have failed to stem the violence.

#90110d8330 04/20/1990 ~French/German News Agency

LAGOS (APRIL 20) - Authorities of the University of Lagos, one of the oldest and biggest universities in Nigeria (15,000 students), have imposed an indefinite ban on processions in and outside campus, government-owned Radio Lagos reported Friday.

The ban was imposed to stem the wave of demonstrations over a 120 million-dollar World Bank loan being negotiated by the government but which Nigerian students consider a "Greek gift" which might entail cuts in numbers of students and staff in the universities, an informed source said.

Western Nigeria's Obafemi Awolowo university in Ile-Ife and northern Ahmadu Bello university in Zaria, and the Polytechnic college in Ibadan -- three key tertiary institutions -- have been closed indefinitely in the past three weeks as a result of student protests.

The 35-year loan would be used to improve the academic infrastructure of most of Nigeria's 30 universities, officials have explained.

#90110d8500 04/20/1990 ~French/German News Agency

MOSCOW (APRIL 20) - Latvia's Popular Front has rejected an offer from Soviet leader Mikhail Gorbachev for special status, and will seek independence as in neighboring Lithuania, the nationalist group's leader said Friday.

Dainis Ivans told Agence France-Presse that the Front would seek an independence vote when the Latvian parliament meets in Riga on May 3.

Mr. Ivans, a member of a Latvian delegation which met Thursday with Mr. Gorbachev in Moscow, said he would give details of the meeting later on television and would outline the Front's strategy.

"We are going to explain to Latvians the fundamental principles of our declaration of independence and the fundamental laws which the parliament plans to pass, notably a law defining Latvian citizenship", he said.

"Mr. Gorbachev made two suggestions: to stay within a renewed federation (or) to leave the union but in the context of rules defined by the Supreme Soviet.

"We told him that most Latvians favoured establishing an independent state by parliamentary means on the Lithuanian model," Mr. Ivans said.

The main problem for Latvia is that "there is no guarantee that Mr. Gorbachev's successor will not change what has already been decided" and that "even with a special confederal-type status for Latvia, the center (Moscow) would have ways of imposing its law", he said.

Mr. Ivans also said that Mr. Gorbachev told the Latvians he "would take identical measures" against them as against Lithuania.

Supplies of oil were cut off and natural gas sharply reduced to Lithuania this week, after Mr. Gorbachev threatened sanctions if Lithuania did not scrap some of the legislative moves taken to bolster its March 11 independence declaration.

Nationalist sources in Riga Thursday said that in talks with Latvian President Anatoly Gorbunov, Mr. Gorbachev emphasised at length the political and economic advantages which would accrue to Latvia if it refrained from breaking with the Soviet Union.

#90110d8710 04/20/1990 ~French/German News Agency

JERUSALEM (APRIL 20) - The Israeli army detained an AFP correspondent and three other Palestinian journalists Friday in the occupied Gaza Strip, one of the detainees reported, charging that he was beaten by soldiers.

Sakher Abu el-Oun, who works part-time for Agence France-Presse and the U.S. network NBC, said he and three other journalists were arrested outside the Nusseirat refugee camp while covering a Palestinian demonstration.

Mr. el-Oun said he and Kassem Ali Ezzat Kefarneh, who works for the Associated Press, the French TF1 television network and the U.S. network WTN, were released after three hours in a Gaza police station.

The two others arrested, Ahmed el-Bagdadi and Ala Tahrawi, correspondents for several newspapers in Arab east Jerusalem, were transferred to the Ketziot detention camp in the Negev desert in southern Israel, he said.

An Israeli military spokesman said he had no information on the arrests.

Mr. el-Oun charged that he was beaten up by an Israeli soldier who had accused him of handing out leaflets during the demonstration organized by the Moslem fundamentalist Hamas group.

He was forced to undress and hand over his film and personal effects to the authorities, before being freed without explanation.

Palestinian journalists working in the Gaza Strip have repeatedly complained of harassment by the Israeli army.

Hamas had called a general strike in the Gaza Strip, the occupied West Bank and east Jerusalem for Friday to mark the last Friday of the holy Moslem fasting month of Ramadan. The strike call was largely followed.

#90110d8850 04/20/1990 ~French/German News Agency

TAIPEI (APRIL 20) - Taiwan has lifted a four-decade ban on importing movies from the Soviet Union, seven weeks after it eased restrictions on direct trade with Moscow.

A local film distributor, ESC Inc., has imported three Soviet-made films, pending the approval of the Government Information Office (GIO), which announced on Wednesday that Soviet films could be shown in local cinemas.

"We see no reason to continue restricting the entry of Soviet films now that direct trade (with the Soviet Union) is allowed," an official of the GIO's motion picture department said.

"War and Peace," based on Tolstoy's novel, is expected to be the first Soviet movie shown here since 1949, when the Nationalists fled here from the Chinese mainland.

The Nationalists banned all direct contact with the Soviet Union, which had backed the Chinese Communists in the civil war on the mainland.

But in line with Taipei's political and economic liberalization policies, authorities here opened direct trade with the Soviet Union in early March.

Chinese films are still banned, but videotaped movies are easily available.

"The Last Emperor", a co-production by China and Italian director Bernardo Bertolucci, was shown here in 1989.

Taiwan imported 506 foreign films last year.

SINGAPORE (APRIL 20) KYODO - JAPANESE RETAILER ISETAN SAID FRIDAY IT HAS ACQUIRED A THIRD PROPERTY IN SINGAPORE, A 10-STORY INDUSTRIAL BUILDING, FOR 17.3 MILLION SINGAPORE DOLLARS.

ISETAN (SINGAPORE) SAID IT PLANS TO USE THE BUILDING, WHICH HAS AN AREA OF ABOUT 6,784 SQUARE METERS, FOR STORING AND DISTRIBUTING ITS MERCHANDISE. IT IS CURRENTLY LEASING WAREHOUSE SPACE.

ISETAN, WHICH PRESENTLY ASSIGNS CONTRACTS TO LOCAL COMPANIES TO MAKE GARMENTS FOR IT, ALSO WANTS TO USE SOME OF THE SPACE FOR PRODUCING ITS OWN GARMENTS.

THE BUILDING IS CURRENTLY OCCUPIED BY TENANTS, AND ISETAN PLANS TO MOVE INTO IT IN TWO YEARS.

ISETAN BECAME THE FIRST JAPANESE RETAILER TO SET UP A DEPARTMENT STORE IN SINGAPORE IN 1971. IT NOW RUNS THREE DEPARTMENT STORES AND TWO SPECIALTY RETAIL SHOPS IN SINGAPORE, AND ALSO OWNS TWO OTHER PROPERTIES.

A 1,835 SQUARE METER OFFICE BUILDING PURCHASED IN 1988 FOR 8.5 MILLION SINGAPORE DOLLARS NOW FUNCTIONS AS THE COMPANY'S ADMINISTRATIVE HEADQUARTERS AND AS A BASE FOR LEXDECOR, ITS SUBSIDIARY SET UP THIS YEAR SPECIALIZING IN INTERIOR DECORATION AND EXPORTS OF FURNITURE AND TIMBER PRODUCTS TO JAPAN.

TOKYO (APRIL 20) KYODO - PARIS LTD., A MEDIUM-SCALE JAPANESE RETAILER OF ACCESSORIES, IN EFFECT HAS GONE BANKRUPT WITH TOTAL LIABILITIES OF ABOUT 70 BILLION YEN, A PRIVATE CREDIT RESEARCH AGENCY REPORTED FRIDAY.

TEIKOKU DATA BANK LTD. SAID THE BUSINESS FAILURE WAS THE LARGEST SO FAR THIS YEAR IN TERMS OF THE DEBT LEFT BEHIND BY THE FAILED COMPANY.

THE OSAKA-BASED RETAILER, CAPITALIZED AT 45 MILLION YEN, TWICE ISSUED BILLS WHICH WERE NOT HONORED, TEIKOKU OFFICIALS SAID.

THE OFFICIALS SAID THE COMPANY HAD BEEN FACED WITH A SEVERELY TIGHT CASH POSITION IN THE WAKE OF A PLUNGE IN STOCK PRICES.

THE COMPANY, ESTABLISHED IN 1971, WAS KNOWN FOR ITS AGGRESSIVENESS IN SO-CALLED FINANCIAL ENGINEERING INVOLVING FAIRLY SPECULATIVE STOCK TRADING EARNING MORE PROFITS FROM THAT SOURCE THAN FROM ITS MAIN LINE OF BUSINESS THE OFFICIALS SAID.

TEIKOKU DATA BANK ALSO PREDICTED THAT PROTRACTED SLUGGISHNESS IN THE STOCK MARKET MAKES IT LIKELY THAT THE NUMBER OF BUSINESS FAILURES IN CONNECTION WITH STOCK TRANSACTIONS WILL SURGE IN THE NEAR FUTURE.

TOKYO (APRIL 20) KYODO - NIPPON STEEL CORP. HAS RESUMED TALKS WITH ALLIED-SIGNAL INC. ON USING THE U.S. FIRM'S PATENT FOR THE MAKING OF AMORPHOUS METALS, A NIPPON STEEL OFFICIAL SAID FRIDAY.

THE MOVE FOLLOWS THE TOP JAPANESE STEELMAKER'S EARLIER SUSPENSION OF TALKS WITH THE U.S. FIRM IN THE AUTUMN OF 1988 OVER ITS MANUFACTURING PATENT ON AMORPHOUS METALS, USED MAINLY TO IMPROVE THE EFFICIENCY OF ELECTRIC POWER TRANSFORMERS, THE OFFICIAL SAID.

THE OFFICIAL, WHO REQUESTED ANONYMITY, DID NOT ELABORATE, BUT INDUSTRY ANALYSTS INTERPRETED THE TALKS AS FOCUSING ON HOW MUCH NIPPON STEEL SHOULD PAY FOR ALLIED-SIGNAL'S PATENT.

NIPPON STEEL PRESIDENT HIROSHI SAITO HAS SAID THE U.S. FIRM HAD OFFERED PATENT FEES WHICH HE FOUND TOO HIGH.

JAPAN AND THE UNITED STATES AGREED WEDNESDAY TO BEGIN TALKS AIMED AT FINDING A RESOLUTION TO U.S. TRADE COMPLAINTS INVOLVING AMORPHOUS METALS.

U.S. TRADE REPRESENTATIVE CARLA HILLS ANNOUNCED IN WASHINGTON THAT SHE WOULD DELAY A DECISION ON A PETITION TO RETALIATE AGAINST JAPAN FOR ALLEGEDLY SHUTTING OUT U.S.-MADE AMORPHOUS METALS FROM ITS MARKET.

ALLIED-SIGNAL, BASED IN MORRISTOWN, NEW JERSEY, FILED THE PETITION ON MARCH 5 CLAIMING IT HAS BEEN UNFAIRLY BARRED FROM SELLING ITS PRODUCTS IN

JAPAN.

JAPAN HAS INSISTED THE U.S. CLAIMS ARE GROUNDLESS AND BASED ON MISUNDERSTANDING.

#90110p5057 04/20/1990 ~PR Newswire

CAMDEN, NJ (APRIL 20) PR NEWSWIRE - The father of two American food staples -- "SpaghettiOs," and "Campbell's Chunky Soup" -- is retiring.

Donald E. Goerke, who led teams which developed the two blockbuster products for Campbell Soup Co. (NYSE: CPB), is hanging up his marketing spikes on May 1, ending a 35-year Campbell career. Combined sales of the two product lines today amount to more than a half billion dollars.

Goerke, a native of Waukesha, Wis., and now a resident of Riverton, N.J., got the idea for SpaghettiOs in the mid-1960s in an attempt to stimulate interest in the canned pasta market while increasing sales of the Franco-American line of products, of which he was the marketing manager.

SpaghettiOs became a big hit with kids, among them Goerke's two sons and a daughter -- now grown. And today, across America, SpaghettiOs are still appealing to the new, younger generation, including Goerke's two granddaughters.

While SpaghettiOs sales were increasing in the late 1960s, Goerke applied his skills to another challenge: Soup sales.

Chunky raised eyebrows inside Campbell, not only for its thickness, but also for being the first major Campbell soup line that was not condensed -- that is, you didn't have to add water to it.

Goerke joined Campbell in 1955 as a marketing research analyst. He

subsequently held a number of key marketing positions in Campbell's canned foods and soup divisions. His most recent assignments were as business director and category general manager, condensed soups (1986-89), and then category general manager, microwave soups. He received a B.S. in mathematics from Carroll College, Waukesha, in 1949, and an M.B.A. from the University of Wisconsin in 1951. He also is a graduate of the Senior Executive Program of M.I.T. (1968). Goerke is married to the former June Uthus of Milwaukee.

Goerke, an avid golfer who now and then enjoys a steaming cup of Chunky Beef soup or a mug of condensed Campbell's tomato soup, plans to establish a marketing consulting business upon retirement.

BURLINGTON, MA (APRIL 20) PR NEWSWIRE - Ontologic, Inc., an object-oriented database technology firm, has introduced ONTOS for OS/2, the first object database for personal computers.

"ONTOS for OS/2 brings the power of object-oriented databases to the PC," said Robert R. Martin, vice president of marketing for Ontologic.

"Now C++ developers have a high-productivity tool for building multi-user, data-intensive PC applications for such complex data as graphics, text, and multi-media," Martin said.

ONTOS for OS/2 has been in use at Fluent Machines, Inc., of Framingham, Mass., and Index Technology, Cambridge, Mass. It will be released in June.

"ONTOS for OS/2 will be the first in a series of new products that Ontologic will introduce for platforms, operating systems, and languages during 1990," Martin said.

ONTOS, Ontologic's flagship product, was introduced in October 1989 on Sun and Apollo computers and is installed in more than 90 sites worldwide. It is the first object-oriented database to support C++, the industry-standard programming language.

ONTOS is a full-featured, object-oriented database management system, designed for interactive, network-based, data-intensive applications. It integrates object-oriented design and language tools with an extensible database management subsystem.

"This approach provides the performance and flexibility of files, the functionality of relational database, and unprecedented productivity of

single paradigm programming," Martin said.

ONTOS network architecture is designed to support network-based applications running on PCs, workstations, minicomputers and mainframes.

CONTACT: Robert R. Martin of Ontologic, Inc., 617-272-7110 or Tim Trainor of Chalfin Kostopoulos & Gilmore for Ontologic, 617-423-2096.

MOUNTAIN VIEW, CA (APRIL 20) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) announced today that they have launched a new program, Scientific Analysis and Visualization of the Environment (S.A.V.E.), in conjunction with Earth Day activities held at the company's headquarters in Mountain View.

S.A.V.E. is a program initiated by Silicon Graphics employees to improve public awareness and education about the results of environmental research. A dedicated laboratory will be established at Silicon Graphics and equipped with the company's IRIS(R) workstations and servers, video equipment, and a full-time staff. The S.A.V.E. lab will be used to:

-- Build a library of environmental simulation, animation, and database software to use and share with customers;

-- Work with environmental researchers to produce animated video clips explaining results of their work;

-- Work with educational institutions to produce videos showing the state of the art in environmental science;

-- Produce animated videos of new scientific discoveries or simulations of significant environmental events;

-- Develop environmental planning games with realistic causes and effects; and

-- Develop software for interactive teaching of environmental science.

Earth Day activities at Silicon Graphics will include a round-trip bike ride from the company's headquarters through a local park and recreation area, presentations on Silicon Graphics customers using IRIS workstations for environmental research, and company information booths on environmental topics such as transportation, recycling, and conservation. Silicon Graphics currently provides company-wide recycling stations for paper and aluminum.

Silicon Graphics Inc. is the leading manufacturer of high performance workstations and computing systems for visual processing applications. These workstations are used by engineers, scientists and creative professionals in the design, analysis, manufacture and simulation of three-dimensional products. The company's stock trades on the New York Stock Exchange under the symbol SGI.

CONTACT: Alexx Wood, 415-335-1026, or Debra Harrison, 415-962-3365, of Silicon Graphics.

#90110p5087 04/20/1990 ~PR Newswire

DENVER (APRIL 20) PR NEWSWIRE - Manville Corp. (NYSE: MVL) today said it is considering the sale of its 50 percent interest in the Stillwater platinum and palladium mining operations located in southwestern Montana. Salomon Brothers Inc. has been retained by the company to solicit bids on the property. The Stillwater deposit is the world's only known economically viable primary source of platinum group metals (PGMs) outside of South Africa.

"The Stillwater operations are independent of our mainstream businesses," Tom Stephens, Manville president and CEO said. "We have received numerous unsolicited inquiries from interested parties over the last several months. If we can realize a premium value for this asset today and reinvest the proceeds, we believe this would enhance overall shareholder value."

Barbara Alexander, managing director for Salomon Brothers, said that "while the property is an extraordinary prize for any mining company, it may be of even greater value to those who need long-term supplies of platinum and/or palladium for their own use or as a precious metals investment opportunity."

PGMs include platinum and palladium with much smaller amounts of rhodium, ruthenium, osmium and iridium. These metals are extremely resistant to corrosion, have high melting points, are very hard and durable, and are often used as catalysts. There are no known cost-effective substitutes for PGMs in many of their key applications.

One of the largest markets for PGMs is pollution control catalysts, particularly for automobiles. Heightened environmental concerns and increasingly stringent regulations in the U.S., Europe, and Japan are stimulating significant growth in demand for PGM catalysts.

Platinum and palladium were discovered in the Stillwater Complex by Manville geologists in 1967. After 20 years of exploration and development, mining operations commenced in late 1986. The mining

operations and all mineral rights are owned by two 50/50 partnerships between Manville and Chevron Resources Co., an affiliate of Chevron U.S.A. Inc. Currently, Manville plans to retain its preexisting 5 percent royalty interest in the revenues of Stillwater's mining operations.

Manville is an international manufacturing and natural resources company with two principal operating subsidiaries, Manville Sales Corp., headquartered in Denver, and Manville Forest Products, headquartered in West Monroe, La. The company's primary businesses include paper and wood products, packaging, fiber glass and industrial insulation products, roofing systems and filtration minerals. Founded in 1858, Manville employs more than 17,000 people at 50 facilities and four mines worldwide. The corporation's headquarters is in Denver.

STILLWATER FACT SHEET -- The 28-mile long Stillwater Complex is the world's only known economically viable primary source of Platinum Group Metals (PGMs) outside of South Africa. -- Over 80 percent of the world's PGMs are currently supplied by South Africa and the Soviet Union. -- PGMs include platinum and palladium with much smaller amounts of rhodium, ruthenium, osmium and iridium. -- PGMs share the valuable characteristics of extreme resistance to corrosion, high melting points, durability and catalytic capability. -- A major market for PGMs is in the pollution control field - particularly for automobiles. Demand for these applications is increasing rapidly. -- SMC has received a commendation from the U.S. Forest Service for its environmentally conscientious operations. -- Manville currently has 50 percent interests in two partnerships, the Stillwater Mining Company and Stillwater PGM Resources, which own the mineral rights and mining facilities at Stillwater. Chevron Resources Company, an affiliate of Chevron U.S.A. Inc., is Manville's partner. -- Manville geologists first discovered platinum and palladium within the Stillwater Complex in 1967. Mining operations began in late 1986. -- On average, the JM Reef contains as much platinum per ton of ore as the Merensky Reef in South Africa and seven times the amount of palladium. -- A smelter is under construction in Columbus, Mont., 40 miles from the mine site. This facility will further process Stillwater concentrate (matte) before final refining and increase revenues. -- Approximately 450 miners, support and management personnel work at SMC. -- SMC contributes more than $33 million annually to the Montana economy in wages, taxes and related spending. -- In addition to drill and blast technology, Stillwater Mining Company also uses a tunnel boring machine which drills access tunnels faster and at a lower cost than traditional mining methods. This is the first use of this type of equipment in hard rock mining in North America.

CONTACT: T. Bergeron, 303-978-4914; or Bill Bullock, (financial), 303-978-4694, both of Manville Corp.

WEST DES MOINES, IA (APRIL 20) PR NEWSWIRE - Emil Martini Jr., chairman of Commtron Corporation (AMEX: CMR), today announced three executive appointments by the board of directors following the March 26 announcement that Gary Rockhold, Commtron's president and CEO, had resigned effective May 1, to become president of Polygram Group Distribution.

Robert Martini, vice chairman of Commtron, was named president, effective May 1 until a new chief executive officer is named. He will continue as president of Bergen Brunswig Corporation (AMEX: BBC), which owns approximately 80 percent of Commtron.

Stephen M. Lacy was named interim general manager in charge of Commtron's day-to-day administration. Lacy will continue to hold his current position of vice president and chief financial officer.

Vern Fross was named senior vice president of video sales and marketing. The new position, effective immediately, expands Fross' responsibilities over Commtron's video business. Fross joined Commtron in 1981, rising from Des Moines branch manager to national sales manager, and then to his most recent position as vice president of merchandising in 1985.

Commtron Corporation is the nation's largest distributor of prerecorded videocassettes and a national distributor of consumer electronics.

PRINCETON, NJ (APRIL 20) PR NEWSWIRE - Dow Jones & Company, Inc. (NYSE: DJ) announced today the launch of its DowVision information service and the formation of strategic alliances with four companies that have developed supporting software products.

DowVision is a comprehensive information service that delivers business news and information through corporate computer systems directly to desktops.

"This information will be specially coded, which will enable users to receive only the news they want as soon as it moves on the Dow Jones newswires," said Carl M. Valenti, Dow Jones senior vice president and president and publisher of Dow Jones Information Services. "DowVision

will offer the corporate customer an information service of unparalleled value."

News will come from the Dow Jones News Service (the "Broadtape"), Professional Investor Report, Capital Markets Report, Dow Jones International News Services and Federal Filings. Additional information will come from PR Newswire and Business Wire, which carry corporate news releases.

Software companies -- known as Alliance Developers -- build custom products that use this news and information to meet specific customer needs on a broad range of corporate computer systems.

The first Dow Jones Alliance Developers are: American Real-Time Services, Inc., New York, N.Y.; Desktop Data, Inc., Waltham, Mass.; GESCAN International, Inc., Research Triangle Park, N.C.; and Verity, Inc., Mountain View, Calif.

"The Alliance Developer program allows us to harness the creative talents and technical expertise of companies whose business it is to understand the workplace and technical environment of the customer," said Charles Brady, executive director of advanced systems for Information Services. "Dow Jones provides a highly advanced network delivery system that will support our newswires and our interactive database service, Dow Jones News/Retrieval. We also bring the company's long-standing commitment to editorial excellence -- an invaluable asset to the customer.

"The Alliance Developers will create the means for sending this information to the user," Brady added. "Through this program, the possible uses of Dow Jones business news and information are limitless."

In the future, DowVision will provide customers with easy access to News/Retrieval's archive of business and financial databases -- but without the need to dial into the system using a modem. DowVision's flat-fee pricing will eliminate per-minute charges on all Dow Jones-proprietary information, reducing a significant barrier to usage.

Dow Jones Information Services is an operating group of Dow Jones & Company, Inc. In addition to its domestic and international newswires, Dow Jones publishes The Wall Street Journal, Barron's and the Ottaway group of community newspapers. The company also owns Telerate, Inc., a supplier of real-time financial information, decision support products and transaction services.

COSTA MESA, CA (APRIL 20) PR NEWSWIRE - ICN Pharmaceuticals Inc. (NYSE: ICN) and SPI Pharmaceuticals Inc. (AMEX: SPI) announced today that ICN will pursue the proposed merger of Galenika through a Yugoslavian company to be formed by ICN, instead of through SPI, a subsidiary of ICN.

ICN had previously announced that letter of intent proposing the merger of SPI and Galenika had been signed by ICN and Galenika on Feb. 8, 1990.

SPI said a merger with Galenika could restrict SPI's ability to raise capital in the U.S. public markets because of SEC financial reporting requirements related to Galenika. While these restrictions also apply to ICN, it is anticipated that they will have a lesser impact on ICN.

The structure of the transaction, and the amount of the purchase price, are currently under negotiation. While the proposed transaction will be pursued by ICN, it is still subject to substantial contingencies, including Yugoslavian tax, currency and other regulatory issues that remain to be resolved. In addition, it is subject to customary conditions including board and regulatory approvals.

ALBANY, GA (APRIL 20) PR NEWSWIRE - The Albany-Dougherty Economic Commission announced this morning that Amitech Inc. of Marietta, GA, will construct a 43,000-square-foot facility for high-precision injection molding in Dougherty County.

A formal statement of the company's construction, investment and employment plans was announced during a special breakfast meeting this morning among members of the Albany-Dougherty Economic Development Commission, local Payroll Development Authority, Albany City Commissioners, Dougherty County Commissioners and members of the boards of directors of Amitech Inc., Nypro Inc. of Clinton, MA, and Mitsui & Company (USA) Inc. of New York. The Albany facility will be the fourth joint venture between Nypro Inc. and Mitsui & Company (USA) Inc.

The 43,000-square-foot facility will be constructed to "clean room" standards for production of health care and electronics components, and start up is scheduled for Feb. 15, 1991. The facility will initially employ 25 persons and will employ approximately 75 people at full production.

Also announced during the breakfast was the approval of a $6.0 million industrial development bond allocation by the state of Georgia for the new

Amitech facility. According to Albany Mayor Tommy Coleman, chairman of the Albany-Dougherty Payroll Development Authority, industrial development bond allocations now are extremely competitive and communities throughout the state aggressively pursue the special allocations. However, Coleman praised local economic development efforts by noting that the Albany-Dougherty Payroll Development Authority recently has established an outstanding record by having its last two allocation requests approved by the state of Georgia.

Economic Development Commission Chairman Jimmy Gray said, "I am delighted over the economic successes taking place in Albany and Dougherty County at this time, and I am convinced that Albany and Dougherty County are eager to pursue the future and its potential."

Gray further stated that Amitech's arrival in Albany-Dougherty County begins a new era in international opportunities and possibilities for our citizens. Amitech is the first company to locate in Albany with direct Japanese ties through one of its joint venture partners, Mitsui & Company (USA), the largest subsidiary of Mitsui & Company Ltd. of Japan.

WILMINGTON, DE (APRIL 20) PR NEWSWIRE - Matlack Systems Inc. (AMEX: MLK) today reported the results for its second quarter and the six months ended

March 31, 1990.

Revenues were up slightly in the second quarter to $55,512,000 compared with $55,263,000 a year earlier. Lower volumes caused by a continued slowdown in the manufacturing sector of the economy, were generally offset by higher average rates and the impact of a fuel surcharge instituted on Jan. 2, 1990. Operating expenses were lower, despite the inclusion of certain one-time charges resulting from a comprehensive cost reduction program designed to reduce the company's annual expenses by approximately $5 million.

The company's operations for the quarter ended March 31, 1990, resulted in a net loss of $206,000 or 4 cents per share, compared with a loss of $513,000 or 10 cents per share last year.

Revenues for the six months ended March 31, 1990, were $107,794,000 compared with $110,333,000 last year. The loss for the period was $1,102,000 or 20 cents per share compared with a loss of $83,000 or 2 cents per share a year earlier.

Despite the continuing soft economy, the company said it expects improved operating results during the second half of the year, mainly due to the impact of the cost reduction program, which was in place by the end of the second fiscal quarter.

Matlack Systems Inc.'s major operation consists of Matlack Inc., one of the largest carriers of bulk commodities by truck in North America. Matlack operates approximately 1,400 tractors and 2,900 trailers out of 86 terminals located in 35 states and three terminals in Canada.

#90110p5121 04/20/1990 ~PR Newswire

CHICAGO (APRIL 20) PR NEWSWIRE - Tribune Company (NYSE: TRB) today reported that first quarter net income was down nine percent to $33.5 million from $36.8 million. The decline was due to operating losses at the New York Daily News and continued weakness in the company's newsprint business, which were only partially offset by higher profits from other operations and reductions in net interest expense and income taxes.

Primary net income per share was down 12 percent to $.43 from $.49 last year. Operating profit declined 13 percent to $62.9 million from $71.9 million. Revenues for the quarter were up six percent to $584 million from $553 million in the 1989 first quarter.

Operating profit for the newspaper publishing group declined 10 percent to $55.7 million from $61.6 million. The decrease resulted from larger operating losses at the Daily News due to weak market conditions and costs associated with contract negotiations currently underway with 10 labor unions. Operating profit improved for the rest of the newspaper group largely due to stronger Chicago Tribune results and lower newsprint costs.

Revenues for the group were up one percent to $398 million. Advertising revenues were $297 million, up one percent. While general advertising revenues were up six percent and classified up two percent, retail revenues declined two percent. Circulation revenues were up one percent to $88 million.

The broadcasting and entertainment group reported operating profit of $6.2 million as compared to a loss of $1.4 million in the first quarter last year. The improvement primarily was due to higher income at the company's television stations. Revenues for the group were up 19 percent to $125 million. Television revenues rose 16 percent, radio was down slightly and entertainment was up 44 percent. The higher entertainment revenues were offset by increased expenses for program development and production.

Operating profit for the newsprint group declined 63 percent to $6.3 million despite a four percent increase in revenues to $114 million. Newsprint prices were lower and operating expenses rose, the latter due to a 12 percent increase in shipments and a stronger Canadian dollar.

Net interest expense declined 18 percent to $7.5 million for the quarter. The effective tax rate for the quarter was 39.5 percent versus 41.5 percent in the same period last year. Dividends on the preferred stock net of related tax benefits were $4.3 million. After deducting these preferred dividends, net income attributable to common shares was $29.2 million.

Tribune Company is a diversified media company engaged in newspaper publishing, broadcasting and entertainment production and newsprint

operations.

#90110p5133 04/20/1990 ~PR Newswire

NEW YORK (APRIL 20) PR NEWSWIRE - Borden, Inc. (NYSE: BN) today reported first quarter 1990 net income of $63.1 million, up 6.9 percent from $59.0 million in the prior-year quarter; earnings per share of 43 cents, 7.5 percent higher than 40 cents in the 1989 first quarter; and sales of $1.89 billion, 4.1 percent ahead of $1.82 billion in the same three months of 1989.

"Once again, our broad product diversity continued to be a great strength " said R.J. Ventres, chairman and chief executive officer, in remarks prepared for the company's annual meeting of shareholders, to be held later today in Flemington, N.J. "Earnings in the Grocery and Specialty Products Division were particularly strong, led by pasta and our niche grocery brands. This more than offset lower income in the Snacks and International Consumer Products Division, where snack marketing expenses were increased to counter heavy domestic competition.

"In our Dairy Division, margins showed signs of improvement as record raw milk costs began to decline near the end of the quarter," Ventres continued. "We look for better dairy profitability as we move through 1990, based on lower raw milk costs, more realistic product pricing and the results of our own restructuring and reconfiguration programs in raising efficiency."

The company expanded rapidly over the 1986-1989 span -- Phase One of Borden's growth program -- through precisely targeted acquisitions and internal growth. Borden built a market leadership position in pasta and strengthened its number two share of sales in North American snacks. "In an age when brand strength is crucial, we have built a mountain of it," Ventres said.

"We're now in Phase Two of our program -- reconfiguring what we've built in order to achieve long-term productivity," he noted.

CONTACT: Christine Tilton of Borden, 614-225-4472, or Kristine Lawas and Jo-Anne Sinnott of Adams & Rinehart, 212-557-0100, for Borden

PASADENA, CA (APRIL 20) PR NEWSWIRE - The Huntington Memorial Hospital

board of directors voted at a special meeting to stay in the Los Angeles County trauma network following the county's agreement to adhere to catchment area boundaries and increase funds promised to the hospital for uncompensated care.

Huntington had announced its intention to drop out of the system May 1, but with the board's decision there will be no interruption in the trauma coverage. Huntington remains the only trauma canter in the San Gabriel Valley.

"Our original decision to withdraw from the network was due to financial losses of $3.7 million incurred in 1989 from the 666 trauma patients brought to Huntington," said Dr. Allen W. Mathies Jr., Huntington president and chief executive officer. "When we announced our withdrawal, we had not received any financial support from the county and could not in good conscience continue to drain our resources away from our other services.

"We have now reached an agreement with the county that includes payments from the tobacco tax initiative funds and a guarantee that we will only receive patients from within our catchment area. These two factors will reduce our trauma losses by nearly $2 million this year. Although we will still lose money, our loss will be manageable and this enables us to stay in the network."

The hospital's trauma catchment area now extends from the mountains on the North; La Canada/Verdugo Hills and Glendale on the west; the 10 Freeway on the south and east to the eastern border of Arcadia and Temple City.

The "trauma" designation is used for patients who have life- threatening injuries that involve multiple systems of the body. Studies have shown that these patients have a better recovery rate if specialized care is provided within the first hour following the injuries. An emergency department that is a part of the trauma network is required to have a general surgeon in-house 24 hours a day, an operating room always available, and specialists who can arrive within 20 minutes of a call.

Over half of the trauma patients brought to Huntington last year were victims of car accidents. Huntington has participated in the trauma system since December 1983. The number of patients served has increased from approximately 175 in 1985 to 666 in 1989. Financial losses have increased each year from $785,000 in 1985 to $3.7 million in 1989.

"In addition to the money promised by the county, we are turning to our local community to seek funding for these vital services," said Mathies. "The tobacco tax initiative funds are available through June 1991. After that, we will again need other sources of income to offset losses from uncompensated care. Since the hospital was founded nearly 100 years ago,

our community has been involved in supporting us. We believe that partnership is as crucial today as before."

In addition to being a center for trauma patients, the hospital has a full-service emergency department that annually sees 45,000 people from the surrounding communities. The hospital will continue as a paramedic base station for the San Gabriel Valley. The emergency department is approved by the county for pediatric emergency care and is approved by the American Heart Association for emergency medical care of heart patients.

A 606-bed, nonprofit community hospital, Huntington Memorial Hospital provides a full complement of acute medical care and community services. The hospital is a regional center for neonatology and high- risk maternity care, and offers the only pediatric intensive care unit in the San Gabriel Valley region. It is a teaching affiliate of the University of Southern California School of Medicine and is accredited by the Joint Commission on Accreditation of Healthcare Organizations.

#90110p5135 04/20/1990 ~PR Newswire

NEW YORK (APRIL 20) PR NEWSWIRE - W. R. Grace & Co. (NYSE: GRA) today announced first quarter net income of $32.6 million, or 38 cents per share 11 percent ahead of the $29.4 million, or 34 cents per share, earned in the 1989 first quarter.

Income from continuing operations for the quarter ended March 31, 1990 was also $32.6 million, or 38 cents per share, 8 percent above the $30.3 million, or 36 cents per share, earned last year. Sales for the first quarter were $1.5 billion, 8 percent ahead of last year's first quarter sales of $1.4 billion.

Grace Specialty Chemicals, the company's major operating unit, traditionally has a slow first quarter and, while sales for the 1990 quarter were $788 million, up 8 percent over 1989, operating income after taxes in the first quarter of $41.3 million was 7 percent less than the $44.2 million earned in the 1989 first quarter. An impressive performance in worldwide packaging and a turnaround in Davison's fluid cracking catalyst business were offset by two nonrecurring factors. The Organic Chemicals Division suffered from a temporary raw material supply interruption due to a supplier's mechanical problems, and the European Technical Products Division reported lower results attributable in large part to an extended, but now settled, strike at a U.K. automobile manufacturing customer.

Grace's energy operations reported operating income in the first quarter of $6.4 million versus $2.1 million in the 1989 first quarter. This improvement resulted from significantly reduced losses in the onshore oil and gas drilling business, as well as a return to profitability by the offshore drilling and oil field services operations. Sales in the 1990 first quarter were $107 million, up 30 percent from the comparable 1989 period.

National Medical Care's operating income rose to $14.0 million in the first quarter, 4 percent higher than last year, due to continued strength in its kidney dialysis business. First quarter 1990 sales were $203 million, up 28 percent from 1989, reflecting in part a full quarter of sales of businesses acquired during 1989.

Excluding the timing of income recognition from the company's 50 percent interest in a paper manufacturing operation recently transferred to the group, Grace Specialty Businesses' operating income surged 31 percent over last year's first quarter. Grace Cocoa's operating income improved and Bekaert, the Belgian-based textiles unit, produced exceptional operating results and was further benefited by a reduction in the corporate tax rate in Belgium. Sales for this group were $409 million, 6 percent higher than the 1989 first quarter.

Offsetting these generally favorable operating performances was an increase in minority interest costs as a result of the partial public ownership of Grace Energy and the full absorption in 1990 of onshore drilling losses. On the positive side was a reversal of stock appreciation expenses charged to prior periods as Grace's common stock price declined during the quarter in concert with the general market.

Grace is an international specialty chemicals company with interests in energy, manufacturing and service businesses with sales last year of $6.1 billion.

#90110p5140 04/20/1990 ~PR Newswire

LANSING, MI (APRIL 20) PR NEWSWIRE - More than 500 agriculture representatives met in Lansing today for a series of forums designed to help the agriculture industry meet food safety challenges. Attendees of the 1990 Governor's Conference on Agriculture heard a group of international experts representing consumers, industry, government and the media, deliver a consistent message -- consumers are concerned about food safety.

"Michigan Department of Agriculture research shows that Michigan consumers are confident that food is safe, but there is an underlying fear about food safety," Dr. Charles R. Atkin, professor of communications at Michigan State University (MSU), said. "Eighty-six percent of those polled believe food in Michigan is safe, but under the surface is a growing concern about issues like product tampering, pesticide residue and improper food processing."

Atkin was part of a panel discussion that examined the effects of food safety publicity on consumers. The panel included Dr. Michael Jacobson, executive director of the Washington D.C.-based Center for Science in the Public Interest, and Sharon Begley, science editor for "Newsweek." Both Jacobson and Begley told conference attendees that consumers view the agriculture industry's stand on food safety with skepticism.

"Claims that we have safe food are falling on deafened ears," Jacobson said. "They've been deafened by controversy after controversy. Consumers believe pesticides and other contaminants are a real problem."

Begley noted that reporters are drawn to food safety because of its emotional impact. "The press is attracted to an outrage, and many people feel outraged by food safety concerns."

A second panel of experts focused on ways that crises are managed and how the agriculture industry should behave during food safety crises. The speakers included Josephine Cooper, senior vice president for Hill and Knowlton Public Affairs Worldwide, who addressed how the apple industry handled the Alar crisis; Jack L. Cooper, director of environmental affairs for the National Food Processors Association, who discussed the processing industry's handling of pesticide-use issues; Michelle Courtney Berry, project coordinator for the New York State Study on Health and Risk Communication; Frank M. Corrado, president of the Chicago-based Communications for Management, Inc. All agree that one of the best ways to manage a crisis is to get the word out.

"The apple industry restored public confidence in their product by getting the word out on Alar," Cooper said. "Food safety is a top-of- mind issue. The public has a need to know which food safety concerns are real and which are trivial."

Added Berry, "The agriculture industry continues to say that food is safe, but the message isn't getting through to the public. The industry needs to do a better job of communicating successfully with consumers. One way to do this is by establishing a framework for public dialogue and discussion."

The Wednesday luncheon, hosted by Michigan first lady Janet Blanchard, featured Rita Burak, deputy minister of agriculture and food for the

Province of Ontario, who presented the Canadian viewpoint on food safety; and Dr. James H. Anderson, dean of the College of Agriculture and Natural Resources at MSU, who discussed food safety programs that MSU has developed. Both echoed the fact that there is apprehension among consumers.

"The public is concerned about the food supply and they are asking a lot of questions," Anderson said. "This is an issue that won't go away and must be a priority."

Said Burak, "All of us bought into the promise of better living through chemistry. Consumers want and deserve assurance that their food is of the highest quality and is produced in an environmentally responsible way. Farmers are also concerned about the health of the environment."

#90110p5148 04/20/1990 ~PR Newswire

CLEVELAND (APRIL 20) PR NEWSWIRE - The Standard Products Co. (NYSE: SPD) today reported sales of $156,071,000 and net income of $1,899,000, equal to 19 cents per share, for the third quarter of its 1990 fiscal year.

The sales increase, which was 9 percent above the $143,341,000 reported in the comparable period last year, was the third highest quarterly level in the Company's history. However, net income was down from the third quarter a year ago when the Company had earnings of $9,083,000, or 85 cents per share.

For the nine months, sales were $473,956,000, 22 percent ahead of the prior year and a new high. Net income for the year-to-date totaled $6,909,000, or 68 cents per share, compared with $21,317,000, or $2.00 per share, in the fiscal 1989 period.

Contributing to the quarter's sales gains were increases from the Company's Oliver Rubber, Holm Industries and military track operations. Sales to North American automotive original equipment manufacturers equaled $97,659,000, a decline of 5 percent from last year's $102,264,000. However, the total North American car build decreased 21 percent during this same period, while the "Big Three" automakers recorded a 28 percent decline in production.

Silent Channel, Ltd., the Company's United Kingdom subsidiary, experienced a decline of 28 percent in sales to $7,307,000, reflecting the softening conditions in the European automotive market and a strike at Ford facilities in the United Kingdom which was resolved in March. Sales and

earnings of Standard Products' Canadian plants continued to improve with the growing volume of the Chevrolet Lumina.

Cleveland-based Standard Products manufactures rubber and plastic parts for the automotive original equipment industry, rubberized track for military vehicles, and plastic and magnetic door seals for home appliances. Its Oliver Rubber subsidiary is a major producer of tread rubber for truck tire retreading.

#90110p5150 04/20/1990 ~PR Newswire

NEW YORK (APRIL 20) PR NEWSWIRE - National Westminster Bancorp (NatWest Bancorp), the parent company of National Westminster Bank USA (NatWest USA), National Westminster Bank NJ (NatWest NJ) and First National Bank of Central Jersey (Central Jersey) today reported consolidated net income of $16.1 million for the first quarter of 1990 compared with $33.9 million in the first quarter of 1989.

Core earnings were $14.5 million for the first quarter of 1990, down from $34.3 million in the same period a year ago. Core earnings exclude goodwill amortization of $9.2 million in 1990 and $7.7 million in 1989 and extraordinary items of $10.8 million in 1990 and $7.4 million in 1989. These extraordinary items represent previously unrecorded tax benefits related to special additions made to the reserve against loans to certain countries with severe debt servicing problems (LDCs) in 1987 and 1989. The results of Central Jersey have been incorporated from Aug. 18, 1989, the date it was acquired by NatWest Bancorp.

The first quarter results included a $55.9 million provision for loan losses, up $35.7 million from the year earlier period. The increase primarily reflects a strengthening of the allowance for loan losses at NatWest NJ in light of the prolonged softness in the New Jersey real estate market. NatWest Bancorp's allowance for loan losses at March 31, 1990, is considered by management as adequate to cover any foreseeable problems in the portfolio.

Commenting on the results, William T. Knowles, chairman and chief executive officer, said, "The additional provisions follow the completion of an extensive internal review of the real estate and commercial loan portfolios of all three banks. With these steps and the recently completed sale of essentially all remaining LDC loans, we expect earnings to return to normal levels during the balance of 1990 barring a further decline in the real estate market in the region."

Net interest income was $181.8 million in the first quarter of 1990 compared with $164.8 million in 1989. The increase was due to the inclusion of Central Jersey as well as growth in domestic commercial and consumer loans, growth in core deposits and a decline in foreign non-accrual loans. Domestic loans grew by $2.2 billion from the first quarter of 1989 and core deposits grew by $2.3 billion during the same period, with the passbook money market account, which was introduced in the fourth quarter of 1989, adding approximately $824 million. These gains were partially offset by an increase in domestic non-performing assets and a narrowing of interest rate spreads.

Net interest income on a tax equivalent basis as a percentage of average earning assets (net interest margin) was 3.97 percent compared with 4.17 percent in the comparative 1989 period.

In the first quarter of 1990 non-interest income increased $3.5 million over 1989 to $68.1 million reflecting higher income from deposit services and the sale of a parcel of land in New Jersey at a pre-tax gain of $5.3 million.

These gains were partially offset by a decline in financial services fees of $7.0 million resulting from the sale of NatWest NJ's mutual fund processing business in the third quarter of 1989.

Operating expenses were $180.8 million in 1990, 10 percent above the $163.9 million incurred during the first quarter of 1989. Excluding the impact of Central Jersey, operating expenses increased only 3 percent over the 1989 level reflecting the benefits derived from various cost containment programs. More specifically, expense reductions have been attained through the sale of the financial services business along with further consolidations of operations for the New Jersey banks. In addition, savings have already been realized and are expected to increase in 1990 following an October 1989 reorganization which was designed to strengthen and expand the role of the holding company and to increase effective control and consistency in operations in the subsidiary banks.

Operating expenses (excluding goodwill amortization) expressed as a percentage of tax equivalent net interest income and non-interest income (cost/income ratio) were 66 percent in 1990 compared with 65 percent in 1989 reflecting the lower revenues.

NatWest Bancorp completed sales of $377.9 million of LDC loans resulting in charge-offs of $259.7 million in the first quarter of 1990 and a reduction in total LDC outstandings to $70 million (principally trade related) from $850 million a year ago. The remaining related allowance for loan losses is considered to be adequate to cover any additional charge-offs that may be taken on this portfolio.

The allowance for loan losses was $312.5 million or 2.06 percent of total loans outstanding at March 31, 1990, compared with $557.0 million or 3.69 percent of total loans outstanding at Dec. 31, 1989, and $468.5 million or 3.43 percent of total loans outstanding at March 31, 1989. The decrease in the level of the allowance is solely due to charge-offs taken in conjunction with the sale of the LDC loans.

ATLANTA (APRIL 20) PR NEWSWIRE - Coca-Cola USA, the domestic soft drink division of The Coca-Cola Company, today announced the appointment of Theodore J. Host as senior vice president, Marketing, effective May 1.

Mr. Host is currently President of Boyle-Midway Household Products Inc., a division of American Home Products Corporation.

Ira C. Herbert, executive vice president of The Coca-Cola Company and president of Coca-Cola USA, said that Mr. Host in his new capacity will have responsibilty for Marketing Planning, including brand planning, advertising, media and marketing research; Marketing Services, including promotions, packaging and entertainment marketing; and Prestige Accounts.

Mr. Herbert stated, "I am very pleased that Coca-Cola USA has been able to attract a person of Ted Host's abilities, experience, record of achievement and outstanding personal characteristics to this key position. I'm confident that he will make a significant contribution to our 104 year tradition of marketing excellence."

"I'm excited about this opportunity with the Company that is not only number one in its industry, but which has the leading brand in every segment of the industry," said Mr. Host. "The chance to work with the best known and most respected trademark in the world is an opportunity a marketing person dreams about.

"I know I'm joining an organization that is already staffed with outstanding marketing personnel who have a long term record of success. I'm looking forward to working with them."

SYRACUSE, NY (APRIL 20) PR NEWSWIRE - Carlisle Companies Incorporated

(NYSE: CSL) today reported that earnings for the first quarter ended March 30, 1990 declined 33 percent on a sales increase of 5 percent.

Stephen P. Munn, president and chief executive officer stated: "Despite a record sales quarter, a decline in earnings resulted from continuing margin pressures in Data Communications and a combination of volume decline and unfavorable product mix in automotive/industrial segments. Improvements are expected in the second quarter," he said.

MIAMI (APRIL 20) PR NEWSWIRE - Beber Silverstein McCabe & Partners has been named agency of record for the Subway Sandwiches and Salads account, the world's fastest growing restaurant chain. The Milford, Conn.-based company currently boasts 4,500 locations worldwide, for which all advertising and marketing services will be provided by Beber out of its Miami offices.

The search for an advertising agency included agencies in Los Angeles, San Francisco, Boston and New York. According to Joyce Beber, chairman of the $70 million shop, "Subway's rapid growth rate and aggressive corporate mentality make it a perfect fit with our strengths."

Cindy Eadie, executive director of Subway's franchise board, which selected Beber, said that the move "represents a major leap forward for all of us. Beber's fast-food background and depth are exactly what we need to keep our marketing strategies a step ahead of our growth."

Beber Silverstein McCabe has offices in New York, Washington, and Miami. The company represents such clients as Knight-Ridder, Humana Inc., Lykes Bros., Florida Power & Light Co., Coty, Florida Gold Orange Juice and First Florida Bank. The agency also handles Broadway-related entertainment advertising.

Beber's first assignment for Subway, the fall campaign, begins immediately.

HOUSTON (APRIL 20) PR NEWSWIRE - The Texas State Board of Insurance has said that Torchmark Corporation's (NYSE: TMK) solicitation of proxies for its director nominees at American General Corporation's (NYSE: AGC) May 2

annual meeting of shareholders violates state law, it was announced today by American General.

In a letter to attorneys for Torchmark dated April 19, the staff of the Texas State Board of Insurance said that it "will view an acquisition of proxies representing 10 percent or more of the power to vote at the (American General) annual shareholders meeting to be in violation of the (Texas Holding Company) Act."

Torchmark's solicitation, the letter states, "constituted an attempt to effectuate control (of American General) within the meaning of the Texas Holding Company Act."

The Texas Board is the third state insurance regulatory body, following those in New York and Tennessee, to warn Torchmark this week that its actions violate state laws, American General noted.

American General is an insurance and financial services organization with assets of $32 billion and total equity of $4.4 billion. Headquartered in Houston, the company has subsidiaries that operate in 50 states and Canada. The company groups its operating subsidiaries into three business segments: Insurance - Home Service; Insurance - Special Markets; and Finance/Real Estate. American General common stock is listed on the New York, Pacific, London, and Swiss stock exchanges.

WILMINGTON, DE (APRIL 20) PR NEWSWIRE - Du Pont (NYSE: DD) today announced it will donate 12 park benches made of recycled plastic to the state to be placed in Delaware's parklands on Earth Day.

The benches are made from plastic collected last September during a statewide beach cleanup co-sponsored by the Delaware Department of Natural Resources and Environmental Control (DNREC) and Du Pont.

The benches will be presented to the state at a ceremony at Brandywine Creek State Park at 1 p.m. on Sunday.

During the cleanup, about 2,000 volunteers collected more than five tons of trash along beaches from Battery Park to Fenwick Island State Park. The 400 Du Pont employees and their families who participated in the cleanup separated the plastics from the other waste collected, which Du Pont had recycled into the park benches.

The third annual cleanup was part of DNREC's "Get the Drift and Bag It" campaign to enlist public support to find solutions to the marine litter problem.

"Recycling has gained a great deal of attention and is clearly on the mind of the public, partially as a result of the recent focus on Earth Day," said Edwin H. "Toby" Clark II, DNREC secretary.

"We applaud Du Pont's efforts in recycling and appreciate the support the company and its employees have given to our annual beach cleanup program. These benches are symbolic of the results that can be achieved when the public and private sectors join forces in a common cause. Plastic which was litter on our Atlantic beaches last fall has become benches to be enjoyed by visitors to Delaware's state parks."

"This program gives important new life to valuable material through recycling and helps Du Pont achieve its goal of corporate environmental stewardship," said Archie W. Dunham, group vice president-polymer products.

The 1989 beach cleanup was the first in which plastics were segregated for recycling.

Du Pont also plans to co-sponsor the 1990 beach cleanup with DNREC.

ELK GROVE VILLAGE, IL (APRIL 20) PR NEWSWIRE - AAR today responded to recent inquiries about trading activity in its common stock. The company believes that the activity resulted from management comments made during a presentation at the Robinson Humphrey Co. Inc. 19th annual Southeastern Conference on Wednesday, April 18.

At the conference, Ira A. Eichner, chairman of the board and chief executive officer, and David P. Storch, president and chief operating officer, presented a general overview of the company. During his remarks Eichner expressed a cautionary view of the company's fourth quarter, and while an earnings estimate for the fiscal year that will end May 31, 1990 was not given, a modest gain over fiscal 1989 is anticipated. Eichner went on to say that work to date on the fiscal 1991 plan indicates that it will be a strong year for AAR.

AAR Corp. (NYSE: AIR) is a leading supplier of aerospace/aviation products and services. The company primarily distributes parts and equipment, performs technical services and manufactures proprietary products for the

aviation industry in the United States and abroad.

NORWALK, CT (APRIL 20) PR NEWSWIRE - In celebration of the 20th anniversary of Earth Day, Pepperidge Farm Inc. announced today strategic environmental initiatives in the areas of packaging materials, package design, solid waste, and plant emission controls.

"Pepperidge Farm is a socially responsible company," said President Richard A. Shea. "We are taking an active role in helping ease the solid waste crisis that affects us all."

Food packaging serves to protect the food with regard to freshness and safety. The portion of packaging material that comes in direct contact with food needs to be made from unused or "virgin" materials. However, other packaging materials can be made from recycled materials. Pepperidge Farm is committed to begin using recycled materials wherever possible in the packaging of its products, Shea said.

He said the company is testing boxes made from recycled material for the following product lines: Snack Sticks, Croutons, Cookie Assortments, Distinctive Crackers, Distinctive Stuffing, and Snack Mix. The recycled boxes, labelled with the statement, "This box made from recycled board," should be in the marketplace beginning this summer. The package lids will also carry the industry symbol denoting that the material used was recycled.

Pepperidge Farm packages will also be reduced in size as much as possible to reduce the amount of solid waste. The company has begun to use smaller carton flaps whenever possible. Similarly, shipping cartons are being downsized, and package boxes made thinner, in an effort towards source reduction. The company is also testing non-foil-lined bags for its cookie, cracker and crouton products.

As some solid waste materials are currently incinerated, Pepperidge Farm has acted to accommodate this method. The company has stopped buying packaging printed with inks containing heavy metals, resulting in cleaner

ash after incineration of the packaging.

Pepperidge Farm has also committed to reducing solid waste at its eight manufacturing plants in response to the landfill crisis. Plant projects as well as employee-based quality circles are addressing current options.

In addition, all plants are audited annually for energy and chemicals used in testing, cleaning and manufacturing. New methods to minimize usage are constantly being sought.

A final effort to improve the environment concerns the company's new baker and biscuit plant in East Cocalico Township, Pennsylvania. With the opening of the plant in 1991, Pepperidge Farm will be the first food manufacturer to utilize catalytic incinerators over an entire facility to burn off the ethanol released in the baking of its yeast doughs.

BETHPAGE, NY (APRIL 20) PR NEWSWIRE - Grumman Corporation (NYSE: GQ) announced today that John E. Harrison has been appointed president of its electronics systems division. He replaces Robert A. Nafis, who is retiring.

Harrison will be responsible for the company's operating unit that has become a leader in automated test equipment for military and commercial users, manufactures high tehnology electronic components for Grumman aircraft, and makes aircraft display and trainer systems.

In June 1989, Harrison joined Grumman as president of the space systems division. He had been vice president and general manager of Honeywell, Inc.'s satellite systems division in Phoenix, Ariz., that specializes is developing and producing custom spaceborne components and systems.

Thomas A. Guarino, president of the systems group, will become acting president of the space systems division. The systems group is comprised of the electronics systems, space systems and Melbourne systems divisions.

A Colorado native, Harrison is a graduate of Wichita State University, where he earned a bachelor of science degree in aeronautical engineering and a master of science degree in electrical engineering.

He is a registered professional engineer; a senior member of the American Institute of Aeronautics and Astronautics, and a member of Tau Beta Pi, an honorary engineering society.

Nafis' association with Grumman spans over 40 years. As a high school senior, he was awarded a Grumman scholarship for four years' study at Cornell University in engineering. Following graduation in 1949, he joined the company as an electronics system engineer. After holding senior management positions in corporate development and heading the company's data systems unit, Nafis was appointed president of the electronics systems division when it was formed in 1985. He will continue with Grumman Corporation as a senior management consultant for technology.

Two Grumman subsidiaries also announced personnel appointments. Paumanock Development Corporation, the company's real estate management arm, appointed Joanne Pedranghelu as assistant treasurer. She was an auditor with Grumman Corporation prior to joining Paumanock in 1988.

Grumman Credit Corporation, a commercial leasing unit, named James M. Black as assistant secretary. Black is a corporate attorney in the Grumman Corporation legal department.

STAMFORD, CT (APRIL 20) PR NEWSWIRE - GTE Mobile Communications Group, a unit of GTE Corp. (NYSE: GTE), today announced it will purchase Providence Journal's ownership-interest in cellular properties in North Carolina, South Carolina, Georgia and Virginia, which total approximately 3.5 million "POPs," bringing GTE's total "POPs" served to over 26 million. ("POPs" refers to the population of a market area multiplied by a company's percentage ownership in the cellular system serving that market.)

GTE will pay Providence Journal $710 million in cash, subject to closing adjustments. Excluding property, plant and equipment, the per- POP price is $189. The transaction is subject to regulatory approvals and Hart-Scott-Rodino review, and is expected to close by year end.

"We are very excited about this acquisition, which is consistent with our commitment to expand our core businesses by exploiting profitable growth opportunities," said James L. "Rocky" Johnson, GTE Corp. chairman and chief executive officer. "The addition of such major cities as Raleigh-Durham, Greensboro, Charleston and Augusta add to our already strong portfolio of cellular franchises in some of the fastest growing areas of the country," he said.

GTE Mobile Communications provides mobile-cellular telecommunications services and products in 34 metropolitan areas and four rural areas, in addition to providing cellular service across the country through its national cellular-service program. The total customer base is nearly 320,000.

GTE subsidiaries operate in 46 states and 41 countries, with combined revenues and sales of $17.4 billion and net income of $1.4 billion in 1989. GTE is a leader in its three core businesses -- telecommunications, lighting and precision materials -- providing products and services worldwide.

BASKING RIDGE, NJ (APRIL 20) PR NEWSWIRE - Crum and Forster, Inc., the New Jersey-based insurance holding company, is withdrawing from the standard personal lines market to concentrate on its traditional strengths of commercial insurance, specialty coverages and reinsurance, Robert J. Vairo, president and chief executive officer, announced today.

"We believe this action will sharpen our focus and make our organization stronger," Vairo stated. "Our strategy focuses our resources on those aspects of our business where we can provide superior products and services at adequate pricing levels, which is not possible for our standard personal lines operations in today's difficult marketplace."

In addition, Vairo said Crum and Forster had reached an agreement in principle with the Metropolitan Property and Casualty Insurance Company to assist most CFPI agents with continuing coverage for their homeowners, fire, and related property insurance lines. Metropolitan will offer appointments to most CFPI agents handling this business and then offer renewals through those agents. "We are pleased with this arrangement," Vairo said, adding, "We believe it will allow for an orderly transition of business for both our policyholders and producers."

Crum and Forster, Inc. will begin immediately to close Crum and Forster Personal Insurance, the operating unit that handles this business. The decision to withdraw is not expected to have a significant financial impact on 1990 earnings but should benefit future years.

Crum and Forster Personal Insurance's standard lines market share is less than one percent country-wide and represents about 11 percent of Crum and Forster's business.

Agents are being notified by letter of the decision, which is effective immediately. CFPI policies other than those for which renewal is offered through Metropolitan will then be non-renewed in compliance with the legal and regulatory requirements in each state.

Vairo praised the approximately 950 Crum and Forster Personal Insurance

employees affected by the decision. "They have worked hard to improve underwriting performance and reduce expenses," he stated. Employees will receive severance packages, outplacement counseling and, where possible, will be offered comparable jobs with other Crum and Forster companies.

Crum and Forster has been an industry leader in insurance products and services for 95 years. The company has two large commercial lines operations, Crum & Forster Commercial Insurance and Industrial Indemnity.

Crum and Forster also operates a major reinsurer, Constitution Reinsurance Corporation, and a number of specialty units.

The company will continue to write non-standard automobile insurance through Viking Insurance Company of Wisconsin in Madison and association-sponsored personal lines through National General Insurance Company in St. Louis.

#90110p5196 04/20/1990 ~PR Newswire

CHICAGO (APRIL 20) PR NEWSWIRE - First Chicago Corporation (NYSE: FNB) today released the following:

First Chicago Corporation today reported first-quarter operating earnings of $65.2 million, or 88 cents per share, and 87 cents per share on a fully diluted basis.

In the year-ago quarter, operating income was $120.1 million, or $1.78 per share, and $1.72 per fully diluted share.

"As we stated publicly at the end of March, first-quarter earnings were adversely affected by an increase in the loan loss provision due to troubled real estate loans," Chairman Barry F. Sullivan said. "We expect that the loan loss provision will return to normal levels in future quarters and we are optimistic about our prospects for the remainder of the year.

"We continued to make excellent progress in reducing our troubled- country debt, and our exposure is $690 million, down from the year-end level of $1.3 billion. The effective TCD reserve is 74 percent of total claims -- one of the highest in the industry," Sullivan said.

First-quarter net income, which includes tax benefits from 1987's net operating loss, was $68.6 million. Earnings per share were 93 cents and earnings per fully diluted share were 92 cents. In the year ago quarter, net income was $124.7 million, earnings per share were $1.85, and earnings

per fully diluted share were $1.79.

First-quarter earnings also included a pretax gain of $52 million from the partial settlement of the First National Bank of Chicago's pension obligations.

Operating earnings for the Superregional Bank, which includes the credit card business, the community banking group, and American National Corp., were $48 million, vs. $40 million in the year-ago quarter. Operating earnings for the Global Corporate Bank, which serves large corporate customers, were $17 million during the first quarter, compared with $80 million a year ago.

For the first quarter of 1990, return on assets was .53 percent and return on common equity was 10.9 percent. Excluding tax benefits and adjusting for the corporation's target level of common equity, return on common equity was 9.2 percent.

The Superregional Bank met its 18 percent return on target equity goal. The Global Corporate Bank fell short of its 16 percent return on target equity goal primarily because of the problem real estate credits. Its return on target equity was 4 percent.

Net Interest Income Net interest income on a tax-equivalent basis for the quarter was $327 million, compared with $332.2 million a year ago.

The corporation's net interest margin was 2.89 percent in the quarter, vs. 2.86 percent in the fourth quarter and 3.37 percent in the year-ago quarter. Average earning assets were $45.8 billion for the quarter, up from $39.9 billion in last year's first quarter.

Non-Interest Income Excluding the $52 million pension settlement gain, non-interest income totaled $260.5 million in the first quarter of 1990. In the 1989 first quarter, non-interest income was $249.5 million.

Foreign exchange trading resulted in a profit of $27.9 million, compared with a loss of $23.7 million in the first quarter of 1989. Trading account profits were $13.2 million in the quarter, compared with $16.3 million a year ago.

Gains on the sale of equity securities during the quarter, mainly generated by the venture capital business, were $11.6 million, down from $22.8 million last year. Gains on lease financing residuals were nominal in the first quarter compared with $49.3 million a year ago due primarily to two major aircraft transactions.

Credit card fee revenue was $82.1 million, up from $74.8 million a year ago, reflecting increases in the corporation's credit card outstandings

and transaction volumes.

Fiduciary and investment management fees were $40.8 million, compared with $34.7 million in last year's first quarter. The 1990 first-quarter results include the additional shareholder service operation which was purchased in mid-1989 and excludes the corporation's investment advisory business which was sold last year in the third quarter. Service charges and commissions were $76.7 million, vs. $66.3 million in the 1989 first quarter.

Non-Interest Expense Non-interest expense in the first quarter was $375.9 million, compared with $343.2 million in last year's first quarter. Excluding the impacts of business acquisitions and dispositions, non-interest expense was 4 percent above year-ago levels.

CONTACT: Lisabeth Weiner or Martha Hesse, 312-732-9077, both of First Chicago.

#90110p5202 04/20/1990 ~PR Newswire

LAKELAND, FL (APRIL 20) PR NEWSWIRE - The following letter was released today by Sikes Corporation (AMEX: SK.A):

TO THE SHARHOLDERS OF SIKES CORPORATION:

Net sales and other income for the fiscal year ended Feb. 28, 1990, was $136,886,000, up 4 percent from $132,158,000 in fiscal year 1989. Net income for fiscal year 1990 decreased 22 percent to $7,434,000, or $.82 per share primary and $.75 per share fully diluted, compared to $9,493,000 or $1.06 per share primary and $.93 per share fully diluted, for fiscal year 1989.

Net sales decreased 2 percent and net income declined 79 percent for the fourth quarter of fiscal year 1990, compared to the same quarter last fiscal year. The company's operating results for the fourth quarter of fiscal year 1990 were significantly impacted by the consequences of restructuring its manufacturing operations in connection with the renovation and modernization of its Florida plant and by lower gross profits from floor tile products as a result of both a decline in sales and the increase in manufacturing costs experienced during the third quarter.

During fiscal year 1990, the company completed the most disruptive aspects of its restructuring and modernization project. The effects of the restructuring included start-up costs, unabsorbed fixed costs resulting from substantial curtailment of production at the Florida plant, and inventory write-offs and lost sales from temporary production delays

associated with re-engineering and transferring to the Georgia plant the manufacturing of a floor tile product line. Full production of the transferred product line is not expected to resume until the last half of fiscal year 1991.

Total restructuring costs for the fourth quarter were $1,365,000, and similar restructuring costs are expected to be incurred during the first half of fiscal year 1991. Fourth quarter net income also was reduced by $250,000 of expenses relating to the board of directors consideration of a possible sale or recapitalization of the company.

Net sales for the fourth quarter were adversely affected by the continuing decline in housing starts and stiff price competition from foreign imports. New housing starts fell under 1,300,000 in December 1989, reducing the adjusted annual rate of new housing starts to below 1,400,000 for the first time since the housing recession of 1982. Meanwhile foreign competition intensified during 1989, compared to 1988.

Net sales and other income for the fourth quarter of fiscal year 1990 was $30,963,000, compared with $31,536,000 for the last quarter of fiscal year 1989. Net income for the fourth quarter of fiscal year 1990 was $488,000 or $.04 per share primary and fully diluted, compared to $2,346,000, or $.26 per share primary and $.23 per share fully diluted, for the fourth quarter last fiscal year.

On April 7, 1990, the company's board of directors declared a regular quarterly cash dividend of $.06 per share, payable on May 1, 1990, to stockholders of record as of the close of business on April 20, 1990.

Sincerely,
SIKES CORPORATION
Kelly E. Norton,

TOKYO, JAPAN (APRIL 20) PR NEWSWIRE - Hitachi Koki Co., Ltd. and Nissei Sangyo Co., Ltd. announced that HND Corporation, a company to be owned 81 percent by Hitachi Koki and 19 percent by Nissei Sangyo, today commenced its cash tender offer for all the outstanding shares of common stock of Dataproducts Corporation (AMEX: PDC), pursuant to the previously announced merger agreement with Dataproducts. Under the tender offer, stockholders

who tender their shares will be entitled to receive $10 in cash per share.
The offer and withdrawal rights will expire at midnight, New York City time, on Thursday, May 17, 1990, unless extended. Following completion of the tender offer, HND Corporation will be merged into Dataproducts and any remaining stockholders will receive $10 per share in cash.

The offer is conditioned upon, among other things, a majority of the outstanding shares on a fully diluted basis being validly tendered and not withdrawn prior to the expiration of the offer.

Georgeson & Company Inc. is the information agent for the offer.

Dataproducts designs, develops, manufactures and markets a broad range of data handling output equipment consisting of printers and associated products, digital communications equipment, and airborne sensors and controllers.

Hitachi Koki, a publicly traded Japanese corporation, is a leading manufacturer of advanced products, including power tools, printers and scientific instruments. Nissei Sangyo is a trading company, trading primarily electronic equipment and materials, and is the Hitachi Group's prime marketing arm.

TORONTO (APRIL 20) PR NEWSWIRE - Canada Packers Inc. (TSE, ME: CK - $13-1/4) and Hillsdown Holdings plc (Hillsdown) announced today an agreement to combine Canada Packers and Maple Leaf Mills Limited (MLM), Hillsdown's wholly owned subsidiary.

The combined company will have revenues of approximately Cdn.$4 billion and will be the largest publicly listed food processor in Canada. It will be a major force in processed foods, edible oils, flour and baked goods, fresh meat, poultry, dairy products, livestock and poultry feed and rendering in Canada.

As part of the agreement, Hillsdown will contribute its entire interests in MLM to Canada Packers and receive approximately 29.5 million shares of newly issued Canada Packers treasury stock, equivalent to a 45 percent interest in the enlarged company.

Additionally, Hillsdown will offer to purchase for cash approximately 7.2 million Canada Packers shares, representing 20 percent of the existing

number of Canada Packers shares, of Canada Packers shares at a price of Cdn.$16.50 per share. As a result of the transaction, Hillsdown will have 56 percent of the enlarged company.

The transaction is subject to the approval of Canada Packers' shareholders and the approval of Hillsdown shareholders. The 20 percent cash offer will be conditional upon these shareholders' approvals.

Members of the McLean Family and associates, with aggregate holdings in Canada Packers amounting to approximately 10.2 million shares, have agreed to vote their shares in favor of the transaction and to tender their shares under the cash offer.

The board of directors of Canada Packers has approved the transaction in principle and will recommend that shareholders vote in favor of the transaction. The board has authorized management to conclude a definitive agreement with Hillsdown in accordance with the terms already agreed. RBC Dominion Securities Inc., who has been advising Canada Packers, believes that the transaction is fair from a financial point of view to the shareholders of Canada Packers.

The transaction is also subject to review and approval by Canadian regulatory authorities including Investment Canada.

Adam Zimmerman, chairman of the Independent Committee of the board of directors of Canada Packers, said, "The long process of selecting the best future arrangement for Canada Packers has been concluded to our entire satisfaction., The extraordinary compatibility of these two companies combined with the continuance of a significant public shareholding creates attractive opportunities for all stakeholders -- employees, customers, suppliers and investors. With the commitment of the major shareholders to subscribe to this deal, it is expected to be consummated quickly so that management can get on with operating the business."

Harry Solomon, chairman of Hillsdown, said, "The combination of these two businesses creates a powerful new force in the North American food industry. The size, scope and resources of the combined company enables it to take full advantage of the opportunities of the Canada/United States Free Trade Agreement."

Roger Porretti, president and chief executive officer of Canada Packers, said, "The association with Hillsdown is very attractive because it will undoubtedly facilitate the forging of global relationships which are essential for prosperity in the 1990s."

Porretti and Solomon highlighted the extraordinarily good fit between the two Canadian businesses. For example, both have a significant involvement in processed foods, grocery products, poultry and rendering from which

considerable synergies and savings will arise. In addition, both companies will benefit from more efficient use of their respective distribution chains and networks which extend across Canada. Canada Packers will also benefit from the ability to draw on Hillsdown's considerable experience in the U.K. and Europe in many of the businesses in which Canada Packers is involved including: fresh beef and pork, grocery products, poultry operations and processed meats. Hillsdown will also bring a unique and highly successful operating philosophy to Canada Packers that should lead to enhanced profitability.

Said Solomon, "Joining forces with Canada Packers presents a unique opportunity both for us and the Canadian investment community. The enlarged company offers investors an opportunity to benefit for the combination for the combination of these two powerful food companies,. The future prospects are very exciting."

CONTACT: John Jackson, vice chairman of Hillsdown Holdings plc, 416-484-7400; Roger Porretti, president and CEO of Canada Packers Inc., 416-766-4311; Jeff Zilka or Karyn Plickert both of Dewe Rogerson Inc., 212-688-6840, both for Hillsdown Holdings plc.

RICHMOND, VA (APRIL 20) PR NEWSWIRE - Dominion Resources, Inc. (DRI) (NYSE: D) today announced earnings from continuing operations for the three months ended March 31, 1990, of $1.01 per share of common stock, up 6 cents from 95 cents per share for the same period in 1989.

In addition, DRI also had a one-time gain of 25 cents per share from the sale in February of Virginia Natural Gas to Consolidated Natural Gas of Pittsburgh. With this one-time gain, DRI's consolidated first-quarter earnings were $1.26 per share.

Contributions to first-quarter earnings per share by DRI's principal subsidiary, Virginia Power, were 98 cents, an increase of 8 cents over 1989. DRI's three non-regulated subsidiaries provided 3 cents per share in the first quarter -- an increase of 2 cents over the same period last year. These increases were partially offset by the absence of 4 cents per share earned by Virginia Natural Gas operations in 1989. The holding company also has three non-regulated subsidiaries. Dominion Capital is involved in capital investment and management services. Dominion Energy is engaged in non-utility power produciton and oil and gas development. Dominion Lands pursues real estate acquisition and development activities in Virginia and North Carolina.

WASHINGTON (APRIL 20) PR NEWSWIRE - Thousands of books and periodicals will soon make their way to Indonesia, courtesy of a cooperative effort involving eight American universities, a private foundation, and the Indonesian Government.

The library project is a joint effort by the Government of Indonesia, the Texaco Philanthropic Foundation and the Midwest Universities Consortium for International Activities (MUCIA). MUCIA, which has eight member schools, will donate books and periodicals to nine Indonesian universities. The Texaco Philanthropic Foundation will provide a grant to MUCIA to underwrite the cost of selecting, packing and shipping the materials to Los Angeles. Garuda Indonesia, the Indonesian flag carrier, will provide complimentary transportation for the books from Los Angeles to Indonesia.

Indonesian Ambassador to the U.S. Abdul Rackman Ramly, speaking at a ceremony to announce the project, welcomed the Foundation's involvement in the joint effort to broaden the base of information that will now be available to the universities. "The books will enable our universities to improve the quality of education for Indonesian students," said Ambassador Ramly.

"Texaco has done business in Indonesia for more than 50 years, through our affiliate, Caltex. And we've worked closely with our colleagues at Indonesia's oil company, Pertamina. During that time, we have come to rely increasingly on the excellent managers, technicians and other employees who have been trained and educated at Indonesia's universities," said Earl L. Johnson, president of the Texaco Middle East/Far East

division. "Now, Texaco has the opportunity to repay those universities for some of that support."

Maria Mike-Mayer, secretary of the Texaco Philanthropic Foundation, said that the Foundation was pleased to participate in the program because of its long history of contributing to educational institutions. "We feel especially good about this grant to the Midwest Universities Consortium because it reinforces our commitment to education."

The Midwest Universities Consortium for International Activities includes: University of Wisconsin; Purdue University; University of Minnesota; University of Illinois; Indiana University; University of Iowa; Michigan State University and Ohio State University.

The participating Indonesian universities include: University of Syiah Kuala, Banda Aceh University of Riau, Riau University of Lancang Kuning, Riau University of Mataram, Mataram University of Nusa Cendana, Kupang University of Pattimura, Ambon University of Cenderawasih, Abepura, Jayapura University of Tadulako, Palu University of Palangkaraya, Palangkaraya

NANUET, NY (APRIL 20) PR NEWSWIRE - Executive TeleCard, Ltd. (NASDAQ: EXTL; PHLX: XTL), and U S West Service Link, a subsidiary of U S West (NYSE: USW), announced they entered into a contract today.

The contract provides for U S West to provide billing services in a number of foreign currencies to the credit card customers of EXTL by electronic transfer and magnetic computer tapes. The customers of EXTL include JCB International Co. Ltd., the largest Japanese credit card issuer; Cartasi, the largest Italian credit card issuer; en Route, the largest Canadian corporate card issuer; Air Travel Card; First Card AB Sweden; and Fintelcard, Finland.

EXTL, in addition to issuing its own Executive TeleCard International and World Direct telephone calling cards, offers a service to bank and other travel and calling card issuers which enables their existing credit card holders to charge telephone calls, as well as merchandise, airline tickets and restaurant charges. U S West Service Link will provide billing services for the telecommunication charges incurred by EXTL's card holders.

According to Gerald Gaines, president of U S West Service Link, "the agreement with Executive TeleCard is the first entree by U S West into the complex world of billing in foreign currencies and will provide a base for its expansion into foreign markets. For instance, Executive TeleCard is offering telephone service in and out of 15 countries this month. This is a good example of the kind of advanced computer billing services that can be provided by U S West Service Link to worldwide telephone carriers," Gaines said.

U S West, headquartered in Denver, is one of the Regional Bell operating companies and the holding company for Mountain Bell, Northwestern Bell and Pacific Northwest Bell.

Robert A. Roach, president of Executive TeleCard, Ltd., said, "The sophisticated services provided by U S West Service Link will enable Executive TeleCard, Ltd. to continue its rapid expansion of its credit card service base from the existing 20 million card holders to an expected 50 million customers."

U S West is a $25 billion diversified communications company that last year posted revenues of $9.7 billion. Its major subsidiary, U S West Communications, serves the communications needs of 10 million customers in 14 western states. U S West also owns other companies involved in regional, national and international markets. Its businesses include cellular mobile communications and paging, business communications systems sales and service, communications software, and financial services. The company is headquartered in Englewood, Colo., a suburb of Denver.

DALLAS (APRIL 20) PR NEWSWIRE - Recognition Equipment Incorporated (NYSE: REC) announced today that it had filed a lawsuit in the state district court in Dallas against two former insurance carriers to recover claims of more than $9 million under policies for directors' and officers' liability insurance.

The company said that the claims submitted are for reimbursement of various costs and expenses, including costs incurred in the defense of its directors and officers in the criminal proceedings and civil lawsuits relating to irregularities in procurement of mail sorting equipment by the United States Postal Service. The criminal proceeding ended in November 1989 with a directed verdict of acquittal in favor of the company and two of its former executives. Additional claims are expected to be submitted under the policies for ongoing expenses of defending those civil suits, as well as several other civil suits.

Recognition said it intends to vigorously pursue its claims, however there could be no assurance that the suit would result in any recovery by the company.

Recognition sells and services data capture, document scanning and image processing systems to customers around the world. Those systems include terminal-based keyboard products and fully integrated systems which utilize networks, high-speed paper handling, optical character reading and image manipulation hardware and software.

JACKSONVILLE, FL (APRIL 20) PR NEWSWIRE - B.J. Walker, chairman and chief executive officer of First Union National Bank of Florida and vice chairman of First Union Corporation (NYSE: FTU), announced today that the bank has named John A. (Jack) Mitchell and G. Kennedy (Ken) Thompson vice chairmen, and Larry J. Wertz executive vice president.

"We have nearly doubled our size over the past year as we continue to build one of the biggest and best banking organizations in Florida," said Walker. "These management promotions are a continuation of our strategy to put in place a broader management structure to ensure our continued success."

Mitchell joined First Union National Bank of Florida in 1989 as executive vice president and chief credit officer. Prior to coming to Florida, he

had served as senior vice president of human resources for First Union Corporation in Charlotte, NC, and had been chief credit officer of First Union National Bank of South Carolina.

Thompson joined First Union National Bank of Florida in 1987 as executive vice president of general banking. Prior to coming to Florida, he had served as senior vice president of human resources of First Union Corporation.

Wertz joined First Union National Bank of Florida in 1986 as senior vice president and chief financial officer. Prior to coming to Florida, he had served as a vice president in First Union's insurance group in Charlotte, NC.

First Union National Bank of Florida, headquartered in Jacksonville, has assets of $16.6 billion and 381 banking offices in 33 counties. It is a subsidiary of Charlotte, NC-based First Union Corporation which reported assets of $39.1 billion at March 31, and operates banking and financial services offices in 36 states and two foreign countries.

#90110p5236 04/20/1990 ~PR Newswire

CHICAGO (APRIL 20) PR NEWSWIRE - FMC Corp. (NYSE: FMC) today announced earnings of $38 million, compared with earnings of $34 million before extraordinary items in 1989. This represents $1.05 per share in 1990 compared with $0.95 per share in first quarter 1989. Including extraordinary charges related to debt restructuring in 1989, first-quarter 1990 net income rose 25 percent from $0.84 per share in last year's quarter. Sales of $814 million declined 3 percent in the quarter on lower defense equipment deliveries.

Operating earnings of $79 million before unusual items increased 4 percent from 1989. A strong performance by the machinery and performance chemical businesses was offset by weaker gold prices and fewer defense vehicle deliveries. Interest expense declined for the quarter. The average rate paid on debt improved in 1990 because of the restructuring and reduction of debt balances. Lower interest income in highly inflationary countries offset the decline in interest expense.

Outlook "Early results for 1990 are better than expected and make us optimistic concerning the year as a whole," said Robert H. Malott, chairman and chief executive officer. "Better performance in our machinery sector improves the near-term outlook for these businesses. At the same time, we face the challenge of an increasingly uncertain outlook

for our defense business, and a strong dollar could create a more difficult international trade environment."

FLEMINGTON, NJ (APRIL 20) PR NEWSWIRE - The board of directors of Borden, Inc. (NYSE: BN) today declared a 10.4 percent increase in the quarterly dividend on the common stock to a new rate of 26.5 cents per share, up from 24 cents per share. The declaration was made here today at a Board meeting held prior to the company's annual meeting of shareholders.

The June 1 dividend payment, to shareholders of record May 11, will be the first at the new quarterly rate.

"This is an indicated annual rate of $1.06 per share, versus the previous 96 cents per share," said Chairman and Chief Executive Officer R.J. Ventres. "The June 1 dividend payment will be number 321 in an unbroken string dating back to 1899. Our total indicated payment to shareholders during 1990 will be the 17th straight yearly increase and will be more than double the payment just five years earlier."

Borden, Inc. is a worldwide producer of foods, non-food consumer products, and packaging and industrial products with worldwide sales of $7.6 billion in 1989.

PITTSBURGH (APRIL 20) PR NEWSWIRE - Armco Inc. (NYSE: AS), Parsippany, N.J., and Acerinox, SA of Madrid, Spain today announced that final agreements had been reached to form two new jointly-owned companies to produce and market stainless steel products. Their goal is to become the world's premier producer of flat rolled grades of stainless steels.

One joint venture company will be in the United States and the other in Europe. Armco and Acerinox had announced an agreement in principle to form the joint ventures in November, 1989.

The U.S. venture, to be called "North American Stainless (An Armco-Acerinox Partnership)," will construct a $222 million state-of-the-art stainless steel finishing plant, at a site in the U.S. to be determined, to produce 48-inch (1220 millimeters) and 60-inch wide (1524 millimeters), high volume grades of chrome nickel stainless sheet and strip. The plant will supply anticipated strong market demand from steel service centers and end users who serve the chemical, pulp and paper, construction and food and beverage industries. The plant will have an initial production capacity of more than 170,000 tons (154,000 metric) of cold rolled material.

The new plant will use competitively priced, world class quality "raw materials" -- stainless steel slabs and semi-finished coils -- with preference given to the partners of the joint venture as suppliers. Armco Advanced Materials Corporation (Armco/AMC), a Butler, Pennsylvania based subsidiary of Armco Inc. which manufactures and markets stainless and electrical flat rolled steels, will market the products of the U.S. joint venture.

A European venture, named "Acerinox-Armco Europa, SA," will process and market chrome stainless grades for use in the fast growing market for European automotive exhaust systems. Steel for this venture will be produced at Acerinox's modern Algeciras, Spain plant and processed in their service centers at various European locations. The products will be marketed by the joint venture company. Facilities dedicated to the joint venture may be added in the future as needed.

The existing operations of Armco and Acerinox will not be part of the joint ventures. Armco/AMC will continue its strong emphasis on chrome, specialty chrome nickel, and semi-finished stainless steels as well as electrical steel products now made at its Butler, Pa. and Zanesville, Ohio plants.

Armco Inc. is a producer of stainless, electrical, and carbon steels and steel products.

HARRISBURG, PA (APRIL 20) PR NEWSWIRE - Provident National Bank of Philadelphia has begun offering free automatic conversions of existing non-interest bearing checking accounts to special accounts that generate interest to pay for legal services for the poor, the Lawyer Trust Account Board announced today.

The board said the roadblock was cleared after discussions board members and the Philadelphia Bar Association held with the bank. Provident is believed to be the largest repository for Interest on Lawyer Trust Account (IOLTA) funds in Philadelphia.

Members of the legal profession in Philadelphia have complained that Philadelphia banks have made establishment of IOLTA accounts difficult and expensive, in contrast to others throughout the state. Most banks elsewhere offer free automatic conversions of existing accounts.

Lawyer Trust Account Board members said they feel the move by Provident will increase Philadelphia lawyer participation in the statewide IOLTA program.

Earlier this year, the Harrisburg-based board noted that Pittsburgh area law firms had raised more than twice the amount of funds for the program than law firms in Philadelphia. Statewide, the board said, more than $2 million has been generated from IOLTA accounts.

The program was established by state law in 1988. Under the program, law firms can designate interest earned on small amounts of clients' money held in trust for a short period of time. The funds help pay for counsel for low-income clients in civil cases.

#90110p5249 04/20/1990 ~PR Newswire

CALGARY, ALBERTA (APRIL 20) PR NEWSWIRE - Gulf Canada Resources Limited (AMEX: GOU) announced today that it has agreed to purchase from Imperial Oil Limited, pursuant to a private transaction, 9,034,200 common shares of Interhome Energy Inc. (NASDAQ: IHEIF), representing a 22.8 percent interest in Interhome, at a price of $54.50 per share for an aggregate purchase price of $492,363,900. Closing of the transaction is conditional upon receipt of necessary regulatory approvals.

Olympia & York Developments Limited has informed Gulf and Interhome that their respective assets and corporate structure have been under review and that Olympia & York and GW Utilities Limited (AMEX: GWT) intend to propose a transaction to the boards of directors of Interhome and Gulf whereby Gulf would be combined with Interhome's wholly-owned oil and gas subsidiary, Home Oil Company Limited. Olympia & York and GW believe this combination would be beneficial to all shareholders of Interhome and Gulf. Home's strong western Canada conventional production and reserves will complement Gulf's frontier and international opportunities. The combined company will be well positioned in terms of oil and gas reserves, production and land holdings, ranking third in oil production and fifth in gas production among all Canadian oil and gas companies. The combination will also provide significant operating and financial synergies. As a result, the combined company is positioned to be Canada's premier upstream oil and gas company.

GCR has been informed that Olympia & York and GW also intend to propose a further transaction to the board of Interhome whereby Interhome shareholders would be provided with direct ownership of Interhome's interest in the combined oil and gas business and direct ownership in Interhome's pipeline business. As a result of this transaction the value of all shareholders' investment in Interhome will be enhanced through direct ownership interests in two publicly-traded companies which will allow for the market to properly recognize the inherent value of these enterprises separately.

Gulf said it will initially fund the purchase of the 22.8 percent interest in Interhome by drawing upon its existing committed long-term bank facilities. Gulf intends to proceed immediately with asset dispositions totaling $200 to $300 million, the proceeds of which will be used to reduce Gulf's acquisition debt from the transaction. These assets will consist primarily of attractive non-producing properties, such as its interest in the Caroline gas field. Gulf and GW also intend to negotiate an agreement, subject to regulatory approval, which would enable Gulf to sell to GW its 22.8 percent interest in Interhome's pipeline business after the distribution by Interhome of its interest in the combined oil and gas company to its shareholders. It is expected that proceeds of approximately $250 million would be realized from this sale which would also be applied to reduce debt.

Gulf and GW have agreed to enter into a new shareholders' agreement which will include rights of first refusal and other customary rights which would apply on any sale of their interests in Interhome. The board of directors of Interhome will be comprised of five nominees of GW, three nominees of Gulf, and seven nominees who are independent of GW and Gulf.

#90110p5252 04/20/1990 ~PR Newswire

BOSTON (APRIL 20) PR NEWSWIRE - Houghton Mifflin Company (NYSE: HTN) today reported net sales of $43.8 million for the first quarter ended March 31, 1990, which exceeded last year's $43.6 million.

Since the ordering of pattern for schools and colleges is seasonal, the company normally incurs a net loss for the first quarter.

The net loss for 1990 totaled $12.1 million, or 85 cents per share, compared with $11.3 million, or 79 cents per share, a year ago. This year's first quarter included a nonrecurring net gain of $4.0 million, or 17 cents per share after taxes.

Harold T. Miller, chairman and chief executive officer, said, "The first-quarter results include the sale of the company's secondary school business education publications list.

"The sale generated an $8.0 million gain ($5.0 million after tax or 35 cents per share) which was offset partially by a $4.0 million provision ($2.5 million after tax or 17 cents per share) to adjust the carrying value of certain educational publishing assets, consisting principally of book plates and inventory."

Miller said, "Educational publishing segment sales increased 4 percent in the first quarter led by the strong sales increases achieved by The Riverside Publishing Company and the School Division. General publishing segment sales declined 4 percent from last year's exceptional first-quarter sales level.

"The higher first-quarter seasonal loss reflected increased publication development expenses and higher selling costs in anticipation of second- and third-quarter sales of school and college textbooks, which are performing well in early reports of textbook decisions.

"The first-quarter results were in line with our plans which call for higher revenue and income for the full year, with the third quarter historically providing the majority of revenue and income."

LOS ANGELES (APRIL 20) PR NEWSWIRE - Mattel Inc. (NYSE: MAT) has named Peter K. Eichorn executive vice president, Europe, the Middle East and Africa. He reports to Lindsey Williams, president of Mattel International.

Eichorn, 50, most recently served as senior assistant postmaster general in the marketing and communications group of the U.S. Postal Service. Prior to that, he spent 23 years with Polaroid Corporation in a variety of domestic and international management positions, including vice president, North American marketing operations; vice president, international operations; and divisional vice president, international.

Born in Cleveland, Ohio, Eichorn received a bachelor's degree in economics from the University of Pennsylvania Wharton School in 1961 and served as an officer in the U.S. Army from 1961 to 1964. He is married and has two children.

Mattel Inc., which reported annual revenues of $1.2 billion in 1989, is a worldwide leader in the design, manufacture and marketing of children's toys. With headquarters in Hawthorne, Calif., Mattel has offices and facilities in 19 foreign countries and markets its products in more than 100 nations throughout the world.

#90110p5259 04/20/1990 ~PR Newswire

PEORIA, IL (APRIL 20) PR NEWSWIRE - Caterpillar Inc. today reported first-quarter profit of $99 million, a decline of $42 million from the $141 million profit reported for the first quarter of 1989. Profit per share was $.97, versus $1.39 per share one year ago.

Sales and revenues totaled $2.94 billion, an increase of $257 million, or 10 percent over one year ago. The increase was due to price improvement, slightly higher volume, and a $17 million increase in revenues from the company's financial subsidiaries.

The price improvement resulted from both higher prices and the effects of stronger European currencies compared with the dollar. This caused both sales and costs in Europe to translate into more dollars. The favorable effect on sales and the unfavorable effect on costs were about offsetting.

The decline in profit resulted from higher costs: -- Wage and benefit increases on all payrolls, including health care costs which are increasing at a significantly higher rate than general inflation; -- Higher start-up costs to support new product development, factory

modernization, employee training, and other company programs; -- Higher material costs; and -- Higher depreciation because of increased capital expenditures in

recent years. As mentioned above, the effects of the weaker dollar, versus European currencies, also had an unfavorable effect on costs in Europe.

Tax expense for the quarter was $47 million based on an estimated effective tax rate of 34 percent for the year. This is the same rate used in the first quarter last year.

The company's share of profit of affiliated companies declined $7 million from the first quarter last year. The decline was primarily at Shin Caterpillar Mitsubishi Ltd., the company's 50 percent-owned affiliate in Japan, as last year's first quarter benefited from tax loss carryforwards.

Sales Inside the United States Sales inside the United States were $1.35 billion, a $72 million or 6 percent increase over the same quarter last year.

Dealer machine sales increased slightly. Machine demand was strong in petroleum and coal mining applications, but declined in the construction and forest products industries, as well as metals and nonmetals mining. U.S. sales of engines were well below year-earlier levels due to continued weakness in demand from truck manufacturers.

U.S. dealer inventories were about normal relative to selling rates. Sales Outside the United States Sales outside the United States increased $168 million, or 12 percent, to $1.52 billion.

Dealer machine sales were somewhat higher than last year due to large gains in the developing countries, especially in the Pacific Rim region. Demand also rose in a number of Latin American countries. In Brazil, demand increased over one year ago despite the uncertainty of the Brazilian economy.

Compared with one year ago, dealer sales in industrial countries rose slightly.

Dealer inventories outside the United States were below normal relative to selling rates.

Outlook The company hasn't changed its outlook from what was stated in its 1989 annual report.

#90110p5269 04/20/1990 ~PR Newswire
CHICAGO (APRIL 20) PR NEWSWIRE - FMC Gold Company (NYSE: FGL) today reported first quarter earnings per share of $0.20, compared with $0.21 per share in the first quarter of 1989. Net income of $13.3 million was 1 percent below 1989 results. Lower gold production was partially offset by increased silver production; however, higher production costs caused by lower gold grades reduced net income from the last year's quarter. Sales of $37 million for the quarter were even with last year's quarter.

The average realized price of gold increased slightly to $404 per ounce from $395 per ounce in the 1989 quarter. The average realized price of silver declined to $5.19 per ounce from $5.94 per ounce in the year-ago period.

In the first quarter, FMC Gold produced 72,000 ounces of gold compared with 84,000 ounces in the same period last year. Lower gold grades caused the decline. At the Jerritt Canyon, Nev., mine, start-up problems continued with the new ore-roasting circuit. During a 13-day shutdown of the ore-roasting circuit in March, these problems were identified, and corrective actions are being taken. Silver production during the first quarter increased to 1.7 million ounces from 1.2 million ounces in 1988, as the richer silver portion of the Paradise Peak, Nev., orebody was mined.

STERLING HEIGHTS, MI (APRIL 20) PR NEWSWIRE - The U.S. Army Tank-Automotive Command today enrolled General Dynamics Land Systems Division's Scranton Plant in Eynon, Pa., into the government's Contractor Performance Certification Program (CP)2. Land Systems builds the Army's M1A1 Abrams main battle tank.

"The Contractor Performance Certification Program (CP)2 is an Army Materiel Command initiative to recognize contractors who consistently deliver quality products, control processes, employ aggressive audit procedures and demonstrate continuous improvement efforts," said Maj. Gen. Leo J. Pigaty, commanding general, U.S. Army Tank-Automotive Command.

Maj. Gen. Pigaty and Robert W. Truxell, vice president of General Dynamics Corporation and general manager of Land Systems Division, signed the letter of intent in ceremonies at the Scranton Plant to mark the beginning of a two-phase program over a 12-month period in which the company must meet rigid quality and production standards. (CP)2 certification makes possible reduced government in-plant quality assurance involvement in the

contractor's day-to-day activities, thus lowering costs to taxpayers while maintaining high quality.

The Abrams tank is the first combat vehicle to be included in the Army's (CP)2 program. It is also the largest and most complex major acquisition "end user" item to be included in the program. An end user item is a piece of equipment that goes directly to the field to be used by soldiers rather than being used as a component of another system.

The (CP)2 program emphasizes the defense contractor's responsibility to assure product quality prior to delivery to the government. "Our signing of this letter of intent is another indication of our commitment to deliver the highest quality product at the least possible cost to our customer," said Truxell. "Our highly skilled work force builds the best tank in the world and we eagerly accept the challenge to achieve (CP)2 certification."

Land Systems' Sterling Manufacturing facility in Sterling Heights, where the division has its electro-optical operations, began the same 12-month effort to achieve (CP)2 certification this February and its Detroit Arsenal Tank Plant achieved (CP)2 certification this January.

Land Systems is in the third year of a four-year multi-year contract to build 3,000 Abrams tanks valued at $3.5 billion. The Abrams tank, which Land Systems has been building since 1979, has had operational readiness rates above 95 percent, considerably higher than any previous tank system.

WASHINGTON (APRIL 18) PR NEWSWIRE - General Motors Chairman Roger B. Smith said today that GM is taking a major step to assist the country in meeting its transportation needs and environmental goals by proceeding with plans to produce and sell an electric-powered car for personal transportation use.

Speaking at the National Press Club, Smith said the corporation's goal is to be the first automobile company to mass produce an electric vehicle that performs as well as current internal combustion engine vehicles.

"We have set an aggressive schedule for ourselves in order to pull along the technological developments that we still need," he said.

Smith said GM has completed its business plans for an electric vehicle and is working to complete production plans and marketing and service

arrangements.

"When we look at the strict clean-air legislation now being proposed for many areas of the country, we are convinced that the Impact has a bright future," he said.

GM's prototype Impact, introduced publicly at the beginning of the year, has range capabilities suitable for most drivers' daily needs. It accelerates from 0 to 60 in eight seconds, has a speed range comparable to that of motor cars on the road today, and has a range of 125 miles.

GM is applying for nearly a dozen patents on various innovations on the Impact, which features new developments in electronics, motor design, structural materials, tires and batteries, coupled with careful attention to weight and rolling design efficiencies.

"In the months ahead we will be working with the appropriate government agencies to address technology issues, safety and damageability rules and consideration for CAFE credits for electric vehicles," he said. "We may need to review and adjust the regulatory structure to recognize the new technology involved in an electric car."

As an example, he pointed out that current government safety standards are based on vehicles designed to carry the weight of internal combustion engines and transmissions. "But with Impact, we can improve the design of bumpers, headlamps, occupant protection, windshields, and other systems so that we meet all the safety standards, yet still reduce the mass and weight that are so critical to an electric car's performance," Smith said.

GM's intent is to produce an electric car that's as safe as any vehicle on the road today and that has a range and cost that consumers will find appealing, he said.

He said GM will also be talking to chemical and electric-power industry representatives about joint efforts to develop batteries that are far ahead of what are offered today.

ATLANTA (APRIL 20) PR NEWSWIRE - Wyman Pilcher announced today he will step down as president and chief executive officer of Barnett Bank of Atlanta.

He has headed Barnett's (NYSE: BBI) Atlanta affiliate since it was

acquired in 1986, guiding it to its present position as a $776-million-asset organization.

Barnett will immediately begin a search for his successor, according to Richard D. Jordan, Barnett's northern regional executive.

"I am pleased that during my tenure, I have helped introduce Barnett to the Atlanta market," Pilcher said. "Now there is a need for different leadership and this is an appropriate time for me to pursue other avenues."

"We have enjoyed our association with Wyman and appreciate his contributions. We wish him well in his new endeavors," said Jordan.

Barnett is a two-state banking company with consolidated assets of more than $29 billion. Its stock is listed on the New York Stock Exchange.

RICHMOND, VA (APRIL 20) PR NEWSWIRE - Thomas E. Capps will become chief executive officer of Dominion Resources, Inc. (NYSE: D) on May 1, succeeding William W. Berry.

Capps, 54, was elected by the Dominion Resources Board of Directors at its meeting today following the annual shareholders' meeting in Richmond. He has been president of Dominion Resources since November 1986, and chief operating officer of Dominion Resources and vice chairman of the Board of Virginia Power since March, 1989.

Berry, 57, continues as chairman, a position he has held since May, 1985. He had succeeded T. Justin Moore, Jr. as chief executive officer in January, 1983.

In remarks to the shareholders' meeting, Berry said the election of Capps follows the earlier pattern of transition in the leadership of Dominion Resources. He cited Capps' achievements in the management of key activities of Virginia Power and in the successful development of Dominion Resources' non-utility businesses.

He reminded shareholders that contributions to earnings from Dominion Resources' new businesses "have increased at a rate of more than 40 percent per year and last year non-regulated earnings reached 30 cents a share. At the same time, the annual return on shareholders' investment in these businesses has consistentnly been more than 20 percent. Tom Capps' leadership and creativity were crucial in creating this record of

accomplishment."

"In the decade of the 1990s, your company faces the challenge of achieving strong utility earnings while making the investments needed to respond to the high demand growth in Virginia Power's service territory. We face the challenge of continuing and enlarging the success of our non-utility businesses."

"Tom Capps has the sterling qualities needed to lead your compnay in meeting these challenges," Berry said.

Capps joined Virginia Power as executive vice president in 1984, having previously been senior counsel for Carolina Power & Light Company, vice president and general counsel of Boston Edison, and a partner in the Miami law firm of Steel Hector and Davis, as well as general counsel of Florida Power and Light Company.

Dominion Resources is a holding company with assets of more that $11 billion, whose subsidiaries are Virginia Power, the nation's 11th largest electric utility; Dominion Energy, one of the largest non-utility power companies; Dominion Lands, a land investment and development company, and Dominion Capital, engaging in capital investment and management.

LOWELL, MA (APRIL 20) PR NEWSWIRE - Today, at the Society of Photo-Optical Instrumentation Engineers' Symposium on Aerospace Sensing and the Earth Observing System being held at Orange County Convention Center (Orlando, Fla.), Paragon Imaging announced a 50 percent "Earth Study" discount on the Visualization Workbench -- a software system for scientific analysis of image data. The "Earth Study" discount is being announced in conjunction with Earth Day to focus on the need for computer industry support of global change studies being undertaken by the scientific community and NASA's Earth Observing System Project (NASA Goddard Space Flight Center, Greenbelt, Md.). The discount will be in effect for all of 1990.

For the study of satellite collected image data, the Visualization Workbench integrates image processing, graphics, and a visual programming system to enable researchers and scientists to quickly analyze imaging data, to prototype concepts and solutions, and to develop application programs. The software system is available on all UNIX workstations including those from Apple, Digital Equipment Corporation, IBM, Sun Microsystems and Silicon Graphics and is in use at leading research

institutions throughout the world including University of Wisconsin, Stanford University, MIT, SEPA (Italy), University of Karlsruhe (Germany), and University of Sydney (Australia).

Paragon Imaging serves the needs of industrial & government "mainstream" users for electronic imaging software for remote sensing, defense, medical geophysical and other imaging applications.

ORLANDO, FL (APRIL 19) PR NEWSWIRE - Major Realty Corporation (NASDAQ: MAJR) announced today that it has reached an agreement in principle with Prudential Insurance Company of America to purchase their interest in the Major Realty/Prudential joint venture.

The interest of Alan Squitieri, Incorporated, in the planned Galleria mall covering 90 acres of the Major/Pru property, will be purchased as well, as part of the overall transaction. The collective purchase price for these interests totals $31 million. The joint venture will also return the $60 million recently advanced by Prudential. Financing of the transaction has been tentatively arranged. The completion of these transactions is subject to certain conditions, including receipt of necessary corporate approvals and negotiations of definitive documents.

The joint venture's real estate holdings include a 274-acre site situated next to MCA's Florida Universal Studios Theme Park in Orlando, which is scheduled to open in May of 1990, and a 10-acre waterfront parcel in downtown Tampa, Fla., across from Harbor Island, an upscale mixed use development.

The transaction is expected to close at the end of April. Bloomfield Hills Mich.-based Stoneridge Resources, Inc. (NYSE: SRE) owns 33 percent of Major Realty.

ST. LOUIS (APRIL 20) PR NEWSWIRE - American Recreation Products, Inc., a subsidiary of Kellwood Company (NYSE: KWD) announced today the acquisition of Travamerica, Inc.'s business and its brand name, Travasak(R). Founded in 1985, Travamerica is a premier marketer of quality sleeping systems for motor homes and recreational vehicles.

Travasak will operate as a brand group within the Wenzel(R) sleeping bag segment under the leadership of its founder, Timothy Jones. Travasak's unique market position gives American Recreation Products access to a new distribution opportunity in the recreational vehicle market. American Recreation Products is a dominant manufacturer and importer of camping products for U.S. and Canadian markets.

Terms of the purchase were not disclosed. The transaction was completed April 12.

American Recreation Products is an international manufacturer and marketer of tents, sleeping bags, hiking and climbing equipment under the Wenzel, Kelty(R), Ridgeway(R), Slumberjack(R) and Everest Elite(R) brands; and private labels.

STAMFORD, CT (APRIL 20) PR NEWSWIRE - The University of Florida has awarded a new five-year, $45 million food service contract to Service America Corporation, the company announced today. Service America, which has been the UF food service contractor since 1966, will be the sole provider of dining and food service for the University's 50,000 students, faculty and administrative personnel at the Gainesville campus.

Service America manages a wide range of dining options at the University to meet the school's diverse needs. A declining balance program allows students to augment the basic board plan offered at Hume Hall and charge their meals at any of the school's facilities, which include cafeterias, snack bars, convenience stores, and a deli-pub. Most of the University's 6,500 resident students and approximately 5,500 non-resident students participate in the plan.

In addition, Service America provides "training table" food service for the University Athletic Association, which feeds the school's male and female students on athletic scholarship and offers specialized weight control programs for the athletes. The company also caters University functions, hosting dignitaries from around the world.

According to Phil Bolt, regional sales manager for the company's Southern Zone, Service America plans to launch an aggressive new brand- name program for the fall quarter that will introduce Dunkin' Donuts, Little Caesars Pizza, and I Can't Believe It's Yogurt licensed products as part of the University's food service program.

In line with its contract proposal, Service America has begun a total

renovation of the University's Orange and Brew dining room, which has operated as an on-campus deli and pub. The renovation will be completed in time for the fall quarter and will introduce new multi- level seating and a contemporary color scheme and decor.

Service America Corporation, with sales in excess of $1 billion, is based in Stamford, and provides dining service management in 44 states, the District of Columbia, and Canada. The firm's clients include schools, colleges and universities, hospitals and retirement facilities, correctional institutions, as well as sports, entertainment, and convention facilities. The company serves 600,000 students at more than 80 U.S. colleges and universities, including the University of California Irvine, the University of Alabama, Gettysburg College, the University of Cincinnati, and California State/Long Beach.

LOUISVILLE, KY (APRIL 20) PR NEWSWIRE - Glenmore Distilleries Company (AMEX: GDS.B) today reported sales for the third quarter ended March 31, 1990 of $85,663,000 compared to $86,005,000 for the same period in the previous year. Excluding federal excise taxes, sales were $40,727,000 in the current quarter, and $36,419,000 for the prior year. For the third quarter of the current fiscal year, net income was $770,000 ($.32 per share), compared to net income of $700,000 ($.29 per share) in the previous year.

Sales for the first nine months of the current fiscal year were $276,859,000 compared to $235,625,000 for the same period in the previous year. Excluding federal excise taxes from the respective periods, sales were $122,610,000 and $95,363,000. Net income for the first nine months of the current fiscal year was $4,345,000 ($1.77 per share), compared to $3,014,000 ($1.22 per share) in the previous year.

Operations of Fleischmann Distilling Company are included in the current year results, and from the date of acquisition, September 8, 1988, in last year's results.

Glenmore's products include: Kentucky Tavern, Yellowstone, Mellow Mash and Ezra Brooks Bourbons; Fleischmann's Gin; Skol Vodka; Scoresby and Inver House Scotches; the Boston line of Cordials and liqueurs; Canadian LTD; Old Thompson and Fleischmann's Preferred Blended Whiskies; Amaretto di Amore; Felipe II and San Marcos Imported Brandies; El Toro Tequila; Elduris Icelandic Vodka; and Chi-Chi's Margaritas, among others.

#90110p5320 04/20/1990 ~PR Newswire

BALTIMORE (APRIL 20) PR NEWSWIRE - Baltimore Gas and Electric Co. (NYSE:

BGE) today reported common stock earnings of $38,512,000 for the three months ended March 31, 1990, equivalent to $.48 per common share.

This compares with earnings of $62,956,000, equivalent to $.79 per share, for the three months ended March 31, 1989. For the 12 months ended March 31, 1990, earnings on common stock were $219,465,000, equivalent to $2.74 per share. This compares with $262,229,000, or $3.31 per share, for the 12 months ended March 31, 1989. Earnings per share for the company's utility business and for its diversified business activities were as follows:

Periods ended	Three months		12 months	
March 31	1990	1989	1990	1989
Utility operations	$ .50	$ .71	$2.60	$3.03
Diversified activities	(.02)	.08	.14	.28
Total	$ .48	$ .79	$2.74	$3.31

The decreases in utility earnings for both periods are attributable to the effects of higher operations and maintenance expenses and increased financing costs. Utility earnings for the 12 months ended March 31, 1990, also reflect a lower rate of electric sales growth versus the prior period.

Kilowatt-hour sales of electricity for the three months ended March 31, 1990, increased 2.8% from the comparable period last year. Likewise, sales to commercial and industrial customers and sales to residential customers each increased 2.8 percent.

The total volume of gas sold during the current three-month period decreased 5.1 percent from the same period last year. The decrease in sales was primarily related to milder winter weather and decreased usage by the company's commercial and industrial customers.

Earnings from diversified business activities primarily represent the results of operations of Constellation Holdings Inc. and its subsidiaries. The decreases in Constellation's earnings for both periods are primarily attributable to the timing of income recognition related to certain real estate and energy projects, as well as lower income from financial investments.

#90110p5322 04/20/1990 ~PR Newswire

HARRISBURG, PA (APRIL 20) PR NEWSWIRE - The Department of Environmental Resources (DER) said today it has collected nearly $4 million in fees from hazardous waste transportation and management industries to help fund the cleanup of hazardous sites.

"The law not only allows us to protect the citizens of Pennsylvania by cleaning up these dangerous sites, but it also gives us a permanent and adequate source of funding to accomplish the task," DER Secretary Arthur A. Davis said. "The industries have been cooperative in complying with the law and doing their part to help promote this important environmental program."

The Hazardous Sites Cleanup Act was proposed by Gov. Robert P. Casey and signed into law in October 1988. It allows the state to accelerate the cleanup of hazardous sites under the federal Superfund program and also allows DER to use state funds to clean up sites and recover the costs from responsible parties.

Davis said the fees collected from hazardous waste transporters and management facilities are combined with general fund revenues and a portion of the capital stock and franchise tax to provide about $50 million annually for the Hazardous Sites Cleanup Fund.

Davis said that while the $4 million in fees are in line with DER funding projections, he expects revenues from the fees to grow to $5 million annually as DER identifies new waste transporters.

Under the act, transporters of hazardous waste are assessed fees of $1.50 to $3 per ton on each shipment of hazardous waste transported in Pennsylvania. Commercial hazardous waste management facilities are assessed fees of $2 to $12 per ton for waste received.

To encourage recycling, a reduced transportation fee is assessed for waste transported to a recycling facility, and no fees are charged to the facilities.

Davis said the fees also are used to provide incentives to municipalities for the siting of new hazardous waste treatment and disposal facilities. The incentives include: one-time payments to municipalities to construct new or expanded hazardous waste facilities; training programs to certify municipal employees to inspect the facilities and to pay portions of their salaries for five years; reimbursements of up to $50,000 for professional costs incurred in reviewing permit applications; and up to $50,000 in reimbursements to review municipal cleanup plans required by DER.

#90110p5327 04/20/1990 ~PR Newswire

PITTSBURGH (APRIL 20) PR NEWSWIRE - The owners of Bruce Plastics Inc. of Robinson Township and their representatives have disputed allegations made by the United Electrical, Radio and Machine Workers of America (UE) Local 689 in a rally held today and reaffirmed their commitment to compliance with the National Labor Relations Act, a spokesman said today.

"The new management of Bruce Plastics agreed voluntarily to recognize the UE as the representative of its employees when it purchased the Robinson Township facility on Feb. 9, 1990," said John Lyncheski of Cohen & Grigsby the law firm that is representing Bruce Plastics in the UE negotiations. "The new management itself took the initiative to commence the collective bargaining process and has been negotiating in good faith with Local 689 since the first session on March 6, 1990," according to Lyncheski.

Lyncheski's comments came in response to a rally directed against both Bruce Plastics and Cohen & Grigsby, held at 1 p.m. today at the CNG Tower, 625 Liberty Ave., in downtown Pittsburgh, where the offices of Cohen & Grigsby are located.

Negotiating sessions between Bruce Plastics and UE Local 689 took place on March 6, March 21, April 4 and April 16. Employees of Bruce Plastics walked off the job completely unannounced on March 22, after the second negotiating session.

According to Bruce Plastics, the strike by UE Local 689 has been marked by a number of incidents of violence since its inception, requiring the company to obtain a court injunction and pursue unfair labor practice charges against the UE with the National Labor Relations Board (NLRB). The company has also initiated contempt proceedings for the UE's refusal to comply with the court's order.

"Several employees have reported to work during the strike and we have

hired replacements to keep the plant operating. We regret that these good people have experienced threats and acts of violence against them during the strike," said Dhiren Shah, chief operating officer of Bruce Plastics. "While we recognize the employees' rights to engage in a work stoppage in support of their bargaining demands, we, likewise, have a right to continue our operations, and to serve our customers despite the strike. We simply cannot condone illegal acts."

The labor dispute comes in the wake of a change in ownership at the Bruce Plastics plant.

Bruce Plastics categorically denies all claims by UE Local 689 that Bruce Plastics tried to bust the union or has been bargaining in bad faith. "The possible acquisition of Bruce Plastics had been in the works for a number of months, long before the UE arrived on the scene. The transaction had nothing to do with the presence of a union at the plant. Employees of Bruce Plastics have been unionized for several decades and our client was aware of this when the plant was acquired," said Lyncheski and Shah.

"Immediately upon taking control of the company, the new ownership voluntarily agreed to recognize the UE as the employees' representative and to begin bargaining. The new owner did reserve its legal right to establish initial terms and conditions of employment," said Lyncheski and Shah.

"This whole problem was occasioned by the employees' precipitous action when they walked out in the middle of a shift at 8 p.m. on March 22. Management chose to respond by taking the lawful action at its disposal to keep the business running," said Lyncheski.

"We are confident that the union's charges of unfair labor practice will be dismissed and that ours will be sustained," said Shah. "We intend to continue to exercise and protect the rights guaranteed to us under federal and state laws."

Neither Lyncheski nor Shah would comment on the terms of the proposals that are being discussed with the UE in the negotiations. "We believe these issues are best addressed at the table through the collective bargaining process," said Lyncheski. "The company is offering the UE a very good contract."

#90110p5333 04/20/1990 ~PR Newswire

NEW YORK (APRIL 20) PR NEWSWIRE - A Swiss-based apparel manufacturer countersued the Coca-Cola Co. today, charging that the giant soft drink maker -- in an effort to recoup losses and avoid bad publicity from a deal that had gone flat with a famous name in fashion -- fraudulently induced it into entering a multi-million dollar licensing agreement to make and distribute clothing bearing the Coke logo.

Coca-Cola then prevented the apparel maker from being able to market the clothing, according to the suit, which seeks actual and punitive damages of $42 million.

The suit, brought in U.S. District Court in Atlanta (Civil Action 1:90-CV-369-JTC) by Spira Textile Investments, S.A. (STI), involves the formerly high-flying but now bankrupt Murjani International Ltd., a previous Coke apparel licensee, who had defaulted on a $25 million loan from the soft drink company.

According to STI's suit, Coca-Cola induced STI into obligations of $23 million for U.S. and Western European rights by misrepresenting that Coke logo apparel would generate 1989 sales of $14 million in the United States.

The suit alleges that Coca-Cola knew but did not reveal to STI that Murjani had followed a market strategy of mass merchandising low-priced, substandard, and inferior goods that created a negative impression in U.S. trade channels, as well as serious concern among Coca-Cola executives.

After Coca-Cola induced STI into the $23 million deal, the suit alleges, Coca-Cola refused to provide the necessary support to develop markets and even refused to publicize its choice of STI as U.S. licensee, apparently to avoid any adverse publicity about the failed relationship with Murjani.

Because of Murjani's performance, the suit alleges, upscale department and

specialty stores in the United States had become disenchanted with the Coke apparel. Coca-Cola also hindered distribution and sales in Europe, the suit alleges, by refusing to approve designs and styles and failing to halt unauthorized sales of a substantial volume of apparel with counterfeit Coke logos.

Coca-Cola's obstructive actions, the suit alleges, caused STI production and financial difficulties, and last October Coca-Cola attempted to terminate STI's license and sued the Swiss company in federal court.

STI's suit seeks actual damages in excess of $7 million and punitive damages of $35 million, for fraudulent inducement, breach of contract and tortious interference. The suit also asks that the license and credit agreement between STI and Coca-Cola be rescinded.

#90110p5337 04/20/1990 ~PR Newswire

CHICAGO (APRIL 20) PR NEWSWIRE - Inland Steel Industries, Inc., (NYSE: IAD) today reported that consolidated 1990 first-quarter net earnings totaled $18,743,000 or 37 cents per common share.

This was an improvement over the $6,708,000, or 9 cents per share, of the fourth quarter 1989, but significantly lower than the $49,390,000 or $1.38 per share, of the 1989 first quarter. The 1990 results included utility refunds equivalent to 17 cents per common share.

First-quarter consolidated revenues increased to $992,505,000 from $953,542,000 in the preceding three months, but were 10 percent below the $1,101,431,000 registered in the first quarter a year ago.

Cost performance improved during the first quarter due to lower expenditures at the Inland Steel Co. subsidiary for repair and maintenance and purchased materials and services.

The integrated steel segment shipped 1,153,000 tons in the first quarter, 41,000 tons more than in the fourth quarter 1989 but 10 percent below the 1,281,000 tons shipped in the 1989 first quarter.

Consolidated operating profit registered a healthy improvement in the first quarter, totaling $40,451,000, up from $10,632,000 in the preceding three months, though 55 percent below the $89,620,000 of the 1989 first quarter.

The 1990 first-quarter operating profit included $30,634,000 from the steel segment and $9,817,000 from the service center segment. Steel results included one-time $8.7 million utility company rate refunds.

In the service center segment, which includes the Joseph T. Ryerson & Son and J.M. Tull Metals Co. materials distribution organizations, margins improved from depressed fourth-quarter levels, though inventory liquidations continued and expense reductions failed to meet expectations.

Luerssen said Inland's financial conditions remains strong. The company's net liquidity position is very satisfactory with cash and equivalents of $233 million on Mar. 31, slightly below the $237 million at year-end 1989.

The company continued its previously announced $185 million common stock buyback program with expenditures of $46 million in the first quarter. Since mid-December 1989, more than 1.5 million shares have been repurchased at an average cost of about $33 per share.

Inland Steel Industries also reported results for its wholly owned Inland Steel Co. Subsidiary. Inland Steel Co.'s net income for the first quarter 1990 totaled $12,556,000, compared with $42,899,000 in the 1989 first quarter and a net loss of $2,953,000 in the fourth quarter of 1989.

#90110p5353 04/20/1990 ~PR Newswire
BINGHAMTON, NY (APRIL 20) PR NEWSWIRE - New York State Electric & Gas Corporation (NYSE: NGE) today reported earnings applicable to common stock of $1.17 per share for the quarter ended March 31, 1990, up from last year's first quarter earnings of $1.13 per share.

This increase in earnings is primarily due to higher profits from the sale of electricity to other utilities. Earnings also increased due to revenues related to the unusually cold weather in December 1989 being recognized in early 1990 after the customers' meters were read. This increase was partially offset by lower revenues due to milder weather during the first quarter of 1990.

Total revenues rose to $438,293,000 for the three months ended March 31, 1990, an increase of 6 percent from the three months ended March 31, 1989. Electric revenues increased 5 percent, of which 2 percent represents the recording of unbilled revenues. The company started to phase in the recording of unbilled revenues in February 1990, in accordance with the rate stabilization plan approved by the Public Service Commission of the State of New York in March 1989. In addition, electric revenues increased as a result of a 37 percent increase in kilowatt-hour sales to other utilities, including the New York Power Authority. Gas revenues increased 9 percent, due to higher purchased gas costs being passed on to customers and higher gas sales to retail customers.

Earnings available for common stock were $67,212,000 in the first quarter of 1990, compared with $64,416,000 for the corresponding period last year.

Earnings available for common stock were $2.57 per share for the 12 months ended March 31, 1990, and $2.84 per share for the 12 months ended March 31 1989. Excluding the effects of the December 1989 adjustment to the 1987 Nine Mile Point Unit No. 2 (NMP2) write-off, earnings were $2.47 per share for the 12 months ended March 31, 1990. Earnings were $2.73 per share for the 12 months ended March 31, 1989, excluding an April 1988 adjustment to the 1987 NMP2 write-off to reflect the date on which the plant achieved commercial operation. The reduction in earnings from $2.73 per share to $2.47 per share is primarily attributable to a reduction in the allowed return on common equity, effective in February 1989. In addition, earnings decreased due to the decline in industrial sales caused by a slowing economy. The reduction in earnings was partially offset by higher profits from the sale of electricity to other utilities.

Total revenues for the 12 months ended March 31, 1990, were $1,452,924,000 a 4 percent increase as compared to the corresponding period last year. Earnings available for common stock were $147,600,000 and $160,302,000 for the 12 months ended March 31, 1990 and 1989, respectively. Excluding the effects of the 1989 and 1988 adjustments to the 1987 NMP2 write-off, earnings available for common stock were $141,819,000 and $154,212,000 for the 12 months ended March 31, 1990 and 1989, respectively.

MIDDLEBURY, CT (APRIL 20) PR NEWSWIRE - General Datacomm Industries, Inc. (NYSE: GDC) today announced that revenues for its second fiscal quarter ended Mar. 31, 1990 were $49.2 million, compared with revenues of $53.4

million for the same period a year ago.

Operating income for the second quarter was $1.1 million, compared to operating income of $681,000 for the Mar. period last year. Net income totaled $139,000 or $.01 per share against a net loss of $313,000 or $.02 per share for the same quarter a year ago.

Revenues for the six months ended Mar. 31, 1990 were $100.3 million against revenues of $104.7 million for the comparable period last year. Net income for the first half of fiscal 1990 totaled $1.1 million or $.08 per share. This compares with a net loss of $803,000 or $.05 per share for the first six months of fiscal 1989.

General Datacomm is a leading provider of systems, solutions, equipment and services for information networks worldwide. Based in Middlebury, Conn., GDC services a broad base of corporate customers and telephone operating companies throughout the Americas, Europe, Australia, the Far East and the Pacific Rim. In its fiscal year ended Sept. 30, 1989, the company reported revenues of $201.2 million.

#90110p5371 04/20/1990 ~PR Newswire

LONG GROVE, IL (APRIL 20) PR NEWSWIRE - Kemper Corporation (NYSE: KEM) today announced it has established loss reserves of $19.7 million to cover severe weather-related losses in its reinsuance and property-casualty insurance segments for the first quarter of 1990. The reserves will result in an after-tax charge to net income of $13.0 million or $.27 per share. Net income for the first quarter, expected to be announced on May 1, 1990, will reflect these losses.

"This reserve is based on an estimate of Kemper Corporation's incurred losses during the first quarter of 1990 as a result of severe weather experienced in Europe, affecting our reinsurance segment, and in the United States' Midwest region, involving our property-casualty insurance segment," said Joseph E. Luecke, chairman of the board, president and chief executive officer. "These events, following last year's record level of catastrophe losses, are already having an affect on certain European and U.S. property catastrophe reinsurance rates and capacity."

Kemper Corporation's reinsurance operations anticipate incurred losses of $10.0 million as a result of violent wind and rainstorms that swept across Europe in the first two months of the year. Industry losses from these storms have been reported as exceeding $8.0 billion.

Kemper Corporation has set aside reserves totaling $9.7 million to cover incurred losses reported by its property-casualty insurance subsidiaries

from winter storms, freezing temperatures and hail in the Midwestern United States. Kemper Corporation's property-casualty insurance subsidiaries have a Midwestern market concentration.

Commenting on another area of business, Luecke noted that a restructuring plan for Kemper Corporation's brokerage firms is underway. The first quarter of 1990 will generate a loss, reflecting trading losses, a reduced volume of retail activities and costs of the reorganization. However, business improved in March, and the securities brokers will have a substantially smaller loss in the first quarter of 1990, versus the last quarter of 1989.

Luecke noted that first-quarter net income for the balance of Kemper Corporation is expected to show improvement versus the same period in 1989.

Kemper Corporation is a non-operating holding company with major subsidiaries in life insurance, investment services, reinsurance and property-casualty insurance.

BATTLE CREEK, MI (APRIL 20) PR NEWSWIRE - Kellogg Company (NYSE: K) today at its annual meeting of stockholders, reported that net earnings for the first quarter of 1990 were $96.3 million, down 13.6 percent from the first quarter of 1989, without the effect of an accounting change. With the accounting change, which inflated first- quarter 1989 profits, 1990 first-quarter earnings were down 39.6 percent.

First-quarter earnings per share were $.79, compared to $.91 without the accounting change and $1.30 with the accounting change in 1989.

First-quarter sales were $1.21 billion, up 6.6 percent over last year. "Although first-quarter earnings declined, our overall results are in line with our long-term plan to enhance our market position in the United States and achieve consistent worldwide business growth," said William E. LaMothe, chairman of the board and chief executive officer of Kellogg Company. "As part of our strategy, we continued to invest heavily in research, product development, and marketing programs during the first quarter.

In other business today, company stockholders re-elected Philip Caldwell, Theodore Cooper, Charles W. Elliott, and Donald Rumsfeld to the board of directors, all for terms expiring in 1993. Stockholders also elected a new director, Claudio X. Gonzalez, to a term expiring in 1993. Gonzalez is chairman of the board and chief executive officer of Kimberly-Clark de Mexico, S.A. de C.V.

LaMothe announced to stockholders that, for the fourth consecutive year, the board of directors has authorized management to purchase up to $100,000,000 of shares of Kellogg Company stock. The 12-month purchase

period extends until April 20, 1991.

Stockholders defeated a proposal calling for preparation of a report regarding the company's South African operations.

RALEIGH, NC (APRIL 20) PR NEWSWIRE - A North Carolina electric co-op veteran has been elected president of the National Rural Telecommunications Cooperative (NRTC) Board of Directors.

David J. Batten, executive vice president and general manager of Brunswick Electric Membership Corporation (EMC), Shallotte, was recently elected to the post at NRTC's Annual Meeting in Orlando, Fla.

Batten had served as NRTC's vice president since 1987 and had served as chairman of its Bi-Directional Committee.

Incorporated in 1987, the Washingon-based NRTC offers television programming to satellite dish owners in rural areas across the country.

NRTC's package, called "Rural TV," includes many of the selections available from cable televisions systems, which rarely serve territories outside the cities where they're based. Currently, "Rural TV" has more than 52,000 subscribers nationwide -- 1,100 in North Carolina.

Through its subsidiary, Rural Consumer Service Corporation, Brunswick EMC became North Carolina's first electric co-op to offer "Rural TV" in 1987.

A resident of Brunswick County, Batten began his rural electric career in 1968 as an agricultural engineer at Brunswick EMC.

After working for the state for two years, Batten returned to Brunswick EMC in 1972 as district manager of the co-op's Whiteville branch office. He assumed his present post in 1981. The EMC serves more than 42,000 consumer-members in Columbus, Bladen, Brunswick and Robeson Counties.

Batten has served as president of the South Brunswick Islands Chamber of Commerce and has been on the board of the N.C. Eastern Chamber of Commerce and the Brunswick County Hospital.

He received his undergraduate and graduate degrees from N.C. State University.

#90110p5397 04/20/1990 ~PR Newswire
CHICAGO, (APRIL 20) PR NEWSWIRE - American National Corp. reported net income of $7.8 million for the first quarter of 1990, compared to $18.7 million in 1989. Return on average assets for the quarter was 0.60 percent, and return on average equity was 10.58 percent.

Average loans outstanding grew 14 percent to $4.1 billion, and average deposits grew to $4.0 billion, up 9 percent from the first quarter 1989. Total assets as of March 31, 1990, were $5.2 billion, an increase of 4 percent from a year ago.

Assets classified as non-performing as of March 31, 1990, were $113.5 million, compared to $69.0 million a year ago. Allowance for possible loan losses, representing 1.30 percent of total loans outstanding, was $54.0 million, as of March 31, 1990, compared to $37.9 million last year.

American National Chairman Michael E. Tobin stated, "Our earnings were adversely impacted by an extraordinary loan provision related to a perceived softness in the economy, particularly in the commercial real estate market. We also established a reserve to allow for potential charges related to the March 2 fire that destroyed the bank's Gateway Center branch."

#90110p5409 04/20/1990 ~PR Newswire

SEATTLE (APRIL 20) PR NEWSWIRE - The has certified Boeing 757 and 767 twinjets for additional extended-range services.

The approvals were given for additional extended twin (engine) operations (ETOPS) by the 757-200 and two series of the 767, the -200 and -300, with specific engine combinations.

ETOPS approval allows the Boeing twinjets to fly more direct routes on long overwater trips or over undeveloped land areas, thus saving fuel and flight times. Typical operations require routings within 60 minutes' flight time of an approved landing field in the event of the loss of one engine's power.

The FAA has now approved 120-minute ETOPS operations for the 757-200 equipped with Pratt & Whitney PW2037 or PW2040 engines. The 757 has been certified for 120-minute operations with Rolls-Royce RB211-535E4 engines since December 1986.

Boeing 767-200 and -300 series have had 120-minute approval with two different engine types since 1985. Now, both of these series have received 180-minute certification with Pratt & Whitney JT9D-7R4D/E engines. They also have just received approval for 120-minute operations with Pratt & Whitney PW4000 engines. As this new engine type accumulates experience, it will be a candidate for 180-minute operations.

The 767 series have had 180-minute certification with two types of General Electric engines since April 1989.

FAA requirements for extended twin operations include establishing that the propulsion system has sufficient inservice flight time and high reliability, based on world fleet experience with the engine and airplane series combination. In addition, the jetliners must have certain other systems enhanced, such as electrical power, fire suppression and avionics cooling systems.

Approval under these guidelines has enabled airlines to take advantage of the efficiencies of twin operations on many routes which, under the one-hour rule, were limited to three and four-engine jetliners.

MIAMI (APRIL 20) PR NEWSWIRE - Nineteen-ninety is expected to be a profitable year for Southeast Banking Corporation (NYSE: STB), despite a loss in the first quarter, Charles J. Zwick, chairman, today told stockholders at the company's annual meeting.

"Southeast Bank is a strong, well-capitalized, solid financial institution which is extremely resilient," Zwick said. "We have proven a remarkable tendency to rebound during the toughest of times."

Zwich told shareholders it is time to move ahead, to recognize the industry's challenges in these tougher economic times, take responsibility

for them, put them behind us and take advantage of our future by building on our strengths. Zwick cited Southeast's accomplishments during 1989. He said that the bank has expanded in North and Central Florida, consolidated its community and corporate bank, increased its branch network and added new products. "A major accomplishment in 1989 was that Southeast, which has always been the major South Florida bank, became a significant North and Central Florida player," Zwick said.

In addition, Southeast has consolidated its community and corporate bank by markets to take advantage of the sales synergies between the two in each geographic area, he said. "By doing so, we decentralized decision-making, placing the decisions closer to the customer," Zwick said. To assist in Southeast's statewide growth, Southeast banker Robert E. White was named executive vice president to oversee the combined corporate and community banks north of metropolitan Miami.

He said that during the four months, Southeast has added nine new branches. Among those new branches, Zwick said, are several which are full-service banking centers located in Gooding's Supermarket branches in the Orlando area. He said that by the end of this year Southeast expects to have 16 Gooding's branches.

Zwick also told shareholders Southeast continues to be innovative in providing financial products. He pointed to Southeast's Can't Lose CD (Certificate of Deposit) that guarantees a six-month market rate regardless of market rate downturns and InvestSmart, the first FDIC-insured account offered statewide by a Florida bank which will pay a true mutual fund money market rate.

To improve credit quality, Zwick said, Southeast established a chief credit officer, independent of the lending units of the bank. The chief credit officer -- William Crowley -- will report directly to the chief executive officer, Zwick said.

Southeast also plans to sell its mortgage business in order to increase the return on capital tied up in that investment, according to Zwick. "This sale will further strengthen an already-solid balance sheet and increase our ability to more rapidly build our core businesses," he said.

During the annual meeting, shareholders elected a board of seventeen directors. One new director was elected to the board. He is Castle W. Jordan, a private investor and business consultant.

Shareholders also approved the appointment of Deloitte & Touche as independent auditors for 1990.

Southeast Banking Corporation is the parent company of Southeast Bank, N.A. Southeast Bank had total assets of $17.1 billion and total deposits

of $13.2 billion at March 31, 1990. Southeast Banking Corporation provides financial services at more than 225 locations throughout Florida.

Other Southeast businesses include: First National in Palm Beach, a division of Southeast Bank, N.A., providing full commercial, private banking and trust services; Southeast Bank Leasing Company, with commercial leasing and financing services; Southeast Bank Brokerage Service, Inc., providing discount brokerage services; Southeast Credit Insurance Company, which reinsures credit insurance policies on loans made by Southeast Bank, and Southeast Mortgage Company, one of the nation's leading mortgage banking institutions, which services a mortgage portfolio of approximately $9 billion.

#90110p5419 04/20/1990 ~PR Newswire

CLEVELAND (APRIL 20) PR NEWSWIRE - Acme-Cleveland Corporation (NYSE: AMT) today reported net earnings for the second quarter of fiscal 1990 of $1.9 million, or $.28 a common share, on sales of $52.4 million. This compares to net earnings for the second quarter of fiscal 1989 of $2.3 million, or $.36 a common share, on sales of $48.3 million. Results for fiscal 1989 included a gain of $.7 million, or $.11 a common share, from the sale of the corporation's minority equity interest in an affiliate company.

Net earnings for the first six months of fiscal 1990 were $3.5 million, or $.54 a common share, on sales of $99.7 million. This compares to net earnings of $3.2 million, or $.49 a common share, on sales of $92.1 million for the same period in fiscal 1989. Results for fiscal 1990 included income of $.6 million, or $.09 a common share, from the sale of the corporation's minority equity interest in an affiliate company and from the sale of land. Results for fiscal 1989 included income of $1.0 million, or $.16 a common share, from the sale of a minority equity interest in an affiliate company and from tax refunds.

Second quarter consolidated orders booked were $51.5 million versus $47.6 million for the previous quarter and $52.2 million for the second quarter of fiscal 1989. The order backlog was $33.5 million at March 31, 1990, compared to $35.2 million at Dec. 31, 1989, and $36.8 million at March 31, 1989.

In commenting on the second quarter, David L. Swift, president and chief executive officer, said, "Higher sales enabled the corporation to achieve better year-over-year operating results in both our Metalworking Products and Telecommunications and Electronics Products segments. Lower earnings at the corporation's Cleveland Twist Drill subsidiary partly offset performance gains elsewhere in the Metalworking Products segment. The

year-over-year improvement in second quarter operating results for the Telecommunications and Electronics Products segment was largely the result of increased demand for outside plant telecommunications products."

Acme-Cleveland Corporation manufactures and sells telecommunications products, sensor devices and controls, cutting tools, multi-spindle machine tools, quality assurance products and systems, and related parts and services.

BEAVERTON, OR (APRIL 20) PR NEWSWIRE - Epitope Inc. (AMEX: EPT) announced today that two of the company's three founders, Dr. Denis R. Burger and Michael C. Hubbard, have left the company to devote full attention to other business ventures. Burger resigned his position as chairman to pursue full-time operation of Yamhill Valley Vineyard and his related wine distribution business. He will remain a member of the company's board of directors and will serve as a consultant to the company's president and board of directors.

"Yamhill Valley Vineyards, which began as an avocation, has grown to the point where it requires my full-time attention as winemaker and president " said Burger.

Hubbard resigned his position as president and chief executive officer and as a director of the company and will devote his time to another business venture. He will remain available to serve as a consultant to the company in connection with the transition to new management.

"Epitope is entering a new and exciting phase in its growth. I believe I have made my contribution to that growth, and it is time for me to hand over the reins to new management. I look forward to working with the company's new president, Dr. Ferro, and with its board of directors in whom I have great confidence," said Hubbard.

"We appreciate the important roles that Denis and Michael played in the development of Epitope from a small clinical reference laboratory to a diversified biotechnology company, said Roger Pringle, newly elected chairman of the board of directors.

Pringle added that Dr. Adolph J. Ferro, senior vice president-research and development and president of Epitope's wholly owned subsidiary, Agritope Inc., will assume the position of president and chief executive officer and has been elected to the board of directors to fill Hubbard's unexpired

term as a director.

Epitope Inc. in a 10-year-old Oregon corporation utilizing biotechnology to develop diagnostic tests for AIDS, therapeutic drugs for protozoan diseases and, through its agricultural unit, Agritope Inc., agronomically superior new plant varieties.

#90110p5433 04/20/1990 ~PR Newswire

RICHMOND, VA (APRIL 20) PR NEWSWIRE -- Chesapeake Corporation (NYSE: CSK) today reported first quarter 1990 net income of $4.4 million, or $.22 a share, a decline of 65 percent from $12.9 million, or $.63 a share earned in the record first quarter of 1989.

Sales for the quarter ended March 31, 1990 were up 8 percent to $203.6 million.

J. Carter Fox, president and chief executive officer, said, "Our results for the first quarter were in line with our early April announcement. In the first quarter 1990 we are comparing to a record first quarter 1989, and we are currently in the peak start-up expense period for our tissue expansion. In addition, business conditions in our kraft and packaging businesses are considerably different from a year ago. The marketplace is much more competitive and prices are being discounted in 1990 for several key commodity kraft products; however, demand and pricing for specialty white paperboard and kraft paper has remained strong. Key costs at both paper mills were also high in the first quarter due to the extreme weather conditions at the end of 1989 at our West Point, Virginia kraft mill and paper machine construction and start-up expenses at our tissue operation. Kraft costs are now coming back in line, but our new tissue machine will not start until late in the second quarter, so we don't expect significant cost improvements there until the second half of the year."

Mr. Fox concluded, "We expect second quarter earnings will continue to be under pressure, but they should be better than the first quarter. Given no dramatic weakening in the economy, we expect our earnings in the second half to show significant improvement. Major investments for the future sometimes cause short-term expenses to increase, but we are confident that the strategic thrust of our capital spending program will enable us to make Chesapeake a stonger business for both our stockholders and our customers."

Chesapeake Corporation is an integrated paper and forest products company

that produces and markets kraft, tissue, packaging, and wood products.

#90110p5437 04/20/1990 ~PR Newswire

SOUTH HAVEN, MI (APRIL 20) PR NEWSWIRE - Employees at Consumers Power Company's Palisades nuclear plant are preparing the facility for its largest project since original construction.

Assisted by Bechtel Power Corporation and its engineering affiliate, Bechtel Associates Professional Corporation, employees are preparing detailed engineering plans to replace the plant's two steam generators this fall. The $100 million steam generator replacement project will coincide with Palisades' next scheduled refueling outage, starting Sept. 1.

One phase of the project will involve actual replacement of the steam generators, which will require cutting a 26- by 28-foot construction opening through the concrete wall of the plant's 3-1/2-foot-thick containment building. The steam generators are 60 feet tall and weigh 460 tons each.

Once the opening is prepared, specially designed cranes will be used to lift the old steam generators out of their positions and place them on heavy-duty transporters, which will carry them to a specially designed concrete storage building for temporary storage. The new steam generators currently being stored on site, will then be installed in the plant for use.

Another phase of the project will include replacement of the plant's six feedwater heat exchangers and some 27,000 main condenser tubes. This work will be done simultaneously with the steam generator replacement project.

Following completion of all work in the plant's containment building and closure of the construction opening, refueling of the reactor will begin. All new equipment, including the re-enclosed concrete containment building will be tested in conformance with safety requirements of the U.S. Nuclear Regulatory Commission to verify operability prior to resuming plant operation.

The entire project is expected to take about five months to complete and will provide work for an additional 1,500 people at the plant. Palisades currently employs 650 people.

The Palisades plant has a rated capacity of 768 megawatts of electricity, enough to serve a community of more than 570,000 people.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

JACKSONVILLE, FL (APRIL 20) PR NEWSWIRE - Barnett Banks Inc. (NYSE: BBI) announced today it is consummating its acquisition of First American Bank and Trust, N.A., in North Palm Beach, Fla., effective Monday morning, April 23.

The acquisition is of all the deposits, certain other liabilities and some of the assets.

First American had been operated as a "bridge bank" since action in December by the comptroller of Florida and the Federal Deposit Insurance Corp. (FDIC) following the failure of its predecessor corporation.

With deposits of $800 million and 32 offices in four counties, the bank strengthens Barnett's presence in Palm Beach, Broward, Dade and Leon counties.

First American's 18 offices in Palm Beach will be part of Barnett Bank of Palm Beach County, except for the Belle Glade office, which will be part of Barnett Bank of Lake Okeechobee. The 12 offices in Dade and Broward counties will be part of Barnett Bank of South Florida, N.A. The two Tallahassee offices will be part of Barnett Bank of Tallahassee.

"We want to assure First American customers that we look forward to delivering the same level of service that Barnett's customers in Florida and Georgia have come to expect," said Mike Strickland, president and CEO of Barnett Bank of Palm Beach County.

Barnett purchased approximately $120 million of the bank's consumer and other small loans. In addition, Barnett acquired approximately $280 million of other loans and assets, with an option to put these back to the FDIC within 90 days of closing. To facilitate the transaction, the FDIC will initially advance approximately $400 million to Barnett. Barnett's purchase premium is $41.6 million.

Barnett is a 113-year-old company with assets of more than $29 billion and 564 offices in Florida and Georgia. Its stock (BBI) is listed on the New York Stock Exchange.

#90110p5445 04/20/1990 ~PR Newswire

WASHINGTON (APRIL 20) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed First Savings and Loan Company, Massillon, Ohio, in receivership and chartered a new federal mutual institution to take its place.

The new institution, First Savings and Loan Company, F.A., will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corporation.

The receivership did not result in any interruption of First Savings' day-to-day operations. The institution and its nine branches will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because First Savings was operating in an unsafe and unsound condition and has suffered losses that have depleted all or substantially all of its capital, with no reasonable prospect of replenishment without federal assistance.

First Savings' condition is due primarily to underwriting deficiencies, sustained monthly losses and significant operating losses, a high level of real estate owned and a stagnant local economy.

As of Feb. 2, 1990, First Savings reported assets of $168 million, liabilities of $171.5 million and tangible capital of negative $7.36 million, for a tangible capital-to-assets ratio of negative 4.2 percent.

WASHINGTON (APRIL 20) PR NEWSWIRE - AFL-CIO Secretary-Treasurer Thomas R. Donahue issued a call for the protection of pension benefits of Eastern Airlines workers.

The carrier now has more than $1 billion in unfunded pension liabilities.

In a letter to Labor Secretary Elizabeth Dole, Donahue called for the Pension Benefit Guaranty Corp. to obtain collateral and guarantees from Eastern parent Texas Air Corp. (AMEX: TEX) to cover the $1 billion of pension obligations.

"It is my hope that the Labor Department will urge the PBGC to ensure that Texas Air and its affiliates -- which have been draining corporate assets from Eastern that would otherwise have been available to satisfy pension obligations -- cannot insulate themselves from liability," he wrote.

Since filing for bankruptcy protection on March 9, 1989, Eastern has lost more than $1.2 billion. On April 18, 1990, the federal bankruptcy court named Martin Shugrue as trustee to take over Eastern operations.

BIRMINGHAM, AL (APRIL 20) PR NEWSWIRE - Torchmark Corporation (NYSE: TMK) said today that it believes its actions with regard to its solicitation of proxies for five independent nominees for director and its shareholder resolution at American General Corporation's (NYSE: AGC) annual meeting on May 2, 1990 are in full compliance with all laws, and will continue.

As previously reported, Torchmark received a letter from Alexander Gonzales, deputy commissioner of the Texas State Board of Insurance, stating the position of the Board's staff regarding Torchmark's proxy solicitation. In the letter, Gonzales pointed out options available to Torchmark. Torchmark said it intends to avail itself of one of those alternatives at the appropriate time.

Torchmark also noted that every injunctive application filed in the various states by or at the behest of American General has been denied. In addition, formal actions taken to date by state regulatory authorities in California and Virginia have held Torchmark's solicitation to be in compliance with the applicable laws and regulations of those states.

Said a Torchmark spokesman, "We believe that it is wrong for American General to spend time and money in an attempt to deny their shareholders the opportunity to vote for the independent nominees. We, however, fully intend to continue with our proxy solicitation."

BOSTON (APRIL 20) PR NEWSWIRE - In accordance with the new law adopted April 17, 1990, by the Massachusetts legislature providing for classified boards, Houghton Mifflin Company has classified its board of directors into three groups.

Only one class consisting of five directors will be elected this year and will serve a three-year term.

The terms of the remaining 10 directors nominated in the proxy will continue until the 1991 or 1992 annual meeting as specified by the law.

The proxy statement previously sent to stockholders indicated that nominees for the entire board (consisting of 15 persons) would stand for election to one-year terms at the annual meeting of stockholders on April 25, 1990. As a result of the new law, however, five nominees for Class I Director -- Joseph A. Baute, Nader F. Darehshori, George Putnam, David R. Replogle, DeRoy C. Thomas -- will stand for election at the 1990 annual meeting.

Five members -- Damaris Ames, Gail Deegan, Robert M. Landis, Charles R. Longsworth, Harold T. Miller -- have been designated as Class II Directors whose terms of office will continue until the 1991 annual meeting, and five members -- Robert F. Baker, Mary H. Lindsay, John F. Magee, Claudine B. Malone, Ralph Z. Sorenson -- have been designated as Class III Directors, whose terms of office will continue until the 1992 annual meeting.

Houghton Mifflin is a leading publisher of textbooks, software, and other educational materials for the elementary and secondary school and college markets, as well as an extensive line of reference publications, business software, and fiction and nonfiction for adult and young readers.

#90110p5463 04/20/1990 ~PR Newswire
RICHMOND, VA (APRIL 20) PR NEWSWIRE - RF&P Corporation (NASDAQ: RFPC) reported today that consolidated net earnings for the first quarter of 1990 were $3.2 million, or $0.18 per share, compared with $9.1 million, or $0.52 per share, earned in the first quarter of 1989.

Frank A Crovo, Jr., President and Chief Executvie Officer, commented that

the decline in first quarter earnings was expected and resulted primarily from two transactions.

Affecting 1990 earnings was the $3.9 million write-off of expenses incurred in connection with the 1989-90 consolidation discussions with CSX Corporation. Such discussions ultimately led to a merger agreement, which was terminated on March 23, 1990. Investment income declined $6.2 million as the result of the $6.8 million gain from the 1989 sale of a portion of the Company's investment in Trailer Train Company stock. Partially offsetting the 1989 stock gain was higher interest income.

Total operating revenues were $15.7 million, down $0.7 million, or five percent from 1989. Rail transportation revenues were down four percent due to a decline in freight traffic volume, partially offset by a higher level of pricing. Real estate revenues decreased eight percent primarily due to the timing on the receipt of the annual net cash flow from a Crystal City real estate project in Northern Virginia. The payment, which is due annually in April, was received in March of 1989.

Total operating expenses declined $1.1 million, or twelve percent, primarily due to the recognition of income, that had been previously deferred, as a result of the arbitration settlements in connection with the Norfolk Southern/Conrail diversion at Potomac Yard.

DELAWARE, OH (APRIL 20) PR NEWSWIRE - The boards of directors of Countrymark, Inc., Delaware, Ohio, and Indiana Farm Bureau Cooperative Association, Inc. (IFBCA), Indianapolis, Ind., agreed to undertake a "Joint Management Approach" during a meeting held today.

IFBCA President and Chief Executive Officer Philip French will serve as Countrymark's president and chief executive officer and leader of this effort. French will also retain his responsbilities as IFBCA's president and CEO.

This agreement represents a good faith undertaking on the part of both cooperatives. Its fundamental purpose is to jointly explore strategic, management and operational issues and opportunities which could lead to the development of a long-term, cohesive Countrymark and IFBCA merger strategy in the substantial interests of both organizations and their stakeholders.

In a joint statement about the board's actions, Don Benschneider and Lloyd

Arthur, board chairman for Countrymark and IFBCA, say, "We fundamentally believe that the eventual joining of our two Cooperative Systems can result in a much stronger future for our farmer-patrons, our Members and our regionals."

The Joint Management Approach between Countrymark and IFBCA will not change the existing by-laws, governance procedures, Board responsibilities and Member or other stakeholder obligations of either organization.

Countrymark and IFBCA are major, federated agricultural supply and marketing cooperatives. Countrymark serves farmers in Ohio and Michigan. IBFCA serves farmers throughout Indiana. Both organizations are owned by their Member Co-ops, which are owned and controlled by their farmer-patrons.

WASHINGTON (APRIL 20) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed Enterprise Federal Savings and Loan Association, Clearwater, Fla., in receivership and chartered a new federal mutual institution to take its place.

The new institution, Enterprise Federal Savings, F.S.A., will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corporation.

The receivership did not result in any interruption of Enterprise's day-to-day operations. The institution will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because Enterprise was operating in an unsafe and unsound condition and has suffered losses that have depleted all or substantially all of its capital, with no reasonable prospect of replenishment without federal assistance.

Enterprise's failure was caused by sustained monthly losses, high operating expenses, a high level of non-earning assets and real estate owned, and a high cost of funds.

Enterprise was a privately held stock corporation with approximately half of its shares of common stock held by the board of directors. The institution had outstanding subordinated debt totaling $500,000. Neither the stockholders nor the debt holders will have any interest in the new institution.

As of Dec. 31, 1989, Enterprise reported assets of $65.5 million and liabilities of $66.4 million. As of Feb. 28, 1990, the thrift reported

tangible capital of negative $1.09 million for a negative tangible capital-to-adjusted assets ratio of 1.7 percent.

CONTACT: Patricia Forsyth, 404-888-5381, or Janis Smith, 202-906-6677, both of the Office of Thrift Supervision.

NEW YORK (APRIL 20) PR NEWSWIRE - Concept, Inc. (NASDAQ: CCPT) and Bristol-Myers Squibb Company (NYSE: BMY) today announced a definitive merger agreement providing for the acquisition of Concept by Bristol-Myers Squibb.

Under the terms of the agreement, each outstanding share of Concept will be exchanged for 0.3607 shares of Bristol-Myers Squibb common stock. The terms provide that the maximum effective price per Concept share will be no more than $22. The transaction, which is intended to qualify as a tax-free pooling of interests, is valued at approximately $205 million.

Concept has 9,637,886 shares outstanding, plus an additional 897,193 shares issuable upon the exercise of outstanding options. Concept also has granted Bristol-Myers Squibb options to acquire 2,409,000 shares at a price of $19.25 per share. The agreement is subject to approval by Concept shareholders at a special meeting to be held within three months.

James T. Treace, president and chief executive officer of Concept, said, "The association with Bristol-Myers Squibb is in the best interests of Concept and all of its shareholders. It will provide Concept with greater resources to facilitate its future growth plans in both domestic and international markets. In addition, it will be particularly helpful in our research and development focus in the area of least invasive orthopaedic surgical procedures."

Richard L. Gelb, chairman and chief executive officer of Bristol- Myers Squibb, said that the agreement with Concept demonstrates the company's commitment to the arthroscopy segment of the orthopaedic products market.

Concept, based in Largo, Fla., is a leading developer, manufacturer and marketer of innovative products for the orthopaedic arthroscopy, microsurgery and electrosurgery markets.

Bristol-Myers Squibb is a diversified pharmaceutical company whose principal businesses are pharmaceuticals, medical devices, consumer products and nutritional products.

ARLINGTON, TX (APRIL 20) PR NEWSWIRE - Six Flags Corporation today announced agreement for an expanded relationship between its national theme park operations and Time Warner, Inc. (NYSE: TWX)

Since 1984, Six Flags parks have been licensed by Warner Bros. for the exclusive use, in theme parks, of Bugs Bunny and other Looney Tunes cartoon characters.

Six Flags is one of the nation's largest operators of theme parks with annual attendance of approximately 17 million guests and revenues of $400 million.

Under the agreement, Six Flags' owners -- consisting of an investor group of individuals associated with Wesray Capital Corporation and Six Flags management -- will sell Time Warner a 19.5 percent fully diluted equity position in Six Flags for $19.5 million.

Time Warner will also receive options to increase its investment up to 50 percent, fully diluted, for up to an additional $30.5 million. The transaction is subject to certain conditions, including governmental approvals.

Six Flags chairman, president and CEO, Larry Cochran said, "Closer ties with Time Warner present a broad array of fresh opportunities, and will lead to expanded use of the Warner cartoon characters."

In addition, Cochran said, the Time Inc. Magazine Company will represent Six Flags in the sale of corporate sponsorships, and Warner Bros. Worldwide Merchandising will support Six Flags in merchandising efforts in its parks.

Six Flags, headquartered in Arlington, owns or manages seven major theme parks located in New Jersey, Chicago, Los Angeles, St. Louis, Houston, Dallas/Fort Worth and Atlanta.

HOUSTON (APRIL 20) PR NEWSWIRE - Continental Airlines today announced that seniors at least age 65 can travel on off-peak days this spring for $139 each way -- or less -- anywhere in the mainland U.S.

The new seniors fares -- for travel on Tuesdays, Wednesdays and Saturdays through June 13 -- range from $79 each way to $139 each way and represent savings of up to 40 percent versus the previous lowest fares available.

Seniors can take along a traveling companion of any age at the same rates, and the fares apply to travel on Continental Express flights as well as Continental jets.

"Before the peak summer season hits, we have the capacity to offer significantly reduced fares for this defined group of customers," a Continental spokesman said. "Seniors may want to visit a quiet resort or spend time visiting far-off family members. These fares make that choice a lot easier."

The seniors fares must be purchased by May 3 and within 24 hours of making a reservation, but otherwise there is no "advance purchase" requirement. A round-trip purchase is required and tickets are nonrefundable.

The fares are part of Continental's ongoing program for seniors, which includes a 10 percent discount on regular fares and a Freedom Passport

offering a year of virtually unlimited travel for as little as $1,599.

TROY, MI (APRIL 20) PR NEWSWIRE - Little Caesars (R) Pizza will become one of the many values offered to shoppers at eight K mart stores within the next three months.

K mart and Little Caesars announced today they have signed an agreement to test the operation in eight stores; four Michigan and four Georgia K marts. The locations will be announced in early May.

"We are pleased to be joining Little Caesars in this test," said Thomas W. Watkins, K mart senior vice president, store operations. "Their reputation for providing value to the consumer fits K mart's strategy to provide quality products in a convenient setting."

Little Caesars was recently named as the No. 1 value among the top restaurant chains in the U.S. in a consumer survey conducted by Restaurants & Institutions magazine, a food-industry trade publication.

"We look forward to a very successful relationship with K mart Corporation " said Denise Ilitch Lites, senior executive vice president for Little Caesar Enterprises, Inc. "Little Caesars has a reputation as the value leader in the pizza industry because we offer quality products at great prices. K mart is 'America's Saving Place,' so this agreement is a natural for Little Caesars."

The Little Caesars operation will be located near the entrance and open the same hours as K mart's normal store hours.

From 9-10:30 a.m., special breakfast pizzas as well as muffins and Danish will be served. After 10:30 a.m., the menu will consist of pizza by the slice, Baby Pan!Pan! (TM), Caesar Sandwiches (R), salads, Crazy Crust (R),

Pizza! Pizza! (R) (medium only), ice cream, yogurt, soft drinks and slushes.

Little Caesars, the world's largest carry-out pizza chain, currently has more than 2,800 restaurants worldwide and expects to reach 3,300 by the end of 1990. Sales are projected to reach $1.5 billion by yearend.

K mart Corporation (NYSE: KM) serves America with more than 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,320 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse Clubs and The Sports Authority.

BETHPAGE, NY (APRIL 20) PR NEWSWIRE - Grumman Corporation announced today that it will close the Bohemia, N.Y., campus of the Grumman Data Systems Institute (GDSI) by the end of 1990. Approximately 150 students presently attend technical and business classes at the Bohemia school which has been in operation since 1983. Most courses will be completed by the time of the closing with the remainder being continued at GDSI's larger, main campus in Woodbury, N.Y.

According to GDSI President Charlene Russert, the decision to close the Bohemia location was based on the general decline in the number of high school graduates and subsequent statewide reduction in vocational and trade school enrollments. "By closing the Bohemia campus, we will be able to consolidate GDSI's operation at Woodbury where we have approximately 600 students presently enrolled," she said.

Grumman Data Systems Institute, a subsidiary of Grumman Corporation, was established in 1970 to provide a broad range of technical and business courses in computers, electronics, drafting and business related subjects. The school is fully licensed and registered by the State of New York

Department of Education and federally accredited by the Association of Independent Colleges and Schools. GDSI has graduated more than 14,000 students over the past 20 years.

NAPLES, FL (APRIL 20) PR NEWSWIRE - BancFlorida Financial Corporation (NYSE: BFL) (the "company") whose primary subsidiary is BancFlorida, a Federal Savings Bank (the "bank"), today reported a net loss of $6,937,000 or a loss per common share of $2.14 for the second quarter ended March 31, 1990. This compares to net income of $281,000 or a loss per common share of $.01 for the same period a year ago. For the six months ended March 31 1990 the company had a net loss of $5,622,000 or a loss per common share of $1.86 compared to net income of $2,052,000 or earnings per common share of $.51 for the same period last year.

The company also announced that it has recently entered into a contract for the sale of its citrus groves for $17.5 million in cash. The contract which is subject to various conditions, including the buyer obtaining outside financing, calls for a closing on June 28, 1990. If consummated, the sale will result in a pre-tax gain of approximately $3.5 million and will generate approximately $6 million in net cash proceeds which will be used to increase the bank's regulatory capital.

Second quarter and year-to-date fiscal 1990 results were adversely impacted by increased provisions for loan losses which totaled $8.6 million for the quarter ended March 31, 1990, compared to $900,000 for the quarter ended March 31, 1989. Year-to-date fiscal 1990 provisions for loan losses totaled $10 million compared to $1.8 million for the six months ended March 31, 1989.

General reserves were increased to $14.4 million at March 31, 1990 which compares to $6.3 million at Sept. 30, 1989. The allowance for loan losses totaled $17.6 million at March 31, 1990 compared to $9.2 million at Sept. 30, 1989. General and specific reserves on the non-residential loan portfolio totaled $16.7 million at March 31, 1990. This compares to $9.0 million at Sept. 30, 1989 and $4.9 million at Sept. 30, 1988. Such general reserves provide protection for the company's capital position.

At March 31, 1990 non-performing assets totaled $103.8 million compared to $85.1 million at Sept. 30, 1989. The increase is primarily due to a $16.9 million loan to a land development company which was originally made in June 1986 for $19.9 million. The borrower and its parent company which is the guarantor on the loan, have experienced financial difficulties and the loan has been placed on non-accrual. Preliminary valuations of the

collateral securing the loan indicate a value in excess of the current principal amount.

Classified assets, which include non-performing loans, real estate owned and certain performing loans having identified credit weaknesses, increased to $151.5 million at March 31, 1990 compared to $115.8 million at Sept. 30, 1989. A portion of the increase is due to a $11.7 million loan secured by land in Broward County, Fla. The loan was classified substandard as a result of financial difficulties experienced by the guarantor.

Stockholders' equity at March 31, 1990 totaled $66.0 million. The bank's risk-based capital of $78.7 million or 5.6 percent of risk-weighted assets was $11.8 million less than the required amount. This has improved substantially from risk-based capital of 5.2 percent or a shortfall of $17.9 million at Dec.31, 1989. Tangible and core capital of the bank totaled $61.1 million and exceeded the minimum regulatory requirement by $35.4 million and $9.7 million, respectively. The bank's capital plan is currently being review by the Office of Thrift Supervision and demonstrates the bank's ability to meet the risk-based capital requirement in 1991. A major component of the capital plan is the sale of the company's citrus groves which, upon closing, is expected to significantly contribute toward meeting the risk-based capital requirement.

BancFlorida Financial Corporation has total assets of approximately $1.7 billion and a book value per common share of $14.91 at March 31, 1990. The company has 3,414,021 shares of common stock outstanding and 1,138,000 shares of cumulative convertible preferred stock outstanding.

#90110p5570 04/20/1990 ~PR Newswire

SOUTH BURLINGTON, VT (APRIL 20) PR NEWSWIRE - Green Mountain Power Corporation (NYSE: GMP) today filed a request with the Vermont Public Service Board to increase electric rates in 1991 by 15.69 percent to offset rising costs.

The increase is needed cover more than $17 million in higher costs associated with generating and buying electricity, upgrading equipment and maintaining electric generating plants, planning and implementing conservation programs and enhancing customer services.

GMP's rates now are lower than they were in 1985. Like many other electric utilities, however, GMP has entered a period in which overall costs are projected to climb through the 1990s.

Currently, GMP's rates are the lowest of the 21 major investor-owned utilities in New England. If the full increase is granted, GMP's rates will continue to be among the lowest of the investor-owned utilities in New England.

"About two-thirds of the rate increase request is due to increases in power supply costs," said Edwin Norse, vice president and chief financial officer. "Several generating sources for GMP have had significant increases in maintenance and plant improvement costs. These costs, coupled with support payments for new transmission facilities and costs of sources to replace expiring power contracts, have contributed to the need for a rate increase."

GMP estimates that about one-fifth of the rate increase is necessary to cover costs associated with new conservation and energy management programs. A portion of this increase is needed to pay for research and development of future conservation programs that will be developed as a result of the collaborative planning process, a joint planning process with public interest and environmental groups and with the Department of Public Service. Other contributing factors are costs associated with implementing the company's existing conservation programs.

Conservation programs are an important and necessary tool in GMP's long-range energy resource strategy. The VPSB recently issued an order setting new state policy for energy conservation measures.

GMP has been able to keep its rates low by increasing sales of surplus electricity to utilities in southern New England, where the market for power has been tight. Although the resale power market is changing in anticipation of Seabrook coming on line, GMP is continuing its efforts to resell power and will reduce its rate increase request if additional resales are negotiated later this year.

#90110p5574 04/20/1990 ~PR Newswire

NEW YORK (APRIL 20) PR NEWSWIRE - CrossLand Savings, FSB (NYSE: CRL) today announced that it has filed with the Office of Thrift Supervision (OTS) preliminary proxy materials that contain a proposal to reclassify the bank's two issues of preferred stock into common stock. If adopted, the reclassification would increase the bank's regulatory capital to an amount that would have exceeded, at March 31, 1990, all the initial OTS capital requirements under transitional rules pursuant to the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA).

Under the plan, shares of CrossLand's $1.8125 cumulative convertible preferred stock, Series A (the Preferred A) and $12.75 cumulative preferred stock, Series B (the Preferred B) would be reclassified into shares of common stock. The reclassification ratios have not yet been determined. The plan is subject to the approval of the appropriate regulatory authorities and CrossLand's common and preferred stockholders.

The primary purpose of the Reclassification Plan is to qualify the $363 million of CrossLand's stockholder's equity attributable to its preferred stock for inclusion in "core capital" and "tangible capital" under the OTS

capital regulations pursuant to FIRREA. The Reclassification Plan will not aid CrossLand in meeting the FDIC leverage capital ratios.

Based in New York City, CrossLand Savings, with assets of $13.2 billion, is the largest savings institution in New York and among the largest in the United States. It serves over one million customers through 115 retail banking offices in eight states.

HARTFORD, CT (APRIL 20) PR NEWSWIRE - Loctite Corporation (NYSE: LOC) reported a 10 percent increase in net earnings per share for the third quarter ended March 31, 1990. Earnings per share were $.87 for the quarter compared to $.79 last year. Sales increased 15 percent to $133,947,000.

For the nine month period ended March 31, net earnings per share increased 13 percent from $2.14 per share to $2.42 per share and sales grew to $370.5 million, up 10 percent from the same period last year.

Commenting on the results for the third quarter, Ken Butterworth, chairman and CEO, stated:

"Sales in our base business grew in double digits, reflecting the strength in our geographical and market diversity. Significant growth occurred in Europe and Latin America. Our U.S. automotive and consumer Group had strong growth while the U.S. industrial group's sales were flat. Favorable exchange rates also had a modest impact on sales. Our recent acquisitions made positive contributions to sales and a moderate contribution to earnings.

"In response to the soft U.S. economic environment, our U.S. operations continued their control of operating expenses enabling them to contribute well to the corporation's growth in profits.

"The corporation's strong operating profit growth of 17 percent was significantly reduced by interest expense and translation losses in Brazil and positively affected by tax benefits generated in that operation. Hyper-inflation existed in Brazil during most of the quarter."

Loctite Corporation, a worldwide, market-driven specialty chemical company ranks among the leading suppliers of proprietary high- performance adhesives, sealants, coatings, specialized brand-name chemicals, and electroluminescent lamps and lighting systems. Principal markets include industrial, electronics, specialized medical, professional automotive and consumer.

(A) -- Statistics of the Pasadena Star-News, sold on June 1, 1989, are excluded for comparability from these schedules. Full-Run ROP linage for the Star-News for March 1989 was 59.1 for the month and 165.0 for the year-to-date.

(B) -- Full run ROP linage of the joint operating agency between the Seattle Times and the Seattle Post Intelligencer was 250 for the month (down 1.2 percent from the prior year) and 683 for the year-to-date (up 3.4 percent from the prior year). Knight-Ridder owns 49.5 percent of the voting stock and 65 percent of the non-voting common stock of the Seattle Times. None of the linage is included in the Advertising Linage section.

(C) -- On Nov. 27, 1989, the Detroit News and the Detroit Free Press began operations under a Joint Operating Agreement as the Detroit News Agency (DNA). Revenue and linage for 1990 include 50 percent of DNA. Revenue and linage for 1989 include Detroit Free Press only. Circulation statistics for Detroit are excluded from both years.

(D) -- Measured by individual Knight-Ridder newspapers. Where necessary, certain previously reported linage has been restated to be consistent with measurement guidelines currently in use.

ROSEMONT, IL (APRIL 20) PR NEWSWIRE - Kenneth N. Pontikes, president and chairman of Comdisco, Inc. (NYSE, Midwest: CDO), announced today that the company is reactivating its previously announced $25 million stock repurchase program, of which approximately $12 million of the company's shares have already been repurchased.

Any such purchases would depend on the market and other conditions, and would be made in the open market at such prices as the company may from time to time approve.

Pontikes stated, "Based on the over-reaction by the market to our second fiscal quarter earnings shortfall and with our historically high rates of growth at superior rates of return, we regard the repurchase of stock at this time as an investment opportunity for the company. Officers, directors and employees, who currently hold in excess of 30 percent of the company's stock, have also indicated an intention to purchase shares on the open market."

Comdisco is engaged primarily in buying, selling and leasing new and used IBM equipment, communication and other high technology equipment. It also arranges related financings. The company, through a wholly owned subsidiary, provides disaster recovery services for computer users.

OKLAHOMA CITY (APRIL 20) PR NEWSWIRE - Kerr-McGee Corp. (NYSE: KMG) has offered to donate two offshore-Georgia islands to the Nature Conservancy, a national conservation group, for sale to the State of Georgia.

The proceeds of the sale will be used to help preserve a 52,000-acre tract of tallgrass prairie in Oklahoma.

Ownership of the islands by Georgia would help ensure preservation of the biologically productive salt-marsh ecosystem which dominates the islands, and which would be threatened by private development. Environmentalists concerned about protecting the wilderness strongly support the proposed agreement.

"This is an opportunity for Kerr-McGee to make a significant contribution to environmental preservation in two states," said Frank A. McPherson, chairman and chief executive officer of the company.

In the 1960's, Kerr-McGee purchased Little Tybee and Cabbage Island, located off the coast of Savannah, to mine phosphate. However, the land was never mined.

The money raised from the sale of the islands will go toward purchase of the tallgrass prairie in Osage County, Okla., seven miles south of the Oklahoma-Kansas border. The tract contains 25,000 acres of virgin prairie. The remaining acres will be replanted with Indian grass, Bluegrass and other native grasses.

DALLAS (APRIL 20) PR NEWSWIRE - Sterling Software Inc. (NYSE: SSW) announced that it was informed by NASA headquarters yesterday that NASA was not pursuing the Motion for Reconsideration of the March 20 decision by the General Services Administration Board of Contract Appeals awarding a $200 million software support contract to Sterling. Sterling said that it received calls from Admiral Stuart J. Evans, NASA's Assistant Administrator for Procurement, and Gary L. Tesch, NASA's Deputy General Counsel, assuring Sterling that NASA was not going forward with CSC on the appeal. Both Admiral Evans and Tesch further confirmed that NASA/Ames Research Center is actively conducting final negotiations on the contract with Sterling's Federal Systems Group.

NASA filed a letter today with the GSBCA "in order to dispel any question that may have arisen as a result of our letter of March 30, 1990, concerning NASA's intended further action before the Board in regard to (CSC's) pending Motion for Reconsideration." The letter stated that "NASA does not intend to make any further submission to the Board in regard to this protest or the pending Motion for Reconsideration."

Sterling Software, headquartered in Dallas, specializes in systems and applications software products, and in professional services for U.S. federal government.

DALLAS (APRIL 20) PR NEWSWIRE - BancTEXAS Group Inc. (NYSE: BTX) reported a net loss of $2.2 million, or 13 cents per share, for the first quarter of 1990. This compares with a net loss of $7 million, or 41 cents per share for the first quarter of 1989. The 1989 results include a loss of

$5.6 million relating to BancTEXAS Dallas N.A., which was then a subsidiary of BTX. On Jan. 26, 1990, BancTEXAS Dallas was declared insolvent by the Office of the Comptroller of the Currency and the Federal Deposit Insurance Corp. was appointed receiver for that bank.

At March 31, 1990, nonperforming assets were $16 million, or 7 percent of loans and foreclosed property, the same as Dec. 31, 1989. The allowance of loan losses at March 31, 1990, was $5.4 million, or 3 percent of loans. This allowance compares to $6 million, or 3 percent, at Dec. 31, 1989.

BTX's consolidated primary capital ratio was a negative 4.01 percent at March 31, 1990, compared to a negative 2.27 percent at Dec. 31, 1989. At March 31, 1990, the primary capital ratios of the subsidiary banks were 5.71 percent for BancTEXAS Houston and 5.15 percent for BancTEXAS McKinney. The equity capital ratios of these banks at March 31, 1990, were 4.13 percent for BancTEXAS Houston and 3.15 percent for BancTEXAS McKinney.

CHICAGO (APRIL 20) PR NEWSWIRE - United States Cellular Corporation (AMEX: USM) today announced that it has filed a shelf registration statement covering securities to be used in connection with future acquisitions. The shelf registration statement covers 1,750,175 common shares and 200,000 shares of preferred stock. These securities will not be sold for cash in a public offering but may be used by USM from time to time to acquire cellular interests. This filing updates information contained in registration statements which USM files each year.

The securities are being registered as a part of USM's continuing acquisition program. Since 1988, USM has issued, pursuant to prior registration statements, common shares in exchange for the stock or assets of other cellular businesses.

Headquartered in Chicago, USM manages and invests in cellular systems throughout the country. As of Dec. 31, 1989, USM owned or had the right to acquire interests in 75 Metropolitan Statistical Areas (MSAs) and 33 Rural Service Areas (RSAs) totaling approximately 8.8 million population equivalents. Systems serving all of USM's MSA markets and one RSA market were in operation at Dec. 31, 1989.

#90110p5609 04/20/1990 ~PR Newswire

PITTSBURGH (APRIL 20) PR NEWSWIRE - The Steel Can Recycling Institute today announced that the overall steel recycling rate every year since 1940 has been in excess of 50 percent.

From 1940, when the recycling rate was 57 percent, to 1988, when the rate was 66 percent, the steel industry has consistently recycled over half of the products it produces.

These products have included a broad range of items, from construction materials and car parts to home appliances, tools and toys. And since at least 1988, the industry also has made great strides in recycling its steel food and beverage cans.

According to Milton Deaner, president of the American Iron and Steel Institute, "The steel industry is very proud of its recycling history. By recycling our products for so long, we have helped diminish landfill space and save energy and natural resources. These environmental issues have always been important, but today, our nation understands that recycling is one of the most vital solid waste solutions."

Additionally, over the last 10 years, due to increasing production efficiency, steel industry use of self-generated scrap has declined from 60.5 percent to 28 percent of the total scrap feed used in the mills. The implication is that roughly three-quarters of the industry scrap usage is from external sources, pulling an increasing number of used steel products -- such as post-consumer food and beverage cans -- out of the solid waste stream.

The steel industry has long been partnered with the scrap recycling and detinning industries, both of which help to provide the network through which steel products are processed and returned to steel mills to become new products. With the more recent implementation of steel can recycling in communities across the country, this network has grown to ensure that post-consumer steel cans are now a percentage of the steel recycling figures.

"Steel cans have become an increasingly important element in the overall steel recycling picture," said Kurt Smalberg, president of the Steel Can Recyling Institute. "The steel industry has focused its attention on recycling this widely used package to ensure that it is diverted from the post-consumer waste stream and returned to the mills. The industry's capacity to recycle provides a broad market for these cans, and we're seeing astonishing growth in steel can recycling. In fact, we've recently announced our 1989 recycling rate for the steel beverage can at 21.6 percent."

Starting in 1940, the average percentages of steel recycling per decade have steadily increased, starting at 54.1 percent and growing by about 2-3 percent per decade, with the most dramatic increase from the 1970s to the 1980s.

The Steel Can Recycling Institute is an industry association with the mission of promoting and sustaining steel can recycling. It is the primary information technical resource for legislators, municipalities, recyclers, businesses and other entities interested in steel recycling or in developing steel can recycling programs.

#90110p5616 04/20/1990 ~PR Newswire

CLARENDON HILLS, IL (APRIL 20) PR NEWSWIRE - MAF Bancorp Inc. (NASDAQ: MAFB), the parent holding company of Mid America Federal Savings Bank, today announced earnings for the quarter and nine months ended March 31, 1990. For the 1990 third quarter, net income was $932,000, or $.28 per share compared to $3.6 million for the prior year quarter. Earnings for the nine month period declined to $3.1 million, or $.90 per share from $6.9 million for the same period a year ago. The bank completed its conversion from a mutual to a stock savings bank on Jan. 19,

1990 and therefore, earnings per share for the prior year periods are not applicable.
